RACINE, Wis.(JAN. 25) BUSINESS WIRE - Versa Technologies Inc. Thursday reported net earnings for the nine months ended Dec. 31, 1989, at $4,403,000, or 75 cents per share, down 6 percent from $4,685,000, or 80 cents per share.

Net sales were $39,695,000, up 13 percent from $35,220,000 a year ago.

For the quarter ended Dec. 31, 1989, net earnings at $1,217,000, or 21 cents per share, were down 19 percent from $1,503,000, or 26 cents per share, for the same quarter last fiscal year.

Net sales were $12,586,000 compared with $11,442,000 a year ago.

In commenting on the results, James E. Mohrhauser, chief executive officer indicated the lower earnings for the quarter and nine months were primarily attributable to the company's custom components division.

The division has experienced an erosion of operating margins for their silicone rubber business reflecting for the most part increased competitive pressure.

Also, the year-to-date performance of their two recent acquisitions in the plastics industry has been the addition of $2,585,000 to net sales coupled with a negative impact on pre-tax earnings of approximately $169,000.

The division's Rio Rico, Arizona plant has been shut down and listed for sale, and significant personnel cutbacks have been made to trim fixed costs in the silicone rubber segment. The results of these actions, due to associated extraordinary expenses, will not benefit the current fiscal year, but are expected to have a positive impact on the next fiscal year.

The medical division's sales are relatively level with the comparable periods last year, as is their operating income on these sales. However, costs incurred related to their new dairy industry product line, the Marathon Milker, which is still in the developmental stage, has adversely affected year-to-date operating income by approximately $200,000.

The positive element is Versa1/4Tek's performance has been the fluid power division where both sales and earnings are up for both their power gear product line and their line of fluid power components.

''Our current overall outlook,'' Mohrhauser indicated, ''is for the balance of the fiscal year to be relatively equal with the final quarter last year' that is, full fiscal year earnings per share are anticipated to be approximately $1. And although next fiscal year's forecasts have not been finalized, all three divisions' preliminary indications are for improved performance.''

The company's regular quarterly dividend of 5 cents per share has been declared payable Feb. 12 to stockholders of record Jan. 31, 1990.

PORTLAND, ME (JAN. 25) BUSINESS WIRE - The One Bancorp (NASDAQ:TONE), a $2.4-billion-asset Maine bank holding company, said it completed an important step in its capital recovery plan Thursday by repurchasing all $40 million principal amount of its 10.70 percent subordinated capital notes due 1998.

In exchange for the notes, The One Bancorp paid $8 million in cash and agreed to issue, by no later than July 31, 1990, shares of a series of convertible noncumulative perpetual preferred stock.

The preferred stock is to have an aggregate liquidation preference of $2.8 million and an aggregate stated value equal to the market value of 4.9 percent of The One Bancorp's common stock immediately prior to the date of issuance. Shares of the preferred stock are, in the aggregate, to be convertible into 4.9 percent of The One Bancorp's common stock on a fully diluted basis.

The One also granted, in exchange for the notes, participation interests in two loans onwed by The One, with a maximum total payment of $1.6 million. The two loans have an aggregate principal value of approximately $9.2 million.

The repurchase will result in a pretax gain by The One Bancorp of $29 million, to be reflected in first-quarter results for 1990. It will also reduce The One Bancorp's annual debt service costs by $4.3 million.

The One Bancorp and its $1.6-billion-asset Maine Savings Bank subsidiary have experienced substantial reductions of capital as the result of loan losses and writedowns related to the soft New England real estate market.

Repurchase of the notes was the second of nine steps in a comprehensive capital plan designed by The One Bancorp to deal with its ongoing loan losses and restore the primary capital ratio of Maine Savings Bank to 8 percent by June 30, 1991.

The first step, transfer of $20 million from The One Bancorp to Maine Savings Bank, occurred on Jan. 11 following agreement with regulators on The One's capital plan.

Remaining steps call for, among other things, conversion of nonperforming

assets into earning assets, sale of four subsidiaries, sale of nine of Maine Savings' 30 banking offices, and restructuring of a second debt issue -- the company's $36.8 million principal amount of 7-1/2 percent convertible subordinated debentures due 2011.

Vincent E. Furey Jr., president and CEO, in commenting on the early progress today, cautioned that the company continues to be dependent upon factors, such as market forces, beyond its control. ''I repeat,'' he said ''that absent reasonably expeditious acquisition and sale of troubled real estate collateral, the preservation of any value in the company's securities is doubtful.''

The company's loan recovery and asset disposition groups are positioned to sell a significant volume of real estate over the next six months if there are buyers in the market, Furey said.

''None of the actions we are pursuing will impede the abilities of our subsidiaries to serve their customers,'' he added. ''Deposits at all of our banks will continue to be insured by the FDIC to the full extent of the law.''

Maine Savings Bank's nine for-sale banking offices are located outside its core market centered on Greater Portland. For-sale subsidiaries are $435-million-asset The Bank of Hartford, with eight offices in Connecticut; $345-million-asset Southstate Bank for Savings, with seven Massachusetts offices south of Boston; and two investment companies with four offices in Maine: Winslow Investment Co. and Winslow Asset Management.

The One Bancorp is a Maine-based Federal Reserve bank holding company formed by 130-year-old Maine Savings Bank in connection with the bank's conversion to stock form in June of 1984. Through subsidiaries in Maine, Massachusetts and Connecticut, The One operates 44 banking offices and four full-service discount brokerage and asset management offices.

#90025b0768 01/25/1990 ~Business Wire

NEW YORK (JAN. 25) BUSINESS WIRE - Net income of Quantum Chemical Corp. for the year 1989 was $247.4 million, or $9.85 per share, compared with $382.7 million, or $14.43 per share in 1988.

The 1989 net income includes $133.3 million, or $5.31 per share, vs. $22.6 million, or 85 cents per share in 1988 related to discontinued operations.

The average number of shares outstanding for 1989 was 25.1 million vs. 26.5 million 1988.

The 1989 sales from continuing operations were $2,671 million vs. $2,921.9 million in 1988.

Net income for the 1989 fourth quarter was $18.1 million, or 72 cents per share, compared with $97.3 million, or $4.10 per share in the 1988 quarter.

The 1988 quarter net income includes $5.9 million, or 25 cents per share, related to discontinued operations. The 1989 quarterly results were adversely affected by an estimated $10 million, or 40 cents per share for costs in excess of estimated insurance recoveries attributable to the fire-related shutdown of the Morris, Ill. petrochemical plant.

The plant is expected to resume full production in early March, 1990.

Sales from continuing operations for the 1989 quarter were $626.7 million, vs. $806.7 million during the same period in 1988.

Per share amounts for all periods have been adjusted for the 1 percent stock dividend declared on Oct. 26, 1989.

John Hoyt Stookey, chairman of Quantum, commented that the company was conserative in estimating insurance recoveries. He further noted that while selling prices for polyethylene, the company's most significant product, began to firm late in the year, first quarter petrochemical results would continue to be impacted by the loss of production at the Morris plant.

With regard to Suburban Propane, Quantum's propane marketing division, Stookey stated, ''The propane business, although benefiting from unusually cold weather in December, experienced some distribution difficulties.''

As previously announced, Quantum's board of directors has omitted its regular cash dividend. A 1 percent stock dividend was paid Dec. 1, 1989 and the board intends to declare a semi-annual stock dividend of 2 percent at its April 26, 1990 meeting, payable June 1.

Thereafter, based upon earnings reserves and business prospects, the company may continue a stock dividend or resume the payment of a cash dividend, as the board may deem appropriate.

Quantum Chemical Corp. has operations in petrochemicals and propane marketing.

#90025b0779 01/25/1990 ~Business Wire

STAMFORD, Conn.(JAN. 25) BUSINESS WIRE - Olin Corp. Thursday reported record fourth quarter primary earnings of $1.50 per share, up 49 percent from $1.01 per share in the fourth quarter of 1988.

Net income rose to $31 million from $21 million a year ago. Excluding businesses sold, sales of $600 million were modestly above the 1988 fourth quarter.

John W. Johnstone, chairman and chief executive officer, said, ''Olin had a very good year in 1989, achieving our $6 per share earnings objective, while exceeding our return on equity target, as ROE rose to 18 percent. As we enter 1990, even though business conditions are weaker than last year and are likely to remain so through the first half of 1990, we still expect a positive GNP for the full year as the economy strengthens in the second half.

In this environment, Olin has the potential to earn $6.00 to $6.40 per share and to maintain a return on equity around 18 percent, providing a strong base to move toward our goal of 20 percent return on equity in the early 1990's.''

For the full year 1989, primary earnings reached a new high of $6.02 a share, up 30 percent from $4.63 in 1988. Sales for the year rose 9 percent to $2.5 billion. Excluding businesses sold, sales increased 14 percent for the year.

Fourth-quarter results included an after-tax gain of $13 million from the sale of Olin Water Services, which was offset by a $12 million charge for costs to exit several product lines.

Chemicals fourth quarter net income of $35 million included the $13 million after-tax gain on the Olin Water Services disposition. Net income in the prior year's fourth quarter was $9 million after a $10 million loss on the sale of a business.

Fourth quarter performance for pool, specialty and Olin Hunt electronic chemicals was ahead of the prior year, offset by lower margins for urethanes and electrochemicals.

Although metals reported a loss of $10 million, this included a $12 million after-tax charge for exiting ceramic packaging and certain specialty clad metals for electronics applications, which had not developed in line with our milestones.

Excluding this charge, net income was $2 million below 1988's fourth quarter, primarily as a result of lower than prior year performance at the Indianapolis brass facility (formerly Bridgeport Brass).

Defense net income rose to $14 million, 40 percent ahead of the fourth quarter of 1988. Strong performance in large caliber ammunition resulting from the acquisition of General Defense Corp. and improved margins in Winchester sporting ammunition contributed to the significant increase over the prior year.

During the quarter the company purchased approximately 428,000 shares ($26 million) of its common stock, substantially completing a previously announced program to repurchase $100 million of common stock. During the full year 1989, approximately 1.6 million shares were repurchased, and at year end there were 19 million shares of Olin common stock outstanding.

Divestitures during the fourth quarter produced $30 million in after-tax cash proceeds. Planned divestitures which were delayed are expected to produce an additional $50 million in 1990 to complete a previously announced program. The ratio of total debt to total capitalization was 49.7 percent at the end of the year. If all the planned divestitures had been completed at that time, the ratio would have been 46.8 percent.

#90025b0786 01/25/1990 ~Business Wire

BAYSIDE, N.Y. (JAN. 25) BUSINESS WIRE - The Home Savings Bank (NASDAQ:HMSB) Thursday reported net income of $19.1 million, or $1.58 per share, for the year ended December 31, 1989, compared with $24.1 million, or $2.00 per share, for 1988.

For the fourth quarter of 1989, the Bank earned $1.7 million, or $0.14 per share, compared with $6.5 million, or $0.54 per share, in the same period

of 1988. The fourth quarter and year-end results reflect an addition of $3.0 million to the Bank's provision for loan losses, compared with prior year periods, in order to strengthen the level of the Bank's allowance for loan losses.

''The increase in the provision for loan losses reflects the general condition of the real estate market in the Bank's lending area and the level of the Bank's non-performing loans,'' said Richard A. Kraemer, Chairman, President and Chief Executive Officer.

The provision for loan losses was $3.9 million for the full year and $3.2 million in the fourth quarter of 1989. The comparable provisions for the 1988 periods were $900,000 and $225,000, respectively. The Bank's allowance for loan losses at December 31, 1989 was $5.4 million. Non-accrual loans and other real estate owned totaled $58.3 million and $2.2 million, respectively, at December 31, 1989 compared with $15.3 million and $390,000, respectively, at December 31, 1988.

''The income stream produced by Home's core earnings and low level of operating expenses allowed the Bank to strengthen its reserve position and remain profitable,'' said Mr. Kraemer. He noted that the 1989 results represented a return on average assets of 1.18% and a return on average equity of 7.79%, compared with 1.49% and 10.21%, respectively, in 1988.

Net interest income before provision for loan losses was $50.7 million in 1989, compared with $56.8 million in 1988. For the fourth quarter of 1989 net interest income was $11.0 million, compared with $14.0 million in the same 1988 period. Net interest income declined during 1989 due to higher interest rates paid on deposits and increased levels of non-performing assets. Other operating income was $3.8 million in 1989 and $4.6 million in 1988. The decline primarily resulted from a $2.1 million decrease in equity in income from joint ventures, partly offset by a $612,000 increase in gains on sales of securities and mortgage loans and a $386,000 gain on the sale of other real estate owned. Other operating income totaled $1.1 million for the fourth quarter of 1989 and $1.7 million for the fourth quarter of 1988.

The Home Savings Bank, with 13 full-service banking offices in the New York metropolitan area, offers savings accounts, mortgage lending and other traditional banking services.

PHILADELPHIA (JAN. 25) BUSINESS WIRE - Diversified Investment Group Inc. (NASDAQ: DING) and Star States Corp. (NASDAQ: STSS) announced Thursday that approval has been received from the Office of Thrift Supervision (OTS) for Wilmington Savings Fund Society, Star States principal subsidiary, to acquire Diversified Investment Group Inc.

Diversified Investment Group is the parent company for Fidelity Federal Savings and Loan Association in northeast Philadelphia. Armondo L. Felicetti, chief executive officer and president of Diversified Investment Group and J. Walton St. Clair Jr., chairman and chief executive officer of Star States, stated "with the approval yesterday by Diversified's shareholders, the OTS approval clears the last major roadblock standing in the way of consummating the merger."

Under the terms of the agreement, each share of Diversified common stock will be exchanged for $13.75 cash. It is anticipated that the acquisition will be completed on Feb. 2, 1990.

It was also announced that the suits against Star States and Diversified relating to the acquisition have been settled, contingent on the consummation of the acquisition as amended. St. Clair noted that Star States is looking forward to completing its partnership with Diversified and that the acquisition is part of the company's strategic goal to expand its banking presence beyond the state of Delaware.

Felicetti stated, "With the completion of the acquisition, Fidelity Federal will be able to offer bes customers a greater variety of products and services and the benefits of being part of a larger organization." He also stated that he believed that employees as well as the community will benefit.

NEW YORK (JAN. 25) BUSINESS WIRE - KB Communications Inc., formerly known as North American Karate Conference Inc. (the ''Company''), Thursday announced a six-for-one reverse stock split effective for stockholders of record on Jan. 31, 1990.

All fractional shares as a result of this reverse split will be rounded up.

As a result of the reverse stock split, and in order to minimize confusion among the company's Class A and Class B Warrantholders caused by the

company's seven-for-one stock dividend which was declared in July 1988, each Class A Warrant will now be convertible into one and one third share of the company's common stock at an exercise price of $5.00 per Class A Warrant.

Each Class B Warrant will now be convertible into one and one third share of the company's common stock at an exercise price of $6.00 per Class B Warrant. No fractional shares will be issued upon the exercise of either the Class A or Class B Warrants.

On Dec. 14, 1989, the company extended the expiration date of the Class A Warrants to June 30, 1990. The company's Class B Warrants will expire on Sept. 31, 1991.

#90025b0799 01/25/1990 ~Business Wire

TEANECK, N.J. (JAN. 25) BUSINESS WIRE - Norex America Inc. (AMEX:NXA) Thursday reported that, compared with a loss in the October/November/December 1988 second fiscal quarter of $355,036, or (8 cents) per share on revenues of $6,170,566, the company was reporting net income for its quarter ending December 1989 of $508,605, or 12 cents per share, on revenues of $6,960,510.

The above reported profit includes earnings from continuing operations of $158,527, or 4 cents per share, on the reported revenues which are all from continuing operations. Also during the current fiscal 1990 second quarter, the earnings from the company's previously discontinued cruise business were $350,078, or 8 cents per share, on revenues of $487,900 which was from charter income of a leased vessel.

The company's profit for the six months ended Dec. 31, 1989 was $1,225,794 or 28 cents per share, on revenues of $12,507,664. This is compared with a profit of $1,813,051 or 41 cents per share on revenues of $9,255,153 for the comparable six months of 1988.

This included earnings from the discontinued cruise business where in 1988 there was a profit for the prior year's period of $1,215,386, or 28 cents per share. In the current six months of the company's fiscal 1990 year, the discontinued operation had a profit of $732,012, or 17 cents per share on revenues of $975,500 which was primarily from charter income on the vessel SS Veracruz which is pending sale in May 1990.

Kristian Siem, chairman, noted that the continuing operations for both reported years contain the result of Norex America's 80 percent ownership

interest in Norgulf Shipping Limited, a Houston based chartering firm, which was acquired in July of 1989. Prior thereto in the previous year, Norgulf was 66.5 percent owned by Norex PLC, the company's principal shareholder, and its restated results have therefore been reflected on a 66.5 percent basis in the reported financial results for 1988.

The income from continuing operations in the current fiscal year was from the company's operating investments in ship chartering, a tanker, cruise ship casino management, and in vessel technical management, and from interest on the company's substantial cash position.

Siem said that these businesses were operating profitably. He also noted that there was a significant improvement in tanker chartering profits at Norgulf Shipping Limited due to strengthening of the international tanker market and the seasonal improvement of that activity which usually occurs in the fall.

Late in the quarter, the Norgulf fleet expanded from four to seven vessels through the charter in of two 40,000 deadweight ton product tankers and one 59,000 ton vessel.

The company also reported that Frank Capstick had been elected president of Norex America Inc., and will be headquartered in the company's executive office in Bermuda.

In addition, pursuant to its program of share repurchase from time to time the company has acquired 50,000 shares of its common stock from a former employee, its Vice Chairman Donald Caldera, who continues in a consulting relationship with the company.

Norex America Inc., is currently engaged in vessel ownership, tanker chartering, ship technical services and the management of cruise ship casino operations, and is pursuing investment and development in shipping and offshore marine activities.

#90025b0801 01/25/1990 ~Business Wire

BLUE BELL, Pa.(JAN. 25) BUSINESS WIRE - Unisys Corp. Thursday reported a return to profitability in the fourth quarter ended Dec. 31, 1989.

Revenue increased 2 percent over the year ago quarter as strong international business was partially offset by a continuing weak U.S. market.

Unisys reported net income of $34.0 million for the quarter, or $5 cents per common share on a fully diluted basis versus $218.0 million, or $1.05 per common share, fully diluted, a year ago. Revenue was $2.97 billion versus $2.91 billion a year ago.

Unisys Chairman and Chief Executive Officer, W. Michael Blumenthal, said, ''Difficult restructuring decisions announced in October began to positively impact financial performance in the quarter despite continued weakness in the U.S. computer and defense markets.

''In the quarter we returned to profitability and positive cash flow from operations. Inventory was reduced by $216 million, bringing the total reduction in 1989 to $723 million, exceeding our $500 million target.

''We are encouraged by the very early results from our fundamental cost structure initiatives. Our program is on schedule. Benefits are expected to accelerate gradually with the full impact to be realized in the latter part of this year.

''In 1990 we will also be sharply focused on debt reduction. Operationally we have set goals for aggressive asset management programs, a return to sound profitability and positive cash flow to help reduce debt. In addition, we are embarking on a special program designed to accelerate debt reduction through the sale of non-strategic and idle assets.

''As a result of this special program and operational goals, we are targeting to reduce debt, excluding Finance Company debt, by approximately $600 to $800 million by the end of the year.'' Orders

Unisys said that strong international commercial order growth was offset in the fourth quarter by decreases in defense business and U.S. commercial computer orders.

In addition to the impact of a continuing weak U.S.market, the company believes the restructuring actions implemented in the fourth quarter temporarily adversely affected the U.S. commercial computer business. International orders, on a local currency basis, continued to grow at a double- digit rate.

Commercial computer products experiencing the strongest gains in the quarter, versus one year earlier, included large-scale 2200 Series mainframes, communications and network products, microprocessor-based workstations, and software and related services. Twelve Months

For the year ended Dec. 31, 1989, Unisys reported a net loss of $639.3 million or $4.71 per common share. A year earlier, net income was $680.6 million or $3.27 per fully diluted common share.

The loss in 1989 was principally experienced in the third quarter. That loss was due in large part to restructuring charges for workforce reductions and consolidation of manufacturing capacity and facilities; costs accrued for the defense business to cover estimated losses on certain fixed price contracts and certain contingent litigation liabilities; high manufacturing costs associated with excess capacity, industry-wide competitive pricing pressures and the effects of inventory reduction actions.

Revenue for the year was $10.10 billion. Good growth in worldwide computer business revenue was partially offset by a decline in the defense business. A year ago, revenue was $9.94 billion. Outlook

''Goals for 1990,'' Blumenthal said, ''are based on conservative economic assumptions, particularly for the U.S. computer and defense markets. We expect modest revenue growth and will manage the business for profitability, positive cash flow and debt reduction.

''Strict cost containment measures will remain in place, but increased R&D investments will be made in our strategic, fast growth areas of open systems, imaging, multi-vendor networking and advanced 4GL/CASE software. And we will continue to integrate our traditional mainframes into a strategy of providing open cooperative network computing systems and solutions.

''We enter 1990 with our strongest product offering. It will be further enhanced during the year in every key area from open systems to mainframes. We are pleased by successes in our traditional mainframe business such as our very strong performance in the communications, airlines and travel markets.

''The recently announced large, multi-year UNIX system order from K mart stores is further proof that our commercial UNIX system strategy is succeeding. We expect the Desktop III award from the U.S. Air Force in November, worth an estimated $700 million if all options are exercised, to open the way for significantly increased personal workstation business in both commercial and government markets.

''And we are very encouraged by good initial results in the emerging imaging systems market. We believe our growth opportunity in this high potential area will be excellent in the 1990's.

''Overall, 1989 was a difficult and disappointing year. We believe we have made progress against problems unique to Unisys, such as the high inventory position entering 1989. And we moved decisively to adapt to the rapidly emerging new economic model for the industry in the 1990's. These actions will facilitate additional progress in the implementation of our strategic plans.'' -0- CONTACT: Unisys Corp., Blue Bell, Pa.

#90025b0802 01/25/1990 ~Business Wire
FREMONT, CA (JAN. 25) BUSINESS WIRE - American Airlines announced Thursday that it has selected GRiD Systems Corp., a wholly owned subsidiary of Tandy Corp., as exclusive vendor for its battery-powered, laptop computer purchases in 1990.

An initial multi-million dollar order was placed this month.

In June, 1989, American signed an agreement with Tandy, Fort Worth, Texas, for Intel 80386 and 80386SX-based PCs. These desktop computers are being used by American Airlines for airport ticket counter and gate functions.

''This new agreement demonstrates the strength of the GRiD/Tandy alliance '' according to John Roach, Tandy chairman and CEO. ''GRiD has a highly-configurable product line, an extensive service and support organization, and is backed by the manufacturing and financial strength of Tandy.

''So GRiD is uniquely positioned to meet the field systems needs of global competitors such as American Airlines.''

Roach added that the agreement combines two companies which are leaders in their respective fields. ''GRiD has always focused on major systems purchases while American Airlines has always focused on providing its personnel with innovative technology,'' Roach said.

Max D. Hopper, senior vice president, American Airlines Information Systems, said GRiD was selected as American's exclusive vendor after the company did extensive research and testing on available laptops.

''We wanted a laptop that was desktop-functional from a performance standpoint and ergonomically attractive as a laptop. But it was GRiD's entire product line that interested us,'' Hopper said. GRiD president Alan Lefkof said that GRiD's leadership position in the field systems market was a crucial factor in the agreement.

''Given American's stringent and demanding vendor standards, this is an important endorsement of our capabilities,'' Lefkof said.

Thomas J. Kiernan, president of American's SABRE Computer Services Division, said that ''the contract with GRiD was favorable from a business standpoint. We know that GRiD's laptop computers are rugged and upgradeable, thus ensuring that the units will have a long asset life.

''GRiD's proven reliability and performance were two key factors in our decision. We also appreciate GRiD's willingness to work directly with us in implementing these field systems.''

Laptops acquired in the initial purchase will be used by American's passenger sales group, a direct sales force. The laptops will enable American's sales representatives to serve accounts more efficiently. The sales agents also will use the laptops for word processing and account management.

After obtaining laptops from prospective vendors, American made its decision based on several factors. Those included product support and reliability, benchmark test results, future product development and establishing a long-term partnership relationship with a vendor.

American Airlines, also based in Fort Worth, is the country's leading domestic carrier. American employs more than 77,000 and posted sales of approximately $10.5 billion for 1989.

GRiD manufactures and markets a comprehensive range of battery-powered laptop computers, industry-standard desktop computers, software, peripherals and electronic mail/networking systems. GRiD provides customers with consulting, training, support and custom software development services through its 34 branch offices and a worldwide direct sales and support organization.

The company also demonstrates products at more than 50 GRiD Systems Centers and sells products through application specific VARs. GRiD is located at 47211 Lakeview Blvd., Fremont, CA 94538. (415) 656-4700.

GRiD is a wholly-owned subsidiary of Tandy Corp., a leading manufacturer and distributor of consumer electronics and computers. Tandy, a New York Stock Exchange company, has sales in excess of $4 billion annually.

DETROIT, MI (JAN. 25) BUSINESS WIRE - Unisys Corp. Thursday announced that W. Michael Blumenthal, chairman and chief executive officer, intends to retire as chief executive officer of the corporation effective in april.

At its regular meeting today, the board of directors elected Unisys President, James A. Unruh, 48, to succeed Blumenthal, 64. Unruh will continue as president and assume the additional duties of chief executive officer after Blumenthal's retirement. Blumenthal will continue as chairman of the board of directors.

Blumenthal said, ''After almost two decades of managing major industrial companies and ten years at Burroughs and Unisys, the time has come for my long-planned retirement. Unisys is a fine company with excellent prospects. Jim Unruh has a keen, strategic understanding of the changing dynamics affecting our industry.

''Jim has a strong team of experienced industry veterans behind him and under his leadership they are well prepared to succeed in the competitive market of the 1990's. We have come through a difficult year of restructuring, responding decisively to the major structural changes in the world computer market.

''We have substantially cut costs and lowered our break-even point, and now can anticipate the future with confidence. Jim can count on my full support in the years ahead.''

Unruh said, ''I am grateful for the trust placed in me and look forward eagerly to the challenges ahead. Mike provided us with dynamic leadership during the turbulent 80's. His foresight and decisive actions helped create a major new information systems company, one of the world's largest.

''With the tough decisions made in 1989 behind us, I am eager to continue to help move Unisys forward in what will be the equally challenging environment of the 90's. There are great opportunities for us and I look to the future with confidence.

''My top priority is to further strengthen Unisys financial position by improving profitability and cash flow. Strategically, Unisys will continue to expand and build on its open network computing systems, while integrating and networking these products with our excellent mainframe systems.

''Our goal is to provide customers with more choices, especially in the area of application and environmental software. Integrating our mainframe and open network computing systems into enterprise-wide cooperative networks will address our customers' needs in the 1990's.''

Unruh added, ''Speaking for the entire board of directors and management team, I want to thank Mike Blumenthal for his outstanding contributions. We are glad we will continue to have his advice and help in the years ahead. We wish him many years of health and happiness.''

#90025b0814 01/25/1990 ~Business Wire

PLAINFIELD, IN. (JAN. 25) BUSINESS WIRE - The board of directors for PSI Holdings Inc. (NYSE:PIN) Thursday named Kenneth M. Duberstein, former chief of staff to Pres. Ronald Reagan, as its newest member.

Duberstein is chairman and chief executive officer of The Duberstein Group a planning and consulting company on world political, economic and social developments. He held several posts with the Reagan administration, before being named chief of staff to the president in 1988.

''The addition of Ken Duberstein to our board complements the varied backgrounds of our other 14 directors,'' said James E. Rogers, chairman of PSI Holdings and its primary subsidiary, Public Service Indiana. ''Like

Stuart Eizenstat, who joined our board in October, Ken's experience in public policy-making will be an asset as we face new challenges and make decisions which will shape our corporate future.''

In other action, PSI Holdings declared a quarterly dividend of 20 cents per share of common stock and announced financial results for 1989. Regular preferred stock dividends for Public Service Indiana were also approved. All dividends are payable March 1 to shareholders of record as of Feb. 13.

PSI Holdings' earnings per share increased 48 cents, from $1.84 in 1988 to $2.32 in 1989. Earnings were charged 57 cents per share in 1988 and 4 cents per share in 1989 for reserves to cover the anticipated cost of the tentative settlement of a lawsuit by Wabash Valley Power Association. The suit related to the cancelled Marble Hill nuclear project.

The effects of a phased-in 13.2 percent rate reduction ordered by the Indiana Utility Regulatory Commission in 1988 were partially offset by higher kilowatt-hour sales and lower interest and preferred dividend costs. The accelerated flow-back of deferred income taxes which offset the after-tax effect of the rate reduction was completed in June 1989. The resulting increase in 1989 income tax expense offset a portion of the gains. The company's operating revenues were $1.059 billion in 1989, compared to $1.043 billion in 1988, and net income was $125 million, compared to $99 million the previous year.

BRISTOL, CT (JAN. 25) BUSINESS WIRE - Frank J. Pascale, Chairman and Chief Executive Officer of Eagle Financial Corp (Amex: EAG) announced Thursday the declaration of a $0.121/2 regular quarterly cash dividend payable on March 1, 1990 to shareholders of record as of February 15, 1990. The declaration is the sixth consecutive for the multiple savings and loan holding company.

On December 15, 1989, Eagle Financial Corp. announced the execution of a definitive merger agreement with Webster Financial Corporation (NASDAQ: WBST) of Waterbury, Connecticut. The proposed ''merger of equals,'' which is subject to regulatory approval and the approval of Eagle and Webster shareholders, would involve a tax free stock-for-stock exchange in which each outstanding share of Eagle would be converted into .95 share of the merged holding company and each outstanding share of Webster would remain

outstanding and represent one share of the merged holding company. Webster reported $701 million in assets at September 30, 1989 and is the holding company for the ten-office First Federal Savings and Loan Association of Waterbury. More detailed information about the proposed merger will be included in a joint proxy statement/ prospectus that is expected to be distributed to all shareholders of Eagle and Webster in February 1990.

Eagle, which had $469 million in assets at September 30, 1989, is the holding company for the four-office Bristol Federal Savings Bank of Bristol, Connecticut and the five-office First Federal Savings and Loan Association of Torrington, Connecticut.

OCONOMOWOC, WI. (JAN. 25) BUSINESS WIRE - Stokely USA Inc. (NASDAQ:STKY) reported record net earnings and sales for the third quarter ended Dec. 31 1989.

Net earnings increased 28 percent to $5,032,000 (61 cents per share) from $3,934,000 (48 cents per share) in the comparable year-ago period. Net sales for the quarter were $88,475,000, a gain of 49 percent over the prior year's $59,376,000.

''This is the sixth consecutive quarter Stokely has posted record net earnings,'' Chairman Joseph B. Weix stated. ''Quarterly net has now increased for the past 10 quarters on a year-to-year basis.

''The 49 percent sales gain reflects a continuation of the increased order flow we began to experience in September and additional volume from our recent acquisition of D & K Frozen Foods,'' Weix said. ''Sales generated by our newly converted freezing facility in Green Bay also contributed to the increase.

''Volume in the third quarter exceeded year-ago levels by 51.5 percent while average selling prices declined 2.5 percent. Orders remain strong and prices are firm as we begin the fourth quarter. Finished goods inventory levels are adequate, and the mix is well balanced. We are positioned to continue meeting our customers' requirements and expect another record quarter.''

#90025b0822 01/25/1990 ~Business Wire

NEW YORK (JAN. 25) BUSINESS WIRE - The Board of Directors of Cummins Engine Co., Inc., today rejected demands for board representation made by Industrial Equity (Pacific) Limited, a Hong Kong based Company, and approved the filing of a suit in the United States District Court in the Southern District of Indiana against Industrial Equity (Pacific) Limited and certain of its affiliates, including Brierley Investments Limited, a New Zealand corporation, and Bruce Hancox, Brierley's chairman.

In the suit Cummins states that the defendants have failed to make legally required disclosure that they actively have been seeking board representation for the past four months and have explicitly threatened to disrupt the Company if their demand for board representation was not met.

Cummins claims that the defendants have not disclosed their true intentions, which are to disrupt the Company in order to reap short-term profits for the defendants to the detriment of the Company and its shareholders, customers, employees, suppliers and the communities the Company serves. Cummins also claims that the defendants violated the Hart-Scott-Rodino Antitrust Improvements Act in acquiring their initial 9.9 percent stake (which currently is 14.9 percent) in that the initial stake was acquired without filing under the Act in an unlawful reliance on the ''solely for investment'' exemption.

Cummins claims that the defendants are pursuing against Cummins the same tactics they have used against other companies: while pretending to be passive investors they unlawfully acquire a stake, fail to disclose their true intentions and then use threats to pressure the target into paying greenmail or engaging in other transactions designed to generate short-term profits for themselves to the detriment of the target company, its shareholders and its other constituencies.

Cummins is seeking, among other things, to require defendants to divest their shares of Cummins stock, to enjoin defendants from acquiring or seeking to acquire any additional shares of Cummins stock, from voting any shares of Cummins stock, and from committing further violations of the securities laws.

OCALA, FL (JAN. 25) BUSINESS WIRE - Mid-State Federal Savings Bank Thursday announced that James L. Goehler has been promoted to executive vice president.

The announcement was made by Charles E. Harris, chairman of the board of Mid-State Federal.

Goehler will continue to serve as chief financial officer and secretary of the Bank. He joined Mid-State Federal as a senior vice president in March 1989.

Additionally, Harris announced the promotion of two of the Bank's branch managers to vice president. Promoted were Elizabeth Ann Davis, manager of the Howell Avenue office in Brooksville, and Daniel J. Kawa, manager of the Brooksville office.

Mid-State Federal is a publicly held, federally insured and federally chartered stock savings bank with its common stock traded over-the-counter and quoted on the NASDAQ National Market System under the symbol ''MSSB.'' With its home office in Ocala, Fla., the thrift has assets in excess of $1 billion and operates 26 branch offices within a five county area in west central Florida.

WYOMISSING, PA (JAN. 25) BUSINESS WIRE - Sovereign Bancorp Inc. (NASDAQ-NMS: SVRN), the holding company of Penn Savings Bank and Yardley Bank for Savings, announced record earnings for 1989 up 8 percent to $5.4 million from $5 million a year earlier.

This represents $1.97 earnings per fully diluted share, up 6 percent from $1.86 for 1988. Earnings per share has been restated for 1988 to reflect the effect of the stock split. Pre-tax earnings for 1989 were up more than 16 percent to $9 million, compared with $7.7 million for 1988.

Fourth quarter earnings were up almost 4 percent to $1.26 million from $1.22 million for fourth quarter 1988. Fourth quarter fully diluted earnings per share were 46 cents compared with 46 cents for 1988.

Assets grew to $1.25 billion, up 13 percent from $1.1 billion at year end 1988. Deposits were also up, increasing 23 percent to $924 million at Dec. 31, 1989, compared with $750 million at Dec. 31, 1988. In addition to the strong growth in its retail branch system, Sovereign's new personalized banking offices established in Chesterbrook and Pottsville also contributed to this increase.

1989 net interest income was $24.4 million compared to $20.2 million for 1988, representing an increase of almost 21 percent. Net interest income for the fourth quarter was $6 million, up from $5.6 million for the 1988 fourth quarter. This increase continues to reflect the repricing of adjustable rate loans to market levels.

Loan volumes softened during 1989 with total fundings reaching $380 million, down from $432 million for 1988. This decrease was a result of the high volatility of interest rates in 1989, a slight softening in real estate, as well as a decrease in the number of loans purchased. While mortgage fundings dropped 10 percent from 1988 levels, home equity line of credit growth continued to be strong, realizing a 42 percent growth over the previous year.

Asset quality at Sovereign continues to be among the best in the country when compared to its peers. Sovereign's non-performing assets (all loans 90 days delinquent, non-accrual loans and foreclosed real estate) to total assets was only .43 percent, down from .59 percent at Dec. 31, 1988 and is less than one fifth the industry average of 2.20 percent for all publicly traded thrifts in Sovereign's asset size category.

#90025b0864 01/25/1990 ~Business Wire
LOS ANGELES, CA (JAN. 25) BUSINESS WIRE - American Magnetics Corp. (NASDAQ: AMMG) Thursday reported a net loss of ($1,616,000), or (33 cents) per share, for the nine month fiscal year ended Sept. 30, 1989, compared to net income of $3,000 for the full 12 months ended Dec. 31, 1988.

Sales for the 1989 fiscal year were $60,607,000, compared with 1988 sales of $16,667,000.

As previously reported, on Oct. 4, 1989 American Magnetics changed its year end to Sept. 30 to closely coincide with the Aug. 31 year end of Damon Corp.

As a result of the acquisition of control of Damon Corp. by a subsidiary of a limited partnership of which American Magnetics is the sole general partner, the financial statements of American Magnetics include the results of operations of Damon since May 30, 1989.

For the last quarter of fiscal 1989, American Magnetics incurred a net loss of ($1,050,000), or (22 cents) per share. This compared with a net

loss of ($160,000) for the fourth quarter of calendar 1988. Sales for the last quarter of fiscal 1989 were $52,714,000, compared with sales in the 1988 period of $4,232,000.

Robert L. Rosen, chairman of the board and chief executive officer of American Magnetics noted that the acquisition of Damon resulted in a significant change in the composition of the businesses of American Magnetics, with Damon's medical services business becoming the principal business segment of American Magnetics.

Rosen also noted that for the three months ended Aug. 31, 1989, sales and gross profit of Damon's medical services business increased 14 percent and 24 percent, respectively, over the comparable 1988 period and that for the quarter ended Nov. 30, 1989 the first quarter of Damon's fiscal 1990, Damon reported increases in sales and gross profit of the medical services business of 25 percent and 34 percent, respectively, over the comparable fiscal 1989 period.

American Magnetics, through Damon, operates one of the leading clinical laboratory testing companies in the United States. American Magnetics is also engaged in the manufacture, sale and distribution of products related to the electronics industry and in the ownership and operation of commercial real estate.

#90025b0867 01/25/1990 ~Business Wire

SOMERVILLE, MA (JAN. 25) BUSINESS WIRE - Century Bancorp Inc. (NASDAQ:CNBKA) Thursday reported net income of $3,440,300, for the year-ending on Dec. 31, 1989; down 12.5 percent from $3,931,400, earned during the previous year.

Fourth quarter earnings were $570,300; down 56.2 percent from the fourth quarter of 1988.

Fourth quarter earnings were affected by an additional increase of $1,100,000 to Century's Loan Loss Provision during the period. Total additional increases to the provision equaled $1,500,000 for fiscal 1989.

The loan loss reserve stands at $5,400,000, compared to $3,100,000 at the end of 1988. At year-end, 1989, Century's non-accruing loans totaled $12,990,000 which represents 3.42 percent of total loans outstanding.

Marshall M. Sloane, president and chairman of Century noted, ''Although we continue to believe that our non-accruing loans remain at a manageable

level, we thought it prudent to increase our provision for loan losses.

''Were it not for these extraordinary increases to the provision and the cost of non-accruing loans, earnings would have been significantly higher than 1988 because of our continued success in growing core earnings while controlling overhead expenses. Given the state of the Massachusetts real estate market, and our continued belief that we can successfully manage through it, we are pleased with our results.''

Citing Century's continued strong capital base, the board of directors voted a regular quarterly dividend on Century stock at 7.50 cents per share on Century Class A common stock, and 1.05 cents on Century Class B common stock. The dividends were declared payable Feb. 15, 1990, to stockholders of record, Feb. 1, 1990.

Total assets at Century grew from $516.8 million at year-end 1988, to $558.4 million at the end of 1989; up 8.0 percent. Total stockholders' equity at the end of 1989 was $36,405,000, or $6.36 per share, compared to $33,923,000, or $5.93 at the end of the previous year.

ENFIELD, CT (JAN. 25) BUSINESS WIRE - LEGO Systems Inc., the leader in the $300 million construction toy category, has announced another year of strong sales growth.

U.S. consumer sales grew 16 percent vs. year ago levels and for the second year in a row, inventory levels at retail on LEGO and DUPLO brand products were very low following heavy consumer demand during the key Christmas selling period.

Peter Eio, president of LEGO Systems Inc., the U.S. division of the Danish-based LEGO Group, stated ''Similar results were achieved by our European and overseas companies. The worldwide success of our Pirates product line led to a LEGO Group increase of 15 percent. These results futher consolidate our parent company's position as Europe's largest toy manufacturer.''

He added, ''Sales of LEGO imitator products and other construction toys available in the U.S. marketplace dropped substantially in 1989 helping LEGO brand toys to reach an all-time high share of its category of approximately 70 percent. In addition, DUPLO preschool products saw significant gains in market share and consumer sales during 1989.''

The educational division of the LEGO Group, LEGO Dacta, posted sales gains of 50 percent to U.S.-preschool and secondary school markets, including the nation's largest, New York City. Subjects taught utilizing LEGO products range from basic math to computer control technology which uses

specially-designed LEGO sets developed in association with the Massachusetts Institute of Technology.

LEGO Systems Inc., made extensive investments in its manufacturing facility during 1989. With its leading molding technology and high-speed automated and semi-automated assembly operations, the U.S. manufacturing operation provides significantly improved flexibility over those toy industry competitors importing from the Far East.

Eio adds, ''LEGO toys have an unparalleled record for quality. The LEGO Groupmeasures defect rates in parts per million with an ultimate corporate goal of zero defects.''

Over 70 new LEGO and DUPLO sets will be introduced at the American International Toy Fair in New York on February 12. Making their debut will be several exciting new Pirate sets and the M-TRON mini-theme within the LEGO Space environment which feature magnetized space vehicles and neo-colored components.

The DUPLO line of preschool toys will expand to include a number of colorful play sets with Airport, Harbor, Barnyard and Circus themes and a Fire House with figures, vehicles and hours of play value for children three to five years of age. A major introduction within the LEGO Basic product line will be the Build-N-Store Chests that feature sliding lids that double as building baseplates for transportable storage.

LEGO Systems Inc. is a division of the LEGO Group, a privately held firm based in Billund, Denmark.

NEW YORK (JAN. 25) BUSINESS WIRE - Daniel L. Lang, president of Diversifeid Global Ltd., wholly owned subsidiary of DGL Inc. (OTC), has been advised by the U.S. Army's Northeast Commissary Region Headquarters it is being awarded a ''Blanket Purchasing Agreement'' (BPA), for its soft serve dessert, ''GELATA de LITE.''

The BPA is being awarded at the request of Walter Reed Army Medical Center one of the largest military facilities of its type. The hospital has concluded, after testing and serving other products, that ''GELATA de LITE'' is the choice as the best soft serve frozen dessert to serve in the hospital's cafeteria.

The BPA will be formalized at the conclusion of a routine inspection of the company's manufacturing facility, within thirty days, and will allow the sale of the product to all such U.S. Army facilities within the region.

The U.S. Naval Hospital in San Diego has recently awarded a fourth contract to the company, for ''GELATA de LITE''. As with previous contracts, the most recent was for a substantially larger purchase than the last. The hospital, the largest of its type in the world, has also advised that another and larger contract will be awarded shortly.

These contracts demonstrate the strengths of ''GELATA de LITE'' -- delicious taste coupled with ease of handling and storage.

#90025b0899 01/25/1990 ~Business Wire

NORTH ANDOVER, MA (JAN. 25) BUSINESS WIRE - Intrex Financial Services Inc. (NASDAQ:TREX), the parent holding company of Lawrence Savings Bank Thursday announced results for the fourth quarter and year ending Dec. 31, 1989.

For the quarter ended Dec. 31, 1989, Intrex Financial Services Inc. had a net loss of $3,605,000, or $(0.85) per share as compared with a net loss of $4,740,000, or $(1.10) per share for the same period of 1988.

The net loss for the year ending Dec. 31, 1989, was $11,450,000, or $(2.70) per share as compared to a net loss of $4,794,000, or $(1.11) per share for the same period 1988. Because of the operating loss carryforward, there is no tax benefit recorded on the $3,605,000 loss for the fourth quarter of 1989 or on the $11,450,000 loss for 1989.

The net interest income totaled $2,298,000 for the fourth quarter of 1989 compared to $2,213,000, for the third quarter 1989 and $2,929,000, for the fourth quarter of 1988. The 1989 fourth quarter provision for possible loan losses was $2,400,000 as compared to $3,000,000 for the third quarter of 1989 and $4,214,000 for the fourth quarter of 1988.

During the fourth quarter of 1989 the company also had write-downs and expenses on certain real estate owned and property formerly held in a joint venture of $987,000 and $397,000, respectively. There were no large write-downs on other real estate owned in the third quarter of 1989 or in the fourth quarter of 1988.

Non-interest expense was $3,700,000 in the fourth quarter of 1989 compared to $2,770,000 and $3,371,000 in the third quarter of 1989 and the fourth quarter of 1988, respectively. The write-downs in other real estate owned in the fourth quarter of 1989 accounts for the increase in operating expenses over the third quarter 1989 expenses.

Net interest income for the year 1989 was $9,503,000 down from $11,778,000 in 1988. The major reason for the decrease is due to higher amounts of non-performing assets in 1989 compared to 1988. The loan loss provision for 1989 was $9,400,000 compared to $8,884,000 in 1988. Write-downs and expenses for the year 1989 on other real estate owned was $987,000 compared to $0 in 1988.

Total non-interest expense in 1989 was $12,500,000 compared to $10,997,000. The increase is primarily caused by the $987,000 write-downs and expenses in other real estate owned and an increase in professional fees of $628,000 which relate primarily to legal and loan collection fees and expenses. Offsetting these increases was a decrease in merger expenses of $806,000 relating to the proposed merger in 1988.

Non-performing assets as of Dec. 31, 1989 were $28,996,000 as compared to $32,362,000 at Sept. 30, 1989 and $21,400,000 at Dec. 31, 1988.

Total assets were $354,040,000 at Dec. 31, 1989, down from $364,145,000 at Dec. 31, 1988; net loans decreased to $256,389,000 from $286,993,000 and deposits were $253,830,000 up from $242,170,000 for the same periods.

Intrex Financial Services is headquartered in North Andover, Mass. Intrex common stock is traded over the counter on the NASDAQ National Market system under the symbol ''TREX.'' Lawrence Savings Bank operates seven retail offices throughout the Greater Lawrence area.

#90025b0902 01/25/1990 ~Business Wire

LITTLE ROCK, AR (JAN. 25) BUSINESS WIRE - Environmental Systems Co. (NYSE:ESC) Thursday reported results of the continuing operations for the quarter and year ended Oct. 31, 1989.

Revenues for the quarter and the year were $30.6 million and $92.6 million respectively, as compared to $20.4 million and $66.4 million, respectively, for the comparable 1988 periods.

Income from continuing operations available for common shares (exclusive of gains and losses from sale of assets and investment activities) was $2

million, or 13 cents per share, and $4.1 million, or 28 cents per share, for the quarter and year ended Oct. 31, 1989, respectively, compared to $(.7 million), or (6 cents) per share, and $2.6 million, or 20 cents per share, for the quarter and year ended Oct. 31, 1988, respectively.

Net income (loss) from continuing operations available for common shares after the special charges (fiscal 1989 detail provided in the attached capsular information) was $.1 million, or 1 cent per share, and $2.6 million, or 18 cents per share, for the most recent quarter and fiscal year, respectively, and $(11.3 million), or (91 cents) per share, and $(8 million), or (65 cents) per share, for the corresponding 1988 quarter and fiscal year, respectively.

The company's 1989 fourth quarter and fiscal year results were adversely affected by a substantial charge related to its investment in CF Systems Corp., a Massachusetts environmental services company.

In fiscal 1988 the company also reported losses from its discontinued field service activities of $(17 million), or $(1.39) per share, and $(16.8 million), or $(1.36) per share, for the fourth quarter and year, respectively. No losses from discontinued operations were reported for fiscal 1989, although the ultimate realization of the value of the remaning discontinued assets is dependent on future events.

As previously reported, the company and certain of its officers and directors continue to be defendants in a pending lawsuit alleging violations of certain federal securities laws. The ultimate outcome of the litigation is not presently determinable, and accordingly, no provision for any liability has been reflected in the operating results described above.

Jack W. Forrest, president and chief executive officer said: ''The El Dorado facility generated increasing operating income during the year, due to improved utilization of production capacity and a favorable pricing environment. Additionally, the permitting process for the Arizona facility appears to be nearing a satisfactory conclusion.

''Despite the disruption in recent months relating to the continuing disagreements between the company and Brambles, the company's operating results continue to improve and are in line with our expectations, confirming the wisdom of the decision to focus our resources and attention on the fixed-based treatment facilities.''

#90025b0903 01/25/1990 ~Business Wire

FAIRPORT, NY (JAN. 25) BUSINESS WIRE - Detection Systems Inc. (NASDAQ: DETC) Thursday reported unaudited results for the third fiscal quarter ended Dec. 31, 1989.

Net sales for the quarter ended Dec. 31, 1989, were $5,591,000, compared to the $4,771,000 of the third quarter a year ago. Net income was $426,000, or 15 cents per share, as compared to $355,000, or 13 cents per share, a year ago. In the nine month period ended Dec. 31, 1989, sales were $16,002,000, compared to $13,981,000 a year ago. Net income was $1,336,000, or 48 cents per share, as compared to $917,000, or 35 cents per share, in the same period last year.

Sales growth for the quarter was good, particularly in view of the dynamics of the electronic security and fire protection industry, where mergers, acquisitions and consolidations continue at a high pace. Our targeted customers are alarm installation and service companies who offer UL-certificated protection, and penetration of this market increased again this quarter.

Our bottom line reflects an increasing investment in new product development, which is essential to long-term viability in a trade that has accelerating technology and declining prices. We remain committed to the high end of the market, offering what we believe to be the industry's best features and quality in electronic detection and control equipment.

Detection Systems Inc.

HARTFORD, CT (JAN. 25) BUSINESS WIRE - Northeast Utilities (NU) has reached agreement with HEC Energy Corp. of Boston to acquire the assets of that company, and Thursday filed for approval of the transaction with the U.S. Securities and Exchange Commission.

The acquisition is expected to be completed by June 1990.

HEC is a leading supplier of engineering, design and installation services associated with energy conservation measures. It provides these services primarily to large institutions such as hospitals and universities in New England and the Midwest.

HEC is currently a privately held corporation. Its assets will be acquired by a newly formed, unregulated subsidiary of NU under the plans announced today. NU is the parent company of three electric companies, The Connecticut Light and Power Co., Western Massachusetts Electric Co., and Holyoke Water Power Co., serving 1.2 million customers in Connecticut and western Massachusetts.

Announcing the agreement, NU Chairman and Chief Executive Officer William B. Ellis stated:

''Our operating companies are nationally recognized for their committment to energy conservation and for the information and incentive programs that we have provided to encourage customers to conserve. The acquisition of HEC's assets will enable us to broaden the range of conservation services we render and help us better understand the marketing programs most effective in encouraging customers to adopt energy conservation measures.''

#90025b0918 01/25/1990 ~Business Wire

CINCINNATI (JAN. 25) BUSINESS WIRE - The U.S. Bankruptcy Court for the Southern District of Ohio today granted interim approval of debtor-in-possession (DIP) financing agreements submitted by Federated Department Stores, Inc. and Allied Stores Corporation.

Today's court action enables Federated and Allied to draw against the DIP financing as needed on an interim basis, pending court hearings on final approval of the DIP agreements. These hearings currently are scheduled to be held on Feb. 8 for Federated and on Feb. 9 for Allied.

As previously announced, Federated has negotiated an agreement with Citibank to provide for a 12-month, $400 million financing, subject to syndication; Allied has negotiated an agreement with Chemical Bank to provide for a 15-month, $300 million financing.

According to information provided by the companies, Federated would not need to draw cash from its DIP financing until the fall season. Both Federated and Allied, however, said they expected to use the DIP financing immediately to provide letters of credit to assure the receipt of imported spring merchandise deliveries. Allied expects to make cash draws against its interim DIP financing beginning in March.

Interim approval to use up to $50 million for letters of credit was granted to Federated, while Allied received interim court approval to use up to $50 million in working capital, and $80 million in receivables financing. In addition to interim approval on the DIP financing agreements, the court also authorized that pre-existing receivables facilities for both companies remain intact. These facilities total $1 billion for Federated and $700 million for Allied, both through Citibank.

''As a result of today's actions by the Bankruptcy Court, we expect to be able to continue business-as-usual relationships with our key vendors and suppliers across the board,'' said James M. Zimmerman, president and chief operating officer of Federated and Allied. ''We were pleased by the strong support we received from our vendors in the past week; it was a level of positive response that was most gratifying.''

Zimmerman noted that a majority of the companies' major merchandise vendors are either already shipping goods to Federated and Allied stores nationwide, or have indicated their plans to do so upon interim approval of the DIP financing. He said the companies believed that the remainder of their vendors -- primarily smaller companies -- may choose, along with some factoring companies, to wait until final approval of the DIP is granted before authorizing the resumption of scheduled shipments. This is not expected to have a noticeable impact on store inventories, Zimmerman said.

#90025b0931 01/25/1990 ~Business Wire

KEENE, NH (JAN. 25) BUSINESS WIRE - Cheshire Financial Corp. (NASDAQ:

CFNH) Thursday announced results of operations for the fourth quarter and the year ended Dec. 31, 1989.

Fourth quarter 1989 earnings were $969,000, or 27 cents per share, compared with $879,000, or 23 cents per share, for the fourth quarter of 1988, a per share increase of 4 cents , or 17 percent. For the year ended Dec. 31, 1989, earnings were $4,441,000, or $1.23 per share, up from $3,940,000, or $1 per share, for the same period last year, a per share increase of 23 cents, or 23 percent.

''I am pleased to announce these record annual earnings,'' said Peter J. Baxter, president and chief executive officer. ''The increase in earnings occurred primarily from increases in net interest income, which totaled $18,647,000, or 24 percent more than last year. Core earnings increased in 1989 as a result of loan growth and increased interest rate spreads which were up from 2.36 percent in 1988 to 2.64 percent in 1989.

''It has been well publicized that the New England economy has slowed considerably from its pace in recent years. During 1989, we experienced an increase in both nonperforming loans and in loans charged off. As a result of these trends, we added $967,000 to our provisions for loan losses in 1989. compared with $350,000 in 1988. In 1989, the allowance for loan losses grew from $2,454,000 to $2,787,000, which represents 67 percent of nonperforming loans. At Dec. 31, 1989, nonperforming loans amounted to $4,162,000, or .95 percent of loans, of which $1,920,000 were nonaccruing,'' Baxter said.

Cheshire Financial Corp. is a multi-bank holding company headquartered in Keene, with total assets of approximately $541,000,000 as of Dec. 31, 1989. The company's banking subsidiaries are Cheshire County Savings Bank of Keene, with assets of approximately $396,000,000, and The Monadnock Bank of Jaffrey, N.H., with assets of approximately $132,000,000. The company is the largest financial institution headquartered in southwestern New Hampshire and operates twelve full-service offices and 40 remote service units throughout the region.

STAMFORD, CT (JAN. 25) COMTEX - Two Windmere Corp. shareholders filed suit against the Miami Lakes, FL, company and four of its top officers Jan. 18, claiming they were misled by false and incorrect public disclosures the company made between December 1988 and December 1989.

The suit, which seeks class action status, was filed in U.S. District Court for the Southern District of Florida, and names Windmere, David M. Friedson, Barbara Friedson Garrett, Burton A. Honig and Arnold Thaler as defendants, according to a filing with the Securities and Exchange Commission.

The shareholders are seeking an unspecified amount in damages, costs and other expenses.

Windmere and the four officers assert the claims are without merit, and plan to defend against the suit.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 24, 1990.

s'FINE ARTS on

Jan. 11, 1990, Capital Network Group Inc. dropped its old business plan to spin-off subsidiaries as a result of "overwhelming regulatory resistance." Capital's first spin-off client company, IFC-Investors First Corp. of Kalispell, MT, has withdrawn its registration with the SEC.

On Jan. 5, 1990, Capital Network entered into an agreement for stock exchange with Princeton Fine Arts of Las Vegas, NE. According to the exchange, Capital Network will acquire all outstanding shares of Princeton Fine Arts in exchange for 2.17 million shares of Capital Network. Capital Network and Princeton shared corporate officers prior to this agreement.

Princeton Fine Arts, which publishes and telemarkets limited edition prints and remarques of emerging artists, began operations on June 1, 1989.

The executive offices of Capital Network Group Inc. are located at 900 Grier Drive, Building b, Las Vegas, NE 89101. Its telephone number is (702) 897-2122.

WASHINGTON (JAN. 25) COMTEX - The 8-K report filed at the SEC shows on Jan. 2, 1990, Game-A-Tron reported that it was insolvent and that it could not pay its bills. Creditors are cooperating and those bills essential for viability are being paid by shareholders. This insolvency is expected to persist until a lawsuit against the company has been adjudicated. At which time further investment in the company is expected.

Due to its insolvency, Game-A-Tron has been unable to pay for an independent audit. It has been negotiating with firms and majority investors and has almost finalized arrangements to have Kostin and Co. perform accounting functions and provide audit statements for fiscal years 1988 and 1989.

Although insolvent, Game-A-Tron states in the 8-K filing that it is not in nor anticipating bankruptcy.

The chief executive offices of Game-A-Tron Corp. are located at 698 Farmington Ave., P.O. Box 232 W. Hartford, CT 06107. Its telephone number

is (203) 233-7843.

TOKYO (JAN. 25) - Sales at 258 major Japanese department stores rose 7.1 percent to 8.6 trillion yen (59 billion dollars) over the course of 1989, an industry association said Thursday.

It was the highest annual increase since 1980 when such sales went up 8.2 percent, the Japan Department Store Association said.

The association attributed the rise in 1989 to Japan's brisk economy.

#90025d0080 01/25/1990 ~French/German News Agency

TOKYO (JAN. 25) - Japanese orders for machine tools jumped 24.5 per cent from a year earlier to a record 117 billion yen (807 million dollars) in November, the Japan Machine Tool Builders Association said Thursday.

The association said demand from manufacturers of general machinery and motor vehicles was particularly strong and that orders grew from all sectors except shipbuilding and transport, precision machinery and trading firms.

Backlogs of orders meanwhile grew 26.9 percent to a record 500 billion yen (3.5 billion dollars), another monthly record.

In the 11 months to November, orders rose 27.7 percent to 1,143 billion yen (7.88 billion dollars) with all sectors showing stronger demand except precision-machinery producers and the public sector, it said.

Orders for numerically-controlled machine tools soared 34.8 percent to 944 billion yen (6.51 billion dollars) in the same period and full-year figures are expected to exceed 1,000 billion yen (6.9 billion dollars) for the first time.

TOKYO (JAN. 25) - Indonesia's state-owned oil company, Pertamina, is to cut oil exports to Japan by 25 percent in January and up to 35 percent in February, a Japanese newspaper reported Thursday.

The Nihon Keizai Shimbun said the company decided to reduce its oil

shipments - which are used to generate electricity in Japan - after a tanker accident at an offloading facility in southeast Sumatra.

A Pertamina official in Tokyo said he was unable to comment on the report.

In another development, Japan plans to send a delegation to Indonesia next month to discuss cooperation with the Southeast Asian nation, Foreign Ministry officials said.

The cooperation concerns Indonesia's five-year development plan from 1989 to 1994, they said. Delegation leader Ryozo Sunobe, an advisor to Foreign Minister Taro Nakayama, will stay in Indonesia for nine days starting February 4, the officials said.

The delegation is to include representatives from the Construction and Agriculture, Forestry and Fisheries Ministries as well as from the Export-Import Bank of Japan, the Overseas Economic Cooperation Fund, and the Japan International Cooperation Agency, the officials said.

As the largest donor of official development aid (ODA) to Indonesia, Asia's biggest debtor nation, Japan committed up to 159 billion yen (1.1 billion dollars) in loans to Indonesia in the current fiscal year ending March 31.

The aid was part of a two-billion dollar credit package pledged in May. Grants totaling 4.85 billion yen (33.4 million dollars) were also committed, the officials said.

#90025d0160 01/25/1990 ~French/German News Agency

LONDON (JAN. 25) - British cinema, television and leisure group the Rank Organisation said Thursday its taxable profit rose 14 percent in the year to October over the previous year's level to 291.1 million pounds (485 million U.S. dollars).

Turnover was up 32 percent at 1.09 billion pounds (1.8 billion dollars) and final dividend was fixed at 20.5 pence, up from 17.75.

Rank also announced that it would be asking shareholders to approve a 357.4 million pound capital raising exercise, offering one new share at 670 pence for four old shares.

The annual results were in line with market expectations of profit of between 285 and 290 million pounds, but news of the capital raising exercise sent Rank shares down 39 pence to 806 in early trading on the London stock exchange.

#90025d0980 01/25/1990 ~French/German News Agency
TOKYO (JAN. 25) - Japan's major steelmakers have agreed to export 500,000 tons of their product to China in the first six months of the year, almost a third less than the same period last year, Nippon Steel Corp. said Thursday.

The fall from an export volume of 1.81 million tons in the same period for 1989 was due largely to a fall in China's foreign currency reserves and sluggish domestic demand, a Nippon Steel spokesman said.

Nippon and five other major Japanese steelmakers also agreed to cut export prices to China by about seven percentage points in U.S. dollar terms from 1988 prices, a Nippon Steel spokesman added, without elaborating.

The price cut, the first since early 1986, reflected a fall in China's foreign exchange reserves due to Western economic sanctions imposed after Beijing's crackdown early June on the democracy movement.

The six Japanese steelmakers - Nippon Steel, NKK Corp., Kawasaki Steel Corp., Sumitomo Metal Industries Ltd., Kobe Steel Ltd. and Nisshin Steel Co. -- had been negotiating the six-month export quotas and prices with Beijing since November.

#90025d1070 01/25/1990 ~French/German News Agency
NEW DELHI (JAN. 25) - The Indian government has rushed additional para-military forces to quell an upsurge of Moslem radical violence in the Himalayan state of Jammu and Kashmir, it was announced Thursday.

An official spokesman told newsmen here that a special aircraft carrying federal government officials was also sent to the violence-scarred northern state to assess the situation.

These measures were announced hours after four Indian air force personnel were shot and killed by two unidentified radicals in Srinagar city, capital of the area.

The United News of India (Uni) news agency said the airmen were standing at a road crossing near a housing colony to go to their workspot when the militants, riding a motorclycle, opened fire.

Prime Minister Vishwanath Pratap Singh, condemning the killing of defence personnel, warned that his government would take stern measures to put down ''such acts of violence''.

#90025d1140 01/25/1990 ~French/German News Agency
PERTH, Australia (JAN. 25) - A major new oil discovery in the Indian Ocean, off the northwest coast of Western Australia, was announced on Thursday.

Joint venturers BHP, Mobil Exploration and Inpax Alpha said in a statement that test drilling at their Griffin One exploration well, 96 kilometres (60 miles) northeast of the small coastal town of Exmouth, had struck a big oil deposit.

They said five drill cores had been sunk over two areas to a depth of more than 2,800 metres (1.7 miles).

Results indicated the presence of a 97 metre (320 feet) thick oil column.

BHP is a 45 per cent partner in the venture, with Mobil having 35 per cent and Inpax 20 per cent.

The find comes in the wake of other recent major Western Australian oil discoveries by Woodside Petroleum on the state's northwest Shelf, and Wapet, near Barrow Island, also in the northwest.

#90025d1260 01/25/1990 ~French/German News Agency
BEIJING (JAN. 25) - Foreign reporters are free to work in China so long as they respect new rules laid down last week by the State Council (cabinet), the Foreign Ministry said Thursday.

In a weekly press briefing, spokesman Jin Guihua said it was incumbent on foreign reporters to "obey the regulations, observe their professional ethics and make legitimate press coverage in China."

The rules, signed last Friday by Premier Li Peng and published Saturday in the People's Daily, stipulate that foreign journalists must "not twist the facts, divulge rumors or make interviews by illegal means."

Critics say the regulations are vague and open to interpretation if the government wants to expel an accredited journalist -- as it has done twice since the June crackdown on pro-democracy unrest.

Though foreign reporters have no right to appeal an expulsion order or other measure decided by the Foreign Ministry which accredits them, Mr. Jin said China had never wrongly sanctioned a journalist.

Besides spelling out guidelines for Beijing-based correspondents, the new rules say that non-resident reporters coming to China must first detail

their plans to a Chinese embassy abroad and get its permission.

Mr. Jin confirmed that the new regulations end the rule whereby Beijing-based reporters wanting to make news coverage outside the capital had to give 10 days' notice to local authorities.

But while the time stipulation is gone, the new rules still require them to get permission first from local authorities before going out of Beijing on assignment, Mr. Jin said.

The Foreign Correspondents' Club of Beijing, which represents the 160 foreign reporters from 27 countries based in the capital, pressed the Foreign Ministry for months to lift such restrictions, saying they were open to abuse.

Last Tuesday the United States reacted to the new regulations with a declaration that press freedom was "fundamental." State Department spokeswoman Margaret Tutwiler urged China "to allow the widest possible latitude for legitimate journalistic activity."

BONN (JAN. 25) - West Germany and the Philippines signed an agreement here Wednesday to reschedule some 90 million Deutsche marks (52.6 million dollars) owed by Manila to Bonn, the finance ministry announced.

Debts guaranteed by the West German government for West German exports totalling 75 million marks and another 15 million marks in credit lines granted under bilateral financial cooperation deals were extended. They will now fall due between 1994 and 2000.

Bonn stressed that it wanted to help the Philippines improve its balance of payments and contribute to the success of economic reforms under President Corazon Aquino.

NAIROBI (JAN. 25) - Kenya lit a second bonfire Thursday in the battle to conserve wildlife from poaching, incinerating some 300 kilograms (660 pounds) of rhino horn at a simple ceremony in the National Park here.

Last July 18, the East African country, sent 12 tonnes of ivory worth three million dollars up in flames as a spectacular gesture to back its campaign to save the African elephant from extinction.

President Daniel arap Moi again used a flaming torch Thursday to ignite a

conflagration of 274 rhino horns, skins and other game trophies all worth seven million dollars in front of a gathering of wildlife enthusiasts.

Many wore rhino emblems or badges reading, "Only an elephant should wear ivory".

Before setting fire to the rhino horn bonfire, President Moi said, "When we burned the elephant tusks last time we were in a desperate situation but we are in a much better position today."

"We have reduced poaching dramatically," he said. After losing 800 elephants to poachers in 1988, Kenya had lost just 100 last year and the rhino population, which was down to less than 400 -- from 18,000 in 1968 -- was now increasing at a rate of five per cent a year.

KHARTOUM (JAN. 25) - Sudan appealed Thursday to Ethiopia and the international community ''to speed up the delivery of food to the estimated four million'' starving Ethiopians in the north of the country in order to stop an influx of refugees into Sudan.

The Sudanese commissioner for refugees, Abdulrahman Sir al-Khatim, said ''5,800 Ethiopians have so far arrived in the eastern Sudanese cities of Kassala and Safawa in the past three months''.

He said Sudan could not afford to take in more refugees because of the country's bad economic situation, which had been complicated by an international cut of 30.8 per cent in refugee aid last year.

''To make things worse, a number of foreign agencies providing health services in refugee camps are pulling out of the Sudan for financial reasons'', al-Khatim said.

Sudan hosts about two million refugees, mainly from Ethiopia, Uganda, Chad and Zaire.

Al-khatim said Sudan would continue to persue its policy to encourage voluntary repatriation in a bid to cut but the number of refugees.

#90025d1770 01/25/1990 ~French/German News Agency

LONDON (JAN. 25) - Political changes in eastern Europe could lead to an increase in the Eastern bloc's grain production, the International Wheat Council said in a report here Thursday.

There is a considerable potential for these countries to increase grain production if they adopt more intensive farming methods and use more fertilisers and chemical products, the report said.

The subsequent rise in production costs could be offset by raising guaranteed prices to farmers and enlarged credit facilities, but a realistic pricing system is probably necessary for any reform of Eastern bloc grain production to succeed, it added.

The most immediate problem for east European countries is to improve the variety and availability of food resources, which could be achieved by reducing or stopping food exports or through increased aid from Western industrialised countries.

In the long-term, they would need to reorganise their agricultural infrastructure.

The climate in several parts of Eastern Europe is favourable for the production of a wide range of crops, the report noted.

Annual grain production in eastern Europe has been between 88 and 96 million tonnes since 1985, with last year's production estimated at 92 million tonnnes. Average imports have been about eight million tonnes a year.

The council also raised its estimate of world wheat production in the 1989-90 season ending June by two million tonnes to 532 million, largely due to a 1.5 million tonnes increase in the Australian harvest estimate to 14.2 million tonnes.

#90025d2310 01/25/1990 ~French/German News Agency

MOSCOW (JAN. 25) - The Soviet statistics office Thursday revealed Soviet economic figures for 1989, some based on Western-style accounting methods, showing that the economy was in the grip of a depression, according to Western analysts.

At a news conference, Nikolai Belov, First Deputy Chairman of the Soviet Statistics Committee, acknowledged for the first time that inflation was considerably higher than previously announced.

He also said that industrial action and ethnic unrest in 1989 had taken a heavy toll on the economy, while the crime rate had gone up by almost a third - 30 percent - compared with the previous year.

"Every day, 30,000 workers were absent from work," Mr. Belov said, adding that this represented a loss of one billion rubles (1.6 billion dollars).

"Mass disorders, pogroms, arson and destruction and other similar actions," had also contributed to darken the economic picture, he said.

The Soviet equivalent of gross national product stood at three per cent in 1989, or slightly down on the previous year, while energy production was also down.

Oil production in 1989 stood at 607 million tonnes, 13 million lower than the previous year.

Indicating that the government had for the first time taken hidden inflation into account, along with a "basket" of prices only slightly different from the Western version, Mr. Belov revealed that the inflation rate in 1989 had stood at 7.5 percent.

But he admitted that the shadow economy had only been partly taken into account in the calculations.

In response to a question, Mr. Belov said that income from the country's thriving black market stood at a massive 60 billion rubles (96 billion dollars).

WINDHOEK (JAN. 25) - Independent Namibia will a multi-party state with a mixed economy if the country's Constituent Assembly approves the draft founding law submitted to it on Thursday.

What is described as the final draft independence constitution was hammered out by a 21-member standing committee drawn from all seven parties represented in the 72-member House, who completed it barely 40 minutes before Thursday's session.

Submitting the document for debate, assembly chairman Hein Geingob, a member of the South West Africa People's Organisation (SWAPO), described it as "one of the best constitutions in the world."

Its main provisions include an executive president, a bicameral parliament,

a bill of fundamental rights and the oulawing of apartheid and the death penalty.

The draft constitution explicitly lays claim to the disputed port enclave of Walvis Bay and the offshore islands along the Namibian coast.

In addition to being head of state, the president will be commander-in-chief of the armed forces. The head of the majority SWAPO party, Sam Nujoma, is most likely to fill the positions.

SWAPO won 57 per cent of the votes in U.N.-supervised elections in November last year, giving it 41 seats in the assembly, but not the two-thirds majority required to approve the independence constitution.

The document makes no provision for a president-for-life. The head of state will only be allowed to serve two terms of five years each.

BERLIN (JAN. 25) - The Christian Democratic Union (CDU) withdrew Thursday from the East German communist-led coalition government under Hans Modrow, the East German news agency ADN reported.

The CDU withdrawal, decided at a special meeting of the party's presidium, aimed to "pave the way to negotiations with new political parties and groups", the agency said.

The Socialist Unity (SED-PDS, communist) party holds a majority of seats in the coalition with other former satellite parties.

General elections are due on May 6.

#90025d8890 01/25/1990 ~French/German News Agency

KUALA LUMPUR (JAN. 25) - The government is planning to tax sawn timber exports from peninsular Malaysia and gradually reduce log sales from the east Malaysian states of Sabah and Sarawak, Primary Industries Minister Lim Keng Yaik said Thursday.

Mr. Lim said that the export levies on various species of sawn timber to be announced within the next two to three months were intended to ensure domestic plywood, mouldings and furniture industries were not starved of supplies.

He said that the federal government was also trying to persuade Sabah and Sarawak to reduce exports of timber logs to encourage downstream processing and add value to exports.

The primary industries ministry said it expected Malaysian exports of forest products last year to total 8.5 billion Malaysian dollars (3.1 billion U.S.),
making it the second largest commodity export after crude oil and gas.

Log sales are expected to total 20.2 million cubic metres and fetch 4.2 billion Malaysian dollars (1.6 billion U.S.) while sawn timber exports are expected to total five million cubic metres worth 2.8 billion dollars (one billion U.S.)

Downstream forest products such as veneer sheets, plywood, wood mouldings and furniture are expected to contribute less that 18 per cent of total earnings from the sector, according to the primary industry ministry estimates.

Mr. Lim said that Sabah and Sarawak would be encouraged to raise quotas for domestic consumption to ensure downstream industries are supplied. Under existing quotas 30 per cent of Sabah's output and 10 per cent of Sarawak's are set aside for domestic use.

The primary industries ministry figures released Thursday estimate Malaysia's total non-oil commodity exports last year at 20.7 billion Malaysian dollars (7.7 billion U.S.), about 600 million Malaysian dollars (222 million U.S.) more than in 1988.

#90025d9230 01/25/1990 ~French/German News Agency

Munich (JAN. 25) - The West German electronics company Siemens said Thursday its net earnings for the 1988-89 year rose 13 percent to almost 1.58 billion marks (938 million dollars), and that profits were rising even faster in the new year.

Reporting both the last year's results and the first-quarter figures simultaneously, Siemens said the higher earnings would be passed on to shareholders in the form of a 12.5 marks per-share dividend. Last year's dividend was eleven marks.

Siemens said its turnover in the 1988-89 year ending September 30 increased three percent to 61.1 billion marks.

In the new business year, turnover had increased by 20 percent to 14.8 billion marks, while earnings had risen 21 percent to 364 million marks.

The company attributed the jump in earnings and sales volume in the new year to the results of newly-acquired companies, such as the U.S. firm Rolm and the French company In2.

Siemens said its orders in the first quarter totalled 17.5 billion marks, a ten percent increase.

#90025d9440 01/25/1990 ~French/German News Agency

BERNE (JAN. 25) - Switzerland may reduce the number of F-18 fighter planes it is ordering from U.S. firm McDonnell Douglas in view of recent changes, particularly in eastern Europe, the government has said.

The Swiss government ordered 34 of the planes in October 1988, to replace its French Mirage and British Hunter aircraft, and they are due to be delivered starting in 1995.

But on Wednesday the government asked the defence ministry to draw up a new report on security needs, in view of "positive developments" in recent months,
particularly in eastern Europe.

The government said it was likely to reduce the F-18 order from 34 to 24, retaining the option to order a further 10 at a later date.

The plan to replace the existing fighter planes, which date back to the 1960's, has been opposed by leftwing minority parties but also members of the coalition government, largely on grounds of cost.

The F-18's cost two billion dollars apiece.

#90025d9510 01/25/1990 ~French/German News Agency
LYNN, Massachusetts (JAN. 25) - The Czechoslovakian Aviation Industry (LET) and General Electric Co. have announced a joint venture to build a commuter plane large enough to carry 40 passengers.

General Electric will manufacture the CT7-9B engines of the turboprop aircraft while the Czechoslovak company will build the plane, officials said in announcing the joint venture Wednesday.

It would mark the first time that a Western country had provided an aircraft engine to an East bloc country in a joint commercial venture, said Robert Salvucci, a spokesman for GE Aircraft Engines.

"This agreement will allow both parties to serve markets in parts of the world that have not previously been accessible," Wallie Everest, director of GE's CT-7 turboprop program, said in a statement.

"We expect that well over 300 million dollars worth of CT7 engines will be purchased by the late 1990s and spare parts sales will add to that business," he said.

Mr. Salvucci said GE Aircraft Engines would supply 400 engines for the plane. LET would be in charge of marketing the plane worldwide, he said.

#90025d9570 01/25/1990 ~French/German News Agency
Tokyo (JAN. 25) - Japanese vehicle production rose 2.6 percent in 1989 to reach a record 13,026,000 units, surpassing the 13-million level for the first time, the industry said Thursday.

The Japan Automobile Manufacturers Association said the output included a record of just over 9.05 million cars, up 10.4 percent from 1988.

The association said that Japanese producers sold a record of nearly 7.26 million vehicles at home last year, up eight percent. It was the eighth consecutive yearly record for domestic sales.

The strong domestic sales helped to compensate for a 3.6 percent drop, to 5.89 million vehicles, in exports, the report said.

#90025d9610 01/25/1990 ~French/German News Agency
MANILA (JAN. 25) - The European Economic Community (EEC) will open a

representative office in the Philippines within the year, EEC commissioner Abel Matutes said here Thursday.

The Manila delegation will be set up despite the existence of a regional office in Thailand because the EEC considers the Philippines "a very important country," Mr. Matutes said after meeting with Foreign Affairs Secretary Raul Manglapus.

"The office will be open during the current year. It's difficult to be more precise," Mr. Matutes told journalists.

"Some very important countries are a little bit far away (from Thailand.) We decided it would be wise to open this delegation in the Philippines, a very important country. We are very keen in showing our commitment to improve and increase our relations," he added.

Mr. Matutes made the remarks after signing an agreement with Mr. Manglapus for a 16.5 million European currency unit (ECU) (20 million dollars) grant for a five-year development program for the southern island of Mindanao.

He also denied speculation that the opening up of Eastern Europe would divert EEC assistance funds away from Southeast Asia.

"It doesn't mean at all that we are going to turn our backs on our partners and our friends elsewhere in ASEAN (the Association of Southeast Asian Nations), particularly the Philippines," Mr. Matutes said.

He noted that EEC grant commitments to the Philippines under its 1989 budget amounted to more than 22 million ECU's (26 million dollars), almost double the figure for 1988.

But he admitted that Western European investors would be keener to venture into Eastern Europe, possibly diverting resources from the Pacific.

Mr. Manglapus later said that during his meeting with Mr. Matutes he briefed him on the steps Manila was taking to stabilize the situation following a bloody coup attempt by rightist renegade soldiers in December.

Mr. Manglapus also said they raised concerns over the planned European single market, particularly a continuing review of European levies on coconut oil, which "would affect millions of Filipinos if the review of the levies would be negative."

Coconut oil is one of the country's top traditional exports.

Frankfurt (JAN. 25) - West Germany's chemical branch, which has shown seven uninterrupted years of expansion, is expecting further records in production, sales and exports in 1990, the industry's top executive said here.

Chemical Industry Association (Vci) president Hermann Strenger, who is also chairman of the Bayer chemical concern, said chemical firms' combined turnover in 1990 would rise by about two percent.

In 1989, turnover growth was six percent, to some 160 billion marks (94.6 billion dollars).

Earnings this year likely match last year's record levels, Strenger predicted.

In 1989, chemical exports reached 88 billion marks, accounting for a record 54 percent of the industry's turnover. More than half the exports went to other European Community countries.

Strenger also reported that West German chemical firms invested a record eleven billion marks in 1989, with most of the investments made to expand production capacities.

QUITO (JAN. 25) EFE- Tens of thousands of Ecuadorean teachers have begun an indefinite strike to press for wage hikes and to protest what they say are the anti-union policies of President Rodrigo Borja.

The industrial action, called by the 120,000-strong Teachers' National Union (UNE), began Wednesday but Education Minister Alfredo Vera claimed that many teachers had not joined the strike.

"There is no unity in the UNE," he said.

UNE President Ernesto Alvarez claimed that 95 per cent of his members were taking part in the stoppage.

All schools stayed open Wednesday in Ecuador's biggest city, Guayaquil, but only private schools were operating as normal in other parts of the country.

The teachers are pushing for a monthly minimum wage of 50,000 sucres ($74)

#90025p0002 01/25/1990 ~PR Newswire

SEATTLE (JAN. 24) PR NEWSWIRE - The Boeing Company (NYSE: BA) and the Seattle Professional Engineering Employees Association (SPEEA) today reached tentative agreement on a new contract that will be unanimously recommended by SPEEA to the engineering membership.

The tentative agreement increases by nine percent the lump sum payment portion of the offer that was rejected in mid-December.

The agreement raises the lump sum payments for the three years of the contract to 10 percent the first year, five percent the second year and four percent the third year. The previous offer was for a lump sum payment of 10 percent the first year only.

The tentative agreement also clarifies the new Alternate Benefit Formula under the retirement plan. The other contract provisions are the same as the intitial offer, namely that engineers will be eligible to receive wage increases of seven percent the first year, four percent the second year, and four percent the third year. In the first year of the contract, three percent of the seven percent total is guaranteed to each engineering employee. The remaining four percent in the first year and the four percent increments in the second and third years respectively are merit increases, which are administered based on an employees' performance. The percentage received by each employee is at the discretion of the individual engineering managers.

Larry McKean, Boeing vice president, Human Resources, said, "During the past few weeks, members of engineering management and general management have reviewed the status of SPEEA contract negotiations, the rationale

behind our initial offer, and the feedback received from all levels of engineering. While the terms of the initial offer are competitive for engineering positions within the aerospace industry, additional circumstances such as the company's belief in the importance of its engineering work force and the spirit of teamwork that must exist in continuous improvement efforts within the company reinforced the decision to submit a revised offer.

"This revised offer to SPEEA is indicative of the company's commitment to our engineering work force."

All increases would be retroactive to Dec. 2, 1989, under terms of the new contract. Within 10 days of ratification of the contract, engineering employees will receive lump sum payments in the amount of 10 percent of their wages from Oct. 4, 1988, to Oct. 3, 1989. Lump sum payments for 1990 and 1991 will be payable by Dec. 15 of those years. The parties expect SPEEA will complete its ratification process in approximately two weeks.

RENO, NE (JAN. 25) PR NEWSWIRE - Athena Gold Corporation (Vancouver: AGC) today said that field and laboratory work being performed during the initial phase of its letter agreement with Placer Dome U.S. Inc. (PDUS) is progressing on schedule. The letter agreement was signed with PDUS on Nov. 16, 1989. Placer Dome U.S. Inc. is the wholly owned subsidiary of Placer Dome Inc., Vancouver (NYSE, Toronto: PDG)

PDUS has drilled 15 holes in the Bear Creek zone of the Talapoosa deposit for a total of 11,300 feet. Five core holes were drilled for a total of 3,600 feet. The 10 rotary holes totaled 7,700 feet. The drilling has been carried out using both vertical and angle holes. The samples have been submitted for assay to Bonder-Clegg in Reno, Nev. The assaying of the drill samples is not complete and PDUS has not released the interim results.

Metallurgical testing on the Talapoosa samples has been done by PDUS at its Golden Sunlight Mine in Whitehall, Montana. Although the results of the testing are not complete the company has been advised that preliminary testing indicates that carbon-in-pulp (CIP) or carbon-in-leach (CIL) maybe a viable alternative to earlier flotation test work done by Athena. Recoveries ranging from 65 percent to 92 percent have been reported.

The results of the PDUS work program at this stage are incomplete and PDUS has not reached a decision regarding the economics of the property.

The terms of the letter agreement permit PDUS a full 90 day drilling and metallurgical testing period followed by another 30 day evaluation period. The initial phase will terminate March 15, 1990. The company remains optimistic that PDUS will elect to enter the joint venture agreement upon the completion of the initial phase.

Athena Gold Corporation has recently applied for listing on the Toronto Stock Exchange.

DENVER (JAN. 25) PR NEWSWIRE - The initial letter of intent for the acquisition of Internet Datacomm Inc. by Wellington Equities Inc. was announced Jan. 9, 1990.

This letter has now been followed by the signing of a formal stock exchange agreement by the officers of each company on Friday, Jan. 19, 1990. It is anticipated the acquisition will be accomplished on or before Feb. 21, 1990.

Internet Datacomm has established itself in a unique niche in the field of office automation and data communication, providing a full line of consulting, product, service, and training.

Internet Datacomm founded three and one-half years ago with only a few thousand dollars of equity capital, produced gross revenues in 1989 of approximately $3.6 million.

The Denver Business Journal (Dec. 11, 1989) recently put the spotlight on the 62 area men and women who have made Denver a hotbed of activity in the telecommunications revolution. These are the people through whom Denver Business speaks to the world. Thomas Galley, president of Internet Datacomm, was named as one of the 62. Among other things, he was recognized as the founder of Internet, a company that he has led to an annual growth rate of 135 percent.

Given the potential of this telecommunications revolution and Internet Datacomm's skill, expertise, and past performance, management has every reason to be optimistic for what the future holds.

SAN DIEGO (JAN. 25) PR NEWSWIRE - Burnham Pacific Properties Inc. (AMEX: BPP), a San Diego-based equity real estate investment trust (REIT), today reported record annual revenues of $20,356,000 as well as record net income of $6,147,000 for the year ended Dec. 31, 1989. This represented a 56 percent increase in revenues over the 1988 amount of $13,064,000 and a 517 percent increase over the 1988 net income of $996,000. After discounting the 1989 net income for the one time capital gain of $2,611,000 resulting from the sale and exchange of the Town & Country Shopping Center, net income rose to $3,536,000 or an increase of 255 percent in 1989.

Louis J. Garday, president, said that the company's 1989 performance was due to a combination of factors including the addition of real property investments to the company's asset base and to the continued high occupancy levels of the company's properties.

Burnham Pacific finished the year by paying its 95th consecutive quarterly cash dividend, 34 cents a share on Dec. 29.

Burnham Pacific now owns 19 commercial real estate properties in San Diego Orange and Los Angeles counties. It is affiliated with John Burnham and Co., a 99-year-old San Diego-based real estate, insurance and mortgage banking firm.

DARIEN, CT (JAN. 25) PR NEWSWIRE - EXECUTONE Information Systems Inc. (NASDAQ: XTON) announces the release of its largest digital product to date. Renamed the ISOETEC Digital System, this product line, can now configure to 864 non-blocking ports - 432 for voice and 432 for data with the System/432.

The first stage of the ISOETEC Digital System, called the ISOETEC System/228, has been marketed for three years. In this configuration, the product has growth capabilities up to 456 non-blocking ports - 228 for voice and 228 for data. The ISOETEC Digital System/108 (108 ports for voice and 108 for data), has been marketed for the last two years. This version brought digital technology in a cost-effective manner to the low end customer.

The new larger system has been "quietly marketed" for the last six months of 1989, with six systems already installed. The company has a backlog of orders for this system, totalling approximately $2 million. Full production and availability is expected at the beginning of the second quarter of 1990.

As this product line evolved, hardware and software developments have been based on a multi-phased platform approach, which included this larger system. Therefore, most existing hardware (trunk cards, station cards, resource cards and telephone instruments) is fully functional with all three size configurations of the ISOETEC Digital System, providing an easy and cost effective migration path for existing customers. Additionally, the operational features on the telephone instruments are similar from one configuration to the next. The previously announced T-1 and Custom Plus ACD developments are compatible with the new expanded configuration. The company will continue to make software enhancements, focusing on

applications-oriented solutions to customer problems.

"We are very pleased with the success of the development of our digital product line. Even though we have not formally announced the System/432 until now, we already have a list of approximately 20 customers awaiting installation," Terry Atwood, director of marketing said. "Our corporate mission statement has been focused on our marketing and sales efforts to companies with 200 desktops and less. Now, with the introduction of our ISOETEC Digital System/432, we can provide a solution beyond the 200 desktop market, expanding our original market force."

EXECUTONE Information Systems Inc. designs, manufactures, sells, installs and services voice and data communications equipment, and is the leading supplier of specialized hospital communications equipment. Products are sold under the EXECUTONE, ISOETEC and INFOSTAR brand names through a nationwide network of direct and independent distributors. Corporate headquarters for EXECUTONE Information Systems Inc. are located at 6 Thorndal Circle, Darien, Conn., 06820.

SAN DIEGO (JAN. 25) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced that it has established a Japanese marketing, distribution, and service network for its X-ray inspection and process monitoring systems for electronics manufacturers.

IRT has signed a distribution agreement with Tokyo Electron Limited (TEL), Japan's leading electronic manufacturing and trading company, to market, distribute and install IRT's electronic X-ray systems in Japan and to provide customer support after installation. TEL, founded in 1963, is based in Tokyo and has more than 30 offices throughout Japan.

"The TEL agreement, which includes the purchase of a CXI-5400 system for demonstration use, confirms the presence of an immediate Japanese market for IRT's automated X-ray systems," said Edward W. Soron, senior vice president and general manager, electronic systems. "This move, together along with our recent establishment of a European marketing and service network through Electronic Instruments, is a major component of our strategy to establish IRT as the world-wide leader in X-ray inspection and process control."

IRT's line of CXI systems combines high-quality X-ray imaging with computerized control and analysis to give electronics manufacturers an in-line process monitoring and inspection tool for printed circuit boards.

IRT's systems are used in high-volume production environments for in-line process monitoring and in quality and product development laboratories for off-line research, development, and inspection applications.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace, and defense applications. IRT also operates a commercial radiation processing facility which provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

#90025p0031 01/25/1990 ~PR Newswire

NORWELL, MA (JAN. 25) PR NEWSWIRE - Serono Laboratories, Inc. of Norwell, Mass., and Sandoz Pharmaceuticals Corp. of East Hanover, N.J., today announced an agreement in which Serono will co-promote Parlodel(R) (bromocriptine mesylate) for indications relating to the treatment of infertility.

The agreement calls for Serono to co-promote Parlodel with its domestic line of ethical pharmaceuticals which are prescribed to treat infertility. Serono's sales force will market the drug to several thousand gynecologists and infertility specialists nationwide. Sandoz will continue to market the product under the same trade name for treatment of Parkinson's Disease and other non-fertility indications. The agreement is limited to the United States and its territories.

Parlodel was approved by the U.S. Food and Drug Administration in 1978 for the treatment of amenorrhea and galactorrhea. In 1981, Parlodel received approval for the treatment of hyperprolactinemia- related infertility. Hyperprolactinemia is a condition where there is an oversupply of the milk-producing hormone prolactin. High levels of prolactin can result in inhibition of ovulation and infertility could occur as a consequence.

Serono's Executive Director of Sales Robert Lederer, said the company expects its Parlodel sales activities to be launched quickly. "We have prepared training and educational materials for our sales representatives, physicians and patients and will be ready to introduce the co-promotion of the product in February."

Sandoz Pharmaceutical Corporation President and Chief Executive Officer

Jacques F. Rejeange, said "the co-promotion of Parlodel in the endocrine indications with Serono gives Sandoz the opportunity to focus on the Parkinson's Disease indication and other non-fertility indications."

Serono Laboratories currently markets four ethical pharmaceuticals used by physicians for the treatment of infertility: Pergonal(R), Metrodin(R), Serophene(R) and Profasi(R). The company's sales surpassed the $100 million mark in 1989.

Serono Laboratories, Inc. is a part of The Ares-Serono Group, an international developer and marketer of pharmaceutical and diagnostic products. Executive headquarters of The Ares-Serono Group are in Geneva, Switzerland, and operating headquarters are in Boston, Mass. Shares of Ares-Serono S.A., the parent company of the group, are listed on the major Swiss stock exchanges.

Sandoz Pharmaceutical Corporation is a subsidiary of Sandoz Pharmaceutical Limited, Basel, Switzerland. Sandoz is currently the eighth largest pharmaceutical company worldwide.

WHITE PLAINS, NY (JAN. 25) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) today reported net income for 1989 was $807.6 million, or $4.10 per share, compared with 1988 net income of $1.32 billion, or $6.63 per share. The company reported that it has taken several one- time charges totaling approximately $325 million after taxes in its fourth-quarter financial results. Had the one-time charges not been taken, earnings per share would have been approximately $5.75, down 13 percent from a year earlier.

Total operating revenues for the year were $13.2 billion, compared with $12.7 billion the previous year. With the adjustments, return on equity was 8.4 percent, compared with 14.2 percent in 1988.

For the fourth quarter of 1989, the company reported a net loss of $43.7 million, or a net loss of $.22 per share, compared with net income of $342.2 million, or $1.74 per share, in the fourth quarter of 1988.

Total operating revenues for the quarter were $3.4 billion, compared with $3.2 billion in the same quarter last year.

The fourth-quarter pre-tax charges can be grouped in five categories: operational restructuring, asset write-downs, work stoppage, benefit plan changes, and regulatory and other items.

Under operational restructuring, the company recorded charges of approximately $120 million. Such items as the early retirement incentive programs, which combined are expected to reduce the workforce by about 4,200, and various business consolidations were included in this category.

Under asset write-downs, the company took charges totaling approximately $90 million for items such as unusually large inventory and billing adjustments.

In addition, the company reported fourth-quarter charges of about $100 million for such items as deferred vacation payments, delayed installations, and other strike-related matters.

The company also recorded a charge of approximately $90 million relating to changes in the benefit plan.

#90025p0035 01/25/1990 ~PR Newswire

ATLANTA (JAN. 25) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today reported record 1989 earnings per share of $7.42 and all-time high net income of $661 million compared with the previous high of $4.76 per share or $467 million in 1988.

Operating profits for the pulp and paper segment were at record levels for the year, $917 million compared with $616 million in 1988. The building products segment also reported greater earnings of $533 million in 1989, tying the previous record set in 1987, versus $428 million in 1988.

Georgia-Pacific's earnings per share for the 1989 fourth quarter rose to $1.84 and net income was $157 million, compared with 1988 fourth-quarter earnings of $1.36 per share ($129 million). Building products operating profits for the quarter increased to $131 million, well above the 1988 figure of $80 million, while pulp and paper profits for the quarter were $193 million in 1989 versus $217 million in 1988.

Sales in 1989 were $10.2 billion, exceeding the 1988 level of $9.5 billion. Sales for the fourth quarter were $2.4 billion compared with $2.6 billion for the same period a year ago. The company's cash flow from operations was above 1988 levels, exceeding $1.3 billion versus $865 million a year ago.

Also during the year, Georgia-Pacific repurchased 9.7 million shares of its common stock at a cost of $468 million. The total number of shares acquired since 1987 is more than 26 million.

#90025p0042 01/25/1990 ~PR Newswire

TORRANCE, CA (JAN. 25) PR NEWSWIRE - International Technology Corp. (IT) (NYSE: ITX) announced today results for the third fiscal quarter ended Dec. 31, 1989. Revenues rose 16.1 percent to a quarterly sales record of $78.4 million, compared with $67.5 million for the same quarter of the prior year. Net income for the quarter was $4.2 million, or $.13 per share, compared with $2.2 million, or $.07 per share, for the same period last year.

For the nine-month period ending Dec. 31, 1989, revenues rose 8.3 percent to $217.6 million, compared with $201.0 million for the same period of the prior year. Net income for the nine-month period was $9.7 million, or $.30 per share, compared with $5.6 million, or $.18 per share, for the same period last year.

"In the third quarter, we are particularly pleased with the continued revenue growth of the company," said Murray H. Hutchison, chairman and chief executive officer. "The Analytical services business continued its strong revenue and profit performance. Substantial small project remediation work also helped revenues and profits," he said.

International Technology Corp., based in Torrance, is a leading environmental management company providing services to government and industry.

#90025p0044 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - AT&T (NYSE: T) today reported fourth quarter profits of $705 million, or 65 cents per share, compared with a loss of $3.342 billion, or a negative $3.11 per share, a year ago. Revenues for the quarter rose to $9.301 billion from $9.207 billion last year.

Net income for the year was $2.697 billion, or $2.50 per share, on revenues of $36.112 billion. In 1988, AT&T reported a loss of $1.669 billion, or a negative $1.55 per share, on revenues of $35.210 billion.

The 1988 results reflected a one-time charge of $6.7 billion for costs associated with accelerated modernization of AT&T's network. Without the

charge, earnings would have been $593 million, or 55 cents per share, in the fourth quarter, and $2.266 billion, or $2.11 per share for the year.

Excluding the 1988 charge, net income rose 19.0 percent for both the year and fourth quarter of 1989.

AT&T also gained some freedom from regulatory constraints. Earlier in the year, the Federal Communications Commission approved "price caps," a ceiling on prices instead of profits. More recently, the FCC affirmed AT&T's right to offer special networks to corporate customers, and said it intends to consider further loosening of regulatory restrictions.

Revenues were up slightly for the quarter, 2.6 percent for the year. The increases were attributable to growth in services revenues and higher product sales, which more than offset continued and expected declines in rental revenues.

Sales of services -- including long distance, financial, shareowner and installation and maintenance services -- increased 2.9 percent for the quarter compared with a year ago, and 6.2 percent for the year. The increase reflects a 6.6 percent growth in communications services volume for the quarter, 6.3 percent for the year, principally in international, outbound and inbound business services, with a modest gain in residence long distance. AT&T continued aggressive promotion of its long distance services, and cut prices twice in 1989. An additional cut in January 1990 brought total reductions in long distance prices to 40 percent since 1984.

ST. PETERSBURG, FL (JAN. 25) PR NEWSWIRE - Security Tag Systems, Inc. (NASDAQ: STAG) today announced the appointment of Jerry T. Kendall to the position of vice president, sales. Kendall, who has been a high-tech private consultant for the past two years, is the former president and chief executive officer of Paradyne Corporation. Over the 10 year span that Kendall was involved with Paradyne, the company's annual revenues increased from about $10 million to over $230 million. (Soon after Kendall left Paradyne in 1987, the company was bought by AT&T.) Prior to his joining Paradyne, Kendall contributed to taking a startup company, Inforex Inc, from zero to over $80 million in annual revenues.

Kendall, in commenting on his new association with Security Tag Systems, stated, "Having looked hard at the electronic surveillance industry, I recognize that there are some significant companies which are servicing markets that have a great deal of growth potential. It is my feeling

that, while the competition is strong, none have better strength in personnel, or the technological competitive edge owned by Security Tag. I am very optimistic that, because of these assets, we can accomplish at Security Tag the type of successes experienced at Inforex and Paradyne."

#90025p0055 01/25/1990 ~PR Newswire

LOS ANGELES (JAN. 25) PR NEWSWIRE - Bell Industries Inc. (NYSE: BI) today reported a 39 percent increase in net earnings for the second quarter and a 61 percent improvement for the six months ended Dec. 31, 1989. The favorable results reflect Bell's continuing focus on higher margin business and benefits from a recently completed restructuring.

Net income for the second quarter was $1,370,000, or 23 cents per share, compared with $989,000, or 16 cents per share in the year-earlier period. Sales declined seven percent to $94,415,000 from $101,879,000 a year ago.

Gross profit margins in Bell's largest single business, electronics distribution, rose to 26.1 percent from 24.8 percent in the year-earlier quarter.

Theodore Williams, president, said the continuing improvement in this important operating measure reflected centralized pricing discipline and the elimination of lower margin business.

"The benefits of our company-wide restructuring also contributed to the positive performance, in terms of a 12 percent reduction in inventory from the prior year, improved efficiency and customer service, and reductions in personnel, resulting principally from consolidation of facilities," Williams said.

Aggregate second quarter results from Bell's other operations -- the Building Products, Graphic Arts and Motor Vehicle Parts and Accessories Groups -- approximated the prior year.

For the six months ended Dec. 31, 1989, net income rose to $3,533,000, or 60 cents per share, from $2,192,000, or 35 cents per share, in the corresponding prior year period. There were approximately seven percent fewer shares outstanding in the current year period. Sales for the period were $195,706,000 versus $211,717,000 in the same period last year.

The lower sales volume in the two current reporting periods reflected the increased concentration on higher margin business.

Bell Industries Inc. distributes and manufactures products for the electronics, computer, building and other markets.

MINNEAPOLIS (JAN. 25) PR NEWSWIRE - The NWNL Companies, Inc. (NASDAQ: NWNL), today announced that it expects to report fourth quarter 1989 earning on both an operating and net basis, at a level consistent with the third quarter.

John E. Pearson, chairman and chief executive officer, said that unusual conditions in the financial markets resulting from recent announcements by some financial companies of write-downs on investments have led the company to announce this indication of fourth-quarter results today. He said that the year-end audit is underway and he expects to announce final results on Feb. 8.

Pearson said that although the company has traditionally been a somewhat more aggressive investor than many insurance companies, he does not feel that recent uncertainties in the junk bond market or write-downs of commercial mortgages justify any serious concern of about NWNL's investment portfolio. He said that while the amount of delinquencies is expected to increase for the fourth quarter, the company has carefully monitored its portfolio for a number of years and recorded reserves for potential losses each quarter.

He said that the company's investment in marketable junk bonds is only about 7 percent of its total consolidated invested assets and that the quality of the junk bond portfolio is believed to be better than the junk bond market as a whole.

The NWNL Companies, Inc., is a Minneapolis-based diversified holding company specializing in insurance and financial services. It has 12.9 million shares of common stock outstanding.

LOS ANGELES (JAN. 25) PR NEWSWIRE - Three North American firms have filed formal letters of intent with the California-Nevada Super Speed Train Commission to lead consortiums competing for the right to privately finance, build and operate a 300-mph train between Las Vegas and Anaheim, covering the distance of 270 miles in about an hour and one half.

"The commission has made tremedous progress since its inception 18 months

ago," said Chairman Arnie Adamsen, who serves on the Las Vegas City Council. "With Bechtel International (of San Francisco), Morrison-Knudsen Co. (of Boise, Idaho) and Bombardier Corp. (of Canada) filing letters of intent," Adamsen explained, "the Super Speed Train can move ahead to link two great states and showcase future technology that the entire country can be proud of.

"The commission will require proposers to help meet the needs of commuters in Southern California," explained Commission Vice Chairman Don Roth, who is also chairman of the Orange County Board of Supervisors. Roth also noted that the $3.5-billion Super Speed Train will include a spur to Palmdale if others provide a link from there to Los Angeles.

Bechtel will use the magnetically-levitated train now completing final tests in West Germany. Bombardier has exclusive rights to the French super train, TGV; it will team with Rail Transportation Systems Inc. of Atlanta.

By July 15, 1990, each consortium must submit a plan proposing the route and stations to be served and a plan for 100 percent private financing. A final plan to construct and operate the train privately will have to be approved by the commission and both states (legislatures and governors). Construction is expected to take from 1993 through 1997.

READING, PA (JAN. 25) PR NEWSWIRE - Metropolitan Edison Co. could become the first electric utility in Pennsylvania to formally introduce competition into the electric power supply business in the commonwealth, if a recent filing is approved by the Pennsylvania Public Utility Commission (PUC).

In the filing, Met-Ed asked the PUC to allow Met-Ed to begin a pilot Competitive Procurement Program for buying additional non-utility generated electricity in the future, to meet the growing demands of the company's customers. Met-Ed previously announced this program to the public last June 7. On Dec. 14, the PUC assigned this filing to an administrative law judge for hearing and a recommended decision.

The program would ensure that available power is purchased from high-quality suppliers at the lowest possible cost. If the proposal is approved, Met-Ed would become the first electric utility in Pennsylvania to solicit bids from potential "qualifying facilities."

Qualifying facilities are "non-utility generators" of electricity that meet certain federal regulations, such as small power producers who generate no more than 80 megawatts using renewable resources or waste fuel (wind, solar, water, coal waste or solid waste) or cogenerators, which are companies that simultaneously generate electricity and heat (using gas, oil or coal) or use in an industrial or commercial process. Purchases of electricity under this proposed program would not begin until the mid-1990s.

A second filing with the PUC deals with a pending contract with Wheelabrator Northampton Energy Co. Inc., a non-utility generator that would supply Met-Ed customers with 82 megawatts (82,000 kilowatts) of electricity for 20 years beginning in January 1992. The filing asks the PUC to approve recovery of costs for energy to be purchased from Wheelabrator through the portion of Met-Ed's bill known as the Energy Cost Rate.

Met-Ed is notifying its customers today of the recent filings. While there will be no immediate impact on customer rates, both filings will result in some increase in customer rates in the future.

LOS ANGELES (JAN. 25) PR NEWSWIRE - First Executive Corporation (NASDAQ: FEXC) announced that at the request of I.C.H. Corporation ("ICH"), First Executive Corporation (the "Company") has given its consent under its Standstill Agreement with ICH to permit ICH, alone or with others, until July 1, 1990, to make an acquisition proposal to the board of directors of the Company contemplating the purchase of all shares of common stock of the Company for cash (with proper provision for all shares of Preferred Stock) (a "Permitted Offer"). A Permitted Offer must be subject only to customary conditions and be accompanied by written commitments for all of the financing for the acquisition contemplated by the Permitted Offer and a check for $5 million payable to the company which shall not be refundable.

In connection with giving this consent, the expiration of the Standstill Agreement was extended to May 8, 1993, unless further extended in accordance with the terms of the Standstill Agreement. ICH is not obligated to make a Permitted Offer and any Permitted Offer may be rejected in the sole discretion of the Company's board of directors. The Company cannot predict the likelihood that ICH will make a Permitted Offer, although ICH has announced it intends to form and lead a group in making a

Permitted Offer. In approving the revisions to the Standstill Agreement, the board of directors did not determine that the Company should be offered for sale or that any action should be taken that would result in a sale, restructuring, recapitalization, extraordinary dividend or any other extraordinary corporate transaction.

The Company's privately held senior notes ($175 million due 1991- 1995) and notes payable to banks ($100 million due 1993) contain a covenant restricting repurchases of capital stock and cash dividends on capital stock, other than cash dividends on the Company's Series E, F and G Preferred Stocks, which are specifically permitted, and other than pay-in-kind dividends such as are permitted to be paid on the Series H Preference Stock. The covenant limits amounts paid as dividends and for repurchases of capital stock after Dec. 31, 1987, to an amount determined by a formula which includes as its principal elements: i) the aggregate cumulative net income/loss after Dec. 31, 1987, plus (ii) the aggregate net proceeds of sales of capital stock after Dec. 31, 1987, plus (iii) $75 million, minus (iv) amounts expended for cash dividend payments on all capital stock after Dec. 31, 1987. The Company believes that its previously announced program to repurchase up to $50 million of its outstanding capital stock is permitted by covenant, assuming that its present estimate of its anticipated 1989 loss is correct.

#90025p0066 01/25/1990 ~PR Newswire

MIDLAND, MI (JAN. 25) PR NEWSWIRE - Dow Corning Corporation today announced sales and profits for 1989. Sales reached $1,575 million, up 7 percent from the $1,477 million reported for 1988. Net income was $162.8 million, up 8 percent from the $150.5 million reported for 1988. Both were new records.

Fourth-quarter sales were $384.8 million, up 4 percent from the $370.1 million for the same period in 1988. Net income was $40.9 million, up 6 percent from last year's $38.4 million.

"Dow Corning's overall performance was quite good in spite of a surprisingly strong dollar and a weakening of major economies through the second half of 1989," said Lawrence A. Reed, president and CEO. "We achieved good sales growth in all parts of the world," Reed noted, "with Europe and the Pacific strongest, and the United States showing more modest improvement. Price increases initiated during the year were essentially offset by the negative effects of currency."

According to Reed, Dow Corning's employees made the difference between what could have been just an okay year and what was truly a year of solid achievement. "Their resourcefulness and flexibility in improving customer service, product quality and the achievement of needed productivity increases made 1989 a winner," Reed said. He cited as one example a 50-percent reduction in late shipments in the United States as "an outstanding accomplishment and a real benefit to our customers."

The year was marked by extensive capital investments that totaled nearly $300 million. About $24 million was dedicated to the environmental improvement of manufacturing facilities, primarily in Carrollton, Ky., and Midland. A new silicone rubber development and compounding facility was opened in Kendallville, Ind., as part of Dow Corning STI's expanding operation. The European Area headquarters relocated to new facilities in Brussels, Belgium.

A notable technology record was the issuance of 153 U.S. patents -- the second consecutive record year. Dow Corning's continued commitment to R&D was also demonstrated by significant progress on two new R&D facilities -- one in Yamakita, Japan, and the other at the corporation's headquarters in Bay County, Mich.

For 1990, Reed said, "We expect another exciting and particularly challenging year. Our two new R&D centers will become operational and we'll be commissioning a major new addition to our basic plant in Carrollton, Ky. The economic outlook is uncertain, but we expect conditions to gradually improve and we will be working hard to commercialize our many new opportunities worldwide."

GREER, S.C. (JAN. 25) PR NEWSWIRE - Ryan's Family Steak Houses, Inc. (NASDAQ-NMS: RYAN) reported fourth quarter revenues of $62,876,000, up 30.9 percent from $48,047,000 for the comparable quarter of 1988.

Net earnings for the quarter increased 14.9 percent to $5,326,000 from $4,636,000. Earnings per share increased to 10 cents per share on 52,316,000 shares, up 11.1 percent from 9 cents on 52,362,000 shares.

This is the 46th consecutive quarter in which revenues and earnings have set record highs over the same quarter of the prior year.

For the year ended January 3, 1990 revenues rose 25.1 percent to $241,426,000 from $193,024,000 a year earlier. Net earnings for the year amounted to $21,451,000 as compared to $19,262,000 for the previous year, an increase of 11.4 percent. Earnings per share increased to 41 cents on 52,682,000 shares, up 10.8 percent from 37 cents on 52,398,000 shares in 1988.

At this date the Company owns and operates 111 and is franchisor of 32 Ryan's Family Steak House restaurants. Fourteen new Company-owned and five franchised restaurants were opened during 1989. One additional Company-owned restaurant and one franchised restaurant opened earlier this month.

#90025p0070 01/25/1990 ~PR Newswire

PARSIPPANY, NJ (JAN. 25) PR NEWSWIRE - General Public Utilities Corp. (NYSE: GPU) today reported record earnings per share of $5.01 (unaudited) for 1989 vs. $4.75 for 1988.

Net income for 1989 was $282.5 million (unaudited) vs. $283.8 million in 1988.

Included in 1989 results was an accounting change that reduced earnings by 23 cents per share. With this change, costs for scheduled nuclear outage maintenance are recorded when related revenues are realized, not as costs are incurred. This change minimizes swings in operation and maintenance expense due to scheduled outages.

Earnings per share also benefited from the company's stock repurchase

plan. At December 31, 1989, average common shares outstanding were 56,382,215, compared to 59,725,295 at year-end 1988.

Revenue in 1989 rose 2.7 percent to $2.9 billion (unaudited). In 1989 residential sales increased 0.8 percent, commercial sales increased 3.9 percent and industrial sales decreased 2.9 percent.

Despite strong residential and commercial sales, GPU net income growth for the year was tempered by the effects of this past summer's cooler weather, resulting in a three percent reduction in kilowatt-hour sales compared with year-earlier third quarter figures.

Earnings for fourth quarter 1989 total $50.6 million (unaudited), or 92 cents per share, a 45 percent increase over the $35.0 million, or 62 cents per share reported for the same period in 1988.

Fourth quarter revenues rose five percent to $706.3 million (unaudited). Residential sales increased 5.2 percent. Commercial sales were up 5.9 percent and industrial sales declined by 6.1 percent from the same period in 1988.

Nuclear expenses for the fourth quarter 1989 decreased in the year-to-year comparison because of the fourth quarter 1988 scheduled outage for the Oyster Creek Nuclear Station. In May 1989, the plant returned from an extended refueling and maintenance outage, but, during the summer, restricted its generation to 65 percent of capacity when problems developed with output transformers. Since September 1989, Oyster Creek has been running at nearly 100 percent capacity.

GPU is a registered electric utility holding company with three operating subsidiaries: Jersey Central Power & Light Co., Pennsylvania Electric Co. and Metropolitan Edison Co. The GPU System provides approximately 39 billion kilowatt-hours of electricity for approximately 1.8 million customers.

#90025p0071 01/25/1990 ~PR Newswire

WEST CHESTER, PA (JAN. 25) PR NEWSWIRE - Chemical Waste Management Inc. (NYSE: CHW) and Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) have reached an agreement in principle to form an alliance to serve the growing waste management requirements of federal agencies in the United States, Weston announced today.

The alliance will exist through their joint ownership in Chemical Waste Management Inc.'s recently formed subsidiary Chem-Nuclear Environmental

Services Inc. (CNES).

Chem-Nuclear Environmental Services Inc. will provide total waste management and disposal services for waste emanating from or existing at federal facilities. The company will especially serve the federal government's radioactive and mixed waste (radioactive and hazardous waste) market at federal facilities. This encompasses the environmentally sound management and disposal of all waste from waste water to high level nuclear wastes. Weston will hold a 29 percent interest and Chemical Waste Management Inc. will own the remaining 71 percent of CNES.

The CNES organization will integrate certain capabilities and assets of Chemical Waste Management Inc. and its subsidiary, Chem-Nuclear Systems Inc., with certain operating capabilities and assets of Weston. Approximately 400 employees are expected to staff the new company initially.

Earl Gjelde, vice-president of Chemical Waste Management Inc., has been named president of Chem-Nuclear Environmental Services. In addition to Mr. Gjelde, Mr. William Hewitt, vice-president and board member of Weston, will be placed in charge of operations.

CNES will be supported by the science and technology capabilities of both Weston and Chemical Waste Management Inc. Both firms have extensive capabilities in analytical, technological development, and leading-edge scientific disciplines. This experience will be employed to develop and implement new technologies for waste minimization, stabilization, transportation, recycling, interim storage and disposal.

The agreement in principle is subject to approval by the boards of directors of Chemical Waste Management Inc. and Roy F. Weston Inc.

Chemical Waste Management Inc. is the nation's largest environmental services company specializing in the transportation, treatment and disposal of hazardous wastes, minimization, recycling and resource recovery of hazardous waste, and the cleanup of sites contaminated with such waste.

Weston is a recognized leader in the environmental engineering, design and consulting industry; as a full-service environmental and health and safety firm, Weston provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services.

#90025p0074 01/25/1990 ~PR Newswire

WASHINGTON (JAN. 25) PR NEWSWIRE - Sales of existing single-family homes remained steady last month, reaching a seasonally adjusted annual rate of 3.55 million units, down 1.1 percent from the previous month, and bringing the 1989 total to 3.43 million units, according to the National Association of Realtors.

Last year's total was down 4.6 percent from the 1988 total of 3.59 million units, which ranked as the strongest year of the decade and was one of the top four sales years on record.

"Although sales declined in 1989, the resale volume in 1988 was the highest since 1979. A healthy level of existing-home sales was sustained last year," said NAR President Norman D. Flynn.

"Last month's resale pace indicates a stable market. With plenty of homes available at good prices, and relatively low mortgage rates, it is really a 'buyer's paradise' right now," said Flynn, a realtor from Madison, Wis.

The national resale volume decline in December was due, in part, to a drop in existing-home sales in the Northeast and South, where severe weather conditions prevailed. However, the largest regional decline occurred in the West, where resale activitiy dropped from an extremely high November level.

In the Northwest, the December 1989 resale pace of 570,000 units fell 3.4 percent from November's rate of 590,000 units. The December resale pace was 18.6 percent lower than the December 1988 rate. The 1989 resale pace for the Northeast was 585,000 units, 13.1 percent below the 1988 pace.

The Northeast median pace of $143,100 last month was 0.1 percent higher than the December 1988 price of $143,000. The 1989 median price for the Northeast was 145,200, 1.5 percent higher the 1988 median.

"The essentially unchanged median home prices in the Northeast reflect a continuing slump in many of the large metropolitan areas," said NAR Chief Economist John A. Tuccillo.

The decline in the West's existing-home sales rate reflected a market correction from an eight-month high in November, especially in California, Tuccillo noted. In the West, the resale pace of 600,000 units fell 6.3 percent from November's rate of 640,000 and 14.4 percent from December 1988. The 1989 home resale total for the West was 605,000 units, 5.8 percent below the 1988 total.

"Despite the decline in the West, the December level of resale activity is healthy overall, which demonstrates the underlying strength of the market," said Tuccillo.

The December median price recorded for the West was $13,300, 5.1 percent higher thant the December 1988 price of $128,700. The 1989 median price for the West was $139,900, up 12.0 percent from the 1988 median price.

The existing home sales rate in the South slipped 3.5 percent in December to 1.38 million units, from November's pace of 1.43 million units. Last month's pace was down 8.0 percent from the December 1988 rate of 1.50 million units.

"Unusually severe weather dampened the market somewhat during the holiday season," Tuccillo said. "Despite this, though, the December level of activity was the second highest of the previous 12 months, indicating an overall healthy market," he added.

For 1989, single-family resales in the South totaled 1.31 million units, 2.9 percent below the 1988 total.

The median price in the South was $83,200 in December, 6.4 percent higher than the December 1988 price of $78,200. The 1989 median price was $84,500, 2.8 percent above the 1988 price.

In the Midwest, the only region posting an increase, the December resale pace of 990,000 units was 3.1 percent above the November pace of 960,000 units, but 2.0 percent below the December 1988 pace of 1.01 million. For the year, the Midwest total was 926,000 units, 0.3 percent below the 1988 total.

"The improvement in the Midwest, in the face of unusually severe weather, signals a market that has been slowly turning around, and one that is expected to continue growing in the 1990's," Tuccillo said.

The median price for existing homes in the Midwest was $69,900 last month, rising $2,100 from January, and 3.9 percent from the February 1988 price of $67,300. The 1989 median price was 71,200, 4.1 percent above the 1988 price.

"Last year, existing home sales totaled nearly 3.5 million units, which would be the fourth consecutive year in which home sales reached or exceeded that level," said Tuccillo. "With the gradual decline in interest races expected in 1990, we should continue to see a healthy market this year," added Tuccillo.

More than half the homes sold in December cost $92,500 or more; the largest percentage by price class, 13.5 percent, were sold in the

$120,000-$159,999 price range. Nine percent cost $250,000 or higher.

The National Association of Realtors, the nation's largest trade association, is the voice for real estate, representing more than 800,000 members involved in all aspects of the real estate industry.

PITTSBURGH (JAN. 25) PR NEWSWIRE - Equitable Gas Co. today granted over $40,000 to two Homestead agencies.

The funds were presented at a meeting of the Allegheny County Commissioners who praised the company for its assistance in aiding the Mon Valley community.

Equitable President John Milantoni said, "We have provided natural gas service to the Mon Valley for over 100 years. We have a commitment to the people and businesses of this area, since we plan to continue providing natural gas service here for at least another 100 years. Equitable is happy to play a part in helping the Steel Valley Council of Governments and Club Alternative continue their assistance to local residents."

The company granted $23,000 to the Steel Valley Council of Governments for replacement of heating equipment at the agency's Human Service Center, 1705 Maple St., Homestead, Pa. The center houses the St. Peter's Child Development Center, Allegheny Intermediate Unit Head Start Program, Community College of Allegheny County Learning Assistance Center, Parental

Stress Center, offices for the Borough of Homestead and the Steel Valley Chamber of Commerce.

Club Alternative, 615 McClure St., received $17,885 for replacement of heating equipment. The organization assists individuals and families with alcohol and substance abuse problems.

CINCINNATI (JAN. 25) PR NEWSWIRE - Multi-Color Corporation (NASDAQ: LABL) today announced results for its third quarter ended Dec. 31, 1989.

Net sales for the third quarter of fiscal 1989 totaled $16,058,000, up from 7.4 percent from $14,950,000 in the year- earlier period. Net income for the period increased to $417,000 or $.19 per share on 2,240,000 average shares, an increase in earnings per share of 12 percent compared with $374,000 or $.17 per share on 2,191,000 average shares, a year ago.

Net sales for the nine months ended Dec. 31, 1989 totaled $47,116,000 an increase of 6 percent from the same prior year period. Earnings per share increased 9 percent to $.61 per share in the nine month period from $.56 per share in the same prior year period.

John C. Court, President of Multi-Color Corporation commented, "Overall, we continue to make good progress in the development and introduction of new products while investing heavily in improving quality and manufacturing efficiency."

Multi-Color Corporation is one of the largest manufacturers of printed labels for branded consumer products in the United States. The Company's shares are traded over-the-counter under the National Market Systems symbol LABL.

#90025p0082 01/25/1990 ~PR Newswire
BOSTON (JAN. 25) PR NEWSWIRE - Downer and Company, an investment bank specializing in international mergers and acquisitions based in Boston and Paris, has formed a joint venture with London-based 3i Corporate Finance to offer an international M and A service.

The 3i Group, which is the largest venture capital company in the world, has an established reputation as an adviser to Britain's small and medium-sized businesses. Its principal shareholders are leading UK banks, including the Bank of England.

The joint venture, Corporate Finance International Inc. (CFI), is owned equally by 3i and Downer. It will provide advice to businesses seeking acquisitions throughout Europe and North America, assisting from the identification of acquisition candidates through to the negotiating and closing of transactions.

Neil Williamson, managing director of 3i CF, explained that the reason for the joint venture was that over the past year an increasing number of the 4,000 companies on the 3i portfolio were looking to make acquisitions overseas. The number of approaches for UK businesses from foreign companies had also shown a dramatic increase.

On cross-border M and A activity Charles Downer, chairman of CFI, said: "The prospect of a single European market has not just spurred European companies to acquire in other parts of Europe, it has also heightened the interest of U.S. companies in European acquisitions."

In 1989, U.S. companies completed 360 cross-border deals compared with 249 the previous year. The disclosed amount spent on cross-border acquisitions also increased from some $20 billion in 1988 to nearly $27 billion in 1989. There was interest in Europe across all sectors, among banks, among manufacturing companies, and among service companies."

BROOKFIELD, WI (JAN. 25) PR NEWSWIRE - Bando McGlocklin Capital Corporation (NASDAQ: BMCC) today reported record earnings for the second quarter ended Dec. 31, 1989.

Total loans outstanding jumped to $62,012,338, compared to $42,109,830 for

the same period a year earlier, an increase of 47.3 percent.

Total operating income rose to $2,252,200, a 32.9-percent increase from the previous year of $1,695,084. Net operating income for the second quarter reached $439,466, an increase of 25.3 percent from the $350,724 in the comparable 1988 period.

Net operating income per share for the three months ended Dec. 31, 1989, increased to $.215 per share from the $.172 per share the prior year, an increase of 25.0 percent, based on 2,044,253 shares outstanding.

On Dec. 20, 1989, the board of directors declared an increase in the regular quarterly dividend to 22 cents per share from the previous 17 cents per share, thus increasing the annual dividend rate to 88 cents per share.

Chairman and CEO George R. Schonath said that the outlook for the remainder of fiscal 1990 is excellent. "We expect loan demand to remain strong in Wisconsin," said Schonath. "The opening of our branch office in Indianapolis is scheduled for March 1st, and we expect it to be an important new source of loans. Our goal is to increase our total loan portfolio to $80 million to $85 million by June 30th."

"Since our initial public offering on May 13, 1987, through Dec. 31, 1989, the total annual compounded rate of return on investment was 22.20 percent. I am also pleased to report that the total return on investment for the current fiscal year ending Dec. 31, 1989, was 22.19 percent."

The calculation of total return on investment is based on cash dividends, the reinvestment of cash dividends through the firm's Dividend Reinvestment Plan, and capital appreciation.

#90025p0089 01/25/1990 ~PR Newswire

LAFAYETTE, LA (JAN. 25) PR NEWSWIRE - The Exploration Company of Louisiana, Inc. ("XCL") (NASDAQ: XCOL), today issued the following quarterly activity report:

-- Grosse Isle Prospect, Vermilion Parish, La.: The Huntsberry No. 1 encountered four productive sands. The bottom sand has been completed flowing 5,317 MCF of gas per day and 480 barrels of condensate per day on a 11/64-inch choke with 8,430 psig flowing tubing pressure. The next well on this prospect should be commenced during the first quarter of 1990. XCL owns a 28.0942 percent working interest in approximately 5,000 acres.

-- Yoakum Canyon Prospect, Lavaca County, Texas: XCL continues the testing program on the Dugat No. 1 which commenced during November 1989. Logs indicate multiple sands with hydrocarbon potential in an expanded Lower Wilcox section which is in excess of 9,000 feet in thickness. Drilling was stopped while still in the Wilcox zone. The Lower Wilcox section consists of three distinct intervals each containing several separate sand bodies. Each such interval is being tested separately. Weather and mechanical problems, which have now been corrected, have delayed testing. Additional Wilcox sands above the Lower Wilcox section will probably be tested in subsequent wells rather than in the Dugat No. 1. Some of the lower sands, while productive, will be too tight to economically produce at this location, but XCL feels, as is the case at Berry R Cox Field, that they should be productive at other locations on the structure. XCL owns a 31.25 percent working interest in 3,418 acres.

-- Bob Acres Prospect, Iberia Parish, La.: The U.S.A. No. 1 encountered the prospective sands water bearing and was plugged and abandoned.

-- Chalkley Prospect, Cameron Parish, La.: XCL and Forest Oil Company have acquired a lease covering approximately 2,800 acres adjacant to the acreage on which Exxon has recently drilled the Sweet Lake No. 1, reported by Exxon to contain a pay thickness of approximately 1,000 feet with a reserve potential in excess of one trillion cubic feet of gas. Exxon has announced well locations immediately offsetting XCL-Forest's acreage to the west, while other operators are presently drilling two additional wells immediately to the east and south of the lease. The lease was obtained from major landowners in southwest Louisiana with whom XCL has had a long-standing relationship. A number of operators, including Exxon, attempted to obtain the lease, or portions thereof. Tentative plans call for the drilling of a test well by XCL and Forest later in 1990.

-- Maurepaus Tract, Southeast Louisiana: XCL has agreed to purchase a 75 percent undivided fee ownership in approximately 63,000 acres in St. James St. Charles and Ascension Parishes, Southeast Louisiana, from the landowners from whom XCL acquired the land subsequently sold to Fina. The tract is essentially untested for oil and gas production, although seismic

indicates the existence of a large, deep structure underlying a portion of the land. The purchase price for both surface and minerals is US$150 per acre for XCL's 75 percent interest. XCL, as managing partner, will immediately commence active exploration activities on the property and may sell the surface, retaining the minerals.

-- Knox Dolomite Play, Black Warrior Basin, Miss.: XCL has acquired oil and gas leases covering 50 percent of the minerals underlying in excess of 250,000 acres and varying interests up to 50 in 13,500 leased acres, in the Knox Dolomite exploration play in Mississippi. This play is an extension of the activity in the Arbuckle Dolomite near Wilburton, Okla., in which major discoveries have been announced by ARCO (11 wells producing from 20,000 to 30,000 MCF per day per well). The Knox and the Arbuckle are geologic equivalents.

-- Clear Marais (Goose Lake Prospect), Calcasieu Parish, La.: The Lyons No. 1 has been completed flowing 150 barrels of oil per day and 150 MCF of gas per day on a 4.5/64-inch choke with 5,450 psig from the Hackberry zone.

-- East Cameron Block 17, Offshore Louisiana: As a result of additional drilling and unitization, XCL has increased its interest to 25 percent in two wells, 17 percent in a third well and 1 percent in a fourth. The combined gross producing rate from the first three wells is approximately 23,000 MCFPD and 326 barrels of condensate per day.

-- East Cameron Block 9, Offshore Louisiana: Production hookup has been completed, with production expected to commence at approximately 3,000 MCF per day of gas and 90 barrels of condensate per day. XCL owns a 26.125 percent interest in this 1,805 acre lease block.

#90025p0092 01/25/1990 ~PR Newswire

UNIVERSAL CITY, CA (JAN. 25) PR NEWSWIRE - Lew R. Wasserman, chairman of the board of MCA Inc. (NYSE: MCA), today announced that for the year ended Dec. 31, 1989, the company reported the highest revenues, operating income income and earnings per share from continuing operations, net income and related earnings per share in its history. For the fourth quarter ended Dec. 31, 1989, the company reported record revenues, operating income and income and earnings per share from continuing operations. Fourth quarter and full year 1989 results include revenues of $100,000,000 (included in other operations) and a contribution to net income of $63,000,000 from the previously announced sale of the company's investment in Discovision Associates.

As previously announced, the company has determined to sell its LJN Toys subsidiary; therefore, LJN is being reported as a discontinued operation in the company's 1989 consolidated financial statements. The decision to sell LJN Toys resulted in a loss from discontinued operations of approximately $53,000,000 (after tax), which includes an approximate $30,000,000 provision for estimated loss on the planned sale of LJN Toys and the operating loss of approximately $23,000,000 for 1989. The operating results and provision for estimated loss on the planned sale of LJN are excluded from the results of continuing operations.

Revenues for the year ended Dec. 31, 1989 were $3,382,344,000 compared to $2,900,339,000 for 1988, operating income was $489,490,000 compared to $372,088,000 for 1988, income from continuing operations was $244,760,000 or $3.34 per share compared to $190,790,000 or $2.61 per share for 1988 and net income was $191,773,000 or $2.62 per share compared to $164,916,000 or $2.26 per share for 1988. Operating income increased 32 percent, income from continuing operations increased 28 percent and net income increased 16 percent compared to 1988.

Revenues for the three months ended Dec. 31, 1989 were $956,320,000 compared to $932,111,000 for 1988, operating income was $200,954,000 compared to $146,372,000 for 1988, income from continuing operations was $111,524,000 or $1.46 per share compared to $76,795,000 or $1.05 per share for 1988, and net income was $71,536,000 or $.95 per share compared to $75,714,000 or $1.04 per share for 1988. Operating income increased 37 percent, income from continuing operations increased 45 percent and net income decreased 6 percent compared to 1988.

#90025p0095 01/25/1990 ~PR Newswire

DETROIT (JAN. 25) PR NEWSWIRE - This week, domestic automakers scheduled output of 121,380 units, 44.29 percent above last week's 84,120 but 23.84 percent below the year-ago week's 159,378, Automotive News said today.

So far this year, 294,298 cars have been assembled, 48.35 percent below the 569,745 completed at this time last year.

Truckmakers targeted output of 77,815 units this week, 42.58 percent above last week's 54,577 but 18.91 percent below the year-ago week's 95,961.

Year to date, 200,841 trucks have been built, 41.84 percent below the 345,303 assembled at this point last year.

This week's estimated auto production was shared as follows: General

Motors, 43.08 percent; Ford Motor Co., 27.00 percent; Chrysler Motors, 9.64 percent; Honda of America Manufacturing, 6.52 percent; Toyota Motor Manufacturing U.S.A., 3.54 percent; New United Motor Manufacturing Inc., 3.38 percent; Diamond-Star Motors, 2.33 percent; Mazda Motor Manufacturing U.S.A. Corp., 2.09 percent; Nissan Motor Manufacturing Corp., U.S.A., 1.96 percent; and Subaru-Isuzu Automotive, 0.46 percent.

THOMASTON, GA (JAN. 25) PR NEWSWIRE - Concerning quarterly results, Neil Hightower, Thomaston Mills president and CEO, made the following statement to shareholders:

"We are pleased to report that Thomaston Mills Inc. sales and earnings continued to improve for the quarter ended Dec. 30, 1989. Sales for the quarter were $48,908,890, up 16.4 percent from the same quarter a year ago. The company earned $1,602,725 in the quarter of $.50 per share. For the six months ended Dec. 30, 1989, sales were $97,613,978, an increase of 20.4 percent, and earnings were $3,055,956 or $.95 per share.

"The company made its first shipment of comforters from the new comforter manufacturing facility in late December. Production from this new facility is on schedule.

The products from this operation have been well received by our customers, and sales for these new products are expected to increase with time.

"We experienced some slowing in the overall growth of company shipments during the month of December and prices for our products have not gone up as fast as raw material prices.

"In looking ahead, we are optimistic about the future of the company, but we detect some short term slowing in the overall U.S. economy. Gains in sales and earnings will be more difficult to achieve in the next few months. The company is well equipped and well positioned for the future and we expect Thomaston Mills' performance to be in line with our peers in the industry."

CONTACT: Neil H. Hightower of Thomaston Mills, 404-647-7131.

#90025p0103 01/25/1990 ~PR Newswire

SALT LAKE CITY (JAN. 25) PR NEWSWIRE - Research Industries Corp. (NASDAQ:

REIC) today reported second quarter fiscal 1990 earnings of $342,514 or 6 cents per share, an increase of 75 percent over the like period a year ago.

Earnings for the six month period ended Dec. 31, 1989, increased 110 percent to $632,378, or 11 cents per share, compared to $301,070, or 6 cents per share in last year's corresponding period.

Total quarterly revenues of $2.1 million reflected a 37 percent increase in healthcare products sales to $1.9 million from $1.4 million, and a decline in real estate revenues, compared to total revenues of $1.8 million in the like period last year. This healthcare products growth was led by a 48 percent increase in sales of the Firm's cardiovascular specialty catheters in the second quarter, and a 53 percent increase in cardiovascular products for the six month period. The Firm also registered gains in the sales of its private label sterile solutions and pharmaceutical products for the three months ended Dec. 31, and a decline in sales of nerve repair products.

The company's after-tax profitability in the first six months benefitted from a marked improvement in health care gross profit margins, which increased to 65 percent compared to 61 percent during the like period last year. These gross profit gains were complemented by reductions in research and development spending and interest costs, the combined effect of which increased after-tax profits in the first half to nearly 16 percent compared to 9 percent the prior year.

"While the company is very pleased with the total corporate earnings growth of 75 percent in the second quarter, this figure understates the earnings performance from our on-going health care operations, due to a real estate transaction in last year's second quarter that contributed significantly to earnings," said Gary L. Crocker, president. "Pre-tax earnings from on-going health care operations increased 157 percent to $541,000 in the second quarter compared to $210,000 last year. Similarly, healthcare operating profits for the first half increased 122 percent to $966,000. Given the recent FDA approval of additional cardioplegia products, we anticipate that revenues and earnings from on-going health care operations in the second half of fiscal 1990 will continue to increase," Crocker added.

The company is a diversified biomedical firm specializing in the development, manufacture and sale of hospital disposable products for open-heart surgery and specialty pharmaceuticals. Research Industries' common stock is traded over the counter, NASDAQ, National Market System, with the symbol REIC.

#90025p0106 01/25/1990 ~PR Newswire

BOSTON (JAN. 25) PR NEWSWIRE - Houghton Mifflin Company (NYSE: HTN) today announced that 1989 revenues passed the $400 million mark for the first time.

Net sales rose 9.8 percent to $404.4 million from $368.3 million in 1988.

Net income for the year totaled $23.0 million, compared with $24.1 million in 1988. The results reflected the restructuring of some publishing operations and increased expenses associated with changes in the school market. Earnings per share were $1.62 compared with $1.70 in the previous year.

Net sales for the fourth quarter, ended Dec. 31, 1989, rose 15.4 percent to $82.8 million from $71.8 million in 1988. The seasonal net loss for the quarter decreased significantly to $1.1 million, or 8 cents per share, from $2.9 million, or 21 cents per share, in the previous year. Fourth-quarter results for 1989 include British publisher Gollancz, which was purchased early in the quarter.

Chairman and Chief Executive Officer Harold T. Miller said, "Both the educational and general publishing segments of our business contributed to the sales gains for the year. General publishing segment sales rose 21 percent with sales of children's books turning in an outstanding performance that included three bestsellers.

"Within the educational publishing segment, the College Division contributed another record year and the School Division substantially bettered its 1988 performance. The sales growth of only 7 percent for the

educational segment reflected decreased sales of Riverside books and educational software."

Miller said, "Significant changes in the school market occurred in 1989 resulting in new curricula and textbook programs which increased publishers' development and marketing expense. Houghton Mifflin committed increased investment to the school market in 1989 in response to these changes. Results to date have been positive. The company's new reading program gained approximately 70 percent of announced adoptions in California in 1989 and is begining to win adoptions across the country.

"The company also incurred increased corporate expenses for external investment and legal advice in connection with the consolidation activity in the publishing industry." Miller said, "The internal adjustments the company made during 1989 had a short-term earnings impact, but have strengthened the company's position for the longer term. We began to see benefit from these actions in the fourth quarter and it will continue into 1990, even though increased costs associated with changes in curricula also are expected to continue.

NEWTOWN SQUARE, PA (JAN. 25) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) has appointed G. William Haines as vice president, automotive, plastics and field sales, a new position that will focus the company's sales activities to a number of key markets, with an emphasis on the automotive industry.

Haines, who had been vice president of polyols, will assume responsibility for automotive industry sales, polystyrenics sales, and management of the company's field and distributor sales, while continuing to direct ARCO Chemical's polyols business.

Haines, who joined ARCO Chemical in 1987, previously was employed by Mobay Corporation as business director, process urethane chemicals, and formerly as director, marketing and sales. He serves on the board of directors of Delaware County Community College, Philadelphia Area Council for Excellence (PACE), and Daughter Productions. He and his wife, Madelyn, and two children live in Bryn Mawr, Pa.

NORWALK, CT (JAN. 25) PR NEWSWIRE - United States Surgical Corporation

(NYSE: USS) reported today that it achieved record sales and record earnings in 1989.

Sales increased 19 percent and net income and net income per share rose 32 percent and 31 percent, respectively. Excluding special items, net income rose 22 percent and net income per share rose 21 percent over the 1988 period.

Consolidated sales for the year were $345.2 million vs. $290.9 million in 1988.

Net income was $30.6 million or $2.61 per share. Excluding the special items, net income was $28.3 million or $2.41 per share compared with $23.2 million or $2.00 per share in 1988.

For the fourth quarter of 1989, sales rose 23 percent to $93.9 million vs. $76.2 million in the comparable 1988 quarter.

Net income and net income per share rose 31 percent and 24 percent, respectively, over the comparable 1988 quarter. Net income was $7.7 million or $.63 per share compared with $5.9 million or $.51 per share in the 1988 fourth quarter.

Leon C. Hirsch, chairman, stated, "The company's record sales performance can be attributed to expanding worldwide usage of Auto Suture(R) surgical staplers, ongoing product innovations and strong sales from endoscopic products. Approximately 50 percent of 1989 revenues were derived from products introduced within the past five years."

United States Surgical Corporation is the world's largest manufacturer and marketer of surgical staplers.

TORONTO (JAN. 25) PR NEWSWIRE - Campeau Corporation today announced that its board of directors has appointed Anthony F. Griffiths and Paul D. Campbell as directors of the corporation.

Griffiths is chairman of Fairfax Financial Holdings Limited, Toronto, and is a director of a number of other Canadian companies. Campbell serves as president of Campeau Canada, the corporation's division responsible for

all of its real estate and development operations in Canada.

Resigning as directors from Campeau Corporation's board to devote their full attention to the restructuring efforts of the U.S. operations were G. William Miller, who was recently elected chairman and chief executive officer of Federated Stores, Inc. (FSI), formerly known as Campeau (United States), and Ronald W. Tysoe, the president, of FSI. Tysoe also resigned his position as president of Campeau Corporation. In addition, Byron E. Allumbaugh resigned from the Campeau Corporation board to focus his full attention on Ralphs Grocery Company where he is chairman and chief executive officer.

The board of directors also announced that it has appointed three directors, who are independent of Robert Campeau and Olympia & York, to its United States voting committee. The committee has been reconstituted by the board to vote the shares of FSI, the corporation's principal United States holding subsidiary. The directors appointed to the committee are Robert Butler, Robert Despres, O.C., and Claude Ducharme.

#90025p0116 01/25/1990 ~PR Newswire

CHICAGO (JAN. 25) PR NEWSWIRE - UAL Corporation (NYSE: UAL) today reported preliminary 1989 net earnings of $324.2 million, or $14.96 per share of common stock. These results compare to 1988 earnings from continuing operations, excluding the one-time gain on the sale of Covia Partnership interests, of $376.5 million, or $12.67 per share. UAL Corporation is the holding company whose primary subsidiary is United Airlines.

For the fourth quarter 1989, UAL Corporation reported net earnings of $6.8 million, or $0.31 per share. This compares to fourth quarter 1988 net earnings of $20.9 million, or $0.97 per share.

UAL Corporation Chairman, President and Chief Executive Officer Stephen M. Wolf characterized fourth quarter earnings, down 67 percent from year ago, as ''disappointing,'' even without buyout related effects.

In the fourth quarter, UAL recognized $60 million of actual and estimated fees and expenses incurred in connection with the merger agreement dated Sept. 14, 1989, between UAL Corporation and Airline Acquisition Corp. These charges were partially offset by a reversal of $40.7 million of accrued expense for stock appreciation rights. These two buyout related effects, when combined, depressed earnings by $11.6 million, or $0.53 per share.

Fuel expense for the fourth quarter 1989 rose 34.4 percent from the same quarter last year. The average price per gallon of jet fuel rose from 52.3 cents in fourth quarter 1988 to 69.5 cents in fourth quarter 1989.

Operating revenues for full year and fourth quarter 1989 were $9.8 billion and $2.4 billion respectively. These results compare to operating revenues for full year and fourth quarter 1988 of $9.0 billion and $2.2 billion. Yields (passenger revenue per mile flown) for full year and fourth quarter were 12.2 and 12.0 cents respectively versus 11.1 and 11.6 cents in 1988. Full year and fourth quarter revenue passenger miles were up 0.8 percent and 2.4 percent over last year.

Operating expenses for full year and fourth quarter 1989 were $9.3 billion and $2.4 billion respectively. These compare to operating expenses for full year and fourth quarter 1988 of $8.3 billion and $2.1 billion.

NEWBURYPORT, MA (JAN. 25) PR NEWSWIRE - Jack Zollinger has been named to the new position of director of marketing and business development for Henschel, a unit of SPD Technologies.

Zollinger, who had served as director of advanced programs since joining Henschel in 1989, will now perform marketing activities, supervise the sales engineering, customer service, contract administration and

subcontracting sales divisions in addition to developing worldwide acquisition, licensing and joint venture opportunities.

Prior to joining Henschel, Zollinger spent 22 years in the U.S. Navy before retiring in 1987 and obtaining his MBA degree from Dartmouth College's Amos Tuck School of Business Administration.

His naval experience includes three years in the Pentagon's Office of Naval Intelligence, where he receivad the meritorious service medal for service as project manager and assistant technical director for a classified research and development effort, and as operations officer for the special projects division.

Earlier in his naval career, Zollinger held posts as the chief engineer on a nuclear attack submarine, assistant operations officer, Submarine Force Commander, U.S. Atlantic Fleet, and division officer on a nuclear attack submarine.

Zollinger received a BS degree in electrical engineering from North Carolina State University. He and his wife are residents of Exeter, N.H.

Henschel is the nation's largest designer and manufacturer of ship control and interior communications systems for the U.S. Navy and the commercial maritime market. Its headquarters and principal manufacturing, engineering and research facilities are in Newburyport.

#90025p0122 01/25/1990 ~PR Newswire

BRISTOL, CT (JAN. 25) PR NEWSWIRE - Barnes Group Inc. (NYSE: B) today announced it has taken a $6.5 million pre-tax charge in the fourth quarter to cover restructuring costs at its Associated Spring group. The charge reduced 1989 net earnings by 68 cents a common share.

For the fourth quarter, after the restructuring charge, the company had a net loss of $0.5 million, or 8 cents a common share, against net income applicable to common stock of $3.5 million, or 63 cents a common share in the same 1988 quarter. Sales for the fourth quarter were $126 million, up 6 percent from $119 million a year ago.

For all of 1989, net income applicable to common stock was $11.1 million, or $1.94 per share, a drop of 34 percent from $16.7 million, or $3.06 per share in 1988. Sales for the year rose 3 percent to $511 million from $496 million, exceeding the $500 million mark for the first time in the company's 133-year history.

Wallace Barnes, chairman and chief executive officer, said the $6.5 million provision covers the anticipated costs of making further improvements at the company's valve spring plants in Saline, Mich., and Burlington, Ontario. "These improvements will enable us to achieve the full profit potential from the automated production lines at the two plants," he said.

"Although this project is taking longer to reach its goals and has been more costly than originally expected, good gains were made in 1989, and we expect major progress in 1990," he added.

The charge also includes severance costs related to staff cutbacks at Associated Spring's group headquarters and the costs of relocating the remaining headquarters employees to refurbished space in the Bristol division manufacturing plant. It also includes costs associated with the elimination in 1990 of unprofitable product lines at several spring plants in North America.

"Although 1989 was a disappointing year overall for the company, there were a number of bright spots, and most of our operating units made good gains in the fourth quarter," Barnes said.

Bowman Distribution, the company's largest and most profitable group, continued to make good progress in 1989. Its sales were up 8 percent over 1988 to $231 million, and operating income climbed 5 percent to $29.2 million. The group was paced by strong growth in both sales and profits in its direct-to-user businesses in North America, but its overall profit was dampened by softness in the markets served by its Pioneer automotive rebuilder business.

#90025p0127 01/25/1990 ~PR Newswire

PITTSBURGH (JAN. 25) PR NEWSWIRE - National Intergroup Inc. (NYSE: NII) today reported that net income for the third quarter of fiscal year 1990

increased to $30.7 million, or $1.35 per share after preferred dividends, on sales of $717.7 million, compared to net income of $22.5 million, or $0.97 per share on sales of $667.5 million in the third quarter last fiscal year.

In the nine months of fiscal year 1990, NII's net income increased to $52.3 million, or $2.21 per share on sales of $2.1 billion, compared to a net loss of $(18.4) million, or $(1.04) per share on sales of $1.9 billion in the nine months last fiscal year.

"FoxMeyer Drug continues to show year-to-year profit and sales improvement " said Howard M. Love, NII's chairman and chief executive officer. "Cash generated from operations, the sale of aluminum assets and the repayment of notes from Weirton Steel have enabled us to strengthen NII's balance sheet significantly. As a result, NII's long-term debt has been reduced to $219.3 million from $390.4 million in the third quarter last year. We are making increasing progress with our strategy of divesting our metals businesses and improving the operations of our wholesale distribution businesses. Negotiations for the sale of our interest in the aluminum smelter and our interest in National Steel are continuing."

The current third quarter and nine months include a $14.7 million after-tax gain ($20.2 million pre-tax) on the sale of two aluminum divisions; extroardinary items of $10.2 million and $16.4 million, respectively, from utilization of net operating loss carryforwards; and $2.1 million and $10.9 million, respectively, for after-tax gains on the repurchase of subordinated notes at discount. The year ago third quarter and nine months included an $18 million net gain on the sale of a tube company; disposition losses of $(10.7) million and $(19.4) million, respectively, for certain FoxMeyer Corp. subsidiaries; and extraordinary items of $4.4 million and $9.6 million, respectively, from utilization of net operating loss carryforwards.

#90025p0128 01/25/1990 ~PR Newswire

MINNEAPOLIS (JAN. 25) PR NEWSWIRE - AirTran Corporation (NASDAQ-NMS: ATCC), the parent company of Mesaba Aviation, Inc., today reported earnings of $341,000 or 8 cents per share for the third quarter ended Dec. 31, 1989. This compares with earnings of $293,000 or 8 cents per share for the same quarter last year.

Earnings for the nine months ended Dec. 31, 1989, were $2,668,000 or 65 cents per share compared to net income of $1,441,000 or 41 cents per share for the same period a year ago.

Operating revenues totaled $18,405,000 for the quarter, an increase of 132 percent from $7,916,000 in the third quarter of last year. For the nine months ended Dec. 31, 1989, operating revenues increased 116 percent to $52,510,000, compared to $24,337,000 for the same period last year.

Revenue passenger miles increased 97 percent to 43.6 million for the current quarter compared to 22.1 million during last year's third quarter. Available seat miles for the quarter rose 100 percent to 84.5 million from 42.3 million flown last year. The Minneapolis-based carrier's third quarter system-wide load factor was 51.5 percent down from 52.4 percent reported last year.

Robert D. Swenson, president and chairman of AirTran, said the quarter's figures were lower than anticipated due to record-setting cold temperatures in December which adversely impacted the carrier's operations during the busy holiday travel season.

Mesaba operates as Northwest Airlink under a marketing agreement with Northwest Airlines to provide regional airline service at Minneapolis/St. Paul, Detroit and Milwaukee. A Twin Cities-based airline, Mesaba currently provides service to 34 cities in 10 states.

RESTON, VA (JAN. 25) PR NEWSWIRE - Lafarge Corporation (NYSE: LAF), one of the largest manufacturers of cement and construction materials in North America, today reported record earnings for 1989 of $100 million, a 7 percent increase from 1988, when the company posted its previous record of $93.5 million.

It was the seventh consecutive year that Lafarge has improved its earnings.

Earnings per common equity share for the year, based upon a greater number of shares outstanding in 1989, were $1.98, compared with $1.96 in 1988.

The company's net sales rose 14 percent in 1989 to $1.5 billion, compared with $1.3 billion in 1988.

"I am pleased to report another record year of earnings growth for Lafarge especially in light of the construction slowdown that occurred in some of our markets and higher interest costs relating to our investment program," said Robert W. Murdoch, Lafarge Corporation president and chief executive officer. "In 1989 we significantly expanded and strengthened our positions in both construction materials and cement, and we are optimistic that our development strategy will enable us to continue to grow profitably in the 1990s."

Income from the company's construction materials and waste management operations increased 24 percent over 1988. The impact of stagnant construction markets in Quebec and the Southwestern United States was more than offset by strong activity in Ontario and western Canada.

Income from cement operations increased approximately 2 percent over 1988 due to contributions from recent acquisitions and sustained construction activity in the company's Great Lakes region. These favorable results

were partially offset by slightly lower contributions from the company's other cement operations.

Cement sales volume for 1989 rose 3 percent to 12 million tons. Average cement pricing last year improved 2 percent while the average cost of sales rose 1 percent on a per-unit basis.

Interest expense increased $5.6 million over 1988, primarily as a result of higher capital expenditures in 1989. Conversely, Lafarge benefited from the increasing value of the Canadian dollar, as the company receives a large portion of its revenues in Canadian currency.

Net income for the three months ending Dec. 31, 1989, was $20.4 million, identical to the last quarter of 1988. Per-share earnings declined 1 cent to 40 cents due to the larger number of shares outstanding in 1989. Even though revenues for the fourth quarter of 1989 rose 19 percent to $394.2 million, earnings were flat because of higher interest expense and the absence of divestment gains reported in the last quarter of 1988.

Lafarge Corporation and its Canadian subsidiary, Lafarge Canada Inc., together form one of the largest manufacturers of cement and construction materials in North America. They operate 14 full- production cement plants with a combined annual rated capacity of 11 million tons, supplemented by six grinding plants and four deep-water ocean import terminals.

Lafarge's principal markets are located throughout Canada and a major portion of the United States. Lafarge is a significant supplier of concrete-based construction materials, particularly in Canada, where Lafarge Canada Inc. is the largest producer of ready-mix concrete and aggregates.

MAUMEE, OH (JAN. 25) PR NEWSWIRE - Trinova Corporation (NYSE: TNV) announced today a new program to purchase up to three million shares of its outstanding common stock upon completion of an existing program to purchase three million shares. As of January 19, 1990, the Company had repurchased 2.7 million shares under the existing program initiated in 1987.

Common shares will be purchased for cash from time to time in the open market and through privately negotiated transactions. The Company is not making a commitment to purchase a specific number of shares. Purchased shares would become treasury shares and would be available for general

corporate purposes.

In a separate action, the Board of Directors declared a regular quarterly cash dividend of 17 cents per share on common stock, payable on March 15, 1990 to shareholders of record on February 20, 1990.

Trinova had 32,973,726 common shares outstanding at December 31, 1989. The Company has paid dividends continuously on its common stock since 1933.

Trinova - through Aeroquip Corporation and Vickers, Incorporated - supplies power and motion control systems and components and custom-engineered plastic products to the industrial equipment, transportation, and aerospace/defense markets.

CONTACT: Warren N. Bimblick (investor), (419) 867-2290; or Thomas J. Ainsworth (press), (419) 867-2298; both of Trinova Corporation.

#90025p0146 01/25/1990 ~PR Newswire

NEW ORLEANS (JAN. 25) PR NEWSWIRE - The Louisiana Land and Exploration Co. (NYSE: LLX) (LL&E) today announced that unaudited consolidated net earnings rose more than ten-fold in 1989's fourth quarter to $10.2 million or $0.36 per share.

In the comparable 1988 quarter net earnings were $1.0 million ($0.03 per share).

The company said that average crude and condensate prices rose $5.24 per barrel in the fourth quarter and were $2.89 per barrel higher for the full year of 1989. These increases, coupled with a consequent rise in refined product prices, were the major factors contributing to the increase in gross revenues in both periods. Primarily as a result of the previously

announced sale of non-strategic producing oil and gas properties, liquids production and natural gas sales were lower in 1989 than in 1988. Liquids production, however, was higher in the fourth quarter because of new production coming onstream since 1988's fourth quarter.

Costs and expenses fell by nearly $161.0 million in 1989, in part because of the inclusion in 1988 of the previously mentioned restructuring charge and litigation provision which totaled $99.5 million before taxes. Significant reductions were also achieved in most other expense categories. The increase in costs and expenses during 1989's fourth quarter was mainly the result of increased refinery feedstock costs and a higher level of dry holes and exploratory charges.

Net cash flow from operating activities rose to $269 million in 1989, as compared to $229 million in 1988. Capital and exploration expenditures, which totaled $167 million in 1989, were below the amount originally budgeted for the year because of unanticipated delays in the commencement of a number of joint venture projects and wells. As previously announced, excess operating cash flow along with the proceeds of asset sales were utilized to reduce debt and repurchase outstanding capital stock. Over $93 million was expended to purchase nearly 2.6 million shares of stock during 1989 and total debt was reduced by approximately one-third, to $379 million at year-end 1989.

#90025p0149 01/25/1990 ~PR Newswire

TULSA, OK (JAN. 25) PR NEWSWIRE - The Federal Energy Regulatory Commission (FERC) has issued a certificate for Kern River Gas Transmission Company to construct its pipeline from southwest Wyoming to California.

"We plan to start construction in the fourth quarter of this year and have the pipeline in service by the end of 1991," said Cuba Wadlington Jr., executive vice president of Kern River. "We expect now to sign additional firm transportation contracts that will fully subscribe our pipeline."

Kern River's current firm commitments for 935 million cubic feet per day (MMcfd) consist of 370 MMcfd in long-term contracts and letters of intent for 565 MMcfd. The letters of intent are expected to be turned into firm contracts by the end of January.

Kern River began detailed design and engineering work for the pipeline last summer and is scheduled to award construction contracts during the third quarter of this year.

The 36-inch-diameter pipeline will be 904 miles long, and will provide California with gas supplies from Canada and the Overthrust Region of the Rocky Mountains. Initial capacity of the pipeline will be 700 MMcfd.

The Kern River pipeline will originate in Wyoming and terminate in Kern County, Calif., where the natural gas will be used for enhanced oil recovery, production of electricity, cogeneration of electricity and steam and distribution by gas utilities.

On Dec. 15, a California administrative law judge selected Kern River from among the competing pipelines as the best project to serve that state's needs for natural gas into the next century. The California Public Utilities Commission is to act on that recommendation later.

Kern River is a joint venture of The Williams Companies, Inc. (NYSE: WMB) and Tenneco Inc. (NYSE: TGT). The Williams Companies, Inc. is a Tulsa-based corporation that operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines, which transport natural gas and petroleum products.

Tenneco Inc., is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals, and minerals.

#90025p0153 01/25/1990 ~PR Newswire

CINCINNATI (JAN. 25) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced sales and earnings for the three and six month periods ended December 31, 1989. The merger on November 30, 1989 with the Noxell Corporation was accounted for as a pooling of interests and the results of Noxell are included beginning July 1, 1989. Since Noxell operations were not material to the company's results, prior years have not been restated.

Worldwide net sales for the October-December period, the second quarter of Procter & Gamble's fiscal year, were $6,025,000,000, an increase of 14 percent over net sales of $5,268,000,000 for the same three months a year ago. The increase in sales was due primarily to higher unit volume.

Net earnings for October-December were $350,000,000, an increase of 8 percent compared to net earnings of $325,000,000 in the same period a year ago. Net earnings per share were $.98 compared with $.96 for the second quarter last year. Second quarter net earnings included a gain of $91,000,000, or $.26 per share, from the previously announced sale of the worldwide Crush soft drink business, and earnings were reduced by $174,000,000 after-tax, or $.50 per share, for the establishment of a reserve to complete the consolidations of certain major worldwide manufacturing facilities.

Excluding both of these one-time effects, net earnings for the quarter totaled $433,000,000, a 33 percent increase over the same quarter last year, and net earnings per share were $1.22. The increase in earnings was due primarily to higher unit volume and improved margins. The benefits from the manufacturing consolidations, together with those announced previously, will reduce manufacturing costs and improve cash flow in the decade ahead.

For the first six months of the fiscal year, worldwide net sales were $11,742,000,000, an increase of 11 percent over sales of $10,535,000,000 for the same period a year ago. Net earnings amounted to $914,000,000, an increase of 26 percent over net earnings of $725,000,000 for the six months one year ago. The cost impact of the consolidations reserve was almost wholly offset by the gain on the sale of the Crush business and the favorable settlement in the July-September period of the litigation

applicable to our Duncan Hines cookie business. Net earnings per common share were $2.57 compared with $2.14 for the same period of last fiscal year.

Procter & Gamble had sales of $21,398,000,000 during fiscal 1988-89. The company manufactures and markets a wide range of laundry and cleaning products, personal care products including pharmaceuticals, food and beverage products, and a variety of products for business and industry.

LONG BEACH, NY (JAN. 25) PR NEWSWIRE - Semper Barris, Inc. (SBI) (OTC), announced today that it has been retained by Rascoff Zysblat Organization, Inc. (RZO) to provide an interactive telephone promotion for the upcoming international "David Bowie All Request Sound & Vision Concert Tour."

"The whole David Bowie organization looks forward to providing the public with an opportunity to tell David what songs he should sing on the first all request concert tour in history, as well as providing David Bowie fans with the opportunity to win concert tickets and a week on tour with David Bowie and the band," said William Zysblat, president of RZO.

Callers in the United States will dial 1-900-2-BOWIE-90 (1-900-226-9439). The call will cost $2 for the first minute and $1.50 for each additional minute. Callers will have the opportunity to win a week on tour with David Bowie in Europe and tickets to Bowie concerts. In addition, Bowie fans will be able to help pick the songs David Bowie will sing on the first all request concert tour in history.

The interactive promotion commenced Jan. 23, 1990, in the United States, Ireland and the United Kingdom and will expand to include Australia, France, Holland, Italy and Sweden. The promotion is being done in conjunction with Telephone International Media, Ltd. (T.I.M.) of London. Gordon Simpson, president of T.I.M., said, "We are most excited to be a part of the first international telephone promotion. We look forward to working with Semper Barris and the David Bowie organization to handle all telephone and promotional operations outside of North America."

European and Pacific Rim fans will be offered the same opportunity as U.S. callers with trips to North America as grand prizes. U.K. Bowie fans will call 098-66-66-60 and fans in Ireland will call 03000-1-66-00. Phone numbers for the other countries to go "on-line" will be released as soon as they become available.

"We are extremely excited and proud to have designed this international interactive promotion, the first of its kind. This promotion is sure to create worldwide awareness of the David Bowie All Request Sound & Vision Concert Tour," said Andrew Batkin, SBI's president.

David Bowie announced his All Request Sound & Vision Concert Tour on Jan. 23, 1990, at a worldwide simulcast press conference in London.

#90025p0155 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - Lower sales and earnings for the second quarter and first half of the current fiscal year were reported today by Johnston Industries, Inc. (NYSE: JII).

The company is a producer of textiles primarily for the industrial and home furnishings markets.

Sales in the quarter ended Dec. 31, 1989, were $26,152,000 compared to $26,856,000 in the corresponding quarter of the previous fiscal year. For the first six months of the current fiscal year, sales totalled $52,487,000, and were $55,362,000 in the comparable period a year earlier.

The company said continued increases in costs, which cannot be fully recovered in selling prices, are adversely affecting earnings this year. In addition, it reported that a reduction of about $860,000 in the 35 percent equity in net assets of Greater Washington Investors (GWI), also contributed to lower earnings this year. GWI is a venture capital company traded on the American Stock Exchange.

In the most recent quarter, net income amounted to $242,000, or five cents a share, compared to $1,831,000, or 36 cents a share, a year ago. For the six months ended Dec. 31, 1989, net income was $870,000, equal to 17 cents a share, compared to $4,137,000, or 81 cents a share, in the prior year.

ATLANTA (JAN. 25) PR NEWSWIRE - The John H. Harland Company (NYSE: JH) today reported record financial results for 1989 and fourth quarter.

Sales for the Atlanta-based company were $344.7 million, up 3.4 percent from $33.3 million in 1988. Earnings increased to $58.1 million, up 8.9 percent from last year's $53.3 million. Net income per share was $1.54, compared with $1.41 in 1988. Return on equity was 22.5 percent, marking the 16th consecutive year Harland's return on equity exceeded 20 percent.

Profit margins rose to 16.8 percent in 1989.

Harland extended its consecutive years' growth record with sales increasing for the 40th consecutive year, and earnings and dividends both rising for the 36th straight year. The company's combined growth record is one of the best of any firm on the New York or American stock exchanges.

The company also reported record fourth quarter sales and earnings. Sales for the three months ended Dec. 31, 1989 were $85.6 million, a 2.9 percent increase over 1988's $83.2 million. Earnings were $15.0 million, up 6.9 percent from $14.1 million in 1988. Net income per share was $.40, compared with $.37 in 1988. Return on equity was 22.3 percent for the fourth quarter.

Both of Harland's subsidiaries, J. Williams Company and Scantron, contributed to the company's success in 1989. "In addition to its primary educational markets, Scantron expanded product development and marketing efforts in the commercial sector in 1989," said J. William Robinson, Harland chairman and chief executive officer.

In 1989, Harland broke ground for its 43rd check printing plan in Wilkes-Barre, Pa. to serve financial institutions in the northeast. The company also expanded its Baltimore facility, and moved into a new Miami plant.

During the year, Harland was added to Standard & Poor's 500-stock index. In addition, the company was recognized in the book "The 100 Best Stocks To Own in America," and by Forbes as one of the 200 best small companies in America. Fortune called Harland a "Company to Watch," and Barron's featured Harland's "Unchecked Growth." Business Week and Financial World also recognized Harland as one of their "Top 1000."

During the year, the board authorized the repurchase of up to 1. 5 million shares of company stock to cover outstanding stock options granted and expected future purchases of stock under the employee stock purchase program. As of Dec. 31, 1989 the company had repurchased 400,000 shares.

Harland is a major national participant in the financial and educational fields with production facilities across the United States and in Puerto Rico.

#90025p0159 01/25/1990 ~PR Newswire

ATLANTA (JAN. 25) PR NEWSWIRE - American Business Products Inc. (NYSE: ABP) today reported that the company achieved record sales and earnings

for 1989. It was the company's 51st consecutive year of record sales. Fourth quarter sales and earnings also set new records.

Net income increased 4.7 percent for the year as sales gained more than 8 percent, Thomas R. Carmody, president and chief executive officer, announced. The fourth quarter produced an 8.5 percent growth in net income with sales up 3.9 percent, Carmody said.

For the 12 months ended Dec. 31, net sales were $387 million compared with $358 million for 1988. Net income for the year increased to $13.6 million compared with $13 million for 1988.

Earnings per share advanced to $1.90 for 1989 compared with $1.82 per share for 1988, as adjusted for a 3-for-4 stock split paid June 30, 1989.

Sales reached an all-time fourth quarter record at $97 million compared with $93 million for the last quarter of 1988. Net income for the quarter advanced to $4.1 million compared with $3.8 million for the fourth quarter of 1988.

Earnings per share for the fourth quarter increased to 57 cents compared with 53 cents per share for fourth quarter 1988 as adjusted for the split.

American Business Products, based in Atlanta, is a leading supplier of forms for computers and other electronic equipment; envelopes and specialty mailers; book printing, and other business supplies with 46 production facilities in the continental United States and Hawaii. ABP's major operating companies are Curtis 1000 Inc., Vanier Graphics Corp., BookCrafters USA Inc. and American Fiber-Velope Mfg. Co. The company also is a joint-venture partner in Curtis 1000 Europe GmbH in Neuwied, West Germany.

YPSILANTI, MI (JAN. 25) PR NEWSWIRE - The success of the Ford Ypsilanti Plant's state-of-the-art starter motor dramatizes the employees' commitment to quality that earned the plant the prestigious Preferred Quality Q1 Award, a Ford executive said today.

The permanent magnet starter was introduced on the 1989 Lincoln Continental, Ford Thunderbird SC and Mercury Cougar XR7.

Several hundred employees gathered in the plant to hear remarks by Marx; Bob Womac, general manager of Ford's Electrical and Fuel Handling

Division; Ypsilanti Plant Manager Ken Miller; Ben Storemski, chairman of UAW Local 849; Bob King, director of UAW Region 1A; and several others. Miller and Storemski accepted the award on behalf of the plant.

Throughout the ceremony the emphasis was on continuous quality improvement through quality products, employee training, and state-of- the-art methods of quality product assurance.

The Ypsilanti Plant is in the midst of a $100 million modernization program and has evolved into a dynamic modern facility using new equipment and teamwork to manufacture world class products.

A training academy to prepare the work force to implement programs on continuous improvement was instituted at the plant in 1984 and is staffed with Eastern Michigan University instructors. The specialized pragmatic program for adult learners includes courses from basic skills education to computer language applications and is the first of its kind in the midwestern states.

The Ypsilanti Plant is a worldwide supplier of electromechanical devices for Ford and other auto manufacturers. Among its major products are starter motors, ignition coils, distributors, and front and rear bumper shocks. The plant employs 1,600 and has more than 1 million square feet of floor space.

ANDOVER, MA (JAN. 25) PR NEWSWIRE - Andover Bancorp, Inc. (NASDAQ: ANDB) today announced its operating results for the fourth quarter and for the year ended Dec. 31, 1989. Bancorp's assets at year-end had grown to $689 million from $644 million at the end of 1988. The capital-to-assets ratio for Andover Bancorp is 14.0 percent.

A net loss of $2,466,000, or 58 cents per share, was reported for the fourth quarter of 1989, compared to net income of $1,955,000, or 41 cents per share, in the fourth quarter of 1988. The net loss included net gains before the effect of taxes, on the sales of securities and loans amounting to $123,000 in the fourth quarter of 1989 compared to net gains of $232,000 in the fourth quarter of 1988. The loss in the fourth quarter was due to an increase of $5.2 million in the provision for loan losses.

For the year ended Dec. 31, 1989, net income was $2,183,000 or 49 cents per share compared to net income of $7,848,000 or $1.59 per share for the year 1988. Net income included net gains, before the effect of taxes, on securities and loan sales amounting to $1,207,000 for 1989 as compared to

$1,557,000 for 1988.

As of Dec. 31, 1989, the reserve for loan losses totals $8.4 million, or 1.72 percent of loans outstanding. Non-performing loans amount to $19.4 million, while other real estate owned totals $8.2 million. At Dec. 31, 1988, there was $9.0 million in non-performing loans and no other real estate owned.

Robert M. Henderson, chairman and chief executive officer, stated that, "The decision to increase the loan loss reserve in the fourth quarter is primarily the result of the deteriorating economy in New England and the increasing level of non-performing loans in our portfolio. These actions should be seen as an appropriate move to account for problems that are affecting not only Andover Bancorp, but the New England banking industry.

During 1989, Andover Bancorp's major subsidiary, Andover Bank, experienced a favorable increase in both deposits and residential mortgage loan volume. Deposits grew by $75 million or 17 percent for the year. Residential mortgage loan origination volume increased substantially, up $51 million over 1988. A majority of the $122 million in residential originations in 1989 were fixed rate loans which were sold into the secondary market.

Andover Bancorp, Inc. recently declared its 14th consecutive dividend payable at 20 cents per share on March 9, 1990 to shareholders of record at the close of business on Feb. 9, 1990.

Andover Bancorp, Inc. is the parent holding company of Andover Savings Bank. Andover Savings Bank is a Massachusetts chartered savings bank organized in 1834 and headquartered in Andover, Mass., approximately 25 miles north of downtown Boston. The bank operates branch banking offices in West Andover, Lawrence, Metheun, North Andover and Tewksbury, Mass.

#90025p0163 01/25/1990 ~PR Newswire

CHICAGO (JAN. 25) PR NEWSWIRE - R.R. Donnelley and Sons Co. (NYSE: DNY), the nation's largest printer, reported net sales for 1989 increased 8.5 percent to $3.122 billion. For the full year, net income was $221.9 million or $2.85 per share, an increase of 8.0 percent over 1988. Normalizing 1989 and 1988 for the onetime, positive effects of unique tax-related and land-sale transactions, earnings per share increased 9.3 percent year to year.

In the fourth quarter, net sales were $897.9 million, an increase of 2.0 percent over the corresponding prior-year period. Net income grew faster than sales in the fourth quarter, increasing 5.5 percent to $68.1 million or 87 cents per share.

''The sales gains resulted primarily from a higher volume of services

provided to customers. As expected, our sales growth rate was smaller in the fourth quarter for several reasons,'' said John R. Walter, Donnelley chairman, president and chief executive officer.

''Delayed product introductions from computer documentation customers, first noted in the third quarter, continued and affected the fourth quarter's sales growth rate. Unfavorable exchange rate variations, flat to-lower paper pricing, and a change in the sales mix also affected the quarter's rate, along with somewhat slower trade book activity levels and some work shifts into the first quarter of 1990,'' he said.

Capital spending for 1989 was $238 million. ''Capital programs included expansion and replacement capacity across the entire business. We started up several new manufacturing facilities in 1989 and started construction late in the year on our new book manufacturing plant in Reynosa, Mexico. That plant will start up during the first quarter of 1991. We are continuing to invest to meet the growing needs of our customers by increasing capacity, improving schedules and strengthening our industry leadership position,'' Walter said.

The company reported that 1990 capital spending is estimated at $250 million, an amount somewhat less than previously expected, reflecting the elimination of certain previously planned capital spending as a result of the agreement to acquire the Meredith/Burda companies for approximately $570 million. The acquisition is expected to close during the first quarter. Meredith/Burda is a high-quality printer of catalogs, newspaper inserts and magazines, and has an excellent customer base. Meredith/Burda reported sales of $456 million for its fiscal year ending June 30, 1989, and operates four printing plants and three pre-press facilities in the United States.

The Donnelley board of directors today declared a quarterly dividend of 24 cents per share, an increase of 2 cents over the previous quarterly rate of 22 cents. The dividend is payable on March 1, 1990 to shareholders of record on Feb. 5, 1990.

#90025p0166 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - LIN Broadcasting Corporation (NASDAQ: LINB) reported today a net loss for the fourth quarter of $15,005,000. Included in the loss are nonrecurring charges of $69,887,000 principally attributable to the termination announced in December of the agreement and plan of merger with BellSouth Corporation. Without the impact of these nonrecurring charges, net income would have increased to approximately

$31,100,000 from $25,944,000 in the fourth quarter of 1988. The per share loss in the quarter was $.28. The nonrecurring charges for the quarter amounted to $.86 per share. Without the impact of these nonrecurring charges, earnings per share would have been $.58 as compared with $.49 in the fourth quarter of 1988.

Media operating income before depreciation and amortization increased 2 percent while operating income before depreciation and amortization attributable to LIN's share of the cellular telephone operations increased 54 percent over the same period. (See supplemental information attached.)

Net income and per share earnings for the year ended Dec. 31, 1989 amounted to $57,366,000 and $1.07, respectively. These results included nonrecurring expenses related to BellSouth and takeover defense costs of $76,629,000 and reduced net income and per share earnings by $50,575,000 and $.95, respectively. Without such costs net income and per share earnings would have been approximately $107,900,000 and $2.02, respectively as compared with net income of $82,121,000 and per share earnings of $1.54 for the year ended Dec. 31, 1988.

During the fourth quarter of 1989, cellular customers on the systems in which LIN has interests increased by approximately 41,000. This compares with an increase of 25,000 in the fourth quarter of 1988, and 33,000 customers in the third quarter of 1989. As of Dec. 31, 1989, cellular operations in which LIN has interests had approximately 369,000 customers. As of this date, broadcast orders for the first quarter of 1990 are running ahead of the prior year.

For guidance as to the progress of LIN's operations, including all of its cellular investments on a proportionate consolidation basis, we have attached supplemental information which is not a part of the company's financial statements.

LIN Broadcasting Corporation common stock is quoted on the NASDAQ National Market System under the symbol LINB. The company is engaged in cellular telephone operations, television broadcasting, and specialty publishing. LIN has major ownership interest in cellular telephone systems serving the metropolitan areas of New York City, Los Angeles, Philadelphia, Dallas-Fort Worth and Houston, owns and operates seven network-affiliated television stations, and publishes advertiser- supported hardcover magazines placed in the rooms of distinguished hotels in 38 metropolitan areas.

#90025p0167 01/25/1990 ~PR Newswire

GREAT NECK, NY (JAN. 25) PR NEWSWIRE - For the second quarter of fiscal 1990 ended Dec. 29, 1989, Avnet Inc. (NYSE: AVT) today reported net income of $16.7 million, or $.46 per share, on sales of $431.7 million compared with last year's second quarter net income of $11.8 million, or $.33 per share, on sales of $495.4 million.

For the first half of fiscal 1990, Avnet reported net income of $33 million, or $.91 per share, on sales of $869.7 million compared with last year's first half net income of $23.5 million, or $.66 per share, on sales of $986.9 million.

Avnet's chairman and chief executive officer, Leon Machiz, said that despite Avnet's sales decline, its net after-tax operating margins improved successively from 2.4 percent of sales in its second fiscal quarter of 1989 to 2.9 percent in the third quarter, 3.3 percent in the fourth quarter, 3.7 in its first quarter of fiscal 1990 and 3.9 percent in the second quarter.

He further noted that the company's improved net income for both this year's second quarter and first half was due to a significant increase in the Electronic Marketing Group's earnings in each period which resulted from reducing operating expenses, increasing margins, improving asset management and eliminating losses by the actions that were taken in the prior fiscal year in divesting unprofitable units of the group.

The Electronic Marketing Group's second quarter sales, which represented 82 percent of consolidated sales, were about 10 percent lower than last year's second quarter sales but 2.7 percent higher than in the preceding quarter.

The uptrend in the daily booking rate in September, October and November did not continue through December. Nevertheless, the group's second quarter net income was 69 percent higher than in the prior year and 15 percent higher than in the preceding quarter.

The Video Communications Group's second quarter sales, which were 7 percent of consolidated sales, declined 43 percent from the prior year's quarter due principally to shutting down certain of its Taiwan operations. It second quarter earnings were accordingly substantially lower than in the year earlier quarter.

The Electrical and Industrial Group's second quarter sales accounted for 11 percent of consolidated sales and its second quarter sales were about 2 percent lower and earnings were somewhat lower than in the prior year's period.

Machiz also said that Avnet's $277 million cash and marketable securities portfolio at the end of December was about $15 million higher than at the end of September and $154 million higher than at the end of December of the prior year.

#90025p0168 01/25/1990 ~PR Newswire

BOSTON (JAN. 25) PR NEWSWIRE - XTRA Corporation (NYSE: XTR) announced today first quarter earnings (three months ended Dec. 31, 1989) from continuing operations of $5,244,000 or 64 cents per share compared to $8,092,000 or $1.08 per share (98 cents per share on a fully diluted basis) for the same period of the prior year. First quarter revenues from continuing operations were $58,105,000 compared to revenues of $56,319,000 during the same quarter of the preceeding year.

Charles F. Kaye, chairman and chief executive officer noted that "Earnings for the first quarter of fiscal 1990 have improved significantly over those experienced in the fourth quarter of 1989 as utilitzation has rebounded sharply due to increased demand, and reductions in our piggyback trailer fleet. In comparison, the fourth quarter of 1989 realized significantly lower earnings, primarily due to lower utilization rates as a result of depressed demand. In contrast, the first quarter of fiscal 1989 was a record high for quarterly earnings due to strong demand. Additionally, the strength of the first quarter's rebound can be measured by the fact that pretax earnings for the period exceed those of the previous three quarters combined.

The company's second fiscal quarter, the three months ending on March 31, tends to be the seasonal low point in transportation activity following the very active holiday shipping period. XTRA's operations to a great extent reflect patterns of transportation activity and, as a result, the utilization rates of its equipment and its reported earnings for the second quarter have historically reflected this seasonality.

Current capital budget commitments are approximately $64 million for fiscal 1990. As previously reported, the company expects its 1990 capital expenditures to be approximately $70 million.

XTRA also announced that its board of directors declared the regular quarterly dividend of 18 cents per share payable on Feb. 28, 1990 to common stockholders of record on Feb. 14, 1990. The board also declared the regular quarterly dividend of $.484375 per share on the $1.9375 Series B Cumulative Convertible Preferred Stock payable on March 1, 1990 to preferred stockholders of record on Feb. 14, 1990.

XTRA Corporation is engaged is transportation leasing services, primarily the leasing, on an operating basis, or rail/intermodal equipment, including piggyback trailers and domestic containers and chassis, as well as over-the-road trailers.

#90025p0169 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - John R. Stafford, chairman, president and chief executive officer of American Home Products Corporation (NYSE: AHP), announced that at its meeting held today, the board of directors increased the quarterly dividend on the common stock to one dollar and seven and one-half cents ($1.075) per share, payable March 1, 1990 to stockholders of record at the close of business on Feb. 13, 1990.

The board also approved a two-for-one split of the company's common stock. The stock split is subject to stockholder approval of an increase in the number of authorized shares of common stock from 210,000,000 to 600,000,000 at the company's annual meeting to be held on April 18, 1990. If the required stockholder approval is secured, it is expected that the additional shares will be mailed on or about May 18, 1990 and that the record date for stockholders entitled to receive such shares will be the close of business on April 19, 1990.

At the new rate, the indicated dividend for the year 1990, on a pre-split basis, would be $4.30, a 10 percent increase over the 1989 dividend of $3.90. On a post-split basis, the indicated dividend for the year 1990 would be $2.15. This represents the highest level of dividends paid by the corporation and marks the 38th consecutive year of increase in the annual dividend rate.

#90025p0172 01/25/1990 ~PR Newswire

TEL AVIV, ISRAEL (JAN. 25) PR NEWSWIRE - ECI Telecom Ltd. (NASDAQ: ECILF) and a Montreal-based wholly owned subsidiary ("Claridge") of Claridge

Israel Inc. (which is a Canadian investment firm owned primarily by Charles R. Bronfman), announced today the consummation of the $11 million acquisition by Claridge of 1,000,000 new shares of ECI.

Claridge has acquired an additional 706,714 ECI shares for $7,067,140. Of this amount, $5,067,140 was paid to Clal Industries Limited (a subsidiary of which is the largest shareholder of ECI) in exchange for options owned by Clal. The balance of $2,000,000 was paid to ECI upon the exercise of the options. Part of the proceeds were used to repay a $2 million loan made to ECI by Clal in 1987.

As a result of the above transactions, Claridge owns approximately 25 percent of the 6,904,739 outstanding and fully paid shares of ECI and the holdings of the Clal Group are reduced to approximately 46 percent. It was agreed that, subject to certain exceptions, Claridge will undertake not to sell any of the shares so acquired for a period of five years.

ECI has also granted Claridge options to acquire up to an additional 350,000 shares at any time during the next four years at a price of $12.50 per share. The full exercise of these options would increase Claridge's holdings to approximately 28 percent while reducing the holdings of the Clal Group to approximately 44 percent.

Claridge has investments in a number of Israeli industrial enterprises. Bronfman has previously stated that his investment in ECI is consistent with his interests in Israeli export oriented high technology industry and reflects his confidence in the future prospects of ECI.

ECI Telecom designs, develops and markets telecommunications and communications systems employing digital speech processing, switching technologies and ISDN (Integrated Services Digital Network) compatible technologies. These systems are designed to increase the conversation and data carrying capacity of telecommunications networks operated by domestic and international long-distance carriers, PTTs and private line users. Other systems manufactured by the company are designed to improve command, control and communications networks.

MIAMI (JAN. 25) PR NEWSWIRE - The Colonnade Hotel has won it first Four-Star rating from the Mobil Travel Guide, announced Jad Shor, managing director of the 157-room property.

This Four-Star rating, the highest level of recognition given to a hotel open for one year, places the new property in the top two percent of the 21,000 properties that the Mobil Guide rated this year.

"This award is the culmination of a team effort," said Shor. "We're especially proud of this honor because we are just one year old. This confirms that we're achieving much of what we set out to accomplish - to create an outstanding hotel with attention to detail and personalized service."

Located in the heart of Coral Gables, the European-style Colonnade Hotel is part of 600,000 square-foot mixed-use expansion and renovation of the historic Colonnade building, which was originally constructed in 1926 for Coral Gables founder George Merrick.

The Colonnade is home to The Aragon Cafe, ranked by The Miami Herald as one of South Florida's top four-star restaurants and Doc Dammers Saloon, a 1920's-style bar and grill.

According to Mobil Travel Guide manager, Jack Anderson, only 377 properties won the prize this year, out of a field of 21,000 competitors. "You can rest assured we won't rate an establishment Four Stars unless it meets our strict criteria," he stated. "The Colonnade was selected because its commitment to quality has paid off in today's big standards."

#90025p0181 01/25/1990 ~PR Newswire
WHITE PLAINS, NY (JAN. 25) PR NEWSWIRE - American Savings Bank, FSB (NYSE: ASB), of New York, today reported net income of $2.3 million for the year ended Dec. 31, 1989. This resulted in a net loss per share of $0.49 for the year (after preferred stock dividends). American's net income was $33.3 million, or $3.83 per fully diluted share, in 1988. Results in 1989 were significantly reduced by additions to loss reserves in the third quarter.

For the fourth quarter of 1989, American recorded a net loss of $1.4 million, or a $0.45 loss per share (primary and fully diluted). The company reported net income of $9.6 million, or $1.10 per fully diluted share, for the fourth quarter of 1988. The 1989 fourth quarter included pre-tax expenses of $1.0 million related to the conversion to New York State charter, the bank's evaluation and revision of its business strategy and changes to the board of directors and senior management.

"American Savings operated in a difficult environment in 1989, marked by a slowdown in the regional economy and generally higher short- term interest rates," said William G. Lillis, president and chief executive officer. "We are committed to a 'back to basics' strategy in 1990. This will include emphasizing our traditional retail franchise and income property lending activities, reviewing options regarding peripheral businesses, reducing operating expenses, and decreasing non- performing assets."

Lillis also noted that the bank's capital exceeds the current standards of the Federal Deposit Insurance Corporation (FDIC). American has not been subject to the capital requirements of the Office of Thrift Supervision since its conversion to New York State charter on Dec. 29, 1989. American's regulatory capital ratio was 6.96 percent of assets at year end as compared with the 6.0 percent FDIC requirement. Its capital was equivalent to 8.97 percent of risk-adjusted assets at the end of 1989, while the requirement is 7.25 percent.

American's net interest income before provision for loan losses was $86.1 million in 1989, compared with $107.2 million in 1988. For the fourth quarter of 1989 net interest income was $18.6 million, compared with $26.4 million in the year-ago period. American's interest rate

ATLANTA (JAN. 25) PR NEWSWIRE - Crawford & Company (NYSE: CFD), a diversified service firm providing claims services, risk management services, health care management, and risk control services to insurance

companies, corporations, and self-insured entities, today reported financial results for the fourth quarter and the year ended Dec. 31, 1989.

F.L. Minix, chairman and chief executive officer, stated that revenue from services provided for the fourth quarter 1989 totaled $103.3 million, a gain of 39 percent over the $74.3 million reported for the year-earlier period.

Pretax income for the fourth quarter 1989 increased nearly 48 percent, totaling $10.6 million compared to $7.2 million reported for the fourth quarter of 1988.

Net income for the 1989 fourth quarter was $6.8 million, a gain of 53 percent over the $4.5 million reported for the same period of 1988. This net income was equivalent to $0.39 per share compared with $0.25 per share for 1988. (All per share amounts have been restated to reflect the 3-for-2 stock split effected in the form of a stock dividend during June 1989.)

For the full year 1989, revenue totaled $374 million, up 27 percent over the comparable period of 1988. Pretax income was $43.9 million, an improvement of more than 44 percent over 1988.

Net income was $27.7 million, a gain of 47 percent over net income for the full year 1988. Earnings per share for 1989 were $1.57 compared to $1.07 for 1988.

Minix stated that the fourth quarter and full-year 1989 revenue gains were broad-based, with improvement achieved in all the company's markets and service lines.

Catastrophe-related revenues contributed substantially to the revenue gains, as a result of claims arising from Hurricane Hugo and a continuation of service (on a reduced scale) from the Alaskan oil spill. Revenue generated by catastrophe adjusters for the full year 1989 approximated $38 million, an increase of more than $25 million over the 1988 total.

Other claims revenue from non-catastrophe sources increased 18 percent during 1989, with good gains in workers compensation claims volume from both insurance company and self-insured clients. Revenue from healthcare management services also grew rapidly during 1989, increasing more than 23 percent of the 1988 totals.

SOUTH PLAINFIELD, NJ (JAN. 25) PR NEWSWIRE - Princeton Diagnostic Laboratories of America, Inc. (AMEX: PDA) announced today Dr. Denis R. Zegar as president and Susan S. Tavis as vice-president of the National Consortium for a Drug-free Workplace.

Dr. Carlton E. Turner, PDLA's president and CEO, stated that "Dr. Zegar is recognized as an expert in the area of labor management."

He is the author of many books including A Guide to Better Labor Management, A Model Substance Abuse Program, and Fighting Drugs in the Workplace. His most recent book is AIDS: Crisis Management. Zegar has published hundreds of articles for leading magazines, trade journals and newsletters. He lectures to numerous business and civic groups and has conducted training seminars for nearly every type of industry.

Zegar is currently producing a book with an accompanying video tape for pre-teen children and parents on the dangers of drug abuse. This educational program is based on the belief that substance abuse is a family industry.

Zegar has acted as a consultant on substance abuse for the Federal Highway Administration, the Department of Transportation, the Senate Commerce Committee and the House of Representatives' Public works Committee. From 1981 to 1989, he was the chief lobbyist for the National American Wholesale Grocers' Association. He received his Ph.D. from the University of Wisconsin in Economics.

Susan Tavis has been employed at PDLA since January 1989 as director of marketing. As vice-president of the National Consortium for a Drug Free Workplace, Travis will focus on marketing the consortium to small businesses and associations.

The National Consortium for a Drug Free Workplace, Inc., a Delaware corporation, was established to provide special assistance to businesses to meet in a cost effective was all federal drug testing regulations.

Comprehensive drug testing policies complying with federal regulations will be provided to members of the consortium. The consortium will also provide its members with information on approved collection sites, a random selection process, a National Institute on Drug Abuse (NIDA) certified laboratory, a Medical Review Officer (MRO) to review all analytical results, and recommendations on employee assistance programs (EAP) including supervisory training mandated under federal drug laws.

PDLA provides specialized clinical testing relating to the detection and monitoring of the treatment of psychiatric disorders, drug abuse, AIDS, and other illnesses for private psychiatric hospitals, general hospitals, psychiatrists, clinical laboratories, sports teams, associations, and

operating companies.

NEW YORK (JAN. 25) PR NEWSWIRE - American Home Products Corporation (NYSE: AHP) announced today the election of two senior company executives, Bernard Canavan, M.D., and Robert G. Blount, to its board of directors. Their addition expands the company's board to 13 members.

Canavan, 54, is executive vice president of American Home Products and chairman of its Wyeth-Ayerst Laboratories. In addition to his election to the board, Canavan will assume responsibility for additional American Home Products health care operations. Prior to assuming his current duties in August 1987, Canavan had since 1984 been the president of Wyeth Laboratories. He has been with the company since 1969, serving in various managerial capacities with Weyeth International Limited and before that Wyeth Limited (Canada).

Canavan received his medical training at the University of Edinburgh M.B. Ch.B. He is a member of the College of Physicians and Surgeons of Ontario and of the Canadian and British Medical Association.

Blount, 51, is executive vice president of American Home Products and its chief financial officer. He has served in that capacity since August 1987. He had been senior vice president-finance prior to that appointment. Prior to joining American Home Products in 1974, Blount was a partner of Arthur Andersen and Company.

In announcing their election to the board, American Home Products

President, Chairman and Chief Executive Officer John R. Stafford said: "Ben Canavan and Bob Blount have consistently and ably demonstrated their talents at the senior managerial level of the company and have contributed significantly to its growth and success. We look forward to benefiting from having their combined experience and expertise at the board level."

American Home Products Corporation is one of the world's leading manufacturers and marketers of prescription drugs, packaged medicines and health care, food and household products. In mid-December, it completed the acquisition of A.H. Robins Company adding considerably to American Home Products already substantial health care products activities and giving it combined 1989 sales of $6.7 billion.

ST. LOUIS (JAN. 25) PR NEWSWIRE - Southwestern Bell Telephone Company confirmed that it has entered into negotiations with a view to reaching a settlement in rate proceedings pending before the Texas Public Utility Commission.

The company confirmed that the parties are considering a tentative framework for a settlement that would result in benefits to customers amounting to approximately $1.2 billion over a four-year period.

Because the current negotiations are being conducted on a confidential basis under supervision of a hearing examiner, the company declined to provide further details, except to say that current press reports are incomplete and in some cases inaccurate.

"We regret the piecemeal disclosure of some aspects of the proposal," said company spokesman Bob Digneo. "The matter is complex, involving novel regulatory approaches; and the impact on the company customers cannot be assessed until all of the details are worked out between the parties and approved by the commission."

#90025p0194 01/25/1990 ~PR Newswire

ANN ARBOR, MI (JAN. 25) PR NEWSWIRE - Great Lakes Bancorp (NASDAQ-NMS: GLBC) today reported fourth-quarter earnings of $4.1 million, or $1.04 per share. In the same period a year ago, Great Lakes earned $3.4 million, or 86 cents per share, Earnings in 1989 totaled $13.7 million, or $3.49 per share, compared with $16.3 million, or $4.16 per share, in 1988.

Net interest income for the quarter totaled $16.0 million, compared with $16.3 million a year ago. For the full year in 1989, net interest income edged to a record level, $65.8 million, compared with $65.6 million in 1988.

"Higher fourth-quarter earnings reflect an improving net interest margin and a greater proportion of earning assets in relation to interest-bearing liabilities," said Roy E. Weber, Great Lakes Bancorp's chairman and chief executive officer.

"In addition, we realized more gains from the sale of mortgages than usual by taking advantage of lower interest rates to sell some long- term fixed-rate assets." Gains in the quarter totaled $9.8 million compared with $8.7 million a year ago.

Offsetting these gains was a provision made for possible loan losses. "There is real public concern about the quality of loan portfolios," Weber said. "We believe Great Lakes should be well reserved and should take a conservative approach to any loans that have a potential for loss. The credit quality of Great Lakes' asset base remains among the best in the industry; nonperforming assets declined $2.5 million from the prior quarter to just 0.29 percent of assets, while our unallocated reserve for possible loan losses increased from $5.5 million to $7.1 million."

Great Lakes originated a total of $106 million of loans in the fourth quarter, bringing total originations for the year to $515 million: $295 million of residential mortgage loans, net of refinancings; $86 million of income property loans, net of refinancings; $120 million of consumer loans; and $14 million of commercial loans, net of repayments.

Great Lakes increased retail deposits $53 million during the quarter, due in large part to the success of its nine-month certificate- of-deposit program. Deposits at year end totaled $1.9 billion.

Great Lakes shrank its asset base from a year ago to $3.4 billion, to further increase its capital ratio as equity continues to grow.

Shareowners' equity has grown to $148 million. Great Lakes' tangible-capital-to-tangible-assets ratio increased to 1.8 percent at Dec. 31. Great Lakes Bancorp exceeds all three of the new capital requirements mandated by the Financial Institutions Reform, Recovery and Enforcement Act.

Great Lakes Bancorp, founded in 1890, celebrates its centennial anniversary this year. The company operates 62 branches in Michigan and Indiana as well as Great Lakes Mortgage Co., a mortgage banking subsidiary and Great Lakes Leasecorp, a joint leasing venture specializing in business equipment leasing in a three-state area. With $3.4 billion in assets, Great Lakes Bancorp is Michigan's second- largest savings bank.

LOS ANGELES (JAN. 25) PR NEWSWIRE - The Foothill Group Inc. (NYSE: FGI) announced today that Foothill Capital Corp. (Foothill Capital), its largest subsidiary, has completed the placement of $50 million in notes. This placement consists of $41 million in 9.80 percent Senior notes, $4 million in 10.60 percent Senior Subordinated notes and $5 million in 11.82 percent Junior Subordinated, notes all due in 1999. The company said that Mellon Bank privately placed the notes with a group of institutional lenders.

David C. Hilton, chief financial officer of The Foothill Group Inc., stated "This financing is very significant to Foothill. It gives Foothill Capital additional capital to fund future loan growth and marks the first time the company has privately placed Junior Subordinated notes. The private placement also helped raise The Foothill Group's capital funds to a record $164 million."

The Foothill Group Inc. specializes in providing innovative financial services through its three highly specialized, yet complementary operating units. Foothill Capital Corp. offers asset-based financing tailored to businesses whose credit needs require more unique, sophisticated types of loan programs. Foothill Thrift and Loan specilizes in commercial real estate lending in California. The Capital Markets Division focuses on asset management activities, arbitrage trading and investing in companies in regorganization.

FORT WORTH, TX (JAN. 25) PR NEWSWIRE - URCARCO, Inc. (NASDAQ: CARS) today announced record sales and record earnings for the second quarter and six months ended Dec. 31, 1989.

Clifton H. Morris Jr., chairman and chief executive officer, reported that sales for the second quarter were $30.5 million, an increase of $25.2 million or 475 percent over last year's $5.3 million sales figure for the second quarter of fiscal 1989. Net income for the current quarter increased 1,016 percent from $251,000 to $2.8 million. Second quarter earnings per share were up 800 percent to $.18, a $.16 increase from last year's EPS results of $.02.

Sales for the current six-month period were a record $55.5 million, up 585 percent from sales of $8.1 million during the same period last year. Net income increased 1,462 percent to $5.2 million as compared to $333,000 for the first six months of fiscal 1989. Earnings per share were $.40, a gain of 1,233 percent over last year's $.03. The company's fiscal year ends June 30, 1990.

"This was a particularly significant quarter in URCARCO's growth," stated Morris. "Not only did the company sell 4,001 cars and light trucks in the quarter and achieve record financial results, but we also raised more than $60 million in equity capital through private and public offerings."

Morris went on to say that the company opened two new sales facilities during the quarter -- a specialty lot selling light trucks in Houston and a large new location on Beltline Road in Farmers Branch north of Dallas. Morris added that another large retail lot was opened this month in Houston.

The company recently announced that it had arranged a $45 million revolving credit facility with NCNB Texas National Bank, with the borrowings to be used primarily for acquisition of inventory and new locations.

URCARCO, Inc. currently operates a chain of 18 used car retail lots in Fort Worth, Dallas, Austin and Houston, Texas, selling quality used passenger cars and light trucks and typically financing customer purchases. The company became America's first publicly held used car company on Nov. 15, 1989, when its stock began trading on the NASDAQ Market System.

BOCA RATON, FL (JAN. 25) PR NEWSWIRE - Eclipse Laboratories, Inc., consumer products company which markets a complete line of suncare products under the Eclipse and Cancer Garde brand names and which last

year introduced Tick Garde, a tick repellent spray which is particularly effective against Lyme-disease-carrying deer ticks, today announced that it has consolidated all of its operations at its facility in Lynchburg, Va.

Effective immediately, the sales, marketing and accounting functions, which were formerly based in Boca Raton, will operate out of Lynchburg. Mike Selman has been appointed president of the company and will be responsible for day-to-day operations.

Steven Manenti will remain as chairman of Eclipse and will continue to direct all marketing and new product activities of the company. Harvey Sosin will continue to manage national sales.

The company also announced that it has entered into an agreement with the Frances Denney Companies, Inc. (NASDAQ: DNNY) covering certain administrative, accounting, distribution, and manufacturing functions as well as leased space in Lynchburg.

The two companies will continue to operate as independent entities with separate managements. Manenti commented that "we believe the consolidation of our operations out of one location will not only improve out profitability but, more importantly, will enable us to serve our customers more effectively. We are anticipating record sales in 1990 in both our suncare and tick repellent lines."

NEW YORK (JAN. 25) PR NEWSWIRE - Thomson McKinnon Asset Management L.P. (TMAMLP) (NYSE: TMA) today announced earnings for the three months ended Dec. 31, 1989, of $4.975 million, or $.498 per unit.

Revenues for this period were $9.211 million. The comparable information for the 1988 period was $3.812 million, $.381 per unit and $8.806 million.

For the year ended Dec. 31, 1989, net income was $15.872 million, or $1.587 per unit, on revenues of $34.638 million as compared with $12.947 million, or $1.295 per unit, on revenues of $30.557 million for 1988.

Reflected in the fourth quarter earnings is a non-recurring item of $894,000, or $.09 per unit, representing a reversal of an accrual for bonuses as a result of certain members of senior management offering to forego certain bonuses in order to increase partnership distributable income.

The partnership also announced that it was retaining $1 million of distributable funds to be used in connection with an anticipated move of New York headquarters to New Jersey. Such move is expect to provide the partnership with significant rent and tax savings.

The partnership has declared a regular fourth quarter distribution of $.32 per unit plus a special year-end distribution of $.18 per unit. The record date for these distributions will be Feb. 1, 1990, with the ex-dividend date being Jan. 26, 1990. Payment date will be Feb. 10, 1990.

The fourth quarter was the first quarter in which the partnership's mutual fund products were sold exclusively through Prudential-Bache Securities rather than through the Thomson McKinnon Securities system. During the fourth quarter of 1989, the assets in cash accumulation trust basically remained constant at the level of $2.7 billion and the assets in Thomson McKinnon Investment Trust (TMIT) declined from $1.8 billion to $1.76 billion reflecting redemptions exceeding sales by approximately $105 million, offset to some extent by market appreciation.

The partnership also indicated that no resolution had been reached to date with representatives of the New York regional office of the Securities and Exchange Commission concerning the proposed administrative proceeding previously disclosed.

MARIETTA, GA. (JAN. 24) PR NEWSWIRE - Healthdyne Inc. (NASDAQ: HDYN)

announced today that its board of directors has authorized management to take the necessary steps to repurchase up to $2 million of the company's outstanding common stock in open market transactions.

These shares will be used to cover future obligations under the company's existing employee benefit plans and any excess will be available for general corporate purposes.

Parker H. Petit, chairman and CEO of Healthdyne stated that: "It is my opinion that at current market prices Healthdyne's shares represent an attractive opportunity for the company in view of our current cash position. The timing of these purchases and the number of shares purchased will be dictated by market conditions and other relevant factors."

Healthdyne is a national provider of high technology home care medical services, including infusion therapy through its partially owned subsidiary HNS and home obstetrical care through its Perinatal Services division, and a manfuacturer of high tech home care products through its Healthdyne Technologies division.

SOUTH PLAINFIELD, NJ (JAN. 25) PR NEWSWIRE - Princeton Diagnostic Laboratories of America, Inc. (AMEX: PDA) announced today Dr. Denis R. Zegar as president and Susan S. Tavis as vice-president of the National Consortium for a Drug-free Workplace.

Dr. Carlton E. Turner, PDLA's president and CEO, stated that "Dr. Zegar is recognized as an expert in the area of labor management." He is the author of many books including A Guide to Better Labor Management, A Model Substance Abuse Program, and Fighting Drugs in the Workplace. His most recent book is AIDS: Crisis Management. Zegar has published hundreds of articles for leading magazines, trade journals and newsletters. He lectures to numerous business and civic groups and has conducted training seminars for nearly every type of industry.

Zegar is currently producing a book with an accompanying video tape for pre-teen children and parents on the dangers of drug abuse. This educational program is based on the belief that substance abuse is a family industry.

Zegar has acted as a consultant on substance abuse for the Federal Highway Administration, the Department of Transportation, the Senate Commerce Committee. From 1981 to 1989, he was the chief lobbyist for the National

American Wholesale Grocers' Association. He received his Ph.D. from the University of Wisconsin in Economics.

Susan Tavis has been employed at PDLA since January, 1989 as director of marketing. As vice-president of the National Consortium for a Drug Free Workplace, Travis will focus on marketing the consortium to small businesses and associations.

The National Consortium for a Drug Free Workplace, Inc., a Delaware corporation, was established to provide special assistance to businesses to meet in a cost effective was all federal drug testing regulations.

Comprehensive drug testing policies complying with federal regulations will be provided to members of the consortium. The consortium will also provide its members with information on approved collection sites, a random selection process, a National Institute on Drug Abuse (NIDA) certified laboratory, a Medical Review Officer (MRO) to review all analytical results, and recommendations on employee assistance programs (EAP) including supervisory training mandated under federal drug laws.

PDLA provides specialized clinical testing relating to the detection and monitoring of the treatment of psychiatric disorders, drug abuse, AIDS, and other illnesses for private psychiatric hospitals, general hospitals, psychiatrists, clinical laboratories, sports teams, associations, and operating companies.

NEW YORK (JAN. 25) PR NEWSWIRE - Merrill Lynch Consumer Markets today announced the appointment of Harry P. Allex as senior vice president, Financial Services Operations & Systems. In his new capacity, he will have responsibility for Merrill Lynch Consumer Markets' nationwide operations and systems.

"Harry Allex brings 20 years of technical and business expertise to his new position," said John L. Steffens, president and chief executive officer, Merrill Lynch Consumer Markets. "We are confident that his proven management skills will help sustain and enhance an outstanding level of operational support for Merrill Lynch Consumer Markets."

Allex's new position consolidates the operations and systems that support the products and 480 domestic branch offices of Merrill Lynch Consumer Markets, the business sector of Merrill Lynch & Co. (NYSE: MER) that serves individuals, small to mid-size businesses and institutions, and employee benefits plans, primarily in the United States. These products include: central asset accounts, including the Cash Management Account(TM); retirement plan accounts, trust accounts and mutual funds. In addition, Allex continues to direct the firm's transfer agency and institutional custody profit centers.

Allex joined Merrill Lynch in 1969 in the corporate systems division, following nine years of managing various systems units at Commercial Union Insurance Co. He has held a number of positions at Merrill Lynch, serving most recently as director of the Financial Services Division, which provides operations and systems support for Consumer Markets products.

Allex is also chairman and chief executive officer of Merrill Lynch Financial Data Services Inc., a subsidiary that includes the transfer agency; executive vice president of Merrill Lynch Trust Company; and a vice president of Merrill Lynch Bank & Trust.

BLUE BELL, PA (JAN. 25) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) today reported a return to profitability in the fourth quarter ended Dec. 31, 1989.

Revenue increased 2 percent over the year ago quarter as strong international business was partially offset by a continuing weak U.S. market.

Unisys reported net income of $34.0 million for the quarter, or $0.05 per common share on a fully diluted basis versus $218.0 million, or $1.05 per common share, fully diluted, a year ago. Revenue was $2.97 billion versus $2.91 billion a year ago.

For the year ended Dec. 31, 1989, Unisys reported a net loss of $639.3 million or $4.71 per common share. A year earlier, net income was $680.6 million or $3.27 per fully diluted common share.

The loss in 1989 was principally experienced in the third quarter. That loss was due in large part to restructuring charges for workforce reductions and consolidation of manufacturing capacity and facilities; costs accrued for the defense business to cover timated losses on certain fixed price contracts and certain contingent litigation liabilities; high manufacturing costs associated with excess capacity, industry-wide competitive pricing pressures and the effects of inventory reduction actions.

Revenue for the year was $10.10 billion. Good growth in worldwide computer business revenue was partially offset by a decline in the defense business. A year ago, revenue was $9.94 billion.

HARRINGTON PARK, NJ, (JAN. 25) PR NEWSWIRE - United Water Resources (NYSE: UWR) today reported fourth quarter net income of $4.4 million in 1989, a 53 percent increase from the $2.9 million earned in the same period a year earlier. Earnings per common share for the quarter were 27 cents, a 59 percent increase from 17 cents per share a year earlier.

Earnings for the year ended December 31,1989 were $14.3 million, a decrease of 21 percent from the $18.0 million earned in 1988. Net income per common share totalled 86 cents for 1989, a 20 percent decrease from the $1.08 per share earned in 1988.

United Water Resources is a holding company engaged in water-related businesses and real estate. Its utility subsidiaries, Hackensack and Spring Valley water companies, serve over one million people in New Jersey and New York. United Water's real estate subsidiary, Rivervale Realty Company, operates in northern New Jersey and southeastern New York. Apart from the golf course properties awaiting transfer, Rivervale owns some 1,100 acres of land about half of which is in various stages of the subdivision and approval process.

United Water has paid continuous cash dividends on common stock since 1886.

#90025p0236 01/25/1990 ~PR Newswire

MOUNT CLEMENS, MI. (JAN. 25) PR NEWSWIRE - First National Bank Corp. (NASDAQ: MTCL) today reported record consolidated earnings of $2,707,000 in 1989, up 11 percent from 1988's earnings of $2,448,000. This is the fifth consecutive year in which the corporation has set an annual earnings record.

Primary earnings per share in 1989 increased to $2.35 as compared to $2.13 in 1988. Fully diluted net income per share rose to $2.25 in 1989 from $2.13 in 1988.

The corporation cited increases in net interest income of $1.1 million from increased loan volume and increases in noninterest income from service charges due to increased deposit account volume as the primary reasons for the increase in 1989 net income. These increases more than offset the increase in noninterest expense of $945,000.

During 1989, the loan portfolio grew 20 percent, to $249 million at year-end 1989 from $209 million at year-end 1988. Deposits grew 10 percent during the year, to $332 million from $303 million. Assets grew 12 percent, to $373 million from $334 million.

The corporation earned $653,000 in the fourth quarter ended Dec. 31, 1989, as compared to $487,000 in the year-earlier period. Primary earnings per share rose to $0.57 for the quarter, as compared to $0.42 in the year-earlier period.

Contributing to the increased fourth-quarter earnings were increases in net interest income, to $3.2 million in the fourth quarter 1989, compared to $3.0 million in the fourth quarter 1988, as well as increases in noninterest income, to $694,000 from $383,000 as a result of increased service charges on deposit accounts due to deposit growth and net investment security gains of $82,000 during the fourth quarter of 1989, compared to net investment security losses of $57,000 in the fourth quarter 1988.

First National Bank Corp. is the parent company of First National Bank in Mount Clemens and Bankers Fund Life Insurance Co. All are headquartered in Mount Clemens. The corporation has 1,151,751 shares of common stock issued and outstanding.

FARMINGDALE, NY (JAN. 25) PR NEWSWIRE - The units of American Safety Closure Corp. consisting of 5 shares of common stock and 3 class A warrants began trading today in the NASDAQ market, Vincent N. Conti, president and chief executive officer announced. American Safety Closure Corp., whose trading symbol is "CLOSU", is a manufacturer of Tamper-Evident closures, jars and vials, and has its manufacturing facilities in Plattsburgh, N.Y., with executive offices in Farmingdale, and employs 120.

Conti noted that American Safety Closure Corp.'s inclusion into the NASDAQ market provides brokers and others with immediate access to the best bid and asked prices and other information about the company's shares throughout the trading day. Those prices are available over more than 150,000 electronic terminals in brokers' offices throughout the United States and the free world. Trading data are also distributed widely through wire services for selective dissemination by newspapers and radio and television stations.

In addition to increased market visibility, NASDAQ gives American Safety Closure Corp. the advantage of multiple market makers that compete to offer the best bid and asked prices, as opposed to a single specialist on the floor of a stock exchange.

#90025p0242 01/25/1990 ~PR Newswire

CHICAGO (JAN. 25) PR NEWSWIRE - Illinois Central Railroad Company today announced the results of the fourth quarter and year ended Dec. 31, 1989.

For the quarter, revenues were $139.8 million compared to $136.6 million for the same period in 1988; operating income was $31.3 million compared to $4.1 million, and net income was $8 million compared to $2.7 million a year ago.

For the year 1989, revenues were $547 million compared to $556.4 million in 1988 and net income was $9.7 million compared to net income of $47.7 million in 1988. The 1988 results included a $61.3 million benefit from a change in the accounting for income taxes. The current year's operating

income of $85.2 million increased from $17.9 million in 1988. Interest expense increased to $76.8 million from $48.3 million reflecting the new debt assumed by the railroad after the merger and merger-related expenses.

Illinois Central Railroad Company, Rail Acquisition Inc. and the Prospect Group Inc., entered a merger agreement on March 9, 1989, and the Illinois Central Railroad Company became a wholly owned subsidiary of Illinois Central Corporation on Sept. 26.

In early January 1990, the Prospect Group (NASDAQ: PROSZ) distributed to its shareholders 11.1 million shares of Illinois Central Corporation Series A common stock. Such common stock is currently traded in tandem with Prospect's stock as a "stapled" unit on the NASDAQ National Market System. It is expected that Illinois Central Corporation's common stock will be unstapled and traded independently later this year.

DENVER (JAN. 25) PR NEWSWIRE - Martin Marietta Astronautics Group reported a record $4.08 billion in new orders in 1989, ending the year with a business backlog of $6.9 billion-close to three years' worth of sales.

Among major new business won by the group during the year were a $1.6-billion addition to an Air Force contract to build and launch the Tital IV rocket, a $297-million National Aeronautics and Space Administration (NASA) contract to build a space robot that will help assemble Space Station Freedom, a $157-million NASA contract to launch Mars Observer spacecraft on Commercial Titan, and a contract to launch a Strategic Defense initiative experiment on an enhanced Air Force Titan II launch vehicle.

The group also was awarded NASA contracts to continue studying concepts for a mission to Mars and to design a reusable upper stage to support both manned and unmanned exploration of the moon and planets.

Titan IV, whose core vehicle is built in Denver, was successfully launched for the first time in June from Cape Canaveral Air Force Station, Fla. Martin Marietta is under contract to the Air Force to build and launch 40 more of the new, most powerful Titans through 1995, with an option for an additional eight.

The Astronautics Group also launched its first Commercial Titan on New Year's Eve from Cape Canaveral, successfully placing into orbit two communications satellites for Japanese and British customers. Two more

Commercial Titan launches are planned this year.

In other Titan launches, the Titan II space launch vehicle recorded its second successful launch in September from Vandenberg Air Force Base, Calif., and the last two Titan 34Ds were successfully launched from Cape Canaveral in May and September. The Titan 34D is being replaced by the Titan IV as the Air Force's workhorse Titan launcher.

The Martin Marietta-built Magellan spacecraft was launched in May by the Space Shuttle, beginning its 795-million-mile journey to Venus--the first major NASA planetary exploration mission in more than a decade. The spacecraft is more than halfway to Venus, where it is expected to arrive by Aug. 10.

At year's end, Astronautics Group employment in Colorado stood at 11,557, a small decline from the end of 1988. Teets said the employment picture for the next year looks stable.

#90025p0254 01/25/1990 ~PR Newswire

MORRIS TOWNSHIP, N.J. (JAN. 25) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) today reported 1989 net income of $528 million, or $3.55 per share, up 14 percent from $463 million, or $3.10 per share for 1988.

The 1989 results include a one-time gain of $23 million, or 16 cents per share, as a result of an insurance settlement received by Union Texas Petroleum Holdings, Inc., in which Allied-Signal has an equity interest. Excluding the one-time gain, Allied-Signal had 1989 net income of $505 million, or $3.39 per share, up 9 percent over 1988.

Sales for 1989 were $11.9 billion, up slightly over last year. For the 1989 fourth quarter, the company reported net income of $115 million, or 78 cents per share, up 11 percent from $104 million, or 70 cents per share in 1988. Sales for the quarter were $3 billion, up slightly from the previous year.

"Allied-Signal's performance during 1989 was in line with our expectations and represented solid improvement in bringing out the underlying value of our businesses," said Edward L. Hennessy Jr., chairman and CEO.

"We intend to continue to strive for improvements in our short-term operating performance, balanced carefully with the investments in research development and engineering and capital projects that are vital to our long-term growth and ability to compete in the rapidly evolving world marketplace," Hennessy said. "We begin 1990 with a goal of continued income growth, a formidable challenge in the uncertain economy ahead."

Fourth quarter net income from the company's aerospace business was $59 million, up 11 percent from the 1988 period. The AiResearch, auxiliary power and engine units all had strong performances in their commercial products. Avionics and engine controls also showed increases. The improvements were partially offset by continued development spending for new engines. Aerospace sales were $1.3 billion, up 6 percent from the 1988 quarter.

Automotive net income was $27 million for the 1989 fourth quarter, up from $26 million the previous year. The overall weakness in the U.S. auto industry continued to impact the company's operations. The company's Brazilian operations and the Autolite sparkplug business both showed improvements in sales and profits, while turbocharger earnings were lower. The automotive business also realized a gain from the sale of a small product line. Automotive sales were $986 million, down slightly from 1988.

Engineered Materials net income for the 1989 fourth quarter was $50 million, the same as last year, reflecting continued strong performance. Earnings improved slightly for the company's UOP joint venture, while the sector's other units were essentially unchanged from last year. Engineered Materials sales for the quarter were $721 million, up slightly from 1988.

Allied-Signal Inc. is an advanced manufacturing company with businesses in aerospace, automotive products and engineered materials.

AUSTIN, TX (JAN. 25) PR NEWSWIRE - K. Bruce Hamilton has been promoted to group vice president of Tracor Applied Sciences and president of Tracor Applied Sciences Inc., announced William C. Moyer, president and chief executive officer of Tracor Holdings Inc. Hamilton replaces Moyer, who recently was named president and chief executive officer of Tracor Holdings.

Hamilton joined Tracor in 1966 and progressed through a series of technical management positions. Most recently, Hamilton served as vice president and general manager of the Systems Technology Operations for Tracor Applied Sciences Inc., and president of Tracor Marcon. He was named acting group vice president for Applied Sciences in early January.

In 1963, Hamilton received a bachelor's degree in Engineering Physics from the University of Oklahoma, Norman, Okla., and, in 1968, received an master's degree in Engineering Physics from the University of Texas at Austin.

In making the announcement, Moyer said, "Bruce and I have worked closely together throughout his career. I have the highest level of confidence in Bruce and his ability to continue the tradition of excellent performance which has characterized Applied Sciences for many years."

The Tracor Applied Sciences Group is comprised of eight operating units providing engineering and management support services to a large number of defense programs, primarily for the U.S. Navy. The Group's expertise includes sonar, radio communications, hydrodynamics, and ocean technology. The Group also provides services to non-defense and commercial areas, including government health, safety, and environmental programs, commercial ocean technology and acoustical services, and radio-telephone communications systems.

Tracor Inc., owned by privately held Westmark Systems Inc., is an international technological products and services company with headquarters in Austin, Texas. The company is a leader in the development and production of countermeasures systems and other defense electronics; a significant research and engineering services contractor in sonar, communications, and aviation; a major commercial and government aircraft modification contractor; and a major manufacturer of analytical instruments and electrical components.

CHICAGO, (JAN. 25) PR NEWSWIRE - Andrew Corp. (NASDAQ: ANDW) today reported substantial first-quarter gains in sales, net income and earnings per share.

Sales for the first quarter of fiscal 1990 ended Dec. 31, 1989, increased 28 percent to $82.9 million from $64.9 million for the same quarter a year earlier.

Net income for the quarter increased 40 percent to $3.5 million from $2.5 million. Earnings per common share were $.35, also up 40 percent from the prior year's $.25 per share.

Orders for the period increased 15 percent to $76.8 million, compared with $66.9 million the prior year. Funded backlog expected to be shipped in the next 12 months was up 21 percent to $110.2 million.

Dr. Floyd L. English, president and chief executive officer, said, "A strong performance from our core businesses, especially sales of products and systems to worldwide cellular markets, led the first quarter's

financial performance.

"In government products, orders for direction finding and frequency management systems for U.S., Canadian and Australian military customers were recorded. Part of the improvement in net income is the result of lower costs in the development of the new high frequency systems in defense electronics.

"Network products sales of token ring products to corporate communications customers continued strong. Sales were also bolstered by the inclusion of KMW Systems, an acquisition which was completed midway through the first quarter," English said.

"Our strong order backlog and the strength of the markets we serve should enable us to record another year of increased sales, income and earnings per share,'' English concluded.

HIGHLAND PARK, MI (JAN. 25) PR NEWSWIRE - Chrysler Motors' Newark, Del., assembly plant today produced its first 1990 Chrysler LeBaron four-door sedan. The mid-year vehicle is aimed at buyers who are seeking a luxurious traditionally styled mid-size sedan.

The six-passenger styled sedan rolled off the world-class, high-technology manufacturing assembly line loaded with standard features.

With a roomy, luxury interior, the front-wheel-drive LeBaron featured a standard 3.0-liter V-6 multi-point fuel injected engine and four-speed automatic Ultradrive transmission and was equipped with a standard driver's side air bag, knee bolster and active three-point seat belts for added security. Along with an electronic message center, AM/FM stereo cassette radio with digital clock and maintenance free battery, the LeBaron features also included air conditioning, tinted glass, power

brakes and power steering, speed control, remote releases for fuel filter, door, hood and truck.

The LeBaron is covered by Chrysler's 7-year/70,000-mile limited powertrain warranty and 7-year/100,000-mile corrosion limited warranty.

The LeBaron sedan is Chrysler's newest entry in the company's 1990 lineup. The Manufacturer's Suggested Retail Price is $15,995.

Newark produced 145,933 vehicles in the 1989 model year, and on Jan. 17 of this year, the plant produced its 250,000th A-body. The LeBaron's sister vehicles, Dodge Spirit and Plymouth Acclaim, rolled off the Newark assembly line in October 1988, after a $205 million plant modernization.

WASHINGTON (JAN. 25) PR NEWSWIRE - On Jan. 25, Air Canada received the first of the Airbus A320 aircraft that it will eventually operate, becoming both the first airline in Canada to take delivery of the aircraft and a new Airbus operator.

Air Canada initially plans to use the Airbus A320 on routes serving Montreal, Toronto, Ottowa and Winnipeg beginning in February. It will add Calgary and Vancouver a few months later and plans to extend its Airbus A320 operation with flights to U.S. cities.

Each of Air Canada's Airbus A320s is powered by CFM International CFM56-5 engines and seats 30 passengers in business class and 107 in economy.

"It is particularly apt that the fleet modernization program that will take us into the next century begins with the world's most advanced airliner," said Air Canada President and Chief Executive Officer Pierre Jeanniot, "especially one as passenger-pleasing and efficient as the Airbus A320."

Air Canada's acceptance of the Airbus A320 follows certification of the aircraft by Transport Canada on Dec. 22, 1989.

"Our long-term future is founded on winning and satisfying new customers such as Air Canada," says Airbus Industrie Managing Director Jean Pierson. "We know we have good products with advanced technology that benefit both passengers and operators, and our prime goal is now to satisfy airline demand and continue providing the high standards of product support that will enable our customers to get the most out of their

aircraft."

Air Canada brings the number of Airbus A320 operators to 11, and the number of deliveries now stands at 78.

CHICAGO (JAN. 25) PR NEWSWIRE - A favorable verdict has been returned for the nation's leading futures and options clearing and execution firm in a court case that focused on the losses it incurred during the 1987 stock market crash. The jury awarded First Options of Chicago, Inc. (FOC), $16.6 million in its fraud suit against Harry C. Polonitza, president and sole shareholder of Harry C. Polonitza and Co.

The case, tried in the Northern District of Illinois before Judge William Hart, charged Polonitza with employing three unauthorized persons to trade on the Chicago Board Options Exchange (CBOE), and that these traders incurred the losses, which were cleared by FOC. The firm's two authorized traders did not suffer losses at that time.

The jury awarded FOC $14.5 million on the fraud charge, and $1.5 million in punitive damages. On a separate count, FOC was awarded $609,000 related to a debt owed the Polonitza firm, on the grounds that the handling of the debt, which was forgiven, was a breach of fiduciary duty.

Continental Bank, which owns FOC, announced last week its decision to sell FOC but stated it will retain its institutional and futures options capabilities, including Continental First Options, Inc., its futures commission merchant subsidiary, to execute and clear futures and options transactions for the bank's corporate and institutional customers.

First Options, a wholly owned subsidiary of Continental Bank, N.A., provides execution, clearing and financing services to securities dealers and others. In addition, the firm engages in borrowing and lending securities. Headquartered in Chicago, First Options has offices in New York, Philadelphia and San Francisco.

WILMINGTON, DE (JAN. 25) PR NEWSWIRE - Du Pont (NYSE: DD) and Warner-Lambert Co. (NYSE: WLA) today announced a cross-licensing agreement

giving Du Pont rights to three anticancer compounds and Warner-Lambert rights to an anticonvulsant agent.

Terms were not disclosed.

Under the agreement, Du Pont will have exclusive worldwide rights to a series of anticancer agents called anthrapyrazoles, three of which are in clinical development.

Warner-Lambert, the market leader in anticonvulsant therapy, will have exclusive worldwide rights to prophenytoin. The drug originally was developed by a subsidiary of Merck and licensed to American Critical Care, which Du Pont purchased in 1986.

Prophenytoin has the potential of being less painful to administer and causing less tissue damage upon injection than currently used drugs.

Anthrapyrazoles are tumorcidal agents which are in early clinical trials in the United States and Europe.

NEW YORK (JAN. 25) PR NEWSWIRE - NYNEX Material Enterprises Company today announced it has signed a joint marketing agreement with Chase Trans-Info, Inc., to provide a variety of transportation and distribution services to corporations throughout the United States.

Specific terms of the agreement were not disclosed.

Chase Trans-Info is a major provider of transportation consulting, audit, payment, freight rating and management reporting services.

The agreement is part of NYNEX Enterprises' new Logistics Services Division, a business unit designed to offer third-party logistics and integrated materials management solutions to a varied customer base both within NYNEX and outside of the NYNEX family of companies.

Under the Chase Trans-Info/Enterprises agreement, Enterprises will provide various transportation services to third parties.

As a third-party logistics provider, Enterprises offers a complete materials management package -- managing the movement of a client's products from the point of origin to the final destination.

NYNEX Enterprises is a subsidiary of NYNEX Corporation (NYSE: NYN).

Enterprises provides cost-effective integrated materials management and technical services for the NYNEX family of companies, including purchasing contracting, quality control, testing, inventory management and distribution.

ST. PAUL, MN (JAN. 25) PR NEWSWIRE - Northwest Airlines today named Roberta L. Rocheford staff vice president of cost analysis and control, a new position.

In her new position, she is responsible for corporate profit planning and forecasting and for compilation of long-range financial plans.

Rocheford began her airline career in 1985 as director of cost analysis and control at Republic Airlines. When Republic was acquired by Northwest in 1986, she was promoted to senior director of cost analysis and control.

Earlier, she was audit manager for Grant Thornton & Co. in Minneapolis. Rocheford was graduated summa cum laude from the University of Minnesota with a bachelor's degree in accounting and is a certified public accountant in the state of Minnesota.

She is the mother of three daughters and lives in Minneapolis.

#90025p0283 01/25/1990 ~PR Newswire
CHICAGO, (JAN. 25) PR NEWSWIRE - Boulevard Bancorp Inc. (NASDAQ: BLVD) today reported lower earnings for the year ended Dec. 31, 1989, with net income of $8.7 million, or $1.20 per share, vs. last year's record level of $13.5 million, or $1.79 per share.

The reduction in earnings was primarily the result of a $6.3 million increase in the provision for loan losses and the decrease of $1.7 million in gains on sale of other real estate owned which benefited net income a year earlier. The effect of these two items was a decrease of 61 cents in earnings per share.

The increase in the provision for loan losses was partially due to a decision by management to increase the year-end loan loss reserve to 1.3

percent of total loans from 1.2 percent at Dec. 31, 1988. The higher 1989 provision also reflects an increased level of charge-offs, which included a loss on the sale of a $12.5 million loan. This transaction was announced on Dec. 20, 1989, and had the effect of lowering earnings by 26 cents per share in 1989.

"The sale of the loan, while costly to 1989 performance, avoids a lengthy and expensive collection effort and puts this behind us," said Richard T. Schroeder, chairman and president. Commenting on credit quality as a whole, Schroeder indicated, "We are taking appropriate actions to improve our management of credit risk. We are comfortable with the year-end level of the loan loss reserve at 1.3 percent of loans."

On Sept. 29, 1989, Boulevard Bancorp completed the acquisition of Northwest Financial Corp., which owns National Security Bank of Chicago, by issuing 840,000 shares of common stock. Since the acquisition is being accounted for as a pooling of interests, all figures in this news release for both years include Northwest Financial Corp.

For the year, net interest income was up 7.3 percent to $64.14 million from $59.78 million a year ago, resulting from a 5.4 percent increase in earning assets coupled with a slight increase in net interest margin to 4.68 percent from 4.63 percent a year ago.

The provision for loan losses for the year was $10.57 million vs. $4.25 million for 1988. Non-interest income declined 7.4 percent to $13.47 million in 1989 vs. $14.54 million in 1988. The decrease in non- interest income is due to a decrease in gains on sale of real estate owned of $1.72 million, which is partially offset by an increase in trust income. Non-interest expense increased 8 percent to $55.71 million in 1989 from $51.59 million in 1988.

Schroeder noted that most of the expense increase occurred in the first half of 1989, reflecting costs to consolidate certain operating areas. "Expense growth in the second half of the year was held to 5 percent, as we continue to strive for operating efficiencies," Schroeder added.

Non-performing loans decreased 42 percent in the fourth quarter to $23.1 million or 1.94 percent of loans at Dec. 31, 1989, as compared to $39.9 million or 3.34 percent at Sept. 30, 1989, and $14.9 million or 1.31 percent at Dec. 31, 1988. Both non-accrual loans and loans past due 90 days or more and still accruing interest decreased substantially in the fourth quarter.

For the fourth quarter, the company recorded a net loss of $600,000 or 5 cents per share, vs. net income of $3.83 million, or 49 cents per share, for the same period in 1988. The loss in the fourth quarter of 1989 was primarily due to an increase in the provision for loan losses to $6.82

million in 1989 vs. $560,000 in 1988. Non-interest income declined 25.2 percent to $3.02 million from $4.04 million, due primarily to gains on the sale of other real state owned in 1988 of $860,000 which did not recur in 1989. Non-interest expense was up marginally in the quarter to $14.17 million from $14.08 million a year ago.

"As we enter 1990, we are clearly focused on improving our earnings performance beyond the record levels of 1988," Schroeder said. "To achieve this goal, we will concentrate on the overall quality of our loans and on increasing our earning asset base while holding down operating expenses."

Boulevard Bancorp Inc. is a $1.7 billion holding company which owns Boulevard Bank in Chicago, First National Bank of Des Plaines, National Security Bank of Chicago and Citizens National Bank of Downers Grove. Its common stock is traded on the NASDAQ National Market System.

WASHINGTON (JAN. 25) PR NEWSWIRE - Linda D. Stern has been named to the newly created position of director of affiliate relations for the UPI Radio Network and UPI Radio Noticias.

Stern brings 19 years of experience in radio management, sales and research at ABC and CBS to UPI.

"Ms. Stern's expertise in affiliate relations will be invaluable to the growth of the UPI Radio Networks. Her insight into station needs will

allow the UPI Radio Networks to achieve unparalleled responsiveness to affiliate concerns," said Jon Wilkes, vice president/general manager, UPI Radio Network.

At Capital Cities/ABC from 1972-1987, Stern held a variety of positions, including associate director for ABC Talkradio Network; director of administration for ABC Radio Networks; director of the ABC Information Network; and director of research, ABC-FM Spot Sales.

From 1969-1972, Stern worked at WCBS-AM Radio in research and promotion capacities. Most recently, from 1987-1989, Stern has been a sales executive at Bernstein Sales & Leasing, a commercial real estate brokerage firm.

Stern is a graduate of Syracuse University with a bachelor's degree in liberal arts and a master's degree in English education.

UPI, founded in 1907, is a news and information services company, with more than 180 bureaus worldwide. UPI is owned by Infotechnology, Inc. (NASDAQ: ITCH), an information and communications firm.

CAMDEN, NJ (JAN. 25) PR NEWSWIRE - Campbell Soup Co.'s (NYSE: CPB) board of directors today issued the following statement:

We have today endorsed a new strategic direction designed to leverage the extensive brand power of Campbell Soup Company and to deliver the financial results needed to build long-term shareholder wealth.

We have strong confidence in the Company's management team led by Chief Executive Officer David W. Johnson to implement this strategic direction. We have noted the extremely broad support that the new CEO has already received from our shareholders and the financial community.

We have given careful consideration to the desire of a minority shareholder group to effect a sale of the Company in the short term. We have also considered the interest of one other shareholder in a tax-free merger transaction. We have also taken into account the wishes of other shareholders who prefer that no such sale or merger take place.

In five extended meetings over the past four months, we have listened carefully to the views of senior management concerning the strategic direction of the Company and of prominent and respected outside investment banking and legal counsel.

We have concluded that now is not the time to pursue a sale or merger of the Company. Because of our high level of confidence in the new leadership and the new strategies, we are convinced that maintaining the Company's independence is the superior means of maximizing the wealth of the Company's shareholders over the long term.

BETHESDA, MD (JAN. 25) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) announced the election of Marcus C. Bennett, vice president and chief financial officer, to be a senior vice president and chief financial officer.

The board of directors approved the promotion at its regular monthly meeting today. Bennett, 54, has been a corporate vice president since 1984 and chief financial officer since July 1988.

A native of Atlanta and a graduate of Georgia Institute of Technology, Bennett has been with Martin Marietta for 30 years. He joined the corporation in 1959 at Orlando, Fla., and served in a series of increasingly responsible managerial positions in contract management and finance at Orlando and at Denver before moving to headquarters in 1975 as controller and treasurer. He was appointed vice president, finance, in 1977 and vice president, business management, in 1980.

Bennett is a member of the Financial Executives Institute, the Procurement and Finance Committee of the Aerospace Industries Association, the Government Procurement Relations Committee of the Electronics Industries Association, and the Contracts and Finance Committees of the National Security Industrial Association.

OIL CITY, PA (JAN. 25) PR NEWSWIRE - Quaker State Corporation (NYSE: KSF) reported net income for 1989 of $11,842,000 ($.44 per share).

This compares with net income of $15,259,000 ($.56 per share) in 1988. Sales and operating revenues for the year were $819,327,000, compared to $880,810,000 in 1988. The decline was primarily caused by lower motor oil sales. Amounts for 1988 have been restated to include the results of McQuik's Oilube, Inc., which was acquired through an exchange of stock and is accounted for on a pooling of interests basis.

Operating profit totaled $34,830,000 in 1989, compared to $37,808,000 in 1988. Declines in the profitability of the company's subsidiaries more than offset a significant increase in the operating profit of the core petroleum segment. The gain in the motor oil segment is attributed primarily to firmer pricing and lower costs.

The operating profit in 1989 includes a $9.9 million unusual gain resulting from the settlement and termination of a coal contract in Utah. This compares to an unusual gain in 1988 of $5.6 million.

For the fourth quarter, Quaker State reported net income of $2,392,000 ($.09 per share) compared to net income in 1988 of $5,669,000 ($.21 per share), which included the pretax unusual item of $5,554,000. Sales and operating revenues for the two quarters were $205,347,000 and $207,459,000 respectively.

#90025p0299 01/25/1990 ~PR Newswire

DAYTON, OH (JAN. 25) PR NEWSWIRE - Mead Corporation (NYSE: MEA) today reported net earnings for the fourth quarter and year ended Dec. 31 of $31.3 million and $215.8 million, respectively.

Quarterly net earnings of $.50 per share were down from $.68 per share, or $43.4 million, for the fourth quarter of 1988.

Full year net earnings were $3.33 per share, compared to $5.37 per share in 1988. Earnings in 1989 included a non-recurring gain of $.23 per share and 1988 included net non-recurring gains of $1.67 per share.

Comparison of the company's year to year results is made difficult by acquisition and divestiture activities. Mead sold its Paperboard Products business in January 1988 and its 50 percent share of the Brunswick Pulp & Paper Company in August 1988. In December 1988 Mead acquired the Michie Company, a legal publishing firm. In September 1989 the Release Products business was sold. (A table showing comparative earnings adjusted for acquisition and divestiture activity follows.)

"Although a number of factors resulted in somewhat lower than expected fourth quarter earnings, 1989 was a good year for Mead," said Burnell R. Roberts, chairman and chief executive officer. "We are on schedule with the start-up of our new $560 million coated board mill in Alabama and we are on plan in development of our new color imaging business. These businesses represent important long-term strategic investments for which we will continue to sacrifice short-term earnings in 1990."

Roberts said that fourth quarter earnings were adversely affected by lower prices for uncoated paper, resulting from softening demand and incremental industry expansion, and a slow start-up following a planned October shutdown at Northwood Forest Industries, a 50 percent-owned affiliate. Advertising and promotional expenses for Mead Imaging's Cycolor(R) products, and training and market development costs associated with the new 370,000 ton-per-year coated board mill also reduced earnings.

Sales for 1989 climbed 3 percent to $4.6 billion, compared to $4.5 billion in 1988. Adjusted for sales of divested businesses, year-to-year sales were up 6 percent. Sales of $1.078 billion in the fourth quarter were up slightly from the prior year's fourth quarter sales of $1.045 billion.

"Coated paper was strong throughout most of the year, and sizable backlogs remain for publishing grades," Roberts said. "Shipments of carbonless strengthened in the second half, but price pressure late in the year diminished earnings. Increased industry capacity in uncoated grades in the latter half of the year resulted in some softening of prices."

Earnings for pulp and wood products were significantly ahead of prior year levels because of strong, stable pricing throughout the year.

Mead School and Office Products division had a good year due to a strong "back to school" season and increased acceptance of its value-added products for home and office. Sales of Zellerbach, Mead's distribution business, were 4 percent ahead of last year.

In its electronic publishing business, Mead posted another record year, with Mead Data Central revenues passing the $400 million mark. Excluding the dilution associated with the Michie acquisition, earnings were well ahead of 1988 levels. Michie, acquired in late 1988, is a leading publisher of state codes and other legal information.

"With our strategic reinvestment program on track, we believe Mead is well positioned to address the challenges of the 1990's," Roberts said.

#90025p0301 01/25/1990 ~PR Newswire

LUGANO, SWITZERLAND (JAN. 25) PR NEWSWIRE - BSI-Banca della Svizzera Italiana today reported 1989 financial year gross profits of Sfr 118m, an increase of 23 percent over previous year's figures. After depreciation and provisions of Sfr 60m (Sfr 49m in 1988), net profit totaled Sfr 58m, up 23.7 percent from 1988.

During 1989, BSI experienced significant growth in both the balance sheet and profit and loss accounts. The bank's balance sheet at year- end reached a total of Sfr 9.124bn, an increase of Sfr 1.201bn or 15 percent over the previous year. Loans to customers increased by Sfr 1.070bn or 23 percent, and totaled Sfr 5.648bn at the end of 1989. This asset growth was financed by higher customer deposits (plus 30 percent), which totaled Sfr 6.5bn.

As for the profit and loss account, BSI's total income net of interest and brokerage paid totaled Sfr 378m, 43 percent of which was derived from balance sheet activities and 57 percent from commission business. Operating costs, excluding taxes, totaled Sfr 243m, of which personnel expenses accounted for Sfr 167m.

In view of these favorable results, BSI's board of directors will propose at the general meeting of shareholders on April 25, 1990, an increase in the dividend from 14 percent to 16 percent, for a total of Sfr 41.7m; the allocation of Sfr 16m (plus 2m) to reserves; and the carryforward of Sfr 3.5m of surplus to the new account. With the acceptance of these recommendations, the bank's published shareholders' equity will rise to Sfr 730m.

BSI-Banca della Svizzera Italiana, headquartered in Lugano, is the sixth largest commercial bank in Switzerland.

BSI-New York opened in 1983 and operates in all phases of personal, corporate and commercial banking, including: international and U.S. private banking, trade finance, corporate and correspondent lending, foreign exchange and money market trading, and global investment management.

#90025p0308 01/25/1990 ~PR Newswire

CHICAGO, (JAN. 25) PR NEWSWIRE - Lindberg Corporation (NASDAQ: LIND) operating results for the quarter and year ended Dec. 31, 1989, were announced today by Leo G. Thompson, president and chief operating officer.

Sales for the fourth quarter of 1989 were $18,712,469 compared to $19,377,493 for the same period in 1988. Net earnings for the quarter were $654,999 versus $685,970 in the fourth quarter of 1988. Net earnings per share for the fourth quarter of 1989 were $.14 compared to $.15 for the prior year.

Thompson reported that during the fourth quarter, sales and earnings for the company's U.S. operations remained sluggish and fell below the results for the same quarter of the prior year. However, higher income related to Lindberg's 50 percent owned Brazilian operation and lower overhead costs partially offset the domestic shortfall.

Sales for the year were $78,957,580 compared to $81,450,503 for 1988. Net earnings for 1989 of $2,865,225 compare to $3,558,701 for the prior year. Net earnings per share of $.61 for the year compare to $.76 for 1988.

Also today, the board of directors of Lindberg Corporation declared a regular quarterly dividend of $.07 per common share. The dividend is payable March 1, 1990, to shareholders of record Feb. 9, 1990. The company has 4,738,207 common shares outstanding.

Lindberg is the nation's largest commercial heat treating company, serving the metalworking industry from 21 plants located in major industrial centers throughout the United States and Brazil. Lindberg also owns and operates Harris Metals, a producer of precision castings; Arrow-Acme, a producer of die castings and permanent mold castings; and Alloy Wire Belt, a producer of conveyor belts for the food processing, building insulation and glass industries.

CHICAGO, (JAN. 25) PR NEWSWIRE - Quixote Corp. (NASDAQ: QUIX) announced today its sales and earnings for the second quarter and for the first six months of its fiscal year.

For the three months ending Dec. 31, 1989, Quixote's sales were $13,571,000 compared to $15,213,000 for the same period last year. Earnings for the second quarter were $273,000, or 4 cents per share, vs. $216,000, or 3 cents per share, for the same quarter a year earlier.

Sales for the second quarter were down compared to the same quarter for the previous year. This was due primarily to a drop in revenues at Source Scientific Systems Inc. caused by a delay in the release of a new line of products.

For the six-month period, sales were $30,220,000, compared to $31,650,000 for the first six months of fiscal 1989. Earnings for the first half of

the fiscal year were $1,332,000, or 18 cents per share, compared to $1,352,000, or 17 cents per share, for the same period last year.

Quixote Corp. is a diversified technology company composed of Energy Absorption Systems, Inc., the world's leading manufacturer of a wide range of highway crash cushions, devices that save lives on our nation's highways; Stenograph Corp., the world's leading manufacturer of shorthand machines and computer systems for the court reporting profession; and Source Scientific Systems Inc., a leading manufacturer of automated diagnostic equipment for the biotechnology industry. In addition, Quixote Corp. holds an equity position in Disctronics Manufacturing Inc., which is one of the largest manufacturers of compact discs (CDs), videodiscs and CD-ROMs in the United States. Quixote Corp. is a founding shareholder of Neophore Technologies Inc., which is developing a unique, patented approach to providing an advanced drug delivery system as well as a substitute for donated human whole blood.

GRAND RAPIDS, MI. (JAN. 25) PR NEWSWIRE - Old Kent Financial Corporation (OTC: OKEN) today announced the adoption of a stock repurchase program.

Old Kent has authorized the purchase of shares of its common stock having an aggregate purchase price not greater than $50 million. Purchases, which may commence immediately, may be in the open market or in negotiated transactions. Timing, price, quantity and manner of purchases will be at the discretion of the corporation's officers. The program may be discontinued or suspended at any time, and there is no assurance that the corporation will purchase the full amount authorized.

Earlier this month, the corporation announced that it had called its Series A Preferred Stock for redemption and expected that holders of Series A Preferred Stock would convert those shares to common stock before the April 1, 1990, redemption date. The purpose of the newly announced stock repurchase program is to acquire, to the extent practicable, shares of common stock to be issued to holders of preferred stock upon conversion.

Old Kent Financial Corporation is a bank holding company headquartered in Grand Rapids, with 17 affiliate banks and 182 banking offices throughout Michigan, and four banks with 12 banking offices in Illinois. Old Kent reported total assets of $8.1 billion at Dec. 31, 1989.

PITTSBURGH (JAN. 25) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDVB) officials today said they were delighted by New Jersey Gov. James Florio's appointment of Steven J. Madonna, Chambers' deputy general counsel for its operations in New Jersey, to the position of environmental prosecutor in New Jersey.

Madonna will be responsible for coordinating the activities of all agencies in New Jersey that have environmental enforcement responsibility, such as the Department of Environmental Protection, Board of Public Utilities and various divisions within the attorney general's office.

Madonna expects to fill the position within a month. Despite the new position, Madonna is sorry to leave Chambers.

Prior to joining Chambers in April 1988, Madonna was the former supervising deputy attorney general of the Waste Industry Investigations Unit, New Jersey Division of Criminal Justice. His responsibilities included investigations and prosecutions involving racketeering and corruption elements in the hazardous and solid waste industries.

Madonna also was chief of the Environmental Prosecution Sections of the New Jersey Division of Criminal Justice and chief of the division's Solid Waste Investigations Unit investigating racketeering and anti-competitive practices in the solid waste industry.

He also served on the 14-state Northeast Hazardous Waste Project as general chairperson of the Steering Committee and training chairperson.

He also lectured extensively throughout the nation on the waste industry. He has also lectured at the FBI Academy and the Federal Law Enforcement Training Center, and has testified as an advisor to numerous federal and state legislative committees.

Chambers Development Co., headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, recycling, disposal and landfill development. The company also has operations in Alabama, the District of Columbia, Georgia, Indiana, Maryland, New Jersey, North Carolina, Ohio, Rhode Island, South Carolina, Texas, Virginia and West Virginia.

#90025p0328 01/25/1990 ~PR Newswire

MENLO PARK, CA. (JAN. 25) PR NEWSWIRE - MEDIAGENIC (NASDAQ: MGNC) today announced net revenues of $20.5 million for the third quarter of its fiscal year, ended March 31, 1990, the highest quarterly net revenues in over six years. The company reported net income for the quarter of $1.1 million or 25 cents per share. This compares with net income of $.6 million, or 15 cents per share, for the corresponding quarter of fiscal year 1989.

These results bring net revenues for the first nine months of fiscal 1990 to $50.9 million an increase of 11 percent over net revenues of $46.0 million in the corresponding period of fiscal year 1989. As a result of a $2.6 million non-recurring restructuring charge incurred in the September quarter, the company reported a net loss of $1.4 million, or 34 cents per share, for the fiscal year to date. This compares with net income of $1.1 million, or 27 cents per share, for the corresponding period in the prior fiscal year.

According to MEDIAGENIC Chairman and CEO Bruce L. Davis, the increase in net revenues is attributable to the introduction of several high- quality video and computer games by both the domestic and international organizations and resulting strong holiday sales worldwide. "Revenues were greatly impacted by increased video game sales for the Nintendo Entertainment System and by the strong lineup of computer entertainment

titles released in Europe by Activision (U.K.) Ltd., which included 'Ghostbusters II,' one of Europe's top-selling entertainment titles over the holiday season," said Davis. He added, "Our heavy investment in product development and the licensing and adaptation of video arcade and motion picture properties into entertainment software have fostered a stronger market share worldwide and increased revenues."

During the third quarter, sales of Nintendo titles were strong, including "Stealth A.T.F.," "Ghostbusters" and "The Three Stooges." Two new Nintendo cartridges, "Archon," from Activision and "A Boy and his Blob" from Absolute Entertainment, an affiliated publisher, were introduced in December. Since October, MEDIAGENIC's domestic computer entertainment releases have included Activision's "MechWarrior," "Die Hard" and "Deathtrack" for IBM-compatible personal computers, and Gamestar's "FaceOff!" and "Dragon Wars" from affiliated publisher Interplay Productions, for the Commodore 64. In Europe, Activision (U.K.) Ltd. shipped 10 new titles across multiple hardware systems, highlighted by the release of "Ghostbusters II," "PowerDrift" and "Bomber."

MEDIAGENIC is a diversified international publisher of floppy-disk, cartridge and optical disc-based entertainment software, headquartered in Menlo Park. The company publishes Activision, Infocom, Gamestar, Electric Dreams and ZSoft software and serves as an exclusive distributor for Absolute Entertainment, Interplay Productions, Dynamix, Inc., Sierra On-Line, System 3, Vivid Images Ltd. and Motion Picture House.

SUNRISE, FL (JAN. 25) PR NEWSWIRE - Jan Bell Marketing, Inc. (AMEX: JBM), announced today that Lee A. Mills, who had served as executive vice president and chief operating officer and a director, has been named vice

chairman and president.

Alan Lipton, who had been president, becomes co-chairman, along with Isaac Arguetty. Arguetty and Lipton co-founded Jan Bell in 1983. Lipton remains CEO and Mills COO of the company. "These moves represent the natural evolution of Jan Bell's top-management leadership, which is shared equally by the three of us," said Arguetty.

"Lee Mills taking on the president's title reflects the many contributions he is making to the company, including the implementation of our 'Phase II' plan of aggressive structured growth. Lee will also continue to serve as chief operating officer for the time being, although we will be adding operating management at all key levels to support our future growth," said Lipton.

Jan Bell is a leading provider of fine jewelry to the value-conscious consumer through turnkey programs with the wholesale membership club industry and other distribution channels that emphasize quality, credibility, and consistent value.

CORAL GABLES, FL. (JAN. 25) PR NEWSWIRE - BankUnited (NASDAQ-NMS: BKUN), a Savings Bank serving both coasts of Florida, has reported net earnings of $172,568 ($.17 per share) on total income of $5,013,107 for the three

months ended Dec. 31, 1989, a gain of 11 percent over its net earnings of $155,190 ($.17 per share) on total income of $3,471,066 for the same quarter of 1988.

In announcing the earnings, Alfred R. Camner, chairman and president of BankUnited, stated, "This is our best ever first quarter, and is an excellent beginning upon which to build our 1990 fiscal year. The 11 percent increase in earnings follows the bank's record performance in profits and other financial categories during the past fiscal year.

"Compared to a year ago, BankUnited's financial gains are very gratifying. Assets are up 31 percent to $205 million, deposits are up 27 percent to nearly $167 million, and regulatory/risk-based capital is up 16 percent to $15.2 million."

BankUnited's seventh office is scheduled to open next month in Delray Beach, and will be the bank's first entry into Palm Beach County. The six existing offices are located in Bonita Springs, Venice, Bradenton, Coral Gables, Tamarac and Coral Springs.

BankUnited, which until Sept. 30, 1989, was named United Savings Association, is a publicly owned financial institution traded on the NASDAQ National Market System under the symbol BKUN.

WALTHAM, MA (JAN. 25) PR NEWSWIRE - Cabot Corporation (NYSE:CBT) reported today income applicable to primary common shares of $17.4 million (71 cents per share) for its first quarter ended Dec. 31, 1989, compared with $21.8 million (81 cents per share) in the same quarter a year ago. Net sales and other operating revenues were $406.6 million versus $480.1 million last year. The decline in sales resulted from the divestiture in late 1989 of Cabot's West Texas gas pipeline and processing businesses.

Total operating profit in the first quarter declined slightly to $46.3 million from $49.6 million in the same quarter last year due principally to the escalation of feedstock costs in the company's carbon black business.

Cabot Corporation is a Waltham, Mass. based Fortune 300 company with operations in Specialty Chemicals and Materials and Energy.

DETROIT (JAN. 25) PR NEWSWIRE - U.S. automakers will assemble an estimated 120,820 cars this week, compared to last week's 83,560 and year-ago's 161,350, Ward's Automotive Reports announced today.

This brings total estimated car output for calendar 1990 through the end of this week to 293,511, compared to 571,928 for the same period of 1989.

General Motors Corp.'s car plants in Fairfax, Kan., and Doraville, Ga., are down this week for inventory adjustment. The Van Nuys, Calif., plant remains closed for changeover.

All Ford Motor Co. plants are up and running with the Wixom, Mich., plant on daily overtime.

Chrysler car plants in St. Louis, and Sterling Heights, Mich, are closed this week.

Ward's said U.S. truckmakers will complete an estimated 75,585 truck assemblies this week, compared to 51,967 the previous week and 94,801 for the same week a year ago.

Chrysler's Warren, Mich., (Dodge City) truck plant is closed until Feb. 5 for inventory reduction.

General Motors' Lordstown, Ohio, van plant is down for inventory adjustment.

Of this week's estimated U.S. car output, GM accounts for 43.3 percent; Ford Motor Co., 27.1 percent; Chrysler Corp., 9.7 percent; Honda of America Mfg. Inc., 6.5 percent; Mazda Motor Mfg. (USA) Corp., 2.1 percent; Nissan of America Mfg. Corp., 2.0 percent; New United Motor Mfg. Inc., 3.4 percent; Toyota Motor Mfg. USA Inc., 3.6 percent; and Diamond-Star Motors Corp., 2.3 percent.

NEW YORK (JAN. 25) PR NEWSWIRE - Walter E. Mac Donald, a director of Mobil Corporation (NYSE: MOB) and executive vice president, Middle East and Marine Transportation, plans to retire May 1. At that time, John P. Keehan, Jr., Mobil's vice president of planning and economics, will become vice president, Middle East and Marine Transportation.

Allen E. Murray, Mobil chairman and chief executive officer, who announced the changes, said Keehan will be on special assignment working with Mac Donald until May 1.

In his 22 years at Mobil, Mac Donald played a major role in establishing the company's producing interests in Indonesia and the North Sea, and in developing Mobil's assets in Saudi Arabia and other Middle East countries.

Mac Donald, 63, a graduate of Brown University and Boston University Law School, served as a Marine Corps officer, was a trial attorney with the U.S. Department of Justice, and had a wide range of other oil industry experience before joining Mobil in 1967 as general manager, Middle East and Indonesian Affairs Department. From 1970 to 1973, he was vice president, exploration & producing administration, in the International Division. He was elected a corporate vice president in 1974 with responsibility for Middle East operations, and a director of Mobil Oil Corporation in 1977. In 1980, he also assumed responsibility for Mobil's

worldwide marine transportation activities and, in 1980, was elected a director of Mobil Corporation.

Keehan, 55, holds undergraduate degrees in geology and economics and a master's degree in economics from Southern Methodist University. He joined Mobil in 1957 and advanced through a variety of planning assignments in exploration and producing. He was subsequently general manager, U.S. product supply & distribution, and general manager, energy minerals. In 1978, he moved to London as general manager, producing northwest Europe. After additional assignments in producing operations, he was named vice president, producing, Exploration & Producing Division in 1986. He was elected a Mobil Corporation vice president in 1988 when he assumed his planning and economics responsibilities.

#90025p0337 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) Chairman and Chief Executive Officer Allen E. Murray announced the following executive appointments, effective Feb. 1:

Thomas C. DeLoach Jr., vice president and general manager, U.S. marketing, Marketing and Refining Division, will be proposed for election as a vice president of Mobil Corporation and will succeed John P. Keehan Jr. as vice president, planning and economics, for Mobil Corporation and Mobil Oil Corporation. As announced separately today, Keehan will be assuming the position of vice president, Middle East and Marine Transportation, when Walter E. MacDonald retires on May 1.

Robert J. McCool, president, Mobil South, Marketing and Refining Division, will succeed DeLoach as vice president and general manager, U.S. marketing.

John C. Simpson, vice president, planning, Marketing and Refining Division will succeed McCool as president, Mobil South.

James T. Mann, general manager, real estate and land development, and president, Mobil Land Development Corporation, will succeed Simpson as vice president, planning, Marketing and Refining Division.

DeLoach, 42, joined Mobil in 1969 as an engineer at the Beaumont, Texas, refinery. After a series of engineering positions, he moved to New York in 1974, where he advanced through positions in corporate planning, crude oil supply, and supply, distribution and transportation planning. In 1982 he was named manager, planning and coordination. In 1984 he was appointed vice president, supply, U.S. marketing and refining, and assumed responsibility for both supply and planning in 1986. He was appointed to

his current position in October 1986.

McCool, 51, joined Mobil in 1963 as a marketing representative in the New England division. After advancing through a variety of positions in the U.S. Marketing and Refining Division, he transferred to corporate employee relations in 1980 as manager, program evaluation and analysis. He returned to U.S. marketing in 1982 as general manager, lube and commercial business. He was appointed regional executive, Mobil South, in 1984, and assumed his current position in 1985.

Simpson, 46, joined Mobil in 1967 as a supply analyst in corporate supply and distribution. After progressing through managerial and planning positions in both supply and distribution and the Middle East Department, he moved to international marketing and refining in 1984 as a regional executive, Mobil Europe, in London. He assumed his current position in 1987.

Mann, 47, joined Mobil Pipe Line Company in 1966 as an accountant. He subsequently advanced through a variety of financial positions in marketing and refining, Mobil Chemical Company, and corporate finance. He has also had general managerial experience in international marketing and refining, becoming regional executive, Mobil South, in 1985. He was appointed to his current position in 1987.

#90025p0340 01/25/1990 ~PR Newswire

LOS ANGELES (JAN. 25) PR NEWSWIRE - Carnation Company has signed an agreement to purchase 27 acres of land in the Beard Industrial Park in Modesto with plans to construct a new evaporated milk production facility.

A number of cities in the San Joaquin Valley were reviewed prior to selecting Modesto.

Factors in the site selection process included available land, and attractive costs on water, sewerage system, electrical power and freight costs. Modesto offers both good highways and a railroad system which intersects all major lines.

Selection of Modesto will also enable Carnation to stay close and continue the relationship with dairy farms with whom the company maintains contracts.

Purchase price for the land or anticipated construction costs were not released.

While no date has been released for construction, Carnation has started exterior and interior design for the 125,000 square-foot facility. With completion expected in the fall of 1991, the plant will employ approximately 60 people. The 27 acre-site will also allow room for future expansion.

Carnation's origins are founded in the evaporated milk business. Today Carnation is the nation's major supplier of evaporated milk in addition to a wide variety of other food products for the retail, foodservice and pet food markets. In addition to Carnation products such as evaporated milk, hot cocoa mix, instant breakfast, malted milk, nonfat dry milk, ice cream, yogurt, and frozen potato products, the company's brand names include: Libby, Contadina, Coffee-mate, Friskies, Fancy Feast, Mighty Dog, Grand Gourmet, Contadina Fresh, Chef-mate, Que Bueno!, Good Start and Buitoni.

Carnation employs approximately 9,000 people at 60 manufacturing, sales or administrative facilities throughout the United States. In 1989 Carnation sales totaled approximately $2.6 billion.

WEST CHESTER, PA (JAN. 25) PR NEWSWIRE - Chemical Waste Management Inc. (NYSE: CHW) and Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) have reached an agreement in principle to form an alliance to serve the growing waste management requirements of federal agencies in the United States, Weston announced today.

The alliance will exist through their joint ownership in Chemical Waste Management Inc.'s recently formed subsidiary Chem-Nuclear Environmental Services Inc. (CNES).

Chem-Nuclear Environmental Services Inc. will provide total waste management and disposal services for waste emanating from or existing at federal facilities. The company will especially serve the federal government's radioactive and mixed waste (radioactive and hazardous waste) market at federal facilities. This encompasses the environmentally sound management and disposal of all waste from waste water to high level nuclear wastes. Weston will hold a 29 percent interest and Chemical Waste Management Inc. will own the remaining 71 percent of CNES.

The CNES organization will integrate certain capabilities and assets of Chemical Waste Management Inc. and its subsidiary, Chem-Nuclear Systems Inc., with certain operating capabilities and assets of Weston. Approximately 400 employees are expected to staff the new company initially.

Earl Gjelde, vice-president of Chemical Waste Management Inc., has been named president of Chem-Nuclear Environmental Services. In addition to Mr. Gjelde, Mr. William Hewitt, vice-president and board member of Weston, will be placed in charge of operations.

CNES will be supported by the science and technology capabilities of both Weston and Chemical Waste Management Inc. Both firms have extensive capabilities in analytical, technological development, and leading-edge scientific disciplines. This experience will be employed to develop and implement new technologies for waste minimization, stabilization, transportation, recycling, interim storage and disposal.

The agreement in principle is subject to approval by the boards of directors of Chemical Waste Management Inc. and Roy F. Weston Inc.

Chemical Waste Management Inc. is the nation's largest environmental services company specializing in the transportation, treatment and disposal of hazardous wastes, minimization, recycling and resource recovery of hazardous waste, and the cleanup of sites contaminated with such waste.

Weston is a recognized leader in the environmental engineering, design and consulting industry; as a full-service environmental and health and safety firm, Weston provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services.

FOUNTAIN VALLEY, CA (JAN. 25) PR NEWSWIRE - Hyundai Motor America today announced its new advertising campaign beginning in February will feature Hyundai commercials accessible to hearing-impaired viewers via closed captions.

Similar to subtitles, captions translate spoken dialogue into printed words on a screen; they also indentify speakers and indicate additional information, including sound effects and mood music. Captions are synchronized with speech patterns and changes in camera angles to convey a sense of rhythm and pace.

There are approximately 16 million hearing-impaired consumers in the

United States. In fact, hearing impairment is the nation's most prevalent disability, affecting one in every 15 people.

"Hyundai is pleased to close caption our commercials for the hearing impaired. It is a further example of Hyundai's commitment to the American public," said Rod Hayden, executive vice president and chief operating officer, Hyundai Motor America.

Prime time captioned network programs sponsored by Hyundai include "Roseanne," "thirtysomething," "Head of the Class," "Growing Pains," "My Two Dads," and "Doogie Howser, M.D." to mention a few.

Hyundai Motor America has sold over 880,035 vehicles since entering the U.S. market in 1986. Besides recently introducing the new midsize Sonata V-6 and an all new redesigned version of the award-winning Excel for 1990, the company plans to introduce a sporty car, aimed at young buyers seeking stylish, economical transportation.

#90025p0345 01/25/1990 ~PR Newswire

CLEARWATER, FL. (JAN. 25) PR NEWSWIRE - Fortune Financial Group, Inc. (NASDAQ-NMS: FORF) today reported a net loss of $1.6 million for its fiscal first quarter, which ended Dec. 31. This compared with net income $908,000 in the three months ended Dec. 31, 1988.

The loss in the latest quarter amounted to 37 cents per share, compared to net income of 20 cents per share for the 1988 quarter.

Despite the holding company's loss, Fortune Savings Bank, its principal subsidiary, showed a profit of $448,000 for the quarter, compared with a $2.1 million profit in the same three months of last year.

Several factors negatively affected the holding company during the latest quarter:

1. The holding company sold more than $5 million in marketable equity securities and money market investments, to insure the bank's continued compliance with the new stricter capital requirments. The transactions occurred during unfavorable market conditions and resulted in losses of $800,000 during the quarter.

2. Amounts paid to the company's retired chairman were accrued and resulted in a $450,000 after-tax charge.

3. The company recorded a loss of $763,000 from its investment in Golf

Car Systems, Inc. Golf Car's restructuring, which began in December, provided little benefit to the company's results during the quarter.

Rausey W. Mason, president and chief executive officer of Fortune Savings Bank, said the bank's interest rate spread for the December quarter was 1.44 percent, the same as the same 1988 quarter and up from the 1.30 percent registered in the previous quarter, ended Sept. 30, 1989.

Fortune's interest rate spread at Dec. 31 was 1.49 percent, compared with 1.34 percent at Dec. 31, 1988. Mason said the spread should continue to improve in the fiscal second quarter.

Fortune's book value per share increased to $29.80 at Dec. 31, 1989, from $28.92 at Sept. 30, due to a decrease in the number of shares outstanding.

Mason said Fortune Savings Bank continues to meet all capital requirements under the Financial Institutions Reform, Recovery and Enforcement Act of 1989.

Fortune Savings Bank, which has $3.2 billion in assets, operates 47 banking branches in Florida, mostly on the west coast.

Fortune Financial's common stock is traded on the NASDAQ National Market System under the symbol "FORF."

DETROIT (JAN. 25) PR NEWSWIRE - Officials at Great Scott! Supermarkets, a division of Meadowdale Foods, Inc., today announced the introduction of "PRESIDENT'S CHOICE," a completely new product line for the company.

Great Scott! (Meadowdale Foods, Inc.) is the exclusive Michigan distributor, one of only five in the entire United States, of the new PRESIDENT'S CHOICE brand, an innovative private-label line of superior quality food products that will be priced lower than national brands. The line has received extraordinary success with its introductions in other markets and has consistently shown strong sales increases.

Meadowdale Foods, Inc. is a privately owned, Detroit-based corporation, which operates both the Great Scott! Supermarkets and Abner Wolf Distributors, a wholesale grocery company.

PRESIDENT'S CHOICE has been developed and marketed by Loblaw Companies, Ltd., one of Canada's leading supermarket groups. The company has been selling PRESIDENT'S CHOICE in Canada for over five years and is now actively extending distribution of these products to selected retailers in the United States and elsewhere internationally.

The Canadian company's dedication to quality and value in its PRESIDENT'S CHOICE program has received broad-based accoladese, most recently being featured on NBC's "Today Show" in December and a current ABC "Evening News with Peter Jennings."

PRESIDENT'S CHOICE, an innovative line of superior quality supermarket products is now available exclusively in Michigan at all 34 Great Scott! locations.

This new private-label line includes foods from all around the world ... raspberry vinegar, all butter Scottish shortbread, real Devon custard from England's famous dairy country ... as well as many new products developed specifically for the PRESIDENT'S CHOICE program, 65 percent of which are produced right here in the United States.

Product developers of PRESIDENT'S CHOICE consult with the leading experts in the field ... for example, in developing value-priced products from pizza to pet foods. More importantly, while PRESIDENT'S CHOICE products are manufactured to strict standards to ensure they're equal to or better than the leading national brand, they are offered at the lowest possible price.

In addition to the exclusive line of food items mentioned, Great Scott! will feature, in the spring, the PRESIDENT'S CHOICE collection of roses, lilies and perennial flowers from around the world.

NEW YORK (JAN. 25) PR NEWSWIRE - Walter E. Blankley, 54, senior vice president of Ametek Inc. (NYSE: AME), will become president and chief executive officer in April, succeeding John P. Dandalides, 66, currently president and chief operating officer, who has decided to retire, Dr. John H. Lux, the company's chairman, annouced today.

Blankley, at that time, will join Ametek's board of directors. Lux will continue to serve the company as chairman of its board of directors.

Ametek also announced the appointment, to take effect in April, of Roger K. Derr as executive vice president and chief operating officer, and Allan Kornfeld as executive vice president and chief financial officer. Both Derr and Kornfeld are senior vice presidents.

Blankley was born Sept. 23, 1935, and received his bachelor of science degree in mechanical engineering from Princeton University in 1957. In July 1960 he joined Ametek and in 1966 was appointed general manager of the company's Hunter Spring division. In 1970 he became general manager of its multi-plant Aluminum Extrusion division, and was elected a vice president of Ametek in 1971, group vice president in 1981, and has been senior vice president since 1983. He and his wife, Rosemary, live in West Chester, Pa., a Philadelphia suburb. They have a son, Stephen, who lives in California, and a daughter, Laura, living in Texas.

Derr, 58, presently a senior vice president of Ametek, joined the company in 1958. He had served as general manager of the Lamb Electric division and became a vice president in 1972, group vice president in 1981, and a senior vice president in 1983. Kornfeld, 52, joined Ametek as comptroller in 1975 after many years with Arthur Young and company. He became vice president and comptroller in 1983, and since 1987 has been senior vice president and chief financial officer.

Blankley will become the seventh president in Ametek's 60-year history. This Fortune 500 industrial manufacturer, with 30 manufacturing plants and research facilities and 6,000 employees worldwide, has sales of more than $500 million. Listed on the New York Stock Exchange since 1930, Ametek has increased dividend payments to its stockholders for 40 consecutive years.

#90025p0349 01/25/1990 ~PR Newswire

SAN MATEO, CA (JAN. 25) PR NEWSWIRE - Electronic Arts today announced its third quarter fiscal year 1990 operating results. Revenues for the third quarter ended Dec. 31, 1989 were $23,485,000, up from $22,994,000 in the third quarter of fiscal 1989. Revenues for the first nine months of fiscal 1990 were $54,442,000 up from $51,517,000 in the first nine months

of fiscal 1989.

Net income for the third quarter of fiscal 1990 was $3,196,000 compared to $2,641,000 in the like quarter of the prior year, an increase of 21 percent. Net income for the nine months ended Dec. 31, 1989 was $5,118,000, an increase of 33 percent over the $3,849,000 earned in the like period in the prior year. Earnings per share for the quarter were 33 cents, the same as earned in the third quarter of fiscal year 1989. Earnings per share were the same on higher earnings due to the increased number of shares outstanding which resulted from the company's September 1989 Initial Public Offering. Earnings per share were 58 cents for the nine months ended Dec. 31, 1989 compared to 48 cents for the like period of the prior year, an increase of 21 percent.

Operating income in the third quarter of fiscal 1990 was $4,135,000, up 35 percent from the $3,061,000 reported in the like quarter of the prior year. For the first nine months of fiscal 1990 operating income was $7,172,000, compared to $4,784,000 in the prior year, an increase of 50 percent. The growth in operating income relative to revenues was primarily due to reduced operating expenses in both domestic and foreign operations and writeoffs taken in fiscal year 1989 in conjunction with the restructuring of certain foreign operations.

Trip Hawkins, president and CEO of Electronic Arts, said, "The company had its best quarter ever. Not only did we set records for revenues and profits, but we also shipped 13 new products which achieved high marks on various industry ratings charts and reviews. With the addition of Lucasfilm Games(TM), SEGA(R), and Cinemaware(R) in the second quarter, our Affiliated Label business continued to grow and our foreign operations continued their success and made significant contributions to our profits."

#90025p0353 01/25/1990 ~PR Newswire

BOSTON (JAN. 25) PR NEWSWIRE - The board of directors of Bank of Boston Corporation (NYSE: BKB) today declared quarterly dividends of 78 cents per share on the corporation's Series A preferred stock (BKB pfA); 75 cents per share on its Series B preferred stock (BKB pfB); and $1.37 per share on its Series C preferred stock (BKB pfC). The dividends on each of these three series of adjustable-rate, cumulative preferred stock are payable March 15, 1990, to stockholders of record on Feb. 23, 1990.

For the period Dec. 16, 1989, through March 15, 1990, the dividend rate is 6.35 percent for the Series A shares, 6.10 percent for the Series B shares and 5.55 percent for the Series C shares.

The corporation's three series of preferred stock were issued each in connection with the acquisition of bank holding companies in Maine (Series A), Connecticut (Series B) and Rhode Island (Series C).

The dividend rate on each of the three series is adjusted quarterly. The dividend rate on the Series A shares is 195 basis points below the highest of three Treasury benchmarks, with a minimum dividend rate of 6 percent and a maximum rate of 13 percent. The dividend rate on the Series B shares is 220 basis points below that Treasury benchmark, with a minimum rate of 6 percent and maximum rate of 13 percent. The dividend rate on the Series C shares is 275 basis points below the same benchmark, with a minimum rate of 5.50 percent and a maximum rate of 12.50 percent.

Bank of Boston Corporation is a New England-based superregional bank holding company with assets of $39 billion at Dec. 31, 1989. Its major banking subsidiaries are The First National Bank of Boston, with headquarters in Massachusetts; Casco Northern Bank, N.A., in Maine; Bank of Boston Connecticut; Rhode Island Hospital Trust National Bank; and Bank of Vermont. The corporation and its subsidiaries provide a broad range of financial services to individual, corporate, instituitonal and governmental customers, as well as to other banks. The corporation's common and preferred stocks are listed on the New York and Boston stock exchanges.

#90025p0357 01/25/1990 ~PR Newswire

BIRMINGHAM, AL (JAN. 25) PR NEWSWIRE - Torchmark Corp. (NYSE: TMK) reported today that net income per share, excluding realized investment gains or losses, for the year ended Dec. 31, 1989 was $3.88, up 20 percent from $3.24 per share for 1988.

R.K. Richey, chairman, stated that this extended the company's record of consecutive annual increases in both earnings per share and dividends per share to 38 years, the longest of any New York Stock Exchange Company. For the fourth quarter of 1989, net income per share, excluding realized losses, was $1.02 compared to $.86 for the fourth quarter of 1988, a 19 percent increase. The company realized investment gains of less than $.01 per share in 1989 compared to capital losses of $.09 per share in 1988. In the fourth quarter, realized investment losses per share were $.07 in 1989 and $.16 in 1988.

Net income for 1989 was $211 million, up 16 percent from $182 million for 1988. Fourth quarter, 1989, net income was $51.3 million compared to $39.7 million for the fourth quarter of 1988, an increase of 29 percent.

Total revenue for 1989 grew 6 percent to $1.6 billion. Individual life premium grew 10 percent to $341 million while individual health premium increased slightly to $683 million. Total premium and policy charges increased 2 percent to $1.2 billion. Financial services revenue was $108 million, up 6 percent. Net investment income grew 16 percent to $308 million.

At the end of 1989, Torchmark's assets were $4.9 billion and shareholders' equity was $895 million. Shareholders' equity per common share was $15.03, and return on common equity for 1989 was 27.9 percent.

#90025p0358 01/25/1990 ~PR Newswire

BIRMINGHAM, AL (JAN. 25) PR NEWSWIRE - United Investors Management Co. (NYSE: UTD) has reported 29 percent growth in net income for 1989.

R.K. Richey, chairman, noted that 1989 was the eighth consecutive year in which earnings growth exceeded 18 percent. Return on average equity for the year was 17.4 percent.

United Investors had net income, excluding realized investment gains or losses, of $54.5 million or $1.44 per share. This compares to $41.8 million or $1.11 per share in 1988. Realized losses in 1989 were $599,000 after tax while in 1988 the company had a realized gain of $63,000 after tax.

For fourth quarter of 1989, net income, excluding realized investment losses, increased to $14.1 million or $.37 per share, up from $11.7 million or $.31 per share. Realized investment losses after tax during the fourth quarter were $475,000 in 1989 and $111,000 in 1988.

Total revenue was $233 million in 1989, up 17 percent from $200 million in 1988. Assets under management at Waddell and Reed increased 6 percent to $8.5 billion. Total life insurance in force at United Investors Life on Dec. 31, 1989 was $14.2 billion. United Investors had total assets of $856 million and shareholders' equity of $331 million at the end of 1989.

#90025p0359 01/25/1990 ~PR Newswire

WESTBOROUGH, MA (JAN. 24) PR NEWSWIRE - New England Electric Systems (NYSE: NES) (NEES) today reported earnings of $2.36 per average share for the year ended December 1989.

In December 1989, two NEES subsidiaries consummated a settlement agreement with a joint venturer, which resolved pending arbitrations and resulted in the sale of NEES's ownership interest in a jointly owned coal-carrying ship. The agreement resulted in a nonrecurring gain in NEES's 1989 earnings of approximately 16 cents per average share due to tax benefits from the sale of the ship and the reversal of previously accrued litigation reserves.

The 1989 earnings compare to a loss of 94 cents per average share for the year 1988. The 1988 loss was the result of a rate settlement announced in June 1988 by New England Power Company (NEP), NEES's wholesale generating subsidiary.

The 1988 rate settlement resulted in an after-tax write-down of $179 million, which reduced earnings per average share by $3.14 for the year 1988. The settlement resolved a number of rate cases outstanding at that time, including all issues associated with our investments through the end of 1987 in the Seabrook 1 nuclear unit. If Seabrook 1 is in commercial operation and various other conditions are met, NEP would be able to reverse a portion of the write-down. This could increase net income by up to about $85 to $115 million after tax. The settlement also allows NEP to recover from customers costs resulting from an affiliate's oil and gas exploration and development activities undertaken from 1974 through 1983.

#90025p0360 01/25/1990 ~PR Newswire

HOUSTON (JAN. 25) PR NEWSWIRE - National Asset Bank (a bank in liquidation) (NASDAQ: NABK) today announced that its board of directors had authorized a distribution to stockholders in partial liquidation of 15

cents per share of common stock. The record date for the determination of stockholders entitled to a distribution is Feb. 15, 1990, and the liquidating distribution will be paid on Feb. 28, 1990.

The liquidating distribution declared by the bank represents the third such distribution to be made by the bank under its plan of liquidation since its inception on Jan. 29, 1988. A spokesman for the bank stated that the 15 cents per share distribution was determined by the bank after giving consideration to, among other things, the bank's current cash accounts and anticipated obligations for operating expenses, advances, fees, taxes and other cash requirements. The spokesman added that future liquidating distributions of the bank to its stockholders will be dependent upon the amount of its future collections and expenses and will be made only after giving consideration to existing circumstances and the bank's cash requirements. Accordingly, there can be no assurance as to the amount or timing of any future liquidating distributions by the bank to its stockholders.

In an unrelated matter, the bank also announced that Michael A. Hrebenar was elected as president and chief executive officer and a director of the bank effective Feb. 7, 1990. Hrebenar will succeed Joe Lynch as president who will continue as chairman of the board of directors of the bank. Hrebenar, whose experience includes serving as senior vice president of National Loan Bank (a bank in liquidation) and with the office of the Comptroller of the Currency, will assume the full time responsibility for overseeing the day to day operations of the bank.

As previously reported, the outstanding shares of common stock of the bank were issued to the stockholders of Allied Bancshares Inc. ("Allied") as a distribution in connection with the merger of Allied with and into a wholly owned subsidiary of First Interstate Bancorp. The initial assets of the bank consisted primarily of participation interests in non-performing loans and various real estate and other non-performing assets transferred to it by Allied upon the bank's inception. The bank is currently operating under a plan of voluntary complete liquidation and its business consists solely of collecting or otherwise realizing on its loan and other assets and distributing the net proceeds to its stockholders. The assets of the bank are currently being managed and serviced by First Interstate Bank of Texas, N.A., a subsidiary of First Interstate Bancorp, pursuant to an exclusive management and servicing agreement. Under such agreement, First Interstate Bank of Texas is currently receiving a management and servicing fee equal to approximately 12-1/2 percent of the amount of gross collections and other realizations in cash with respect to the bank's assets plus out-of-pocket expenses.

#90025p0362 01/25/1990 ~PR Newswire

ANN ARBOR, MI. (JAN. 25) PR NEWSWIRE - Interface Systems, Inc. (NASDAQ-NMS: INTF) today reported increased revenues and reduced earnings for the first quarter of fiscal 1990, which ended on Dec. 31, 1989, for the company.

Revenues for the quarter were $8,703,349, up 51.6 percent from last year's first-quarter revenues of $5,739,424. Net earnings dropped 23.7 percent to $411,214, or $0.10 per share, from $539,297, or $0.13 per share, for the same period last year.

There were 4,325,190 average common shares outstanding, compared to 4,314,089 during the first quarter of fiscal 1989.

Interface Systems is a diversified manufacturer of high-technology products. The company and its subsidiaries manufacture industrial-grade computers and computer terminals, called industrial workstations; plug-compatible printers for users of IBM mainframe and midrange computer systems; remote high-speed PC-to-mainframe data communications systems; and custom printed circuit boards.

Carl L. Bixby, Interface Systems' CEO, attributed much of the company's first-quarter revenue growth to the December 1988 acquisition of CLEO Software. Results from CLEO Software were not included in fiscal 1989's first-quarter totals.

In April 1989, Interface Systems merged CLEO Software with its former Winterhalter, Inc. subsidiary to form CLEO Communications, now operating as a company division.

Further contributing to Interface Systems' first-quarter revenue growth were improved sales of its IBM plug-compatible printers. Sales of its Nematron industrial workstations also increased, though less than expected. "This," said Bixby, "was a major factor in our first-quarter earnings decline."

Bixby projected continued revenue growth and improved earnings performance in the company's second quarter. "We have healthy backlogs in orders for our printers and data communications products," he said. "Plus, we expect Nematron to keep growing, though at a lower level than originally forecasted. The factory automation market appears to be soft right now, and to accommodate this, we are cutting back on expenses."

#90025p0364 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - S&P lowered its rating on Shawmut National Corp. commercial paper to 'A-2' from 'A-1'; Hartford National Corp. senior debt to single-'A'-minus from single-'A' and subordinated debt to triple-'B'-plus from single-'A'-minus; Shawmut Bank of Boston's certificates of deposit to single-'A'-minus/'A-2' from single-'A'/'A-1'; and Connecticut National Bank's certificates of deposit and debt issues backed by letters of credit to single-'A'-minus/'A-2' from single-'A'/'A-1'.

In addition, the rating on Shawmut Corp. is lowered to single-'A'- minus from single-'A'.

The downgrades affects about $575 million of debt. Continued asset quality deterioration, especially in its real estate-related loan portfolio, has weakened financial performance. Regional economic and real estate sector problems have led to steady increases in problem loans and necessitated a large income reducing provision for losses in the fourth quarter.

Given a weakening operating environment, it is likely that further problem loans will surface which will require higher than normal charges to earnings for the foreseeable future.

Shawmut National is the third largest bank holding company in New England with $28 billion in assets. It operates in three states with its flagship, Connecticut National Bank being the largest in Connecticut, while Shawmut Bank of Boston is the third largest in Massachusetts. It also operates a smaller bank in Rhode Island.

Despite negative trends, Shawmut National is in a better financial position to avoid the more troubling asset quality deterioration that occurred in many New England banks and thrifts.

Although subject to the overall decline in New England economic condition, Shawmut National's loan mix is less concentrated in the weakest loan categories -- construction and commercial real estate mortgage -- with 20 percent of its portfolio in these loan categories.

In addition, it maintained more prudent loan leverage at 11.4 percent.

However, should deterioration in regional economic conditions continue at an accelerated pace, higher-than-expected problem loans could result in losses, capital impairment, and consequently additional ratings adjustments, S&P said.

WEST CHESTER, PA (JAN. 25) PR NEWSWIRE - Chemical Waste Management Inc. (NYSE: CHW) and Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) have reached an agreement in principle to form an alliance to serve the growing waste management requirements of federal agencies in the United States, Weston announced today.

The alliance will exist through their joint ownership in Chemical Waste Management Inc.'s recently formed subsidiary Chem-Nuclear Environmental Services Inc. (CNES).

Chem-Nuclear Environmental Services Inc. will provide total waste management and disposal services for waste emanating from or existing at federal facilities. The company will especially serve the federal government's radioactive and mixed waste (radioactive and hazardous waste) market at federal facilities. This encompasses the environmentally sound management and disposal of all waste from waste water to high level nuclear wastes. Weston will hold a 29 percent interest and Chemical Waste Management Inc. will own the remaining 71 percent of CNES.

The CNES organization will integrate certain capabilities and assets of

Chemical Waste Management Inc. and its subsidiary, Chem-Nuclear Systems Inc., with certain operating capabilities and assets of Weston. Approximately 400 employees are expected to staff the new company initially.

"Federal facilities represent a multi-billion dollar annual market for the treatment and disposal of all types of waste including particularly radioactive and mixed waste," stated Jerry E. Dempsey, president and chief executive officer of Chemical Waste Management Inc. "Weston has highly regarded capabilities involving sophisticated engineering and related technical services for government installations and we believe the combination of Weston's strengths with those of our company will create new, needed capabilities for the management of these wastes," the chief executive noted.

"Weston expects to combine some members of its staff, who are associated with existing federal government agency contracts, with staff members from Chemical Waste Management, Inc. and their subsidiary company. The alliance thus formed will broaden Weston's line of business and enhance the continuation of its normal base of services," stated Roy F. Weston, chairman and chief executive officer of Weston.

Earl Gjelde, vice-president of Chemical Waste Management Inc., has been named president of Chem-Nuclear Environmental Services. In addition to Mr. Gjelde, Mr. William Hewitt, vice-president and board member of Weston, will be placed in charge of operations.

CNES will be supported by the science and technology capabilities of both Weston and Chemical Waste Management Inc. Both firms have extensive capabilities in analytical, technological development, and leading-edge scientific disciplines. This experience will be employed to develop and implement new technologies for waste minimization, stabilization, transportation, recycling, interim storage and disposal.

The agreement in principle is subject to approval by the boards of directors of Chemical Waste Management Inc. and Roy F. Weston Inc.

Chemical Waste Management Inc. is the nation's largest environmental services company specializing in the transportation, treatment and disposal of hazardous wastes, minimization, recycling and resource recovery of hazardous waste, and the cleanup of sites contaminated with such waste.

Weston is a recognized leader in the environmental engineering, design and consulting industry; as a full-service environmental and health and safety firm, Weston provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management

services.

FORT WORTH, TX (JAN. 25) PR NEWSWIRE - Robert H. McLean, chairman of the board and president of Buffton Corp. (AMEX: BFX), announced today that a Strategic Planning Committee of the board of directors has been appointed and that the company has retained the services of the investment banking firm, Dean Witter Reynolds Inc. to work with the Committee in evaluating various business plan alternatives available to the company.

In making the announcement, McLean stated, "Over the past several years, including years in which we have had strong earnings, we have not been satisfied with the market valuation of our common stock. The underlying values of our operating businesses have grown from year to year, and on most occasions have exceeded the market value of our common stock in the marketplace. As a result, we have not been afforded the opportunity to finance the company utilizing equity based securities."

McLean further stated, "We have operated as a holding company with a diversified base of industrial manufacturing companies. As a result, we offered an investor some protection from downside risk, but little opportunity for expected upside gains. It is possible we will undertake a plan to sell certain of our businesses and redeploy some of our assets into other industries."

McLean further stated, "Dean Witter Reynolds Inc. will advise management concerning the sale of certain assets as we move forward to develop a definitive plan for the company. Our goal is to best position the company for the 1990s and to enhance the company's value to its stockholders."

McLean also announced today that Nicholas Martin Jr. has joined the

company's board of directors. Martin is president of Martin Land and Investment Co., a private real estate investment company. For 10 years, Martin served as president and chairman of the board of Mastershield Inc., a manufacturer of vinyl siding products located in Weatherford, Texas.

Buffton Corp. is a diversified group of companies engaged in the manufacture of avionic, electronic, and plastic products.

FORT WASHINGTON, PA (JAN. 25) PR NEWSWIRE - Rorer Group Inc., (NYSE: ROR) a Fortune 500 pharmaceutical manufacturer, today reported that net income rose 40 percent to $86.5 million in 1989, compared with $61.8 million in 1988.

Primary earnings per share increased 36 percent to $2.67, up from $1.96 per share one year ago. Fully diluted earnings per share increased 26 percent to $2.43, from $1.93 in 1988.

Earnings for 1989 benefited from a $19.9 million pre-tax gain resulting from a merger-termination fee paid by A.H. Robins Co. Inc. This gain was partially offset by restructuring costs for rationalization of facilities in Europe. Excluding these one-time items, primary earnings per share were $2.42, compared with $1.96 in 1988; and fully-diluted earnings per share were $2.25, from $1.93.

Worldwide sales increased 13 percent to a record $1.18 billion for the year ended December 31, 1989, compared with sales of $1.04 billion for the same period in 1988. Excluding the impact of foreign currency exchange, sales increased 16 percent in 1989, continuing a strong record of sales increases.

Sales in the fourth quarter of 1989 grew by 24 percent to $403 million, compared with $325 million in the same period in 1988. Net income in the quarter was $44.7 million, up 66 percent from $26.9 million one year ago.

Primary earnings per share grew by 62 percent to $1.38, compared with 85 cents in 1988; and fully diluted earnings per share grew 49 percent to $1.12, up from 75 cents.

Excluding the impact of one-time items, fourth quarter net income increased 37 percent; primary earnings per share grew 34 percent to $1.14 and fully diluted earnings per share was 94 cents, an increase of 25 percent over the same period a year ago.

Robert E. Cawthorn, chairman and chief executive officer, said: "It was an exceptionally good year for us around the world. We achieved strong results even though we invested heavily in marketing programs and re-search and development to ensure a prosperous future.

"Our 'Maalox Moments'(R) campaign is beginning to return our investment. Overall, sales of our Maalox(R) line grew by 19 percent in the fourth quarter compared with the year-ago period. Maalox sales growth was aided by the U.S. introduction of cherry - flavored tablets and cherry- and mint-flavored Extra Strength Maalox Plus.

SEATTLE, (JAN. 25) PR NEWSWIRE - Washington Mutual, a Federal Savings Bank and Old Stone Bank, a Federal Savings Bank, announced today that they have signed a definitive agreement for Washington Mutual to purchase Old Stone's seven-branch Washington Division.

Washington Mutual, a Federal Savings Bank is a subsidiary of Washington Mutual Savings Bank (NASDAQ: WAMU), Seattle. Old Stone's Washington division is known as Old Stone Bank of Washington.

The agreement, which is subject to regulatory approval, calls for Washington Mutual to assume Old Stone's deposit liabilities in Washington state, which totaled $338 million as of Dec. 31, 1989, and servicing rights on $185 million of primarily Washington-based residential loans serviced for others. In exchange, Old Stone will provide Washington Mutual $325.6 million in assets consisting primarily of Washington-originated consumer, residential construction, residential mortgage and commercial real estate loans.

Old Stone will continue to operate three loan production offices previously operated by Old Stone's Washington division in Lynnwood, Bellevue and Federal Way, Wash., through Old Stone Mortgage Corp.

"This acquisition will enable us to better serve customers in the Puget Sound area by expanding our financial center network," said Louis H. Pepper, chairman and chief executive officer of Washington Mutual Savings Bank. "It is consistent with our corporate strategy of increasing market share through new households and new locations."

Old Stone had announced in December its intention to sell its Washington division.

Washington Mutual, a Federal Savings Bank was formed in 1988 when Washington Mutual Savings Bank acquired Columbia Federal and Shoreline Savings Banks. Together, Washington Mutual Savings Bank and Washington Mutual, a Federal Savings Bank operate 68 financial centers in Washington and 19 loan production offices in Washington, Oregon and Idaho. Washington Mutual has $6.6 billion in assets.

Old Stone Bank of Washington is a division of Old Stone Bank, a Federal Savings Bank, a subsidiary of Old Stone Corp. (NASDAQ: OSTN). Old Stone Corp. and its subsidiaries operate 186 offices in 26 states, and have $4.4 billion in consolidated assets.

PHILADELPHIA (JAN. 25) PR NEWSWIRE - Coors Brewing Company (NASDAQ: ACCOB) today announced record sales for Coors products in Pennsylvania

during 1989.

"Pennsylvania's response to Coors brands has been far better than planned " according to Kevin McDonough, Coors eastern region sales director. "In Pennsylvania, consumer demand for Coors beers is greater than any other premium brand entry in the last 10 years."

Last week, the company reported record sales for Coors Light, elevating the brand to the fastest growing premium light beer and the third most popular brand in the country. Distributors throughout eastern Pennsylvania cite Coors Light's popularity and a renewed interest in domestic brews as two of the chief reasons for sales increases.

"Philadelphia has to be one of the most competitive beer markets in the country," said William Castleberg Jr., sale manager for Antonio Origlio Inc., the local Coors distributor. "But, consumer acceptance of Coors has been tremendous -- especially Coors Light."

"We were cautiously optimistic about Coors' success after the first year," commented Bert Lechner with W&L Sales Co., Inc., Coors' Harrisburg, Pa., wholesaler. "However, a year later the growth remains steady and very, very strong."

Coors Brewing Company, in Golden, Colo., is reporting best ever sales throughout the country in 1989. States leading the pack include New York, New Jersey, Pennsylvania, California, Arizona, Florida and Ohio.

SUNNYVALE, CA. (JAN. 25) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) reported revenue of $49,200,000 and net income of $6,880,000 (81 cents per share) in the year ended Dec. 31, 1989. Compared with 1988, these results represent a 40 percent increase over revenue of $35,200,000 and a 72 percent increase over net income of $4,000,000 (52 cents per share).

For the fourth quarter of 1989, Weitek posted revenue of $14,200,000 and net income of $1,952,000 (23 cents per share). Revenue in the fourth quarter of 1988 was $10,100,000, and net income was $1,428,000 (17 cents per share).

According to president Arthur Collmeyer, "In the fourth quarter, Weitek continued its record of strong, consistent financial growth. For the 11th consecutive quarter, revenue and net income increased substantially and our book/bill ratio remained over 1.0. Gross margins and operating income remained stable at 65 percent and 20 percent of revenue, respectively.

Furthermore, we increased our cash balances to a total of $21.8 million, even as we continued to generate the working capital required to support our 40 percent revenue growth.

"The expansion of our business has, of course, been accompanied by an expansion of our staff, which grew by 21 percent in 1989. Through the talent and dedication of the Weitek team, new and old alike, employee productivity climbed continuously during the year to revenue of $284,000 per person in the fourth quarter."

Weitek is the leading supplier of high-performance numeric processing solutions. The company's VLSI circuits and software development tools power a broad range of computer systems, from minisupercomputers and engineering workstations to desktop computers and page printers.

LOWELL, MA (JAN. 25) PR NEWSWIRE - Richard W. Miller, president and chief operating officer of Wang Laboratories, Inc. (AMEX: WAN) today announced that the company has named Michael F. Mee to the position of executive vice president and chief financial officer. He will also be nominated for election to the Wang board of directors. Mee, 47, had been vice president of finance and chief financial officer of Norton Company.

"I am extremely pleased to announced Michael Mee's decision to join the Senior Wang Management Team," said Miller. "Mike is a world-class chief financial officer. His depth of experience in corporate restructurings and building strong financial organizations, his accomplishments in asset management, and his knowledge of international financial markets are a rare combination of skills that match precisely the needs of Wang Laboratories as we continue our steady progress toward our goals of fiscal stability, sustainable profitability, and renewed growth."

Mee, who joined Norton in 1985, had been chief financial officer of the $1.6-billion company for the past four years and had been a member of the board of directors since 1987.

Mee joined Norton Company in January 1985 as vice president of finance, was named chief financial officer later that year, and was elected to the board of directors in 1987. At Norton, he has been involved in a fundamental restructuring of the company in which non-strategic businesses have been substantially improved. As a result, the company has been repositioned to compete successfully in mature and changing markets.

Before joining Norton, Mee served eight years in various financial positions at Monsanto Company, where his last responsibility was vice president and corporate controller. Prior to that role, he served as director of finance for the company's Europe-Africa businesses and he resided in Brussels, Belgium. During his tenure with Monsanto, he participated in a major strategic repositioning of the company, including the restructuring of its core businesses both in the United States and in Europe, the launching of a major bio-technology commitment, and the direction of a corporate-wide asset management program.

ATLANTA (JAN. 25) PR NEWSWIRE - The Federal Home Loan Bank of Atlanta today announced the election of three new members to its board of directors.

The new members are Billy Don Anderson, president and chief executive officer of Valley Federal Savings Bank in Sheffield, Ala.; James L. Davidson Jr., president and chief executive officer of First Federal Savings Bank, Lynchburg, Va.; Lynn W. Hodge, president and chief executive officer of United Savings Bank Inc.; Greenwood, S.C.

Anderson joined Valley Federal Savings Bank in 1962 and was named president in 1981. He is the immediate past chairman and director of the Alabama League of Savings Institutions.

Davidson joined First Federal Savings Bank in 1961 and was named president in 1975. He is past chairman of the Virginia League of Savings Institutions.

Hodge joined United Savings Bank Inc., in 1970 and was named president in 1983. He is past chairman of the board of the South Carolina League of Savings Institutions.

The Atlanta bank has 14 directors, with eight elected by the bank's members, and six appointed by the Federal Housing Finance Board.

The Federal Home Loan Bank of Atlanta is a $22 billion credit bank. Its primary purpose is to expand the availability of housing credit by providing financial and other banking services to housing finance lenders in the South, primarily thrifts, and commercial banks and credit unions. It serves the Fourth District comprised of Alabama, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia and the District of Columbia.

#90025p0408 01/25/1990 ~PR Newswire
FOSTER CITY, CA (JAN. 25) PR NEWSWIRE - Applied Biosystems Inc. (NASDAQ: ABIO) today reported results for the second fiscal quarter of 1990 which ended Dec. 29, 1989.

Net sales were $40.8 million, up 5.1 percent versus $38.8 million for the

like period a year ago. If last year's exchange rates had remained in effect, sales would have grown approximately ten percent. Net income of $2.3 million, or 16 cents per share, compares to $5.1 million, or 37 cents per share, in the preceding fiscal year.

For the first six months of fiscal 1990, net sales totaled $77.6 million, compared to $75.2 million in the first six months of fiscal 1989. Net income was $4.6 million, or 32 cents per share, compared to $9.6 million, or 69 cents per share, one year ago.

In the second quarter, European revenues reached record levels, and as anticipated, revenues from Japan increased significantly over the first quarter of fiscal 1990. Despite these achievements, overall company performance was below expectations.

The effect of the continued strength of the U.S. dollar on international sales adversely impacted sales and gross margin levels. Other contributing factors include a significant slowdown in the U.S. market, and resulting manufacturing plant capacity variances.

In addition, a marked shift to sales of lower priced instruments occurred during the quarter which negatively impacted revenues and gross margin levels. This effect is judged to be linked to customers' concerns over government funding levels and is consistent with general softness being seen throughout the analytical instrumentation market.

All of the above resulted in gross margins as a percent of sales declining to 51 percent in the current quarter from 54 percent in the first quarter of fiscal 1990 and down from 59 percent in the second quarter of the previous fiscal year.

Operating income was $3.6 million, or 8.7 percent of sales, compared to $8.1 million, or 20.9 percent of sales for the second fiscal quarter of 1989. The reduced operating income level is due to lower gross margins and higher operating expenses, primarily in the R&D and selling functions.

R&D expenditures of $5.3 million were up 30 percent over the second quarter of fiscal 1989, reflecting the company's continuing commitment to new product development.

#90025p0410 01/25/1990 ~PR Newswire

SAN FRANCISCO (JAN. 25) PR NEWSWIRE - Leucadia National Corporation (NYSE PSE: LUK) and BRAE Corporation (NASDAQ: BRAE) announced today that Leucadia has proposed a cash merger pursuant to which all holders of BRAE

common stock (other than Leucadia's affiliates) would receive $6.03 in cash per share (the Dec. 31, 1989 book value per share on a fully diluted basis) and BRAE would become a wholly owned subsidiary of Leucadia. At present Leucadia beneficially owns approximately 48.8 percent of BRAE's outstanding common stock.

A special committee of BRAE's board of directors previously appointed to consider offers to acquire all of BRAE's outstanding stock will evaluate the merger proposal and will make its recommendation to the BRAE board.

BRAE also announced its operating results for the year ended Dec. 31, 1989. Net income was $3,079,000 or $.26 per common and dilutive common equivalent share ($.24 on a fully diluted basis) for the year ended Dec. 31, 1989 compared to $1,247,000 or $.07 per common share for the year ended Dec. 31, 1988. Included in 1989 net income was a gain from discontinued operations of $1,806,000, or $.21 per common and dilutive common equivalent share ($.19 on a fully diluted basis) after tax credits of $15,576,000. As previously announced, during the fourth quarter of 1989, the company disposed of its railcar leasing and management operations at a pre-tax profit of approximately $8,570,000 and its electronic visual communications business at a pre-tax loss of approximately $21,178,000. The unusually large credit for income taxes principally resulted from having provided deferred taxes in prior years at the higher income tax rates then in effect. Income from continuing operations was $1,273,000 or $.05 per common share (after preferred dividend requirements) for the year ended Dec. 31, 1989 compared to $69,000 or a loss of $.10 per common share (after preferred dividend requirements) for the year ended Dec. 31, 1988. Continuing operations consist solely of administrative activities, principally investment of available funds.

At Dec. 31, 1989 the company had a common shareholders' equity of $58,438,000 or $7.00 per outstanding common share ($6.03 per share on a fully diluted basis). The company also had cash and temporary investments of $59,990,000.

#90025p0412 01/25/1990 ~PR Newswire

MILWAUKEE (JAN. 25) PR NEWSWIRE - At the Universal Foods (NYSE: UFC) annual shareholders meeting today, Chairman John L. Murray, 62, announced his retirement from active service to the company, effective May 31, 1990.

Murray joined Universal Foods in 1955. He became a director in 1971, president in 1976, chief executive officer in 1979, and chairman of the board in 1984. The board of directors has not yet elected a successor to

assume the chairmanship upon Murray's retirement.

At the meeting shareholders elected the five nominees to the board of directors, including a new director, James H. Keyes, president and chief executive officer of Johnson Controls, Inc.; and approved an increase in the number of authorized shares of common stock from 40 million to 100 million shares. The additional shares will be used for stock splits, for acquisitions, and for raising equity capital to support the company's growth.

Universal Foods is a national manufacturer and marketer of food ingredients and selected consumer food items. These include the world's most diversified line of yeast products; frozen potato products; food colors and flavors; dehydrated products; and a complete line of Italian-style, imported and substitute cheeses.

#90025p0416 01/25/1990 ~PR Newswire

MOUNT AIRY, NC (JAN. 25) PR NEWSWIRE - Insteel Industries, Inc. (AMEX: III), one of the nation's largest wire products manufacturers, today announced results for its first quarter ended Dec. 31, 1989.

Revenues were $55,704,000 compared with $45,178,000 in the same quarter of 1988, and net earnings were $353,000 or $.08 per share (primary), compared with $1,289,000 or $.30 per share (primary).

Commenting on the results, Howard O. Woltz, Jr., chairman, said, "As anticipated, our newest acquisition, Forbes Steel & Wire Corporation, created a considerable drain on earnings for the quarter.

"This is likely to continue to a lesser extent in the second quarter and Forbes is expected to become profitable in the third quarter. The start-up of our newest subsidiary, Insteel Construction Systems, which produces the Insteel 3-D wall component, is going very smoothly, with production in its new manufacturing facility at Brunswick, Ga., beginning this month.

"The operations which made up Insteel during the first quarter of 1989 showed improved profit performance in this year's first quarter. The gains made by those operations, however, were not sufficient to offset the substantial losses at Forbes and the moderate start-up costs at Insteel Construction Systems."

Insteel Industries, Inc., operating 11 manufacturing plants, mostly in the eastern and southern U.S., produces welded wire reinforcement, high and low carbon industrial wire, galvanized fencing products, specialty wire fabrics, and nails.

BETHPAGE, NY (JAN. 25) PR NEWSWIRE - E. Clinton Towl, one of the six founders of Grumman Corporation (NYSE: GQ), died today at his home in Stuart, Fla., at age 84.

In December 1929, Towl along with Leroy Grumman, Edmund Poor, William Schwendler, Leon "Jake" Swirbul, and Joseph Stamm founded Grumman Aircraft Engineering Corporation which was renamed Grumman Corporation. The fledgling company, whose first product was floats for amphibian airplanes, became one of the leading aerospace companies in America.

Known simply as "Clint," Towl was born in Brooklyn, N.Y., on Oct. 26, 1905. He was educated at St. Paul's School, Garden City, N.Y., and attended Cornell University.

Towl's career with Grumman spanned more than four decades. Although he studied engineering in college, he served in a variety of capacities in the young company before being elected assistant treasurer in 1937. He became vice president in 1940 and administrative vice president in 1954. He was elected president in 1960, and then served as chairman of the board from 1966 until his retirement in 1975.

Towl moved to Stuart in the early 1970s where he was active in a number of local charitable organizations and served as a member of the board of directors of Martin Memorial Hospital and the YMCA.

He is survived by his wife, the former Mimi Moyer; two children from a former marriage to the late Christine Koempel, a daughter, Mrs. Sandra Towl Corcoran, of Montclair, N.J., and a son, F. Clinton "Kip," of Centerport, N.Y.; five grandchildren; and a sister, Dorothy Gillies, of Locust Valley, N.Y.

Services will be held Monday, Jan. 29, 1990, at St. Mary's Episcopal Church, 622 S.E. Osceola St., Stuart, Fla. The family requests that memorials be made to Hospice of Martin County, Inc., 925 S.E. Lincoln Ave. Stuart, Fla., 34994, in lieu of flowers.

#90025p0424 01/25/1990 ~PR Newswire
CHICAGO (JAN. 25) PR NEWSWIRE - The board of directors of UAL Corporation (NYSE: UAL) confirmed that it has received from the Airline Pilots Association, International, the Association of Flight Attendants and the International Association of Machinists a letter indicating that the unions are prepared, as a group, to enter into negotiations for the acquisition by UAL's employees of a 75 percent interest in UAL through an employee stock ownership plan, with 25 percent to remain in public hands. The participants in the employee stock ownership plan would include UAL's union and non-contract employees. The board stated that the letter indicated that the unions have agreed in principle to provide for significant reductions in labor costs and that the letter also contemplated a reduction in non-contract employee labor costs.

After reviewing the letter submitted by UAL's unions, the board instructed its legal and financial advisors to continue discussions with the representatives of the unions regarding the development of an acquisition proposal for UAL. The board requested that its representatives keep the board informed as to progress in these discussions and that they report back to the board at the next regularly scheduled board meeting in February. The board also said that its financial advisors will continue to examine the possibility of a recapitalization.

The board stated that the letter received from the unions did not constitute an acquisition proposal and that it would consider any acquisition proposal made by the employee group or any third party when any such proposal is made. The board also decided to release Marvin Davis and British Airways PLC from certain provisions of their Confidentiality

and Standstill Agreements. They had previously been prohibited from making an offer at a price less than $300 per share.

There can be no assurance that any acquisition proposal will be made by the employee group or any other party or that, if made, the board will determine that such proposal is in the best interest of UAL shareholders.

#90025p0425 01/25/1990 ~PR Newswire

ATLANTA (JAN. 25) PR NEWSWIRE - Contel Cellular Inc. (NASDAQ: CCXLA) today reported higher revenues and net income for the year ended December 31, 1989, compared with prior year results.

Revenues increased 58 percent to $65.5 million, compared with $41.4 million for 1988. Service revenues, which exclude equipment sales, were $57.5 million, a 69 percent increase over the $34.0 million reported in 1988. Net income increased 30 percent to $2.6 million, or $.03 cents per share, compared with $2.0 million, or $.02 cents per share, reported in 1988. All per share amounts reflect a two-for-one stock split, which became effective in June 1989.

Revenue growth was driven primarily by a 69 percent increase in the number of subscribers since December 31, 1988. Contel Cellular reported a total of 50,050 subscribers at year-end 1989. Net income increased primarily due to higher earnings from limited partnerships, partially offset by higher operating costs in company-controlled markets.

For the quarter ended December 31, 1989, Contel Cellular reported revenues of $19.5 million, compared with $13.1 million reported in the year-earlier period. Net income was $.2 million, or less than $.01 cent per share, for the fourth quarter 1989, compared with a net loss of $.6 million, or $.01 cent per share, in the corresponding 1988 period.

For the fourth 1989 quarter, Contel Cellular posted a $4.6 million pretax operating loss from company-controlled operations, compared with a $3.9 million loss reported a year ago. The operating losses in each period were offset by earnings from limited partnerships of $5 million in the 1989 fourth quarter and $3.5 million in the 1988 period. These earnings are not consolidated with the operating results from company-controlled systems.

Contel Cellular is a 90-percent owned subsidiary of Contel Corporation and is one of four operating sectors within that company. Contel Corporation retains controlling interest in Contel Cellular through its ownership of

90 million shares of Class B common stock.

#90025p0430 01/25/1990 ~PR Newswire

ATLANTA (JAN. 25) PR NEWSWIRE - Contel Corp. (NYSE: CTC) today reported record consolidated revenues and sales, net income and earnings per share for the year ended December 31, 1989.

Revenues and sales in 1989 were $3.1 billion, up 7 percent compared with $2.9 billion in 1988. Net income, which increased 4 percent in 1989, was $287 million, or $1.80 per share, compared with $276 million, or $1.75 per share, in 1988.

Income from continuing operations was $277 million, or $1. 74 per share, compared with $308 million, or $1.95 per share, in the prior year. Income from continuing operations in 1988 included an after-tax gain of $43 million, or $ .27 per share, resulting from an initial public stock offering by Contel Cellular Inc., a 90 percent owned subsidiary. Excluding this gain, income from continuing operations increased 5 percent in 1989. All per share amounts reflect a two-for-one stock split, which became effective in August 1989.

Cash flow from operations for 1989 totalled $752 million, compared with $746 million in 1988. Capital expenditures for 1989 were $775 million, compared with $802 million in 1988.

For the 1989 fourth quarter, Contel posted revenues and sales of $831 million, compared with $840 million in the year earlier period. Net income totalled $84 million, or $.53 per share, compared with $50 million, or $.32 per share, in the 1988 fourth quarter. Income from continuing operations was $78 million in the 1989 fourth quarter, compared with $72 million in the year earlier period. The decrease in fourth quarter revenues was due primarily to the winding down earlier this year of the construction phase of a major contract in the Federal Systems Sector. Year-to-year net income comparisons were affected by the recognition in the 1988 fourth quarter of $22 million, or $.14 per share, in losses resulting from the disposition of Contel Business Systems and the International Division of Contel ASC.

Contel Corporation, a company with more than $3 billion in revenues and sales, provides a broad range of telecommunications products and services.

#90025p0437 01/25/1990 ~PR Newswire

SYRACUSE (JAN. 25) PR NEWSWIRE - Niagara Mohawk Power Corporation's (NYSE: NMK) earnings for the year ended Dec. 31, 1989, were $105.6 million or $.78 per share, compared to $159.7 million of $1.21 per share last year.

For the three months ended Dec. 31, 1989, a net loss of $1.8 million or 1 cent per share resulted, compared to a loss of $15.6 million or 12 cents per share last year.

Decreased earnings for 1989 reflected a number of regulatory agreements entered into by the company during 1988 and 1989, nuclear outages at Nine Mile Units One and Two, and the cost of new programs that had not, because of changed conditions, been anticipated within the regulatory agreements.

The company achieved a 5.6 percent return on common equity in 1989, compared with an 8.7 percent return on common equity in 1988. Earnings from continuing operations for 1990 are expected to be higher than 1989 as a consequence of the anticipated return to service of Unit One and certain provisions of the 1989 agreement, which establish minimum and target interest coverage levels during 1990.

During 1989, a new electric peak usage record of 6,376 megawatts was established and the level of gas usage also increased. In addition, the numbers of electric and gas customers at the end of 1989 were at all time highs, necessitating higher outlays for both facilities and maintenance.

For the year 1989, electric sales to ultimate customers, which includes the residential, commercial, industrial and municipal service sales sectors, increased 2.8 percent, compared to the same period last year. Residential, commercial and industrial sales sectors increased 2.6, 2.2 and 3.7 percent, respectively, while municipal service sales decreased 3.8 percent during the year. The overall increase reflects a combination of weather-related increases, load growth within the company's franchise territory, fuel adjustment clause revenues and recognition of unbilled electric revenues. Sales to other systems were down 31 percent because of wholesale market competition and the nuclear plant outages. For the year 1989, total electric revenues increased 3.2 percent to $2.419 billion from $2.344 billion for the year 1988.

Gas sales (including transportation of customer-owned gas) for the year 1989 increased 5.3 percent. Residential gas sales increased 3.6 percent, reflecting a combination of weather-related sales and load growth. Commercial and industrial gas sales decreased 3.3 and 38.9 percent, respectively, due to the continued increase in the use of oil by dual-fuel customers and the purchase of gas by some industrial users directly from producers. Transportation of customer-owned gas during the year increased 24.0 percent. Total gas revenues for 1989 increased 6.7 percent to $487.4 million from $456.7 million in 1988.

For the fourth quarter, electric sales to ultimate customers increased 2.5 percent, led by increases of 3.7 percent, 3.2 percent and 1.1 percent in the residential, commercial and industrial sectors, respectively, compared to the same 1988 time period. Total electric sales reflect a 4.3 percent increase for the fourth quarter 1989, compared to the same 1988 time period.

Gas sales (including transportation of customer-owned gas) for the fourth quarter 1989 increased 10.3 percent due principally to an increase in transportation of customer-owned gas and also to increases in residential, commercial and industrial gas sales due to weather and improving economic conditions.

Niagara Mohawk also announced that no first quarter 1990 common stock dividend was declared. This is consistent with the company's agreements with various state agencies that a common stock dividend will not be declared at least until Nine Mile Unit One is successfully returned to service. Nine Mile Unit one is not expected to be ready to restart prior to the second quarter of 1990. Further, the declaration of future common stock dividends will be reviewed on a quarterly basis and will be dependent upon, among other things, the financial circumstances of the company.

Dividends were declared at prescribed rates for all series of preferred stock. The first quarter dividend rate per annum for the adjustable rate

preferred stock Series A is 6.50 percent; Series B is 8.675 percent; and Series C is 8.45 percent. These rates equate to payments of $.40625, $.5421875 and $.528125 per share, respectively.

Preferred dividends are payable March 31 to holders of record Feb. 16, 1990.

PHILADELPHIA (JAN. 25) PR NEWSWIRE - Coors Brewing Company (NASDAQ: ACCOB) today announced record sales for Coors products in Pennsylvania during 1989.

"Pennsylvania's response to Coors brands has been far better than planned " according to Kevin McDonough, Coors eastern region sales director. "In Pennsylvania, consumer demand for Coors beers is greater than any other premium brand entry in the last 10 years."

Last week, the company reported record sales for Coors Light, elevating the brand to the fastest growing premium light beer and the third most popular brand in the country. Distributors throughout eastern Pennsylvania cite Coors Light's popularity and a renewed interest in domestic brews as two of the chief reasons for sales increases.

"Philadelphia has to be one of the most competitive beer markets in the country," said William Castleberg Jr., sale manager for Antonio Origlio Inc., the local Coors distributor. "But, consumer acceptance of Coors has been tremendous -- especially Coors Light."

"We were cautiously optimistic about Coors' success after the first year," commented Bert Lechner with W&L Sales Co., Inc., Coors' Harrisburg, Pa., wholesaler. "However, a year later the growth remains steady and very, very strong."

Coors Brewing Company, in Golden, Colo., is reporting best ever sales throughout the country in 1989. States leading the pack include New York New Jersey, Pennsylvania, California, Arizona, Florida and Ohio.

MIDDLEFIELD, CT (JAN. 25) PR NEWSWIRE - Zygo Corporation (NASDAQ: ZIGO) today reported sales of $6,242,000 for the quarter ended Dec. 31, 1989, a decrease of $32,000 from the comparable prior year period.

Company Chief Executive Officer Paul F. Forman reported that the company had net earnings of $143,000, or $.06 per share, vs. net earnings of $24,000, or $.01 per share, for the three months ended Dec. 31, 1988.

Net sales for the six months ended Dec. 31, 1989, were $12,276,000, an increase of $623,000 over the comparable prior year period. The company had net earnings of $189,000, or $.07 per share, vs. a net loss of $299,000, or a $.12 per share loss, for the six months ended Dec. 31, 1988. Backlog at Dec. 31, 1989, was $7,598,000 as compared to $6,459,000 at Dec. 31, 1988.

The improvement in net earnings for the three months ended Dec. 31, 1989, was due primarily to improved margins while the improvement for the six

months was due to higher sales and improved margins. This improvement reflects the company's ongoing efforts to return to profitability while, at the same time, continuing to make investments for the future.

The company announced that Zygo and Canon Inc. (NASDAQ: CANNY) have signed a letter of intent whereby Canon, over a three-year period, would provide Zygo with up to $3,000,000 of research and development funding. Zygo will use the funding to work on certain projects that will be mutually agreed upon by Zygo and Canon. Canon owns approximately 20 percent of Zygo's outstanding common stock and two of the executive officers of Canon's U.S. subsidiary are members of Zygo's board of directors.

The board of directors has also authorized the company's management to purchase up to $250,000 worth of the company's outstanding common stock, primarily for use in the company's stock option program. Purchases are authorized to be made from time to time in negotiated or open market transactions.

Zygo Corporation designs, develops, manufactures and markets high-performance, laser-based, noncontact electro-optical measuring instruments and accessories and manufactures precision optical components. The firm is based in Middlefield.

HOUSTON (JAN. 25) PR NEWSWIRE - The board of directors of Union Texas Petroleum Holdings Inc. (NYSE: UTH) has approved a 1990 capital spending budget of $361 million, up from approximately $256 million spent in 1989, including funding for two major development projects in the U.K. North Sea.

"Our 1990 budget will allow us to pursue some attractive exploration and development opportunities around the world," said Chairman and CEO Clark Johnson. "Over the past five years, Union Texas has spent more than $1.2 billion on high-quality capital projects worldwide. Our objective is centered on building our reserve base through a sustained and balanced capital program."

The company plans to spend approximately $117 million in 1990 on the redevelopment of the North Sea's Piper field and the development of a nearby oilfield, the promising Saltire field (previously known as East

Piper). Initial spending on these projects totaled $25 million in 1989. When the two fields are placed onstream in 1992, they are expected to be major contributors to Union Texas' operating and financial performance in the years ahead, the company said.

In addition, Union Texas has allocated approximately $123 million for its other overseas oil and gas interests in 1990, including drilling programs in Indonesia and the North Sea's Claymore and Scapa fields and increased exploration activities in other international areas. The independent producer has earmarked $100 million for its U.S. oil and gas operations, with continued emphasis on its Gulf of Mexico holdings.

The company has budgeted $13 million for its hydrocarbon products business in 1990, down from $39 million in 1989 following the completion of a major expansion program at its jointly-owned ethylene plant near Baton Rouge, La.

Union Texas also plans to spend about $8 million for general corporate items in 1990, including expenditures for new exploration ventures.

#90025p0458 01/25/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - Eastern Airlines today outlined a new reorganization plan to its creditors committee that would enable the company to emerge from bankruptcy as soon as mid-year as a strong competitor with $500 million in cash, access to new aircraft and a revamped, more conservative balance sheet.

The plan proposes that certain creditors make contributions to assure Eastern's post-reorganization successful operations and participate in the equity of the company. It also contemplates the airline's owner, Texas Air Corporation, will take substantial steps to improve Eastern's future prospects for success and contribute 40 percent of its ownership to certain classes of creditors.

Easten has been operating under Chapter 11 of the federal bankruptcy statutes since March 9, 1989. The filing occurred five days after the airline was virtually shut down by a strike of three unions. Since then two of the three unions have abandoned the strike.

Eastern said it has flown 9.4 million passengers during 10 months of rebuilding its service. The company also said its recently introduced promotional fares have generated more than two million advance reservations.

Eastern said it will ask the Bankruptcy Court for a $100 million drawdown

from its own restricted funds. The request follows previous advances totalling $210 million.

The cash advance would come from the company's $600 million escrow balance accumulated through asset sales over the past several months.

Eastern also said it will ask the creditors to join with it in seeking a modest extension of its exclusivity period so that it and the creditors can review today's plan. The airline noted, however, that it is prepared to file the reorganization plan as currently scheduled on Feb. 12.

Texas Air, in conjunction with Continental Airlines, also would restructure the One-Pass frequent flyer agreement between Eastern and Continental to provide very favorable terms to Eastern, including a five-year extension of the agreement and a 50 percent reduction in charges to Eastern because of its participation in the program.

OKLAHOMA CITY (JAN. 25) PR NEWSWIRE - Ned N. Fleming, honorary chairman of the board of Fleming Companies, Inc. (NYSE: FLM) died Wednesday evening Jan. 24, in Phoenix, Ariz., where he had been hospitalized for several weeks.

Fleming was born on Jan. 18, 1900. He had been associated with the company since 1921 when he joined the firm in Topeka, Kan., after attending Washburn University in Topeka and graduating with a B.S. in economics from the University of Pennsylvania.

In the food industry, Fleming served as president of the National American Wholesale Grocers' Association and later as chairman of its board of governors. In 1964 he received that organization's highest honor, the Herbert Hoover Award, for humanitarian service in business. He also was a member of the board of directors of the Independent Grocers Alliance (IGA).

He was a trustee of the Midwest Research Institute, and served on the executive committee of the Menninger Foundation, as president of the Topeka Chamber of Commerce, and as a director of the Kansas State Chamber of Commerce. He also served on the executive committee of the National Association of Boys' Clubs of America.

Fleming lived in Topeka, and also had a residence in Paradise Valley, Ariz. His wife of 60 years, Virginia Miller Fleming, passed away in 1984. There are three surviving children: Marilyn Fleming Harrison, Oklahoma

City; James B. Fleming, Tucson, Ariz.; and Stephen M. Fleming, Comanche, Texas. Fleming was preceded in death by one son, Ned N. Fleming, Jr. There are also 11 surviving grandchildren.

RUTHERFORD, NJ (JAN. 25) PR NEWSWIRE - Shadow Traffic of New York, an affiliate of Shadow Communications Corp., was purchased yesterday by CitiTraffic Corp.

The traffic news service company will continue to operate as Shadow Traffic Network of New York. Inez Aimee has been appointed president and chief executive officer.

The new management of Shadow Traffic Network of New York has assumed all existing station and sponsor contracts, and service will continue uninterrupted.

A significant investor in CitiTraffic Corp. is Alan Markowitz, a financier with diverse business interests. Markowitz previously owned 25 percent of Shadow Traffic Network of New York, and has had a longtome interest in the traffic news service industry.

"Shadow Traffic Network of New York is now emerging as a much stronger organization. With Inez Aimee's direction, I am confident that the company is on track and can experience growth," said Markowitz.

Aimee brings more than 25 years of experience to her post at Shadow Traffic Network of New York. During her career she held management positions at McGavren-Guild, WMCA Radio, WINS Radio and WABC Radio. She played a major role in the growth of NFL Films during her 15-year tenure there. She subsequently moved on to the Katz Agency, where she held the position of vice president of the newly formed Special Events Division for radio and television. Most recently she served as president of her own company, Sports Marketing & News Inc.

Shadow Traffic Network of New York currently provides traffic news services to 70 stations in the New York metropolitan area and covers 13,000 square miles in New York, Long Island, West Chester, N.Y., Connecticut and northern New Jersey.

CANTON, MA (JAN. 25) PR NEWSWIRE - Computer Identics Corporation (NASDAQ: CIDN) reported its results today for the fourth quarter and year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, sales were $17,796,000 compared to $13,372,000 in 1988. Included in 1989 revenues is a $1,561,000 non-recurring first quarter sale of a manufacturing license and related assets. The revenue increase was 33 percent with or 21 percent without the non-recurring sale. Revenue for the fourth quarter of 1989 was $4,381,000 as compared with $3,612,000 for the same period in 1988, a 21 percent increase.

Net income for 1989 was $908,000 or 10 cents per share as compared with a net loss of $1,134,000 or 13 cents per share for all of 1988. 1989 results include a pre-tax gain of approximately $800,000 on the sale of the manufacturing license. For the fourth quarter of 1989, the company reported net income of $207,000 or 2 cents per share as compared with a net loss of $172,000 or 2 cents per share for the same period in 1988.

Frank J. Wesniak, president and chief executive officer, said, "The fourth quarter of 1989 saw a continuation of the progress Computer Identics has made this year in becoming a profitable, growing company. We achieved this by focusing our efforts on supplying standard hardware and software solutions, meeting industrial requirements in data collection, and material handling applications. International revenues have increased especially rapidly as we continued to expand our sales, service and applications activites in Europe."

Computer Identics Corporation manufactures, markets and services a broad range of bar code products for industrial applications, principally material handling and data collection.

GREENSBORO, NC (JAN. 25) PR NEWSWIRE - Oakwood Homes Corporation (NYSE: OH) today reported sales and earnings for the quarter ended Dec. 31, 1989, the first quarter of the 1990 fiscal year.

Sales for the quarter were $20,989,000, an increase of 28 percent, compared with $16,360,000 in the same period last year. Net income was $614,000, compared with last year's $46,000.

Primary earnings per share were 12 cents vs. 1 cent last year. Fully diluted earnings per share were the same as primary for both the current quarter and first quarter last year.

"We are pleased with the financial results for the first quarter," said Nicholas J. St. George, president and chief executive officer. "These strong operating results are further confirmation that we are pursuing the right strategies toward returning the company to its historically high levels of profitability."

Oakwood Homes Corporation and its subsidiaries are engaged primarily in the production and sale of manufactured housing in North and South Carolina, Virginia, West Virginia, Tennessee, Georgia, Delaware and Kentucky.

#90025p0468 01/25/1990 ~PR Newswire

NEWPORT BEACH, CA (JAN. 25) PR NEWSWIRE - EIP Microwave Inc. (NASDAQ: EIPM) reported net sales for the first quarter ended Dec. 31, 1989, of $3,358,000, an 8 percent increase from the same period last year. Net income of $219,000 ($.10 per share) was earned for the quarter as compared to a net loss of $192,000 ($.09 per share) incurred during the same period of the previous year.

The prior year's first quarter loss included a pre-tax charge to operations of $1,050,000 resulting from the write down of certain assets

associated with the company's realignment of technical, financial and management resources. Reducing the net loss for the first quarter of fiscal 1989 was the cumulative effect on prior years of adopting the new accounting standard on income taxes of $748,000, or $.34 per share.

Incoming orders for the first quarter were $3,109,000, a 45 percent reduction from the same period during the previous year. The current year included $974,000 in order releases on U.S. Government contracts, compared with $3,103,000 in order releases received during the prior year quarter.

The company believes that the softness in the test and measurement instrument markets will continue to persist. As a result, the company expects flat revenues and modest profits for the remainder of the year.

EIP manufactures microwave test and measurement instruments, which are predominantly used in the defense and telecommunications industries. The company has manufacturing facilities in San Jose, Calif. and maintains corporate offices in Newport Beach.

WASHINGTON, D.C. (JAN. 25) PR NEWSWIRE - Capital Bank, N.A. today reported 1989 net income of $635,000, or $1.68 per share, compared with $620,000, or $1.65 per share, in 1988.

For the quarter ended Dec. 31, the bank earned $169,000, or $0.44 per share, compared with $236,000, or $0.63 per share in the fourth quarter of 1988. The fourth quarter 1989 results include a gain on the sale of securities.

"We are pleased that Capital Bank, N.A. achieved record profits once again in a year the bank made a substantial investment in a new Adams Morgan branch," said Chairman and President Abel Holtz. "Capital Bank, N.A.'s strong earnings performance during 1989 was due primarily to a significant increase in net interest income, which exceeded year ago figures by $341,000, or 10 percent."

At Dec. 31, stockholders' equity, a major barometer of the bank's financial strength, grew 13 percent to $7.5 million from $6.9 million a year earlier.

At year-end 1989, assets totaled $107.7 million, a 32 percent increase from $81.8 million a year earlier. Net loans outstanding increased 16 percent from $56.6 million to $65.6 million, while deposits rose from

$74.1 million to $95.2 million.

NILES, MI (JAN. 25) PR NEWSWIRE - National-Standard Company (NYSE: NSD) reported sales of $66.0 million and a net loss of $2.7 million or $0.65 per share for the first quarter ended Dec. 31, 1989, according to Michael B. Savitske, president and chief executive officer.

Sales of bead and hose wire continued at a strong pace, but the slowdown in domestic automobile sales and losses in new business units adversely affected the company's profitability.

In the prior year, first-quarter sales were $70.4 million with an income of $185,000 or $0.05 per share after extraordinary credit for utilization of net operating loss carryforward of $45,000 or $0.02 per share. Last year's first-quarter results included $3.5 million in sales from business units closed or divested during the 1989 fiscal year.

During the first quarter of 1990, the company announced the sale of its Strandflex business and plant facilities in Oriskany, N.Y., to The Maryland Specialty Wire Company, a wholly owned subsidiary of the Handy & Harman corporation, New York. Also during the first quarter, the ARCHON(R) II Weld Monitoring System business was sold to Jetline Engineering of Irvine, Calif.; and the COPPERPLY(R) wire product line was sold to Copperweld Corporation of Pittsburgh. The proceeds of the sales of these businesses were used to reduce National-Standard's level of borrowing and had no significant effect on company earnings.

RALEIGH, N.C. (JAN. 25) PR NEWSWIRE - Firstcorp, Inc. (AMEX: FCR) reported a loss of $2,731,000, or $0.84 a share, for the nine months ended December 31, 1989. The loss primarily results from a $7.0 million decline in net interest income; it declined to $6.9 million from $13.9 million. Nonperforming real estate assets account for the reduced interest income. At December 31, 1989 the Company had $86 million in nonperforming assets.

Reflected in the year to date loss is a benefit of $1.6 million from the implementation of the new Financial Accounting Standards Statement 96 regarding income tax accounting.

During the nine months Firstcorp's principal subsidiary, 1st Federal of Raleigh, disposed of 165 troubled properties totaling $14.6 million and at December 31, 1989 had another 35 of such properties totalling $9.4 million under contract. Since January 1, 1990 the Company has accepted contracts on an additional 38 troubled properties totaling $3.2 million.

CALGARY, Alberta (JAN. 25) PR NEWSWIRE - NOVA Corporation of Alberta (NYSE: NVA) transported a record 2.83 trillion cubic feet (tcf) of natural gas in 1989, up 3 percent from receipts of 2.75 tcf in 1988, also a record year.

On March 4, 1989, a new record day receipt of 9.3 billion cubic feet (bcf) was recorded. For the third consecutive year, the annual and peak day volumes were new records for NOVA. Daily receipts averaged 7.7 bcf, up 3 percent from average daily receipts of 7.5 bcf n 1988.

NOVA's Alberta pipeline system is the primary transportation system through which gas is collected and delivered to Alberta border points for shipment to other markets. Historically, NOVA has transported more than 80% of marketed Canadian gas production.

The pipeline system is essentially full year round. Volumes have increased by 50 percent over the past 10 years and NOVA anticipates deliveries will increase by an additional 1 tcf over the next 10 years. Deliveries are expected to continue at record levels in 1990, ranking NOVA as one of the top natural gas transporters in North America, said Bruce Simpson, president of NOVA's Alberta Gas Transmission Division.

During 1989, 2.19 tcf of gas was carried through NOVA's pipelines for export from Alberta, essentially equal to volumes carried in 1988. At the Alberta-British Columbia border, total deliveries were flat at 519 bcf. At the Alberta-Saskatchewan border, gas deliveries destined for central

Canada and U.S. markets via the TransCanada pipeline system were also flat at 1.30 tcf. Gas deliveries destined for the U.S. Midwest via the Foothills pipeline system were up 3 percent to 324 bcf.

For use within Alberta, NOVA transported 629 bcf, up 13 percent from 557 bcf in 1988. The largest portion of increased gas deliveries within the province was due to strong industrial use and colder-than-average weather during the first four months of 1989.

For the contract year beginning in November 1990, facilities are currently under construction to provide approximately 650 bcf of increased delivery capability at major border points. Capital expenditures are estimated at $525 million compared with $400 million in 1989.

CLEVELAND (JAN. 25) PR NEWSWIRE - Blue Cross & Blue Shield of Ohio (BCBSO) today filed its response to the Ohio Department of Insurance (ODI) hearing officer's recommendation that the company's rate increase requests for non-group business be denied.

In effect, the response states that if all the hearing officer's objections were met, the requested rate increases would be lowered by no more than $500,000 -- less than 2 percent of the requested $33.7 million.

Since the cost of an overage ODI hearing is $750,000, all of which is charged to the company's non-group administrative expense, the end result would actually cost Blue Cross customers more in 1990 by a rehearing than they would save through the hearing officer's recommended reductions.

BCBSO's 21-page response, by lawyer Kenneth F. Seminatore of the Cleveland law firm of Climaco, Climaco, Seminatore, Lefkowitz and Garofoli, asserts eight errors by the ODI hearing officer, Edward L. Clark, on a variety of issues. Much of those involved technical arguments regarding administrative expense.

BCBSO maintains the lowest administrative expense rate of all the more than 500 health insurers in Ohio -- 9.5 percent. For every premium dollar received from policyholders, BCBSO spends more than 90 cents to pay hospital and doctors.

#90025p0490 01/25/1990 ~PR Newswire
WASHINGTON (JAN. 25) PR NEWSWIRE - The United Shareholders Association today urged shareholders to oppose two management-sponsored proposals at Apple Computer, Inc. (NASDAQ-NMS: AAPL) that would eliminate cumulative voting in the election of directors and stagger the terms of office for the company's directors.

Apple shareholders will vote on the proposals at Apple's annual meeting on Jan. 31.

"USA strongly opposes this attempt by Apple's management to disenfranchise shareholders," said USA Director Ralph Whitworth.

Whitworth explained that cumulative voting allows shareholders to add their votes for all board members together to support a single candidate, thus giving minority shareholders a better chance at board representation.

A California law passed in 1989 cleared the way for managements to eliminate cumulative voting, which has been a prominent feature of the state's corporate law.

"Revoking the right to cumulative voting means that every Apple shareholder will be forced to dilute proxy votes among the entire board," added Whitworth, noting that this practice "protects management from accountability to shareholders -- who, after all, do own the company."

Whitworth said Apple has also introduced a proposal to stagger the terms of office for board members. "This move would further insulate management from shareholders," said Whitworth, "since it would take two years for shareholders to take action against the entire board.

Whitworth encouraged all USA members and Apple shareholders to actively oppose the two management-sponsored proposals. "It's time Apple shareholders demanded accountability and performance from corporate management," he said.

With 36 chapters and more than 60,000 members nationwide, USA is a non-profit, grassroots organization founded in August 1986 to protect and enhance shareholder rights and management accountability as key elements of a competitive American economy.

ST. PAUL, MN (JAN. 25) PR NEWSWIRE - Northwest Airlines announced today

that passengers flying between now and April 6 can earn free roundtrip tickets for travel later in the year.

Passengers who complete three roundtrips during that period earn one free roundtrip ticket to wherever Northwest flies in the continental United States, Alaska, Canada, Mexico and the Caribbean. Five paid roundtrips qualify the passenger for two free North American trips or one free roundtrip to anywhere Northwest flies in Europe. Seven paid roundtrips earn three free North American trips or two free roundtrips to Europe.

The Northwest promotion goes further than similar programs being offered by American Airlines and United Airlines by providing free European travel.

Northwest also enhances the offer by allowing the free travel to be used May 1 through May 31, as well as Sept. 4 through Dec. 14 as under the competition's programs.

To earn the free roundtrips passengers must be enrolled in Northwest's frequent flier program, WorldPerks, in which membership is free. Seats are limited, some blackout dates apply and qualifying fares must be of at least $98.

ALBUQUERQUE, N.M. (JAN. 25) PR NEWSWIRE - Public Service Company of New Mexico (PNM) (NYSE: PNM) today petitioned the U.S. District Court to confirm its ownership of the lines and poles the company built on public rights-of-way belonging to the City of Albuquerque.

In a statement to employees, Bill Eglinton, the electric utility's chief operating officer, said, "The former City administration hired a take-over attorney and now the new City Council has been asked to consider a bill to take over our property without our consent. Our opponents say the City can take over our electric utility without paying us. We don't believe this is legal and we're asking the court to agree.

This is a friendly test and a fact-finding effort. It should not be viewed as being hostile to the City or the taxpayers. We're asking the court to define our rights to our property prior to any attempted City take-over."

The exact percentage of PNM's system that sits on City rights-of-way is unclear, but the company estimates it to be a small portion. The majority of PNM's system is believed to be on private land owned by the

company and others.

While today's action is not taken against the City, it is a request for a legal and factual determination of property ownership. PNM believes the law on this issue is clear and that the U.S. District Court will find in the company's favor.

MINNEAPOLIS (JAN. 25) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR) today announced that its board of directors has elected Michael G. Wilhelm to the position of vice president and general manager, Americas Operation. The company also announced today the appointment of Charles Breckenridge to the position of vice president, government marketing. Both are filling new positions created by the recently announced changes in Cray Research's

sales and service organization.

Wilhelm joined Cray Research as a region manager in 1982 and had been general manager of the company's Western Region since 1983. In his new position, he will be responsible for all sales and service operations in North America, as well as business development activities in South America. In addition, he will retain responsibility for operations in Australia, South Korea, Taiwan, and Hong Kong.

Prior to joining Cray Research, Wilhelm served in a variety of positions with International Business Machines (IBM), including salesman, marketing manager, commercial analysis representative, branch manager, and program manager for IBM's internal executive development program. He received a bachelor's degree in business administration from the University of Wisconsin in 1966.

Breckenridge had been general manager of Cray Research's Eastern Region since 1988. He joined the company in 1980 as an account manager and was named marketing manager of the company's Western Region in 1986. In his new role he will report to Wilhelm and will be responsible for developing business with the U.S. government.

Prior to joining Cray Research, Breckenridge was president of his own business data processing firm. He also served for 11 years at Control Data Corporation, in a variety of sales, technical management, and sales management positions. He received a bachelor of science degree in electrical engineering from the University of Minnesota.

Cray Research Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

MINNEAPOLIS (JAN. 25) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR) announced today that Robert G. Potter has been elected to its board of directors. Potter is a corporate group vice president of Monsanto Co. (NYSE: MTC) and president of Monsanto Chemical Co., a Monsanto operating unit based in St. Louis.

Potter, 50, joined Monsanto in 1965 after serving three years as an officer in the U.S. Navy. He held various sales positions until 1975, when he was named business director, Functional Products, a position he held until 1977. He served as general manager of Monsanto's Detergents and Phosphates Division from 1977 to 1979, and general manager of the

Commercial Division from 1979 to 1981, when he was elected a vice president. Potter was named a managing director in 1982, and acquired the additional title of group vice president in 1983. In 1984, he was named managing director of Monsanto Polymer Products Co., and in 1986 was elected to his current positions. He is a director of G.D. Searle & Co., a Monsanto subsidiary, and an advisory director on the board of Monsanto Co. He also is a member of Monsanto's executive management committee.

Potter holds a bachelor of science degree from Purdue University and a masters of business administration degree from Indiana University. He is a member of the board of the National Association of Manufacturers and the executive committee of the U.S. Council for International Business. He is on the executive board of the St. Louis Area Council for Boy Scouts of America and the Board of Governors of Cardinal Glennon Children's Hospital in St. Louis.

Cray Research Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

#90025p0516 01/25/1990 ~PR Newswire

ENGLEWOOD, COL (JAN. 25) PR NEWSWIRE - Jones Spacelink Ltd. (NASDAQ: SPLKA), today reported a 116 percent increase in revenues and a 240 percent increase in operating income before depreciation and amortization for the second quarter of fiscal 1990 compared to a similar period a year ago.

Jones Spacelink owns and operates cable television systems and owns 23 percent of the total shares outstanding of both classes of stock in Jones Intercable Inc. (NASDAQ: JOIN), one of the nation's ten largest cable television operators, and holds an 80 percent ownership interest in The Jones Group Ltd., a cable television brokerage company. The company also owns Jones Futurex Inc., a manufacturer of personal computer security hardware and software.

For Spacelink and its wholly-owned subsidiaries, not including Jones Intercable or The Jones Group, revenues increased for the second quarter to $3,472,000 from $1,606,000 the previous year. Operating income before depreciation and amortization for the period increased to $1,027,000 from $302,000 in the previous year.

While revenues and operating income showed strong growth, increases in depreciation, amortization and interest expense primarily relating to the acquisition of the cable television systems serving Hilo, Hawaii in

October 1988 and Kenosha, Wis. in September 1989 resulted in a net loss of $217,000, compared with net income in the like quarter a year ago of $1,156,000, or 2 cents per share.

For the three and six month periods ended Nov. 30, 1989, subscriber service fees for Spacelink-owned systems totalled approximately $2,975,000 and $4,841,000, respectively, increases of approximately 132 percent and 121 percent. These increases are primarily the result of the acquisition of the cable television systems mentioned above, which collectively served approximately 32,500 basic subscribers at Nov. 30, 1989.

Fees for the management of cable television systems owned by Spacelink-sponsored limited partnerships totalled $231,000 for the second quarter of fiscal 1990, compared to $101,000 for the like period one year ago, an increase of approximately 129 percent. For the six-month periods ended Nov. 30, 1989 and 1988, management fees totalled $365,000 and $200,000, respectively, an increase of 83 percent. This increase is primarily due to the formation and investment of Jones Growth Partners L.P. in October 1989 and Jones Spacelink Income/Growth Fund 1-A Ltd. in November 1988. The company recognized a significant increase in management fee revenue beginning in the second quarter of fiscal 1990 as a result of the October 1989 purchase by Jones Growth Partners L.P. of the cable television systems serving approximately 34,000 basic subscribers in the areas in and around Wheaton, Ill., a Chicago suburb. Jones Spacelink anticipates net cash provided by operating activities to approximately double from the first half of fiscal 1990 to the second half as a result of increased management fees resulting from this purchase and the purchase of the Kenosha system mentioned above.

In the second quarter of fiscal 1990, operating, general and administrative expenses totalled approximately $2,445,000, an increase of 88 percent from the previous year, due largely to the acquisition of the Hilo and Kenosha cable television systems.

Depreciation and amortization totalled approximately $1,420,000 and $2,153,000, respectively, for the three and six month periods ended Nov. 30, 1989, compared to $611,000 and $1,116,000, respectively, for the like periods in the prior year. These increased expenses are largely due to the company's expanded capital asset base as a result of the Hilo and Kenosha system acquisitions.

On a consolidated basis, Jones Spacelink and its subsidiaries, including Jones Intercable and The Jones Group, reported total revenues for the three and six month periods of $25,276,000 and $47,362,000, respectively, increases over the prior year of 20 percent for the quarter and 28 percent for the six-month period. Consolidated subscriber service fees increased 38 and 40 percent for the three and six month periods, from $14,112,000 and $26,674,000, respectively, in fiscal 1989 to $19,453,000 and

$37,433,000, respectively, in fiscal 1990. However, increased depreciation, amortization and interest expenses resulted in a consolidated net loss for the quarter of $1,697,000, or 3 cents per share, compared with a net loss of $275,000, or zero cents per share, reported in the second quarter of fiscal 1989.

Jones Spacelink is a publicly-held subsidiary of Jones International Ltd.

WASHINGTON (JAN. 25) UPI - Saying telephone marketing fraud costs Americans more than $1 million an hour, an alliance of consumer, business and government groups issued a list Thursday of the top 10 telemarketing swindles of the 1990s.

The scams range from ''900'' phone numbers that promise credit cards but only deliver generic information, to look-alike envelopes that appear to be from the government and overseas ''boiler rooms'' pushing penny stocks.

The list was released by the Alliance Against Fraud in Telemarketing, a coalition of more than 60 consumer groups, trade associations, businesses, unions and government agencies coordinated by the National Consumers League.

''While the alliance recognizes that many products and services are sold legitimately through telemarketing, we want to warn consumers that con artists are making these types of offers through high-pressure sales

pitches providing little concrete information,'' said NCL Executive Director Linda Golodner.

She said consumers ''need to take time to ask questions, get answers in writing and contact consumer protection agencies when they don't know with whom they are dealing.''

The group said telephone scams involve tens of billions of dollars a year. It has been estimated that Americans lose $10 billion a year - more than $1 million an hour - to telephone con artists in the investment area alone it said.

The scams are:

-Abusive 900 numbers: Swindles include a failure to inform consumers of the costs, keeping a caller on hold to run up per-minute charges or appeals aimed at children. One scam involves promising a credit card for a $29.95 call but delivering a how-to kit on getting credit.

-Overseas boiler rooms: High-pressured sales people pushing low-price penny stocks and precious metals have moved out of the reach of U.S. regulators to ''safe havens'' in Costa Rica, the Bahamas, Liberia and South Africa.

-Bogus health care promotions: Be wary of arthritis remedies, weight-loss plans, sexual aids, baldness remedies, nutrition schemes, ''chelation'' therapy, muscle stimulators and antifungal drugs for hypersensitivity to ''candida.'' These schemes ''could result in serious illness or worse.''

-Bank-financed precious metals: Investors promised big profits for a downpayment on gold or silver will lose $1 billion this year, mainly in Southern California. Commissions and fees make it nearly impossible to profit.

-''Blind pool'' penny stocks: Typical offering document contains no meaningful information on how invested funds will be spent. They were ''at the heart'' of estimates Americans lose $2 billion annually to penny stock swindles.

-Look-alike envelope promotions: Mailings that duplicate the look and names of federal agencies such as the Social Security Administration and the IRS. They often suggest contacting a toll-free ''800'' number and placing an order.

-Accelerated mortgage scalpers: Consumers need to check with the financial institution that holds their mortgage to see if a payment plan is legitimate. Most legitimate bi-weekly payment plans do not demand service charges.

-''One shot'' credit cards: In return for a $35 or $50 call, consumers think they are getting a VISA or Mastercard. Instead they receive a card useful for the purchase of goods from a specific store or catalog.

-Guaranteed timeshare resales: For a fee, the swindler offers to resell a timeshare property, offering a money-back guarantee or a $1,000 bond. Often there is no money-back guarantee and the bond is worth as little as $60.

-Phony foreign banking schemes: Scam artists promise to invest in overseas banks or financial instruments offering high interest rates and then pocket the money.

#90025u0196 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - President Bush was all ready to reveal his updated anti-drug strategy Thursday with a call for more military might, more federal agents and a death sentence for drug lords. But the Democratic chief of the Senate Judiciary Committee got there first.

Sen. Joseph Biden, D-Del., beat Bush to the punch in the war of competing drug initiatives Wednesday, releasing details of his own plan for a crackdown on hard-core users versus the casual user, and emphasizing economic aid instead of a beefed-up military role to help wean farmers in the Andean nations from the cocaine crop.

Biden said his proposal was not intended as ''wholesale rejection'' of the administration program despite some ''fundamental strategic differences'' and some ''tactical disputes.''

But in outlining his policy initiatives, Biden said they offer ''real hope for meeting the greatest domestic challenge facing our nation today.''

Biden was scheduled to formally present the plan before the U.S. Conference of Mayors Thursday, shortly before Bush was to outline the administration's strategy in a speech at the White House.

At a news conference Wednesday, Bush touted his soon-to-be revealed strategy, declaring, ''The future of this country depends on whether we can give our children a chance to grow up drug free.''

On the president's side, officials said their new plan, details of which have been surfacing for weeks, is expected to cost about $10 billion. They said the final figure was well short of what federal anti-drug chief William Bennett had wanted.

The Biden plan, more ambitious, would cost $14.6 billion.

Judiciary Committee sources pointed Wednesday to two other key differences in the Bush and Biden approaches: the committee chairman wants to target hard-core users rather than casual ones and wants to cut off the flow of drugs through economic aid rather than military action.

The Bush-Bennett strategy seeks an increased role for the military in drug interdiction. A centerpiece of that initiative was to be stationing of U.S. warships off Colombia, but that proposal has been placed on hold, perhaps permanently, because it elicited bitter protests from the coca-producing countries Peru and Bolivia.

Biden instead proposes debt relief in exchange for crop substitution and development in the Andean nations and a Narcotics Free Trade Zone to end the economic dependence of those countries on the coca crop.

The senator also swiped at the administration plan to seek an expanded death sentence for drug kingpins, even if they or their organizations are not directly involved in a murder, calling it a ''simplistic answer ... (that) offers a slogan instead of a solution.''

Under the Biden plan, hard-core users of drugs would have to voluntarily get treatment or go to jail and get treatment there.

The administration package, drafted by Bennett, calls for hiring more FBI and Drug Enforcement Administration agents and recommends the designation of New York, Los Angeles, Miami and Houston as ''high-intensity drug-trafficking areas'' that would be become eligible for additional federal funds.

Biden's eight-point plan, partially included in an anti-crime package now pending in the Senate, would double the amount of federal aid to state and communities to put cops on the streets, double the number of FBI agents assigned to attack drug rings and build new drug-treatment regional prisons.

The plan also would provide money to treat all pregnant addicts within a year, provide treatment-on-demand in four years and expand Medicare to cover drug treatment.

Last year the president proposed a $7.9 billion anti-drug strategy, which Congress boosted to more than $9 billion.

#90025u0219 01/25/1990 ~United Press International

(JAN. 25) UPI - John MacLean scored with three seconds left Wednesday

night and collected his 10th game-winning goal of the season.

MacLean scored his 29th goal of the season at 19:57 of the final period, lifting the New Jersey Devils to a 3-2 victory over Washington, the second straight night the Capitals lost with three seconds remaining.

''That's what they pay me for,'' MacLean said. ''I'm usually in front of the net and they are going in pretty good right now.''

MacLean scored on a power play when he dug the puck out of a goalmouth scramble and poked it past goalie Bob Mason. Washington had tied the score 2-2 35 seconds earlier on Michal Pivonka's goal.

''After Washington tied the game, we wanted to get it back right away and not have to go into overtime,'' MacLean said.

Defenseman Tommy Albelin had started the winning play with a 50-foot shot from the point. Brendan Shanahan picked up the rebound near the boards and passed out in front to MacLean.

''I saw the puck come off the back boards and threw it blind in front where Johnny Mac(Lean) usually is,'' Shanahan said. ''He (MacLean) was right there and got the shot off in time.''

''We are snakebit,'' Washington Coach Terry Murray said after his team lost to the Devils for the first time this season after three victories. ''How can something like that happen two games in a row?''

Washington, which suffered its 10th loss in 12 games, scored in the first ten seconds of the game as Yvon Corriveau took passes from Pivonka and Steve Leach on the opening rush. Corriveau beat Sean Burke from 15 feet out.

--- AROUND THE NHL ---

Elsewhere in the NHL, Buffalo clipped Chicago 3-2, Montreal manhandled Quebec 7-3 and Toronto tripped Minnesota 7-3.

Sabres 3, Blackhawks 2

At Chicago, Pierre Turgeon scored the tying goal late in the second period and the game-winner midway through the third period to rally Buffalo. Turgeon gave the Sabres their first lead with a power-play goal at 8:21 of the third when he wristed a rebound over a sprawled out goalie Jacques Cloutier, who was his first start against his old team. Buffalo traded Cloutier to Chicago last Sept. 29.

Canadiens 7, Nordiques 3

At Montreal, Russ Courtnall scored two goals and set up Ryan Walter's first goal since Dec. 8 to lead Montreal over Quebec, which has the worst record in the NHL and has just two victories in its last 14 contests (2-11-1). Courtnall scored his second goal at 17:43 of the final period to give the Canadiens a 7-3 lead.

Maple Leafs 7, North Stars 3

At Toronto, Tom Kurvers scored two power-play goals and Mark Osborne put Toronto ahead for good with a goal late in the second period, lifting Toronto past Minnesota. With the score 2-2, Osborne scored his 16th goal of the season at 18:11 when he drilled a shot which hit Minnesota goaltender Jon Casey's shoulder and dropped into the net.

#90025u0271 01/25/1990 ~United Press International

(JAN. 25) UPI - Residents of Miami's predominantly black Overtown neighborhood are angry with the seven-year sentence Hispanic police officer William Lozano received Wednesday for the deaths of two black men. The deaths a year ago sparked three days of rioting. Many people questioned felt Lozano got off too easily. They also felt he should've been ordered to go right to jail... rather than allowed to remain free on bond. One man felt the sentence significantly diluted the apparent victory of last month's guilty verdict on manslaughter charges.

A Portland, Oregon, woman told a Canadian federal court in Calgary, Alberta, Wednesday she sent ''Star Wars'' creator George Lucas an unsolicited plot line five years before a similar idea appeared in his 1983 movie ''Return of the Jedi.'' 23-year-old Jenny Rothschild was a witness for Calgary writer-producer Dean Preston, who is suing Lucas for 128-Million dollars. Preston claims Lucas stole the ''Jedi'' Ewoks characters from his earlier script ''Space Pets.''

The Postal Service is expanding its fax service. Assistant postmaster general Gordon Morison says the post office has signed a contract with a Miami-based company to install self-service credit card-operated facsimile terminals in 209 locations nationwide. 54 postal locations in the Northeast already feature FaxMail terminals... the result of a pilot program begun last November.

-30- 1572

#90025u0272 01/25/1990 ~United Press International

(JAN. 25) UPI - For the Philadelphia 76ers lately, there's no place like home.

The 76ers, who lost to Orlando in Florida earlier this season, rolled over the Magic 125-103 Wednesday night for their sixth straight victory and eighth in nine games.

Not coincidentally, six of those nine contests have been played at the Spectrum in Philadelphia, where the 76ers are 15-3.

''The main thing is we just came home,'' said Charles Barkley, who led Philadelphia with 27 points (on 11 of 13 shooting) and 16 rebounds. ''It's tough to get chemistry, continuity or confidence on the road. We have a lot of confidence at home. We just have to take advantage of our situation and win our home games.''

The victory closed the 76ers within two games of first-place New York in the Atlantic Division. The Knicks are faced with a three-game road trip.

''I knew that if we kept it close going into January, we could make a move '' Barkley said. ''It's working out perfectly. If we had played better earlier in the season, we'd be rolling. Now we have to play catch-up.''

Not for long, if Barkley has his way, especially with two more home games this week.

Philadelphia, which defeated Cleveland 103-88 on Tuesday night, certainly took care of business against Orlando, which rested after arriving in Philadelphia Tuesday afternoon.

Johnny Dawkins and Mike Gminski added 18 points apiece for Philadelphia, which had six players score in double figures as it handed the Magic their 15th straight loss on the road.

Orlando, losers of six of seven and 14 of 16, got a career-high 33 points and 16 rebounds from Otis Smith, 14 points from Michael Ansley and 13 each from Sam Vincent, Nick Anderson and Reggie Theus.

The Magic shot only 40 percent as a team and committed 20 turnovers, thanks to an active Philadelphia defense.

--- AROUND THE NBA ---

Elsewhere in the NBA, Boston beat Miami 116-95, the LA Lakers defeated Indiana 120-111, Atlanta topped Cleveland 103-86, San Antonio stopped the LA Clippers 106-98, Sacramento stopped Golden State 129-99 and Milwaukee defeated Seattle 119-112.

Celtics 116, Heat 95

At Boston, Robert Parish scored 23 points and Larry Bird added 20 to help

Boston hand the Miami its fourth straight defeat. Glen Rice led the Heat with 22 points. Over the past two seasons, the Celtics are 13-0 against the NBA's four expansion teams.

LA Lakers 120, Pacers 111

At Indianapolis, Magic Johnson scored 26 of his 32 points in the second half to lift the Lakers. Pat Riley became the fastest of 13 coaches to reach his 500th NBA victory. Riley coached his first NBA game on Nov. 19, 1981.

Hawks 103, Cavaliers 8

At Atlanta, John Long scored 19 points and Dominique Wilkins added 15 off the bench to help Atlanta hand the Cavaliers their fifth straight loss. Wilkins has a sprained ankle and played 17 minutes. Cleveland was led by Mark Price with 20 points.

Spurs 106, Clippers 98

At San Antonio, Terry Cummings scored 31 points to guide the Spurs. David Robinson added 24 points and Willie Anderson 21 for San Antonio. The Clippers received a career-high 31 points from Danny Manning.

Kings 129, Warriors 99

At Sacramento, Calif., reserve guard Vinny Del Negro scored a season-high 27 points, including 14 in the fourth quarter, to help Sacramento rout Golden State. Wayman Tisdale added 24 points for the Kings. Reserves Sarunas Marciulionis and Rod Higgins led the Warriors with 19 points each.

Bucks 119, Sonics 112

At Seattle, Jack Sikma scored 28 points and Ricky Pierce added 27 to help Milwaukee rebound from its worst loss of the season. The Portland Trail Blazers routed the Bucks 119-90 Tuesday night. Xavier McDaniel scored 32 points for Seattle, which lost its fourth straight game.

#90025u0301 01/25/1990 ~United Press International

(JAN. 25) UPI - Louisiana State Coach Dale Brown believes the voters should grade the Tigers on their performance instead of their potential.

The 13th-ranked Tigers missed the front end of eight consecutive one-and-one free-throw situations down the stretch and allowed Georgia to run off 10 straight points in overtime Wednesday night, dropping a 94-92 Southeastern Conference decision to the Bulldogs.

''We should drop out of the polls. Completely out,'' said Brown, whose

team dropped to 12-4 and 4-3 in the SEC. ''I honestly believe we could have been 12-4 with our schedule with an intramural team.''

LSU's only consistent production Wednesday night came from Chris Jackson, who led all scorers with 45 points. Shaquille O'Neal added 15 points and Wayne Sims 13.

The game featured an improbable finish to regulation in which a Georgia player hit three free throws with four seconds left to tie the score 79-79.

Rod Cole was awarded three free throws as part of an experiment in the SEC this year in which a player fouled while shooting a three-pointer is given three shots from the line.

''We hit some big shots, and their missed free throws helped us tremendously,'' said Georgia Coach Hugh Durham, whose team improved to 11-5 and 4-3.

Alec Kessler scored 27 points to pace the Bulldogs. Marshall Wilson added 22 and Jody Patton and Cole finished with 19 each. The Bulldogs played without second-leading scorer Litterial Green, who sat out the game with a boil on his buttocks.

--- AROUND THE COLLEGE SCENE ---

Elsewhere in the Top 20, No. 6 Oklahoma beat Iowa State 107-96, No. 7 Duke outlasted North Carolina State 85-82 in overtime, Michigan State shocked No. 15 Indiana 75-57, No. 17 St. John's topped Providence 83-75 and No. 19 Connecticut blasted Central Connecticut 99-77.

At Norman, Okla., William Davis scored 24 points and pulled down 14 rebounds to lead the Sooners. Victor Alexander scored 20 points for Iowa State and Kirk Baker had a perfect night shooting for the Cyclones, going 7 for 7 from the floor and 4 for 4 from the free-throw line for 18 points.

At Durham, N.C., Phil Henderson scored 25 points, including four in overtime, to lead Duke. The Blue Devils needed a tip-in by Christian Laettner off a missed free throw with 18 seconds left in regulation to force overtime. Rodney Monroe, who made only 6 of 26 shots, scored 19 points to lead the Wolfpack.

At Bloomington, Ind., Kirk Manns scored 25 points and Michigan State dominated Indiana defensively to pull within a half-game of the Big Ten lead. The Hoosiers scored their fewest points since a 55-53 victory over Wisconsin in 1988 and lost to Michigan State by the largest margin since an 82-58 drubbing by the 1979 Spartan team that won the NCAA title.

At Providence, R.I., Jayson Williams scored 23 points and Boo Harvey added

18 to lead St. John's. The victory moved the Redmen into sole possession of first place in the Big East conference with a 6-1 record, a half-game ahead of Georgetown. The Friars made just 24 of 67 shots from the floor.

At Storrs, Conn., Chris Smith scored 19 points and Tate George added 16 to lead Connecticut past Central Connecticut. The game was the last to be played at Connecticut's Storrs Field House, the school's home court since the 1954-55 season.

In other games, it was Temple 81, Rhode Island 70; Auburn 74, Kentucky 70; Jacksonville 86, Alabama-Birmingham 84; Vanderbilt 71, Florida 64; Virginia 77,Virginia Tech 59; Kansas State 84, Akron 60; Notre Dame 88, Wichita State 78 and Slippery Rock 80, Clarion 68.

Also, Winston-Salem State gave coach Clarence ''Bighouse'' Gaines his 800th career victory with a 79-70 victory over Livingstone. Gaines is only the second coach in NCAA history to record 800 wins, joining Kentucky legend Adolph Rupp.

GENEVA (JAN. 25) UPI - Disagreement between Britain and the United States doomed talks on delaying British plans to forcibly repatriate thousands of Vietnamese boat people from Hong Kong.

Britain said it was prepared to accept a six-month moratorium until July 1 - starting from Jan. 1 - but the United States Wednesday insisted on one year, with none of the refugees sent back before next Jan. 1.

''We were very close to an agreement and we had a prepared text,'' British delegation leader Robin McLaren told reporters after the two-day meeting ended in failure.

McLaren said Britain argued there was ''no objective justification'' for delaying mandatory repatriation of boat people deemed to be economic refugees looking for a better life rather than genuine political refugees.

''However, we were prepared in the interests of a consensus to agree to a moratorium and that mandatory repatriation should start on July 1,'' he said.

''Unfortunately, the United States insisted on Jan. 1 next year, while Vietnam said Oct. 1 this year,'' McLaren said. ''All the other participants were agreed to the first of July.''

At the State Department in Washington, spokeswoman Margaret Tutwiler said the United States remains opposed to the forced repatriation of refugees,

but since the decision is in the hands of a multinational committee, the Bush administration has made two proposals:

-Return of the Vietnamese be delayed for 12 months.

-Certain safeguards, including a careful screening of refugees and a rule against ''pushing off'' newly arrived refugee boats be put into place.

McLaren, assistant undersecretary of state at the British Foreign Office, said U.N. High Commissioner for Refugees Thorwald Stoltenberg of Norway would now to try to get Washington and Hanoi to change their positions.

The British diplomat ducked the question of whether Prime Minister Margaret Thatcher would now carry out Britain's declared repatriation policy or wait until July 1.

''I don't know,'' he said. ''A decision is up to the government.''

McLaren also said that the U.S. insistence on waiting until Jan. 1 was ''illogical'' because the problem would only worsen with time.

British officials earlier pointed out the weather in the region improves considerably near the end of March, when a greater influx of boat people could be expected.

McLaren argued that the two-day meeting was not a complete failure because ''we have made mandatory repatriation under safeguards including monitoring'' a part of the Comprehensive Plan of Action for Indochinese refugees.

That plan was adopted at a Geneva conference last year by nations most involved - countries of origin, countries of first asylum like Hong Kong, and the main Western countries of final resettlement led by the United States.

''Agreement eluded us this time but it was not the last time,'' McLaren said. ''People will now go away and think again. We hope the high commissioner for refugees will ... get agreement as soon as possible.

''We believe repatriation is the answer whether or not people agree to return voluntarily (and) the only thing to decide now is when it should begin.''

There are some 41,000 boat people in Hong Kong held by Britain to be mostly economic refugees who should be forced back to Vietnam if they refuse to return voluntarily.

Tens of thousands of other Vietnamese boat people are crowding other first

asylum countries in Southeast Asia such as Thailand and the Philippines.

Those countries especially supported the British at the latest Geneva talks.

U.S. officials said before the meeting that Washington opposes forced repatriation because conditions in Vietnam remain unchanged and preclude guarantees of fair treatment and no punishment for returning nationals.

American delegation leader Robert Funseth, senior deputy assistant secretary of state for refugee affairs, did not make a statement after the collapse of the talks, however, and aides said he was leaving comment to Washington.

#90025u0348 01/25/1990 ~United Press International

MIAMI (JAN. 25) UPI - The streets of Miami, which erupted in race riots three times in the 1980s after policemen killed blacks, were quiet following the sentencing of a Hispanic police officer for the deaths of two black men.

But a feeling of injustice lingered in the black community Wednesday after a Dade County Circuit judge sentenced officer William Lozano to seven years in prison and then allowed him to remain free on bond pending his appeal.

Lozano, 31, could have received a maximum sentence of 45 years in prison for his two manslaughter convictions in the deaths of motorcyclist Clement Lloyd, 23, and passenger Allan Blanchard, 24.

''I believe in peace and I believe in justice, but after that pat on the back today, what the hell is justice?'' asked Joshua Bellamy, a resident of Miami's predominantly black Overtown community. ''As usual, it's just us.''

Blacks began searching for justice in 1980 after a jury acquitted six white Metro-Dade County officers in the fatal beating death in 1979 of black insurance agent Arthur McDuffie.

The acquittal triggered the bloodiest rioting in Miami's history with 18 dead, 116 injured and more than $100 million in damages.

Four years later, Miami officer Luis Alvarez shot and killed Nevelle Johnson, a 21-year-old black man, in an Overtown video arcade, sparking three days of rioting that claimed two more lives.

Scattered violence broke out again when an all-white jury acquitted

Alvarez of manslaughter in 1984.

Lozano's shooting of Lloyd as he rode by on his motorcycle and the subsequent death of Blanchard as a result of an ensuing accident was seen by blacks as part of a familiar pattern and sparked three days of rioting in January 1989.

The reaction to the Lozano case was markedly different in the Hispanic community where Colombian natives rallied to Lozano's defense. Upset by his conviction in December, they gathered the signatures of 15,000 people on a petition asking the judge to give the Colombian native probation.

''I was very sorry about the (guilty) verdict. Not only the police were going to suffer but all of Miami,'' said Luz Rodriguez. ''Lozano was just doing his job.''

Before handing down the sentence, Dade County Circuit Judge Joseph P. Farina said: ''The court cannot do perfect justice in this case. Perfect justice would be to restore the lives of Clement Lloyd and Allan Blanchard and to restore William Lozano to his previous public service.''

Lozano, dressed in a gray suit with a red silk tie and handkerchief, closed his eyes and clasped his hands on his lap as the sentence was read. He was fingerprinted immediately afterward.

Assistant State Attorney John Hogan called the sentencing ''a difficult question. ... The judge was conscientious about it,'' he said.

Immediately after the sentencing, defense lawyer Roy Black filed an appeal with the 3rd District Court of Appeals in Miami.

Lozano, who has been suspended without pay from the Miami Police Department and is expected to be fired soon, told a news conference at Black's office the sentencing was ''not the end. This is only the end of the beginning. ... My attorneys, my family and I will continue to fight for the truth and what is right. And at the end, we will win.''

Black, who said a decision on his appeal could take as long as 18 months, called the sentencing ''somewhat of a compromise.''

A tri-ethnic jury deliberated more than eight hours over two days before convicting Lozano Dec. 7 of two counts of manslaughter in the deaths of Lloyd and Blanchard. The trial included nearly three weeks of jury selection, 13 days of testimony and more than 80 pieces of evidence.

Lloyd and Blanchard were riding a motorcycle through the predominantly black Overtown neighborhood about 6 p.m. Jan. 16, 1989, after a parade celebrating the birthday of Martin Luther King Jr. A police officer in a

patrol car was chasing them for allegedly committing a traffic violation.

Lozano, who was answering a domestic distrubance call, stepped into the street as the motorcycle came by and fired.

Lozano claimed he shot Lloyd in self-defense because the motorcyclist was going to run him down. Prosecutors said Lozano's life was never in danger and he shot his gun out of negligence.

#90025u0394 01/25/1990 ~United Press International

MOSCOW (JAN. 25) UPI - Communist Party maverick Boris Yeltsin, a leading critic of President Mikhail Gorbachev, said he has promised his supporters that he will seek the presidency of the Russian Federation, the largest of the Soviet Union's 15 republics.

Because of his populist criticism of party privileges, Yeltsin is considered a shoo-in for election. Reports in official media that he drank too much on a tour of the United States last year made him even more popular in vodka-loving Russia.

Nominations are now being held for the parliament, or Supreme Soviet, of the Russian republic, and the outspoken Yeltsin has been offered as a candidate by many cities, including Leningrad, Moscow and sites in the Urals and Siberia.

''At all meetings where I was nominated, I was given political instructions by the electors not to turn down the fight for the chairman (presidency) of the Russian Supreme Soviet,'' Yeltsin told the weekly newspaper Literaturnaya Gazeta. ''At one meeting, I gave my word I would not turn it down.''

Yeltsin, the only Soviet politician in memory who has made a comeback after being sacked from the Politburo, must first win election to the Russian parliament in March.

Members of the Russian parliament then would vote to decide whether Yeltsin would lead them, just as Mikhail Gorbachev leads the national parliament as its chairman, the post that makes him Soviet president.

The Russian republic contains all of Siberia and covers 76 percent of the entire Soviet Union. Its 145 million people make up about half the Soviet population.

Although it contains about 100 nationalities, 80 percent of its population is Russian, affording the ethnic Russian Yeltsin a powerful base for a presidential run.

In addition, the countrywide wave of nationalism has finally hit the Russian republic and Russians who feel their nation has been sacrificed in the internationalism of the Soviet Union and its Communist Party.

Yeltsin began his run for Russia's presidency with typical outspoken views. He told Literaturnaya Gazeta that the Russian republic should be independent with a separate seat in the United Nations.

He also said it should have its own Communist Party, breaking away from the Soviet party like Lithuania's Communists did in December.

Yeltsin also indicated he would give up his seat in the national Supreme Soviet if he is elected and receives a high post in the Russian body.

Yeltsin's election to the Supreme Soviet kept the nation on tenterhooks for a week last year. Although he received more votes than any other candidate, the Congress of People's Deputies acting as electors initially kept him out.

Mass rallies and marches rocked Moscow in protest, and after several legislators offered to give their seats to Yeltsin, a second ballot made him a legislator.

Gorbachev has shunted him, however, to the inconspicuous parliament chairmanship of the architecture and building committee, making Yeltsin restive.

#90025u0417 01/25/1990 ~United Press International

(JAN. 25) UPI - Captain Kirk has been slapped with a six-Million-dollar palimony suit. In the lawsuit filed Wednesday in Los Angeles, 28-year-old Vira Montes claims she and ''Star Trek'' star William Shatner had a five-year relationship until a few weeks ago, when he suddenly broke it off. Montes says during the time she and the actor were together, he repeatedly promised to divorce his wife and marry her. NO comment from the 58-year-old Shatner.

Wildlife officials in Seattle, Washington, have come up with yet another plan they hope will convince Herschel the sea lion and his gluttonous buddies to lay off the salmon and steelhead around the Ballard Locks. Firecrackers, fish laced with yucky flavors, nets and amplified sounds of sea lion predators have failed. Last year's ''trap-and-truck'' operation was only marginally successful. Now officials want to try rubber-tipped arrows. They first need an O-K from the National Marine Fisheries Service.

KARACHI, Pakistan (JAN. 25) UPI - Prime Minister Benazir Bhutto gave birth Thursday to a daughter, her second child, and by all accounts became the first head of government in modern history to give birth while in office, her family announced.

''Almighty Allah has blessed my daughter, Benazir, and her husband, Asif Ali Zardari, with a daughter at 9:35 this morning,'' Bhutto's mother, Nusrat, said in a brief statement. There was no word on the child's name.

Sources at the Bhutto family home in the southern port city of Karachi said the baby, whose name has not been announced, weighed 7 1/2 pounds. Mother and daughter were reported to be in good health and resting comfortably in a Karachi hospital.

Hundreds of people danced and sang in the street in the slum areas of Karachi after the birth announcement was made.

The baby is the 36-year-old prime minister's second child. Bhutto, while as opposition leader, gave birth to a boy, Bilawal, Sept. 21, 1988. Less than three months later, she was nominated as prime minister after her Pakistan People's Party won the first democratic elections in the South Asian nation in 11 years.

While it cannot be determined beyond all doubt, Bhutto apparently is the first head of government in modern history to give birth while in office.

Her pregnancy has been criticized by opposition leaders, who said it would interfere with her running of the government.

Bhutto was in Karachi to distribute land to poor farmers in the area and was due to return to Islamabad Wednesday, but she decided to stay in the

southern city after it became apparent she was about to give birth.

Her entourage has included a doctor and paramedics for the past month.

Bhutto, educated at Harvard and Oxford, married Zardari, a wealthy businessman, Dec. 18, 1987. The marriage was arranged by their two families, according to Pakistani tradition.

Bhutto's father, Prime Minister Zulfikar Ali Bhutto, was overthrown in a 1977 coup by then-army chief of staff Gen. Mohammad Zia ul-Haq and hanged two years later for involvement in a plot to kill a political opponent.

Zia ruled the country for 11 years, eight of them as head of a military government, until his death in a mysterious plane crash in August 1988.

#90025u0557 01/25/1990 ~United Press International

(JAN. 25) UPI - Blustery winter storms chased mild weather from the Midwest early Thursday, while soupy fog blanketed portions of New England and rain dampened much of the South and scattered areas of the Southwest.

Wintry conditions returned to the Midwest early Thursday, breaking a spell of mild weather that dominated region for most of January, the National Weather Service said. In the early morning hours, snow blanketed parts of Wisconsin, Ohio and Illinois, and storms dumped as much as 5 inches in parts of Iowa.

Although snow whitened portions of southern Illinois, Chicago and areas south of the Windy City enjoyed a brief respite from the frigid, snowy weather that was predicted to hit the city in the early morning hours.

Dense fog covered parts of northern New England early Thursday as mild, damp weather remained in the region. Temperatures in Maine hovered just above the freezing mark as fog spread throughout the state.

Central New Hampshire reported dense fog and temperatures in the upper 20s and skies were overcast across Massachusetts, where the mercury was around the 40-degree mark.

Temperatures in Vermont were in the low 40s under partly cloudy skies, while haze covered much of Rhode Island, where the mercury was in the mid 30s.

The NWS issued a flood watch for parts of Vermont and New York because of the possibility of heavy rain Thursday and runoff from a rapid snow melt caused by very mild air over the flood watch area.

A warm front brought rain and warm temperatures to the mid-Atlantic region early Thursday, the weather service said.

Temperatures throughout the area were in the upper 40s and low 50s, and rain extended from southern Maryland to the New Jersey shore.

Rain dampened much of the South, with flash flood watches posted in Georgia, Alabama and Mississippi. But fair weather prevailed in much of Florida, where dense fog cut visibility in the state's north and central regions.

Temperatures in the South ranged from 49 in Knoxville, Tenn., to 52 in Atlanta, 67 in Charleston, S.C., and 74 in Miami.

Temperatures plunged as a Pacific cold front moved through Oklahoma, Arkansas and Texas, triggering wind gusts up to 40 mph.

A few snow flurries were reported Thursday in northern Arkansas and severe thunderstorms rumbled through southern Louisiana, but the cold front produced mostly dry conditions, clear skies and temperatures in the 50s and 60s. Before the front passed, nearly an inch of rain fell Wednesday in Port Arthur, Texas.

A storm gathering strength in the Gulf of Alaska threatened to send rain across most of Washington and Oregon. Much colder air following the storm front also could bring more snow to the mountains of both states late Thursday and early Friday, while a high-wind warning was posted for coastal areas.

Forecasters said high pressure along the West Coast was begining to break down, and a Pacific weather front was expected to spread rain over northern California and into central California late Thursday and Friday.

(JAN. 25) UPI - Around the world... around the clock... the latest news from U-P-I.

Miami police report NO racial violence... just a lot of grumbling... after the sentencing of a police officer to seven years in prison for the deaths of two black men. Officer William Lozano could have received as much as 45 years in prison. Lozano is free on bond, pending his appeal of his manslaughter convictions.

The Soviet news agency Tass says military leaders last night reported all quiet in Baku, the capital of Azerbaijan . Azerbaijanis lifted a blockade that had been set up around Soviet naval vessels in Baku bay in an effort to drive out the Soviets. Tass says the casualty toll has reached 93.

President Bush plans to unveil his updated anti-drug strategy today. Bush will call for a death sentence for drug lords, and more military might and more federal agents into the war against drugs. Officials say the president's plan is expected to cost about 10-BILLION dollars.

House Speaker Thomas Foley predicts the House will pass a clean air bill this spring. But in the Senate, assistant Republican leader Alan Simpson predicts a bitter fight over acid rain control. Meanwhile, President Bush has endorsed elevating the Environmental Protection Agency to Cabinet status.

Two defense analysts from ''think tanks'' told the Senate that the military threat in Europe is vanishing. One of the analysts is Richard Perle, a former assistant defense secretary. Perle said it's NO longer possible to imagine the Warsaw Pact forcing its way through the center of Europe.

#90025u0564 01/25/1990 ~United Press International

MANILA, Philippines (JAN. 25) UPI - Suspected communist guerrillas bombed and sprayed gunfire at four buildings, including the offices of the U.S. Information Agency, early Thursday in the southern port city of Davao, police said.

Police reported no injuries and minor damage in the attacks that occurred two weeks after communist guerrillas unfurled streamers in the city 600 miles south of Manila declaring, ''We are back.''

Davao had been home to communist ''Sparrow'' hit squads until 1986, when the military formed paramilitary units called Alsa Masa, or rising masses, and drove them from the city.

Teams of heavily armed men, striking simultaneously about 2:30 a.m., sprayed automatic rifle fire and then exploded homemade bombs and grenades at the offices of the USIA, a police station, the national telecommunications bureau and the land transportation commission, police said.

The attacks shattered glass windows and damaged walls, and a patrol car parked near the police station also was damaged.

A homemade device exploded near the fence of the building housing the USIA library and office, shattering windows, said Col. Franco Calida, Davao police chief.

No one has claimed responsibility for the attacks, but Calida said he

believed guerrillas of the communist New People's Army were behind the incidents.

Calida, reached by telephone at the USIA office where he was conducting an investigation, said damage to the building was ''superficial.''

''The bombing obviously was intended for propaganda. The guerrillas are trying to take advantage of the situation,'' Calida said, referring to threats by right-wing groups to stage an uprising in Davao.

A USIA staff member, who did not wish to be named, said the office was staffed by Filipinos at the time.

''The communists can do what they want but they don't have the support of the people,'' Calida said.

It was the second attack at USIA in Davao in more than a month. On Christmas eve, gunmen sprayed gunfire and tossed a grenade in the building. No one was injured in that attack. Communist guerrillas later claimed responsibility.

Last Dec. 14, two rifle grenades were fired at the U.S. embassy's Seafront recreational and housing complex in Manila, causing no casualties.

#90025u0594 01/25/1990 ~United Press International

BANGKOK, Thailand (JAN. 25) UPI - The Cambodian resistance Thursday tightened the noose around the last major government base near the Thai border, rebel officials said.

''Our troops just today captured the artillery base at Phaong, which puts (the district capital of) Samroang in even worse position,'' said Roland Eng, a spokesman for the the Sihanoukist National Army, the guerrilla force loyal to Prince Norodom Sihanouk.

Eng said he received a message that the Phaong artillery base, about 8 miles from the Thai border, fell Thursday.

While the report could not be independently confirmed, Western diplomats in Bangkok said it was clear government forces were on the defensive and apparently unable to launch a long-anticipated dry season offensive.

The three resistance factions are fighting a government installed by Vietnam's 1978 invasion. The resistance made little progress on the battlefield until September, when Vietnam announced the last of its troops had left Cambodia.

Eng said the Phaong artillery base was a key defensive position protecting Samroang, about 15 miles to the south. Samroang, which includes an airport and a large troop garrison, is the last major government base within 20 miles of the Thai border.

''We have cut all supply routes to Samroang and the defenders are crying for food. Their morale is very low,'' Eng said.

''We do not plan any major assault - why loose arms, ammunition and lives when they will eventually have to surrender without a fight?'' he said.

Eng said such tactics were the basis of a resistance offensive that has gradually occupied a broad strip of territory along Cambodia's western border with Thailand.

He said guerrilla forces, including troops from the other two resistance forces, were trying to cut supply routes to Sisophon, a key crossroads town and military base.

''Many people are already trying to escape the town,'' he said.

He said the government was trying to move up heavy Soviet-supplied military equipment including armor, ammunition and artillery to help defend Sisophon and the neighboring provincial capital of Battambang, the country's second-largest city.

''What has been remarkable is that so far the (President) Heng Samrin forces have failed to launch any major counter-offensives against the areas we have taken,'' he said. ''If they could just retake one of those places, it would be a major propaganda victory.''

The government in Phnom Penh continued broadcasting claims of military victories in the west, saying its forces intercepted a resistance band in Battambang province Tuesday, killing 11 guerrillas and wounding 15.

''With their continuous successes, our armed forces in Battambang Province and other provinces throughout the country continue to defeat the three enemy groups and plunge them into a dismal morass,'' the radio said.

The Khmer Rouge radio, however, reported increased attacks west of Battambang city, which it said were ''causing great panic to the enemies.''

The radio said the government forces near Bavel, a town about 22 miles northwest of Battambang were plagued by desertions and had repeatedly called in vain for reinforcements.

Differing accounts of the fighting again were highlighted when the government radio proclaimed a major victory at Varin district, about 25

miles north of the 12th century ruins at Angkor Wat in Siem Reap province.

President Heng Samrin commended government forces for inflicting ''the most shameful defeat since the onset (of the resistance offensive)'' on resistance forces at Varin. He gave no details of the fighting Tuesday in the area, which resistance forces claimed to have captured earlier this month.

Khmer Rouge radio, however, said a government attempt to retake the town was stopped two days earlier, with the loss of eight government soldiers and the destruction of two trucks.

#90025u0614 01/25/1990 ~United Press International

BRUSSELS, Belgium (JAN. 25) UPI - Belgium's defense minister said Thursday that NATO was not reacting quickly enough to democratic reforms in Eastern Europe and it must cut its budget.

In an interview with daily De Standaard, Guy Coeme also said, ''As the situation in Europe is developing now, the withdrawal of the Belgian troops from Germany becomes likely.''

''Hence, I instructed the general staff to work out different scenarios for the withdrawal,'' he said. ''The time has come to prepare for that and to tell the people involved.''

Belgium has about 25,000 troops stationed in West Germany, responsible for the defense of a 37-mile-wide sector.

Coeme, who leaves Friday for Moscow, said the West has to take into account the recent democratic changes in Eastern Europe and the reduced threat from the Warsaw Pact military alliance.

After the present Conventional Forces in Europe negotiations in Vienna, new convention forces talks should begin dealing mainly with the troop strength of NATO and the Warsaw Pact, he said.

He said NATO, which is headquartered in Brussels, was reacting too slowly to the events in Eastern Europe, and was still working on the premise that defense budgets of member states have to grow.

''Public opinion would not understand that detente would not result in a reduction of defense spending,'' he said.

''I wrote a letter to NATO Secretary-General (Manfred) Woerner, asking that the present procedure in NATO be revised.

''The alliance has to adapt itself to the new situation and has to tighten the belt with savings on the NATO budgets,'' he said.

#90025u0670 01/25/1990 ~United Press International

(JAN. 25) UPI - President Bush is set to announce his drug plan... the Senate prepares to vote on a presidential veto... a Soviet spokesman says President Gorbachev will survive the nation's troubles... and another shuttle roll-out is scheduled today. Those stories and more, next from U-P-I.

President Bush is preparing to reveal his updated anti-drug strategy today... but he was upstaged by Senator Joseph Biden ... who as chairman of the Senate Judiciary Committee presented his own plan a day earlier.

The Bush plan reportedly calls for more military effort, more federal agents and a death sentence for drug lords... all at a price of 10-BILLION dollars. That amount is well short of the sum requested by anti-drug chief William Bennett.

Biden, a Delaware Democrat... released details of his competing drug initiative yesterday. Biden calls for a crackdown on hard-core users instead of the casual user... and emphasizes economic aid instead of a beefed-up military role to help wean farmers in the Andean nations from the cocaine crop.

Biden says his plan is NOT a ''wholesale rejection'' of the Bush program, despite what he calls some ''fundamental strategic differences'' and some ''tactical disputes.''

The Biden plan would cost 14-point-six BILLION dollars.

Biden is scheduled to formally present his plan today before the U-S Conference of Mayors... shortly before Bush outlines his strategy in a speech at the White House.

The Senate is expected to follow in the footsteps of the House today and vote to override President Bush's veto of a bill that would allow Chinese students to stay in the United States.

The House voted 390-25 yesterday to overturn the veto, with all Democrats voting against Bush and only 25 Republicans supporting him. Leaders of the Senate's 45 Republicans see NO way Bush can get 34 votes- the one third necessary to uphold the veto. Senators are expected to vote this afternoon.

However, Bush said last night that he has ''a fighting chance'' to sustain the veto in the Senate. Secretary of State Baker, who lobbied Republicans

on Capitol Hill, says they ''might surprise some people''

Bush warned that enactment of the bill could cause ''long-term consequences'' to U-S relations with China. But the House brushed the argument aside in the rush to punish China's leaders for calling out the tanks last June to crush the pro-democracy movement in Beijing .

Congressman Harold Volkmer, a Missouri Democrat, argued ''You caN'T reason with mad dogs.''

#90025u0680 01/25/1990 ~United Press International

(JAN. 25) UPI - A Soviet Foreign Ministry spokesman vows that President Gorbachev will NOT allow the dissolution of the Soviet Union, despite the near revolt in the predominantly Moslem southern republic of Azerbaijan.

Spokesman Gennady Gerasimov admits that Gorbachev may have been hurt politically by ordering the Red Army into the Azerbaijani capital of Baku to halt the killing... but says there was NO alternative.

Gerasimov says conservative forces in the Soviet Union may benefit from Gorbachev's troubles because it's an additional argument against Gorbachev's radical economic and social re-structuring policy.

Gorbachev ordered the Baku assault to put down the worst ethnic violence in a two-year dispute between Azerbaijan and Armenia. Azerbaijan's parliament had threatened to consider secession if the Red Army did NOT pull out yesterday. NO Soviet republic has ever seceded despite a constitutional right to do so.

The Soviet news agency Tass says military leaders reported all quiet in Baku last night... and that militant Azerbaijanis lifted a blockade that had been set up around Soviet naval vessels in the port city.

Space agency engineers are getting ready to move the next shuttle to its launch pad.

The Atlantis will make the journey from NASA's Vehicle Assembly Building to launch pad 39-B at Cape Canaveral today.

Atlantis will put a Pentagon satellite into orbit. While lift-off is planned for February 22nd, an official date will NOT be set until after a formal flight readiness review February 10th.

The shuttle Columbia, just back from an 11-day space mission, is scheduled to begin a cross-country trip from Edwards Air Force Base in California back to the Kennedy Space Center today. Columbia will make the trip bolted

to the back of a NASA jumbo jet.

A satellite that Columbia rescued is still in the shuttle's cargo bay. If all goes well, technicians will remove the satellite next week to study how its experiments and materials were affected by five and one-half years in space.

An Air Force Delta-2 rocket successfully boosted a ''Navstar'' satellite into orbit last night. It's the sixth of 21 radio navigation beacons that will allow troops around the world to pinpoint their locations to within about 50 feet.

The Air Force Delta-2 rocket is an upgraded version of the workhorse Delta rockets launched for many years by NASA.

#90025u0687 01/25/1990 ~United Press International

TALLAHASSEE, FL (JAN. 25) UPI - The Florida Supreme Court indefinitely delayed the execution of ''black widow'' killer Judy Buenoano, who had been scheduled to die Thursday morning for poisoning her husband.

State Department of Corrections officials said Buenoano, who also was convicted of murdering her invalid son and trying to kill a boyfriend, was moved from her death-watch cell after notification of the stay. She eventually will be transferred to Broward County.

Buenoano, dubbed ''the black widow'' by prosecutors, had been was scheduled to die in the electric chair at 7 a.m. Thursday. She was convicted in Orange County in 1985 of first-degree murder in the arsenic poisoning of James Goodyear, her husband. The former Air Force pilot died in 1971, just three months after completing a tour of duty in Vietnam. His death originally was attributed to pneumonia and possible hepatitis.

But his body was exhumed following Buenoano's 1984 conviction for murdering her son, and investigators found a thousand times the lethal dose of arsenic in his remains.

At the time she was convicted of murdering Goodyear, Buenoano already was serving a life term for the slaying of her invalid 19-year-old son, Michael, and a 12-year term for the attempted murder of her boyfriend, John Gentry.

Buenoano, also known as Judy Goodyear, was convicted in Pensacola in 1984 of pushing her handicapped son, Michael, out of a canoe during a family outing. Michael, who wore heavy metal arm and leg braces, drowned.

During that trial, Assistant State Attorney Ressell Edgar called Buenoano

''a black widow feeding off her young,'' and the nickname stuck.

Buenoano had rigged a dynamite bomb to explode in Gentry's car and also had been putting arsenic in his food. Gentry was badly injured but survived.

Colorado officials also identified her as a suspect in the arsenic poisoning of her common-law husband, Bobby Joe Morris, who died in 1978.

Prosecutors said she committed the crimes to collect on insurance policies.

#90025u0692 01/25/1990 ~United Press International

(JAN. 25) UPI - The streets of Miami are quiet even though the black community feels there was NO justice in the sentencing of a police officer for the deaths of two black men.

Miami erupted in race riots three times in the 1980's after police officers killed blacks.

Hispanic officer William Lozano was sentenced to seven years in prison for his two manslaughter convictions in the deaths of a motorcyclist and passenger. Lozano could have received a maximum sentence of 45 years in prison.

One resident of Miami's predominantly black Overtown community says Lozano received a pat on the back.

The reaction to the Colombian-American's case was markedly different in Miami's Hispanic community. Colombian natives, upset by Lozano's conviction in December, gathered the signatures of 15-thousand people on a petition asking the judge to give Lozano probation.

Lozano was allowed to remain free on appeal bond. His appeal was filed shortly after he was sentenced.

Lozano has been suspended without pay from the Miami Police Department and expects to be fired soon.

Palimony lawyer Marvin Mitchelson has filed a six-Million-dollar suit against actor William Shatner... claiming the actor failed to keep promises to 28-year-old Vira Montes with whom Shatner lived part-time.

Montes charges that she and Shatner, who plays Captain James Kirk in the ''Star Trek'' television series and movies... had a five-year relationship and that he promised to divorce his current wife and marry her.

Mitchelson says Shatner suddenly broke off his relationship with Montes a few weeks ago. Until then, the actor had been spending more than half his time at the San Fernando Valley home he bought for Montes.

Shatner could NOT be reached for comment. He's currently married to his second wife, Marcie.

Mitchelson says he'll seek an emergency court order requiring Shatner to resume making payments on the home where Montes lives with her eight-year-old son. Montes says she gave up her job as a medical assistant to devote herself to serving as a ''companion, confidante and homemaker'' to Shatner.

The suit seeks three-Million dollars in actual damages for fraud, breach of contract and infliction of emotional distress... plus an additional three-Million in punitive damages.

#90025u0849 01/25/1990 ~United Press International

(JAN. 25) UPI - Prices on the Tokyo Stock Exchange rebounded in slow trading Thursday, encouraged by Wednesday's rally on Wall Street.

The key Nikkei Average of 225 selected issues, which tumbled 599.04 points Wednesday, gained 190.13 points to close at 36,969.11.

TOPIX or the broader-based Tokyo Stock Exchange Index of all listed major shares gained 7.44 points to 2,712.90.

An estimated 500 million shares changed hands, compared with 578 million shares on Wednesday.

Declines edged out advances 470 to 421, while 229 issues issues remained unchanged.

Brokers said investors were encouraged by the Japanese yen's rise against the dollar on the money market.

On the Tokyo Foreign Exchange, the dollar declined for the fourth consective session on concerns over sagging prices in the world's major stock markets, closing 0.50 yen lower at 145.30 yen.

Heavy-duty electricals and communications issues such as Toshiba, Hitachi, Oki Electric and Fujitsu all gained.

Consumer electricals like Matsushita Electric Industrial and Victor Co. of Japan also advanced along with foods, drugs, machinery issues and some nonferrous metals.

Distributions and chemicals weakened along with some constructions, precision instruments and leisure-related issues.

On the trading floor, NEC paced the actives followed by Fujitsu, Hitachi Co.,HKK and Oki Electric.

Elsewhere in Asia, stocks closed higher on the Hong Kong Stock Exchange in the final trading session before the long Chinese New Year holidays.

The key Hang Seng Index, which eased 6.06 points on Wednesday, closed up 12.47 points at 2,768.86. Utilities rose 115.04 points, financials gained 22.41, industrials edged up 4.76 and properties soared 54.45 points.

Turnover was light at 523 million shares, but up slightly from the 442 million shares chnaging hands on Wednesday.

Share prices traditionally rise at the Chinese New Year but the rally was late in arriving this year, primarily due to a wait-and-see attitude by investors watching political news from China and major price swings on other share markets.

The Hong Kong Stock Market will be closed on Friday, Jan. 26, for the start of the Lunar New Year holiday. Trading will resume on Tuesday, Jan. 30.

''The market just picked up in the last half hour of trading, mainly due to short covering by investors before the holiday,'' said a broker with a local firm.

Dealers said some players were short on blue-chip stocks, especially in the propery sector and to a lesser extent, the financial sector, which they bought in late trading.

In Singapore, stocks closed slightly higher in light trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which fell 25.48 points on Wednesday, rose 1.3 points to 1496.55. The narrower All Singapore Index gained 1.11 points to 414.75.

Volume amounted to around 79.4 million shares, well below the 111 million shares changing hands on Wednesday.

Analysts said the markets performance was due to late bargain hunting before the upcoming Lunar New Year holiday.

''Lunar New Year Eve, Jan. 26, is half-day market and I expect it to be

lackluster,'' one market analyst said.

Brokers said unless there was a major drop or rally in New York, the market would remain featureless.

On the trading floor, Bukit Sembawang pasced the advancing issues followed by Jurong Shipyard, Far East Shipping, National Iron, Jurong Cement and Sembawang Shipyard.

Singapore Airline foreign shares led the declining issues followed by Central Properties, Fraser and Neave ordinary, Hong Leong Industries and United Overseas Bank foreign shares.

In Australia, a rally in the gold and mining sectore boosted stocks in moderate trading on the Sydney Sharemarket.

The key All Ordinaries Index, eased 3.5 points on Wednesday, gained 14.1 points to 1675.3. The All Industrials Index rose 12.2 points to 2637.3 and the All Resources Index climbed 14.6 points to 943.5.

Volume amounted to 103.3 million shares, below the 123.7 million shares changing hands on Wednesday.

Analysts said a sharp rally in the global price of bullion combined with a weaker Australian dollar, triggered strong international buying interest for top Australian gold stocks.

Among some of the day's highlights included, BHP Gold adding 4 cents to 58 cents a share, Homestake Mining gaining 10 cents to $1.78, Newmont Mining adding 5 cents to $1.08, Placer Pacific climbing 24 cents to $3.29 and Highland Gold adding 6 cents to $1.03.

Elsewhere, in a strong banking sector, Westpac Bank gained 16 cents to $6.06, NAB Bank gained 10 cents to $6.82 and the ANZ Bank added 2 cents to $6.32.

#90025u0870 01/25/1990 ~United Press International

LONDON (JAN. 25) UPI - Stock prices were sharply higher in moderate trading at midday Thursday on the London International stock exchange sending the key indicator through the psychologically important 2,300 level.

The key Financial Times 100-stock index, which measures the value of Britain's 100 largest companies in terms of market capitalization, climbed 27.7 points to 2,306.3.

The narrower top 30 industrial average was ahead 16.9 points to 1,845.5. Volume amounted to around 275 million shares compared with 285 million shares traded during the same period Wednesday.

Analysts said encouring signals from overseas markets and some selected bargin-hunting boosted prices across a broad front.

Volume was held in check as many large institutional investors remained on the sidelines to await Friday's key report on Britian's trade.

Forecasters are expecting the government to report a deficit of $2.6 billion to $2.8 billion.

Among the most widely traded stocks, Reuters PLC surged 38 cents to $16.20 and Rank Organization tumbled 51 cents to $13 after the company announced plans of a $591 million rights issue.

Insurance companies retreated on profit-taking after soaring against a falling market Wednesday on speculation one or more could become the target of a takeover bid from a French company, analysts said.

Royal Insurance lost 16 cents to $8.43 and Guardian Royal Exchange slipped 11 cents to $3.85.

Among some of the day's other active issues, RTZ gained 24 cents to $8.52 and Lonrho eased eight cents to $4.75 after reporting lower-than-expected earnings.

#90025u0873 01/25/1990 ~United Press International

TOKYO (JAN. 25) UPI - Japan's telecommunications giant said Thursday it will ask seven U.S.-Japanese ventures to submit proposals for design services and construction supervision for the company's new head office in Tokyo. Nippon Telegraph and Telephone Corp. said the seven teams have been selected from among ten applicants in pre-qualification screening.

The company decided to seek foreign participation in the construction of its new head office, bowing to pressure from the United States to open Japan's construction market. The project calls for building a 30-story structure which will house the company's new head office in Shinjuku, Tokyo's new business center.

NTT originally planned to seek foreign participation in the construction, excluding design services. The seven teams consist of consortiums comprising 13 Japanese and eight U.S. firms.

The joint ventures which were selected in the pre-qualification screening

include: Cesar Pelli and Yamashita Architects, Stubbine and Mitsubishi Estate, CRSS and GKK and Orimoto and Inuzuka, SOM and Architecture and Technology, Hok and Nihon Sogo Architects and Sogo Setsubi Consulting, Leo A Daly and Nihon Sekkei and Richard Meiyers and Arata Isozaki and Ove Arup and Interbex and Bus. NTT said it plans to choose the contractor in late March.

#90025u0887 01/25/1990 ~United Press International

ATHENS, Greece (JAN. 25) UPI - About 1 million workers went on a 24-hour strike Thursday, bringing Greece to a virtual standstill in Prime Minister Xenophon Zolotas's first major crisis since taking office less than two months ago.

The strike was in response to a call from the Greek General Confederation of Labor, which demanded a new law on collective bargaining, tax reforms and more pay.

The work action paralyzed banks, air and sea traffic, public utilities, urban mass transport, railroads, telecommunictions, postal services and private industries.

No precise figures were immediately available of the number of workers who responded to the strike but the labor confederation earlier estimated that 1 million workers would participate.

Zolotas, who heads a national unity government composed of the conservative New Democracy party, the Pan-Hellenic Socialist Movement and the communist-led Alliance of the Left, took office in early December, essentially to head a compromise administration that would hold office while the three major political parties prepared for fresh elections in April.

The arrangement became necessary because no party could win an overall majority in the November general elections, the second in five months, and neither New Democracy nor PASOK could form a stable coalition with the communists.

Zolotas, whose government makes policy decisions after weekly meetings with the party leaders, said he would hold another meeting with them Thursday, his second this week, to consider the strike.

On Tuesday, Zolotas asked the labor leaders to reconsider their demands but he refused to discuss higher wages.

''To accept those demands would dynamite the economy and the interests of the workers themselves,'' he said. Zolotas, an economist, is a former

governor of the Bank of Greece.

In December, days after taking office, he revealed the treasury was desperately short of money and that the government was unable to pay the pensions of retired agricultural workers.

The government later borrowed money to pay the pensions but Zolotas introduced some immediate economic measures to raise cash. These included higher prices for state-run utilities, including electricity, telephones and public transport.

He also slashed long-standing state subsidies on such items as bread and promised to revamp the internal revenue department to make it more efficient in collecting taxes.

Despite these measures, most of which were unpopular among the working classes, the conservative press criticized the government as weak and said Zolotas's policies were insufficient to meet the country's economic crisis.

New Democracy party chief Constantine Mitsotakis said bluntly last week: ''The country is broke.'' He blamed eight years of socialist rule by Prime Minister Andreas Papandreou for the crisis.

But the labor confederation, in a statement Wednesday, said Greek workers were being made to bear the brunt of the economic crisis, ''while the capitalists and those protected by the black (market) economy and the unjust taxation system make billions.''

The confederation called for changes in the taxation system, easing the burden on wage earners and pensioners, price controls and measures to solve the unemployment problem.''

The unions also demanded unemployment benefits equal to 80 percent of the minimum wage of an unskilled worker.

#90025u0893 01/25/1990 ~United Press International

PORTLAND, OR (JAN. 25) UPI - A jury ruled the Tri-Met transit agency discriminated against a former bus dispatcher because he carried the virus that causes AIDS, but a state law will cut the $500,000 in damages they awarded by 80 percent.

Multnomah County Circuit Court jurors deliberated more than six hours before voting 9-3 Wednesday in favor of Joe Griffin, 44, in what is believed to be the first AIDS discrimination case to come to court in Oregon.

The jury set total damages at $500,000 but that figure will be reduced to $100,000 under a state law that places a limit on the amount of damages that can be won against a public agency.

Griffin lost his job with the Portland-area transit agency twice, in 1988 and 1989, the second time after winning his $31,500-a-year job back through a union grievance. He expressed elation over the jury's verdict.

''I think it sends a strong message to all employers in the state that accommodations must be made in the workplace for HIV-positive individuals '' Griffin said.

Edwin Harnden, a Portland lawyer who represented Tri-Met, said he was disappointed by the verdict.

''I think Tri-Met acted appropriately in all regards,'' he said, adding that he had given no thought yet to an appeal.

Janice Wilson, a Portland lawyer representing Griffin, said state laws barring discrimination against the handicapped allow Griffin to seek attorneys' fees as a result of his vctory. She estimated her expenses will approach $100,000 due to the case's complexity.

Griffin testified that Tri-Met supervisors challenged him repeatedly over routine work procedures and demanded private medical information after learning from an anonymous letter in October 1987 that he carried the HIV virus, which can cause acquired immune deficiency syndrome.

#90025u0904 01/25/1990 ~United Press International

OSAKA, JAPAN (JAN. 25) UPI - Bank of Japan governor Yasushi Mieno said Thursday the central bank is not considering another discount rate hike at present as it is still monitoring the effects of the previous raise on the economy, Kyodo News Service reported. Kyodo said Mieno's remark was aimed at discouraging speculative foreign currency trading worldwide.

Mieno, who assumed his post in December, made the remark amid reports that Japanese financial institutions are preparing to shift their funds from U.S. capital and financial markets to Japan in anticipation of the narrowing interest rate gap between the two countries. There also was speculation that the central bank may raise the key lending rate to check the dollar's recent rise against the yen.

"The yen has weakened only two to three yen against the U.S. dollar since the start of the new year," Mieno was quoted as saying, adding: "In the domestic market, there is nothing to suggest that the yen's value should be lowered (against other currencies)."

The central bank raised its official discount rate by a half percentage point to 4.25 percent last November in the second round of upward revision of the key interest rate last year.

#90025u0907 01/25/1990 ~United Press International

KNOXVILLE, TN (JAN. 25) UPI - A retired policewoman fatally shot her husband to stop years of abuse at his hands, then killed her retarded son because she feared he would be left alone with no one to care for him, police said Thursday.

Dorothea ''Dottie'' Sweeten, 66, held deputy sheriffs at bay with a .38 caliber pistol at her head for two hours Wednesday before they overpowered her.

Sweeten, a retired captain, had written a suicide note that outlined years of mental and physical abuse by her husband, Tom, 55, police said. She said she killed her 39-year-old son, Chucky, because ''she loved him and knew no one else would take care of him,'' detective Mike Cheaves said.

'''I have to act out of 38 years of love'' for what is ''best for him,''' he said she wrote.

Police said Sweeten, her face bruised, told detectives her husband had beaten her Tuesday night. Police said she shot Tom Sweeten once in the chest at close range as he lay in bed. Her son was shot twice in the back in his bed.

Police said she then phoned her church's pastor and told him what she had done. The pastor had someone else alert police as he talked with Sweeten, and she was on the phone when police kicked in the door of her home.

''She was standing in an area adjacent to the kitchen. She had a revolver in her right hand and it was cocked and she kept her finger on the trigger the whole time,'' police hostage negotiator Bryan Sturgill said.

Throughout the ordeal, he said she ''held the gun in her mouth, on herself and then at her side.''

Sturgill grabbed the gun and overpowered Sweeten after she ''maneuvered herself into a position where she was vulnerable.'' She was jailed under $40,000 bond on murder charges.

Tom Sweeten worked at The Knoxville Journal from 1953 until 1986, the last 12 years as managing editor. He then worked in public relations for the Tennessee Valley Authority.

#90025u0913 01/25/1990 ~United Press International
WASHINGTON (JAN. 25) UPI - Three white NFL quarterbacks allegedly tested positive for cocaine use over the past 10 years without undergoing mandatory counseling or treatment, while drug tests were used to target black players in the league, a television station reported Wednesday.

The station, ABC affiliate WJLA-TV, in a copyright report on NFL drug testing, quoted a former associate of the man hired to lead the NFL's drug testing program as saying the league's drug policy was biased against black athletes. The station reported the three quarterbacks were ''stars.''

The report came four days before the kickoff of Super Bowl XXIV in New Orleans and two days before the first ''state of the league'' news conference for recently hired NFL Commissioner Paul Tagliabue.

Tagliabue called the report ''a smear of all quarterbacks'' and ''quite absurd.'' The story was tainted because it came from a disgruntled employee, he said.

''I think the league, including Commissioner Rozelle (predecessor Pete Rozelle), was careful to apply the program with an even hand,'' Tagliabue said in an interview on CBS's ''This Morning.''

Much of the report was based on remarks from Gordon Griffith, formerly employed by Dr. Forest Tennant, a California physican hired by Rozelle in 1986 to head the league's drug program. Griffith was dismissed in what was described by the station as a payroll dispute.

Griffith told WJLA that Tennant was protecting high-visibility white players while targeting some black athletes.

''I became very discouraged in terms of knowing how unethical some individuals can be in terms of injuring other people's lives when it comes to drug testing,'' Griffith told the television station.

Tennant denied charges he helped protect some players.

''I knew how most of those critics are,'' Tennant told the station. ''They're not treating anybody. They've just got an ax to grind.''

The station said either unnamed agents or the quarterbacks themselves confirmed that the three quarterbacks had tested positive for cocaine use. One of the informants told the station the NFL ''forgot about it.''

Twenty-five of the 28 quarterbacks who finished the regular season as

starters are white. Griffith was asked during the report whether he thought there was a, ''witch hunt,'' in the NFL against black players. He replied: ''I definitely think there was.''

''There was a push to get (former Washington Redskin running back) George Rogers out of the league,'' Griffith said. He also said he felt the NFL tried to ensure the suspension of Redskin defensive lineman Dexter Manley, ''because of his wild behavior with the news media. They felt he was portraying a negative image.'' Manley was suspended during the 1989 season for drug abuse.

The report said some players' agents heard complaints, such as team trainers warning quarterbacks of upcoming drug tests while black linemen were not given such advance notice.

The report said former Cincinnati running back Stanley Wilson, who was kicked off the team the day before last year's Super Bowl, was being treated by Tennant.

''Stanley tested positive when he was with us in the clinic,'' Griffith said. ''But Dr. Tennant wanted that kept quiet because he wanted to show that the guy was turning around ... turned over a new leaf.''

NFL rules call for players to undergo counseling after failing their first league drug test. Players can be suspended for 30 days after testing positive for drug use a second time and suspended for life after a third positive test. Players banned for life can apply for reinstatement within a year.

Former Chicago Bears running back Calvin Thomas, a member of the 1986 world championship team, was suspended for 30 days in 1988 when he tested positive for drugs. Thomas said he was shocked to learn he had failed a previous drug test and had not been notified by league officials.

Results of the first drug test failed by Thomas, obtained by WJLA, showed marijuana levels so low they would have been dismissed by virtually every other private and government drug program, the station said.

Bobby Tovar, a former employee in Tennant's testing lab, said testing procedures were lax, and bottles containing urine samples commonly were labeled with players' names - a clear violation of NFL policy.

Tovar said many urine specimens arrived at the lab in improperly sealed envelopes and broke open or leaked during shipment, resulting in contamination of about a quarter of the samples tested at Tennant's office.

''On a fast day when we had to push the urine samples all the way through ... we had to do it at a very fast pace and there could always be the

possibility of error. But we were told he needed them right now, before 5 o'clock,'' Tovar said.

Tovar, who worked as a courier for Tennant before he was placed in the lab said, ''Dr. Tennant always felt that lab work was such an easy thing that he didn't need to have any lab technicians in there.

''He specifically made the statement, 'You could hire a chimpanzee to do the lab work.' You walk in one day, you're hired as a medical assistant or maybe as a secretary up front and he'd say, 'Come on, I'm going to teach you how to run the machines here in the laboratory,' and tomorrow you would be a lab tech.''

#90025u0952 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - The White House Historical Association announced Thursday a campaign to collect $25 million in donations to provide permanent funding for the collection of fine paintings and furnishings in the Executive Mansion.

First lady Barbara Bush arranged an afternoon reception in the State Dining Room to announce the creation of The White House Endowment Fund, which will handle the fund-raising drive.

Mrs. Earle Craig Jr of Midland, Texas, was named as chairman of the endowment fund.

Association chairman Dr. Melvin Payne said in the announcement that ''the historic character of the White House and its furnishings are a national treasure. We must assure for all the generations to come, the White House continues to be beautiful and accurate reflection of our history and culture.''

Other members of the endowment fund will include Roger Horchow, Dallas, Texas; Mrs. Donald Hall, Shawnee Mission, Kan.; Mrs. William Clements, wife of the Texas governor, Dallas; Mrs. Richard Scaife, Pittsburgh, Pa.; Mrs. John Lewis Jr, Winnetka, Ill.; George Hartzog, McLean, Va.; and Alfred Stern, New York.

#90025u0956 01/25/1990 ~United Press International

(JAN. 25) UPI - The Soviet news agency reports that Azerbaijan's prime minister has gained vastly widened power which may be used to stem nationalist violence. Tass says the Central Committee of Azerbaijan's Communist Party selected Ayaz Mutalibov as its new leader today. The election came at a meeting attended by Soviet Defense Minister Dimitri

Yazov, indicating Moscow's support for the leader in the southern republic.

Soviet Communist Party maverick Boris Yeltsin says he will run for president of the Russian Federation, the largest of the Soviet Union's 15 republics. Yeltsin is considered a shoo-in for election because of his populist criticism of party privileges. Reports that he drank too much on a tour of the United States last year made Yeltsin even more popular in vodka-loving Russia.

The Hispanic police officer in Miami who was sentenced to seven years for killing two black men appealed his conviction a short time later. Officer William Lozano says he will fight for what is right. The judge who sentenced Lozano said he could NOT hand out perfect justice because that would require restoring the lives of the two men killed.

Heavily armed men bombed and sprayed gunfire at four buildings in the Philippine city of Davao, 600 miles south of Manila, today. One target was the offices of the U-S Information Agency. Police report NO injuries and only minor damage. The attacks come two weeks after communist guerrillas unfurled streamers in Davao, declaring ''We are back.''

PITTSBURGH (JAN. 25) UPI - A special committee of independent directors of Aristech Chemical Corp. has told its advisors to solicit proposals of more than $26 a share for the company from potential buyers.

Aristech, the chemical unit spinoff of USX Corp, has set a Jan. 29 deadline for the receipt of written bids, the company said Wednesday. The company said there was no guarantee the committee would recommend any transaction to the board.

Mitsubishi Corp. and an Aristech management group have extended until Jan. 30 the deadline for acceptance of their proposal to acquire Aristech for $26 cash a share of Aristech's common stock. The proposal had been scheduled to expire Jan. 23.

The committee was told on Jan. 19 by Huntsman Holdings Corp. of Salt Lake City that Huntsman expected to submit an offer to acquire Aristech within one week to ten days, Aristech said.

Huntsman in October offered a $25-a-share buyout bid that was rejected by the Aristech board as inadequate. The committee has sent letters to Mitsubishi and Huntsman about the submission of proposals, Aristech said.

(JAN. 25) UPI - Pope John Paul is on his way to five famine-ridden nations in Africa. The pontiff asked Catholics to pray for his success in visiting the nations in western and central Africa. Most residents in four of the countries are Moslems, or worship animal spirits. Only the pope's first stop, the Cape Verde islands, are largely Catholic. The pope also will visit Guinea-Bissau, Mali, Burkina Faso and Chad.

Bush administration officials have apologized for making misleading changes in a report on food aid to poor women and children. The report showed benefits from the Agriculture Department program... but congressional investigators say its summary was re-written to under-state the benefits. Democrats in Congress say they hope the food program will be expanded.

The National Institutes of Health says enforcement of noise control regulations has been spotty since the Reagan administration closed the Office of Noise Abatement in 1982. A N-I-H committee recommends that the government re-establish an over-all co-ordinated effort to reduce the hazards of loud noise. Medical experts say the hearing of more than 20-Million Americans may be at stake.

The president of Little League Incorporated has told the world champion baseball team in Trumbull, Connecticut, to stop making public appearances... or risk losing its charter. Little League President Creighton Hale says he's concerned about the youngsters being exploited. Since Trumbull defeated Taiwan... the team has met President Bush, been featured in sports magazines, appeared on television shows and attended pro baseball's World Series.

#90025u0980 01/25/1990 ~United Press International
WASHINGTON (JAN. 25) UPI - Government opposition to the American Heart Association's plan to place its seal of approval on foods amounts to ''harassment'' and is unfair to the American public, the group's president said Thursday.

In a letter sent to the heart association, acting FDA Commissioner James Benson Wednesday said companies taking part in the ''Heartguide'' food labeling plan may face ''regulatory action'' if they push ahead and start the effort Feb. 1.

''Although we agree with the laudable objectives of your program, I regret to say that we have serious reservations about the means you have chosen to meet those ends,'' Benson wrote.

Under the program, the heart association would grant seals of approval to

processed foods that meet its fat, cholesterol and salt guidelines. Participation in the program is voluntary, and manufacturers must pay fees ranging from $15,000 to $640,000 per brand for food testing and consumer education.

''We think the American public is sick and tired of the misinformation they are getting in the food stores about what is heart healthy,'' said Dr. Myron Weisfeldt, president of the heart association.

The FDA action is the second major blow to the Heartguide plan. In October the Agriculture Department barred the heart group from including meat and poultry products in the Heartguide program.

''The American public should address those officials who are responsible for this type of harassment,'' Weisfeldt said. ''It's remarkable that the FDA and the USDA are taking on the heart association with the track record it has had in areas of smoking, high blood pressure, cardiopulmonary resuscitation.''

The FDA's main objection to the effort is that it ''could very easily result in the endorsement of products - such as some varieties of margarine, spreads and salad dressings - that quite simply do not represent the kinds of foods that ought to be promoted to achieve healthy hearts,'' Benson said.

Another concern raised by the FDA was the heart group's refusal to include in label statements that the seal of approval was made possible only by payment of a fee.

The start of the Heartguide plan will be delayed pending the outcome of further negotiations with the FDA, said Weisfeldt, emphasizing that his group does not plan to abandon the effort.

More than 100 food products involving nine companies were scheduled to be part of the first wave of the Heartguide program, Weisfeldt said.

The Heartguide program will grant marks of approval only to those foods that would easily fit into a daily diet that derives no more than 30 percent of its calories from fat. In addition, daily limits for saturated fat would be 10 percent of calories; cholesterol, 300 milligrams; and sodium, 3,000 milligrams.

Although the Agriculture Department can forbid the heart association from placing its mark on meat and poultry, the FDA does not have power to take action until the seals actually appear on food products. Also, under FDA rules, manufacturers - not the heart association - would be subject to any penalties for improper labeling.

#90025u1019 01/25/1990 ~United Press International
WASHINGTON (JAN. 25) UPI - A Jewish organization and several independent Roman Catholic groups Thursday criticized New York Auxiliary Bishop Austin Vaughan for attacks he made on Gov. Mario Cuomo, which suggested Cuomo's stance on abortion would send him to hell.

Vaughan, one of the hierarchy's most militant anti-abortionist, attacked Cuomo in a series of interviews he gave New York newspapers earlier this week while serving a nine-day jail sentence for participating in a blockade of a woman's health clinic that performs abortions.

In his remarks, Vaughan compared Cuomo's stand on abortion to a Nazi soldier who ''supported the German government's right to murder six million innocent Jews.'' He also said Cuomo's views on abortion put him in ''serious risk of going to hell.''

Henry Siegman, executive director of the American Jewish Congress, called Vaughan's comments ''so outrageous and so outside the bounds of the legitimate expression as to demand special condemnation.''

''His gratuitous references to the Holocaust, and his odious comparison of the morally wrenching debate over abortion with the Nazi's calculated extermination of Jews do not not advance public understanding of the differernces on abortion,'' Siegman said.

''On the contrary, by equating the governor's position to Nazism, they serve to preclude rational discourse and debase public discussion,'' he said.

In addition to the Jewish group, a group of seven Catholic feminist groups organized by Catholics for a Free Choice, joined in condemning Vaughan's remarks.

''As people of faith deeply concerned with the quality of the participation of the Roman Catholic hierarchy in political debate in our country, we are alarmed at the vicious personal attacks some Catholic bishops have launched against Catholic public officials who take a pro-choice position on the question of public policy and abortion,'' the groups said.

Taking issue with Vaughan's comments that Cuomo was risking hell, the groups said, ''It is not, we believe, either pastorally appropriate or possible for any member of the clergy to comment on the state of the soul of any Catholic.''

''With this proclamation, Vaughan not only attacks Gov. Cuomo, but the

religious sensibility of our Jewish brothers and sisters who have made clear their oppostiion to any comparison of abortion to the Holocaust.''

The groups called Vaughan to retract his remarks and urged other bishops to demand that their colleagues ''act in accord with principles of respectful debate.''

Cuomo has come under attack from members of the hierarchy before for his views on abortion. In a 1984 speech at Notre Dame, Cuomo said he respected the teaching authority of the bishops and accepted the church's teaching on abortion. But Cuomo said that as governor he is ''involved in defining policies that determine other people's rights'' in such areas as abortion and that ''approval or rejection of legal restrictions on abortion should not be the exclusive litmus test of Catholic loyalty.''

In addition to Catholics for a Free Choice, groups signing the statement included, Chicago Catholic Women; the National Coalition of American Nuns; the Quixote Center Women Church Convergence Task Force; Women of Spirit of Colorado; Women's Alliance for Theology, Ethics and Ritual and the Women's Ordination Conference.

#90025u1042 01/25/1990 ~United Press International
DALLAS (JAN. 25) UPI - Japan's largest electronics company will build a huge manufacturing complex in the Fort Worth Area, The Dallas Morning News said Thursday.

The report quoted industry and trade sources as saying Matsushita Electric Industrial Co. has narrowed its choices for the plant location to sites in Tarrant or Denton counties near Fort Worth's new Alliance Airport.

The area is near where Tandy Corp. has a factory that builds personal computers sold under both the Tandy and Panasonic brands. "It's probably in your area," said Mike Kitadeya, a spokesman for a U.S. subsidiary, Matsushita Electric Corp. of America, said Wednesday.

The News' report said a Japanese industrial newspaper also reported that Matsushita, the maker of Panasonic electronic products, will choose one of three sites in the city of Fort Worth for the plant.

Wednesday's edition of Nipon Keizai Sanyo Shimbun carried an interview with Matsushita chairman Shoji Imura detailing plans for a vast factory expansion overseas, and for the Fort Worth-area complex. According to the article, Imura said the company plans to build its own town, including a corporate campus with a group of factories and research and development facilities, housing for its employees, and an athletic center.

The News quoted Texas sources as saying Matsushita is negotiating for a 1,000 acre site, an extremely large area. Real estate sources pegged the investment in the land alone at $50,000 an acre, or $50 million.

"It takes more than an hour by car to see the whole property," Imura said. "Since a vast piece of land is to be developed, I want to open a sports facility to the general public so that we can mix in with the local community."

Another Japanese journal reported in October the investment in land and factories would in the range of $715 million. The News said the expansion figured into Matsushita's plans to manufacture at least half of its products outside Japan. It currently has 13 manufacturing centers in the United States.

Imura said selection of the specific products to be built in north Texas

remains "up in the air," and there was no indication of when the land would be purchased or when construction would begin.

#90025u1043 01/25/1990 ~United Press International

WEST BERLIN (JAN. 25) UPI - East German Prime Minister Hans Modrow has indicated he would temporarily resign from the Communist Party if opposition groups agreed to join his troubled government, prominent politicians said Thursday.

Modrow appeared to confirm the report at a news conference, when he reiterated an earlier statement that his duties were to the people and not to any political party.

Earlier this week Modrow appealed to the opposition to join his communist-dominated government to help bolster it before elections scheduled May 6, but opposition groups requested he first temporarily suspend his membership in the Communist Party.

Opposition movements met Thursday to discuss the reported offer and were expected to formally respond to it - and most likely accept it - Friday.

Martin Kirchner, secretary-general of the East German Christian Democratic Union, said Modrow indicated he would temporarily give up his party membership during talks with the bloc parties, the traditional allies and current coalition partners of the Communist Party.

The four bloc parties, including the Christian Democratic Union, have distanced themselves from the communists since last fall, when the East German leadership started moving away from the Stalinist policies that were its trademark for the past 40 years.

Modrow's nine-week administration has come under increasing pressure amid calls for a faster pace of change and widespread mistrust of the Communist Party. Thousands have taken part in a recent series of strikes and demonstrations to protest party policies.

The communists have also been plagued by the defection of its members, including the popular, reformist mayor of Dresden, Wolfgang Berghofer.

On Thursday, the mayor of the southern town of Sonneberg said there were no communists left in the City Council since he and seven others had quit the party, known as the Socialist Unity Party of Germany (SED).

''Maybe the SED wants the situation in the GDR (East Germany) to get even worse so that it ... (will) get another chance to stabilize its power,'' said Horst Teltschik, a senior adviser to West German Chancellor Helmut

Kohl.

Commenting on the continuing migration of thousands of East Germans to the West, Teltschik said that West Germany could easily accomodate another 2 million East German migrants.

''If 2 million people leave the GDR, it's the end over there,'' he said in an interview with the West German Wirschaftswoche weekly. ''The GDR cannot survive as an industrialized nation if millions of skilled workers, specialists and intelectuals leave.''

Meanwhile, Kohl aide Rudolf Seiters met with Modrow in East Berlin Thursday to prepare for a German summit that is expected to be held in Bonn next month.

Seiters was due to meet with opposition groups later in the day.

#90025u1051 01/25/1990 ~United Press International

HOUSTON (JAN. 25) UPI - More than 270 investors who bought limited partnerships in livestock and agriculture programs sold by Granada Management Corp. have accused the company of securities fraud and racketeering.

In a federal suit filed Wednesday, the investors charged that the Houston-based corporation raised more than $328 million since October 1976 in high-risk ventures that were advertised falsely as secure investments offering tax benefits for individuals. Granada Management was the general partner charged with running the limited partnerships for Granada Corp.

The investors represented by the suit comprise a small portion of the investors who bought partnerships in one of the 11 Granada programs offered between 1976 and 1986. Granada President Douglas McKinna declined to comment, saying he had not been formally served with the suit.

Plaintiffs' attorney Roger B. Greenberg of Houston said he expects other investors to join the suit. Greenberg said he believes investors in the ventures numbered in the thousands.

The suit claims none of the plaintiffs, who as a group invested nearly $4 million, have received any return on their investment. In the suit, the investors ask for triple the amount of money they lost.

On Monday, Granada sold shares of two new public companies that hold the assets of the partnerships. Those companies were Granada BioSciences Inc. and Granada Foods Corp.

Limited partnership investors received a total of three million shares of Granada BioSciences and 1.2 million shares of Granada Foods. Additionally, they were offered the right to buy 1.5 million Granada BioSciences shares and nearly 1.3 shares of Granada Foods at $7 a share. Only about ten percent of those additional shares were subscribed.

A similar suit was bought against Granada last month in federal court in San Francisco by some investors who bought a total of $30,000 in Granada partnerships. Greenberg said he hopes that suit will be combined into the Houston suit.

#90025u1054 01/25/1990 ~United Press International

GDANSK, POLAND (JAN. 25) UPI - Solidarity leader Lech Walesa said Thursday the old Soviet empire bound by ''Stalinist terror'' is collapsing and predicted a new ''partnership'' of several republics linked with Moscow will replace it.

Walesa also vowed in an interview with United Press International to press his call for withdrawl of Soviet troops from Poland, a demand he said is shared by the majority of Polish people. Walesa also said he had no political ambitions but did not rule out a future race for president or prime minister.

Walesa, wearing a brown sweater and seated in an armchair in the union's headquarters, told UPI that the present Soviet empire was glued together by ''Stalinist terror'' and its breakdown began when Soviet leader Mikhail Gorbachev launched a series of unprecedented political reforms.

''That's the end of this kind of empire,'' he said. ''Its only a matter of time.''

To replace it, he said, ''something must be formed that will be based on the principle of partnership. But not everybody will want to remain in the same partnership. A few countries will drop out.''

Walesa said Gorbachev's position as leader is stronger than ever thanks to his persistence in implementing glasnost.

''He is a brave politician but he should be more careful,'' he said, adding that Gorbachev should not have sent troops into Azerbaijan.

The Soviet Baltic republic of Lithuania has been at the forefront in attempting to secede from Soviet Union. Azerbaijan, involved in a nationalistic struggle against the Armenians, also has become anti-Soviet following intervention of Soviet troops.

Walesa praised Gorbachev for his courage in implementing bold reforms even at the risk of civil war such as he faces in Azerbaijan.

Walesa reiteraited his call for the withdrawal of up to 60,000 Sovet troops from Poland even though his position is not fully supported by the Solidarity government led by Prime Minister Tadeusz Mazowiecki.

He criticized government spokeswoman Malgorzata Niezabitowska for dissassociating herself from his demand. He said contrary to her comment that it was his ''personal opinion,'' the whole nation supports the withdrawal.

''I am going to speed up the demands (on the withdrawal) and they will become a social demand,'' he pledged. ''I will do my best so that Soviet troops will have left Poland by the end of the year.''

There is extensive discussion within the Warsaw Pact, in which several governments are moving away from communism, over whether to continue as a military alliance, convert it to a political partnership, or disband altogether, particularly once an agreement is reached with NATO countries on conventional troop reductions in Central Europe.

Walesa stressed Poland will respect its obligations and will remain a member of the Warsaw Pact, but said the stationing of troops in foreign territories has become an obsolete military concept.

''Nowadays in the period of rockets all that is only a (financial) burden and it is absurd,'' he said.

Walesa said he has no political ambitions, but he did not rule out the possibility of running for president or prime minister in the future if developments warrant.

''I dont't rule out such a possiblity if Poland needs it,'' he said.

#90025u1066 01/25/1990 ~United Press International

LONDON (JAN. 25) UPI - A judge Thursday ordered a ferry company and seven of its employees to stand trial on manslaughter charges in the 1987 capsizing of a ferry near the Belgian town of Zeebrugge that killed 193 people.

Magistrate David Hopkin, after hearing evidence for more than one month, including a report by the director of public prosecutions, said the case against P and O Ferries and the employees must go before a jury at the Old Baily criminal court.

''They have been committed to the central criminal court for trial,'' a court sergeant explained. ''No date has been set, but it could be several months before the case gets listed.''

Restrictions prohibit reporting on Hopkin's 10-minute explanation in the Bow Street magistrates court but several survivors and relatives of victims emerged from the crowded room weeping and visibly moved by memories of the tragedy.

Thousands of tons of water flowed into the Herald of Free Enterprise through open stern loading doors shortly after it departed from Zeebrugge on March 6, 1987. The vessel capsized with 540 passengers aboard and 193 people died, mostly by drowning.

The charges are specifically related to the deaths of two passengers and two crew members. P and O European Ferries faces a charge of corporate manslaughter, the first time such a case has been filed in Britain. If convicted, there are no limits to a fine the judge can order the shipping company to pay.

Three P and O executives - the company director, the deputy chief superintendent and technical director - and the company's senior master face charges of manslaughter, which can carry a penalty of life

imprisonment.

The other three accused - Capt. David Lewry, Chief Officer Leslie Sabel and Assistant Bosun Marc Stanley - were aboard the ill-fated vessel for Britain's worst maritime disaster since the Titanic sunk in 1912.

All of the eight parties have pleaded innocent and granted conditional bail.

An 11-member coroner's jury ruled that 187 victims died ''unlawfully'' because the jury claimed carelessness and negligence by the crew caused the vessel to capsize.

MEMPHIS, TN (JAN. 25) UPI - Holiday Corp. said Thursday it anticipates its deal to sell its Holiday Inn chain to Bass PLC of London for $2.2 billion will be completed on Feb. 7.

Holiday cleared one of two regulatory hurdles Wednesday when New Jersey gaming officials unanimously approved the restructuring plan that will allow Holiday Corp. to sell its Holiday Inn operations and spin off a new company to focus on its gaming ventures, including Harrah's Marina Hotel Casino.

The new company, Promus Co. Inc., will operate Harrah's and Holiday's

other casinos in Nevada, as well as the Hampton Inn, Embassy Suites, and Homewood Suites hotel chains.

The Casino Control Commission ruled that Holiday had met its requirement of financial stability. Holiday shareholders, who will receive Promus and Bass stock and a $30-a-share bonus, approved the transaction last week. The Nevada Gaming Commission was scheduled to rule on the deal Thursday.

Holiday said that immediately before the merger, it will complete the spin-off by declaring a share-for-share distribution of Promus common stock to the stockholders of record. After the merger is complete, Promus will pay the $30 cash dividend set out in the merger agreement.

NEW YORK (JAN. 25) UPI - The New York Mercantile Exchange Thursday said it planned next month to impose previously announced limits on the use of foreign crude oil as delivery replacements for U.S. crude contracts.

Spokesman Nachomah Jacobovits said the Merc, the world's largest energy market, plans to implement the limits in about a month with the April delivery contract. The exchange began trading the March contract Tuesday.

The Merc announced the limits last August subject to approval by the governmemnt's Commodity Futures Trading Commission. "We are expecting the commission to approve shortly," Jacobovits said.

In August, the Merc announced it was dropping four foreign crudes from its list of those that can be used to fulfill delivery requirements on futures contracts when the benchmark U.S. West Texas Intermediate crude is in short supply.

The four were dropped because their availability was spotty. They are: the Nigerian Brass Blend, the Norweigan Ekofish, and Algeria's Zaraitine and Saharan Blend crudes.

MOSCOW (JAN. 25) UPI - Soviet forces broke a blockade by merchant ships on Baku Harbor and reclaimed control of sea lanes in a further restoration of order in the Azerbaijani capital while on the political front, local Communist officials chose a new leader.

Even as the Communist Party's Central Committee in Azerbaijan deliberated Ayaz Mutalibov's nomination, heavily armed Azerbaijani vigilantes battled Soviet troops at a key barracks in the Caspian Sea capital of Baku, killing two soldiers, the official news agency Tass said.

The deaths raised to 95 the number of people killed in the so-called Battle for Baku. The fighting, now in its sixth day, was triggered when Soviet troops stormed the city. Of the dead, 75 have been civilians and at least 715 people have been wounded, including 639 civilians.

Soviet forces reportedly scored a victory late Wednesday by breaking the blockade by merchant ships.

In Moscow, official spokesman Gennady Gerasimov Thursday denied earlier reports of a gunbattle and said no shots were fired. He said troops boarded two boats that were blocking the harbor, effectively ending the blockade.

The blockade had been imposed to hamper the evacuation of Armenians and because of rumors the military was using the vessels to hide bodies of Azerbaijanis killed in the battle for Baku - a charge the official media have ridiculed.

Azerbaijani legislators have visited the ships to confirm there were no bodies aboard, Tass and Soviet television reported Thursday.

On the political front, the Communist Party of Azerbaijan reportedly chose the republic's prime minister as its new party leader to replace a man accused of losing control of the convulsed region.

The Central Committee of the Communist Party of Azerbaijan selected Mutalibov, the republic's prime minister, as its new leader late Wednesday Tass reported. Defense Minister Dmitri Yazov reportedly was in attendance for the move giving the premier greatly widened powers.

Mutalibov, now Azerbaijani first secretary as well as premier, replaced the sacked and disgraced Abdul Rakhman Vazirov, who has been thrown out of the Azerbajani Communist Party as well as losing the top job.

Vazirov was sacked Saturday after Soviet troops fought their way into Baku Saturday to end a mounting mutiny against Moscow and a virtual civil war between the republics of Armenia and Azerbaijan over the enclave of Nagorno-Karabakh.

The Soviet media openly said Vazirov had let the situation get out of control. His duties were temporarily given to both Mutalibov, the government premier, and the second secretary of the party, Viktor Polyanichko on Saturday, leaving the office vacant until Wednesday's election under the shadow of Soviet tanks.

A general strike persisted into its third day Thursday in Baku, a major oil-processing center and the Soviet Union's fifth largest city with 1.8 million people.

''Industrial plants stand idle in Baku and many rural areas, while only a limited number of transport and trade outlets work,'' Tass said.

Azerbaijan's powerful anti-communist Popular Front has vowed to maintain the general strike and a civil disobedience campaign until the occupying force of 24,000 regular army and interior minsitry troops and sailors leave.

But there were signs of a return to order under the firm hand of the military acting by virtue of a state of emergency clamped on the capital.

The military banned and disbanded the national defense commitee of the Popular Front on Wednesday, Tass said, ending the existence of a command center of resistance and coordinator of attacks against Armenians.

In Baku, Soviet Interior Minister Vadim Bakatin said Thursday the curfew in the capital may soon be lifted ''if the Azerbaijani militia is efficient and helps stablilize the situation and disarms dangerous groups,'' Tass said.

Reliance on the militia to restore control and frequent meetings involving Popular Front leaders indicate to what extent the party had lost control in the Transcaucasian republic of 6.8 million people.

An Interior Ministry spokesman, asked during a telephone interview this week if he had really meant to say the Popular Front was in effect running things, said, ''What do you think? Of course they are.''

Wednesday, the Red Army, ignoring an Azerbaijani secession ultimatum, took control of the volatile border with Iran Wednesday. In Moscow, spokesman Gennady Gerasimov vowed Gorbachev will not preside over the dissolution of the Soviet Union.

Azerbaijan's parliament had threatened to consider secession if the Red Army did not pull out by 6 a.m. Wednesday.

#90025u1236 01/25/1990 ~United Press International

BOSTON (JAN. 25) UPI - Researchers concluded Thursday, contrary to predictions, there will be no glut of doctors in the United States in the foreseeable future.

Dr. William Schwartz and researcher Daniel Mendelson of the Tufts University School of Medicine analyzed doctor work patterns and income between 1982 and 1987 and concluded no doctor surplus has materialized or is in the offing.

''Indeed, the data suggest that the demand for physicians' services, as measured by hours of patient care and real income, has been rising faster than physician supply,'' the pair wrote in the Journal of the American Medical Association.

''Moreover, a variety of forces is likely to maintain the growth in demand for physicians' services, thus preventing the development of an appreciable surplus,'' they said.

Previous studies concluded there would be a surplus of 150,000 doctors or more in the United States by the year 2000, triggering calls for medical schools to curtail enrollment. But other studies have produced conflicting projections.

''Given these disparate conclusions, we have evaluated the experience of the last few years to see whether there is empirical evidence of an emerging surplus of physicians,'' the pair wrote.

The researchers analyzed American Medical Association data for six years and found doctors spent 21 percent more time caring for patients and their net income rose by 30 percent while the supply of doctors rose by only 16 percent.

If there was a doctor surplus emerging, the opposite would have been true, the researchers said. There would have been fewer patients to go around, cutting into doctor's time with patients and pay, they said. Recently released data for 1988 show a similar pattern, they added.

But the interpretation was criticized by Dr. Alvin Tarlov of The Henry J. Kaiser Family Foundation in Menlo Park, Calif., who led previous research that projected a glut.

''... increasing hours worked, increasing numbers of patients seen, and increasing income per physician can be viewed as indicators of increasing use rather than as an authentic rise in demand,'' Tarlov wrote in a companion editorial.

But the Tufts researchers also cited a survey of 788 hospitals two years ago that found 60 percent were actively recruiting doctors or planning to and a second study last year that showed half of medical groups with three or more doctors were looking or planning to look for doctors.

''A rapid rate of technological change, the growth and aging of the population, an increase in the number of cases of acquired immunodeficiency syndrome, and the likely extension of health insurance coverage to the uninsured are likely to maintain a rate of increase in demand,'' they said.

SIDON, LEBANON (JAN. 25) UPI - Israeli jets blasted a base of the Palestinian Abu Nidal terrorist group Thursday in south Lebanon in apparent retaliation for the killing of an Israeli officer, security sources said.

Sources said two Israeli warplanes, covered by two others, raided a base of the Fatah-Revolutionary Council of Abu Nidal in the Majdelyoun area east of the port city of Sidon, 24 miles south of Beirut.

They said five people were wounded during the six-minute raid. Witnesses said clouds of black smoke billowed into the sky over the camp after the attack.

A spokesman for the group who confirmed the raid said there were no casualties.

''Israel air force planes attacked this afternoon a terrorist target 4 miles east of Sidon,'' an Israeli army spokesman said in Jerusalem. ''All of our planes returned safely. The target attacked was used as a base for the Abu Nidal group.''

On Monday, the Abu Nidal group claimed responsibility for killing Israeli Col. Yitzhak Rahimov in a confrontation near the village of Yaroun, one mile north of the Israeli border.

Rahimov was shot when a joint force of Israeli troops and their surrogate militia, the South Lebanon Army, attempted to storm a house in Yaroun inside the Israeli self-proclaimed ''security zone.''

It was the second Israeli raid in less than a week against Palestinian positions in south Lebanon. Last Friday, Israeli jets bombed a radio station run by the Palestine Liberation Organization, killing three people and wounding eight.

AUSTIN, TX (JAN. 25) UPI - Motorola, Inc. said Thursday it has begun making the company's most advanced microprocessor - the 68040 - which is expected to lead to the development of a new generation of faster, smarter personal computers. Motorola said Apple Computer and 35 other manufacturers have endorsed the chip as the base of a new line of advanced computers.

The new microprocessor, designed and produced at the company's Austin plant, fits 1.2 million transisters onto a fingernail-size piece of silicon and is available in limited quantities for $795 each. Motorola said it expects to begin volume production by the end of the second

quarter.

The company said its new microprocessor runs at 20 million instructions per second, or about one-third faster than Intel's new 80486 chip, which went into limited production last fall. Industry analysts say the speed of the chip will win over computer makers and users.

"It's a significant upgrade of existing technology," said Jack Quinn, senior analyst for In-Stat, a semiconductor market research firm in Scottsdale, Ariz. "It should allow Apple to come up with a Macintosh that is a lot faster."

Personal computer makers are expected to be the first to use the new chip, but makers of graphics workstations and multi-user computers also are expected to benefit. The microprocessor also is targeted for use later as an "imbedded controller" for such devices as laser printers.

Motorola expects to sell about 100,000 of the chips in the next year, said Jim Reinhart, company product marketing manager.

Motorola, based in Schaumburg, Ill., is the largest supplier of semiconductors in North America. It employs about 5,000 people at its Austin facilities.

(JAN. 25) UPI - The head of the Resolution Trust Corporation- the government agency created to settle the nation's thrift crisis- wants Congress to O-K more money. The R-T-C's William Seidman says the agency needs at least an additional 50-BILLION dollars to re-pay depositors of failed thrifts.

Closing arguments are winding up in the Philadelphia trial of General Electric and two of its executives. A federal prosecutor told a jury that G-E looked the other way while two purchasing agents cheated the Defense Department of more than 15-Million dollars.

A jury in Pomona, California, has found a doctor innocent of strangling his 11-year-old son and dismembering the body. Dr. Khalid Parwez was accused of slaying the boy because of a custody fight with his former wife. The boy wanted to live with his mother.

Two Vietnam veterans are leading a group of veterans back to the war zone for a month-long tour... despite warnings from the federal government of possible fines and prison terms. John Myers and Don Mills of Akron, Ohio, have led seven previous trips.

The Postal Service says self-service credit card-operated facsimile terminals will soon be available to postal customers in 263 locations across the nation. The Postal Service signed a contract for the faxes with Hotelecopy Incorporated of Miami.

Officials in Key West, Florida, have sent 210 colleges and universities a message discouraging students from going to Key West for spring break. Last year, 20-thousand students looked for fun in the sun on the island. Hotel officials fear the crowd could double this spring... and overload facilities.

SACRAMENTO, CA (JAN. 25) UPI - A man upset over the breakup of his marriage burst into his estranged wife's office and killed her with three shotgun blasts to the chest as horrified co-workers looked on, sheriff's officers said.

Richard Thomas, 35, was in police custody on a murder charge Thursday, one day after he allegedly went to his wife's office at River City Rentals and shot her point blank, officials said.

Katherine Thomas, 25, who worked as a secretary, began screaming as soon as her husband burst into her office, witnesses said.

''As soon as Kathy saw him, she just started screaming,'' said Sally Myers a witness in the building. ''She couldn't talk. She just screamed. She never had a chance.''

The couple separated a few months ago, and Katherine Thomas obtained a court order that forbade her husband from seeing her, friends said.

They said she recently called police about repeated threats from her husband, but officers said they could do little until he made a physical move against her.

Sheriff's Lt. Ron Cole said Thomas was booked in the Sacramento County Jail and is being held without bail. He was ''highly agitated'' when deputies arrived to arrest him Wednesday, Cole said.

Witnesses said that after the shooting, Thomas asked them if anyone ''had the nerve'' to shoot him, then called 911 to report his wife's death and ordered everyone out of the building.

He paced the office until deputies arrived and, at one point, he collapsed as they led him to a patrol car.

Thomas, a concrete finisher, could not cope with the breakup of the couple's eight-year marriage and had made a suicide attempt last month, friends said.

''At first, he imprisoned himself in his home for a long time after they separated,'' a friend who asked not to be identified told The Sacramento Union in a report Thursday. ''But I just saw him a couple of days ago and he looked so good. He was really trying to work things out.''

Myers said Thomas burst into the office with a 12-gauge shotgun and began yelling, ''I warned you, didn't I?''

She said Thomas shot his wife once, knocking her from her desk to the floor, then walked over and shot her two more times.

Then he offered the gun to seven shocked co-workers and asked, ''Does anyone have the nerve to shoot me?,'' she said.

Thomas called the 911 emergency number, then ordered everyone outside. He laid down his gun and walked out with his hands up when deputies arrived, Myers said.

WARSAW, POLAND (JAN. 25) UPI - Czechoslovak President Vaclav Havel called Thursday for the establishment of a ''central European federation'' of his country, Hungary and Poland to reintegrate with Western Europe.

In an address to the Polish parliament, Havel invited the Polish and Hungarian governments ''and observers of other countries'' to attend a one-day summit in Bratislava that has not yet been scheduled.

''Before us is a historic opportunity to fill a large political vacuum created in central Europe after the fall of the Hapsburgs (during World War I),'' he said.

Havel said the conference would include discussions on mutual economic problems but also may take up other issues, including questions of disarmament.

His Polish counterpart, communist President Wojciech Jaruzelski, sat

stone-faced during the joint session of the Sejm and Senate as Havel also called for the withdrawal of Soviet forces from central Europe.

''We want to belong to Europe as a friendly association of independent, democratic countries,'' Havel said. ''We hope that the Soviet Union, in the interest of good relations with her former satellites, will gradually withdraw her armies.''

Czechoslovakia has already called for withdrawal of the 70,000 Soviet troops in its country by the end of the year, with half of them to be out by elections scheduled for June.

Havel, an oft-imprisoned playwright and essayist who became president last Dec. 29, was snubbed during his one-day trip to Poland by Solidarity leader Lech Walesa, who refused to come to Warsaw to see him.

Walesa had criticized Havel for making his first foreign visit to the two Germanys, rather than to neighboring Poland.

Later though, at a news conference in Gdansk, Poland, Walesa conveyed his apologies to Havel, saying he was not able to travel to Warsaw because of previous commitments.

The Czechoslovak president indirectly referred to the incident during his speech, saying his visit to East and West Germany on the day after his inauguration was ''an attempt to spread confidence'' that talk of German unification will not upset the political balance in central Europe.

In his speech, Jaruzelski referred to Poland's participation in the 1968 Warsaw Pact invasion of Czechoslovakia to crush the reform-minded Prague Spring as a ''moral guilt.''

''Although the Prague Spring was ahead of its time, its democratic call for freedom was deeply stuck in the minds of many people - not only of Czechs and Slovaks,'' Jaruzelski said.

On his arrival, Havel reviewed the troops alongside Jaruzelski, an activity few could have predicted a year ago.

''I couldn't believe the sight of Havel walking side by side with Jaruzelski,'' one Polish observer said.

But protocol was not followed through the entire ceremony. When Havel approached parliamentary deputy Adam Michnik and Zbigniew Janas, leader of the Polish-Czechoslovak Solidarity movement, they embraced as the old friends they are.

Havel held talks with both Jaruzelski and Solidarity Prime Minister

Tadeusz Mazowiecki, who visited Czechoslovakia Monday.

Later he visited Powszechny Theater, which staged several of his plays while they were still banned in Czechoslovakia, and the grave of the Rev. Jerzy Popieluszko, the pro-Solidarity priest murdered by secret police in 1984.

Havel travels to Budapest Friday for a one-day visit.

During an interview in Gdansk, Walesa was critical of Havel's offer to President Bush and Soviet President Mikhail Gorbachev to hold their next summit in Prague, an offer the White House already has politely declined.

''These are symbols and slogans,'' Walesa said. ''He's playing with photographs ... he doesn't have reforms.''

In political and particularly economic reforms, Poland and Hungary are ahead of Czechoslovakia, whose revolution to replace the communist monopoly only began Nov. 17.

#90025u1290 01/25/1990 ~United Press International

CHARLOTTE, NC (JAN. 25) UPI - Tammy Faye Bakker declared war on the devil Thursday, saying the ''demon powers of darkness'' have destroyed her husband's ministry and are relentlessly pursuing his family.

In letters to her husband's followers in Charlotte, Tammy Faye gave a detailed account of her Christmas visit to evangelist Jim Bakker and blamed the devil for his imprisonment.

''The devil won by dividing,'' she declared. ''The devil divided our people, scattered them and as they were running away from each other, he won.

''If we would have locked arms and marched forward with a firm purpose of protecting a wounded soldier, the devil could never have accomplished what he did,'' wrote Tammy Faye. ''Why didn't we don our battle gear and go to war against him? Let us declare war on the devil.''

Tammy Faye detailed onslaught after fiendish onslaught by the devil, and she gave a sad account of Christmas at the Federal Medical Center prison in Rochester, Minn., where her husband is serving a 45-year sentence following his conviction last fall on 24 counts of defrauding his flock at PTL.

''Jim would not be behind prison bars today if the Christians would have stood firm and stood together,'' she said, adding that when she saw Bakker

over Christmas, ''Jim still had the look of disbelief on his face, as if he still wasn't sure this was not a dream.

''He just kept saying, 'I can't believe you are here, I don't want this to end.'''

Tammy Faye, her daughter Tammy Sue, 19, and son Jamie Charles, 14, spent four days with Bakker over the holidays and were allowed to eat Christmas dinner with him before leaving.

''My husband put his arms around me and for a few seconds I felt secure again next to the man I love so much,'' she said. ''We had to be careful not to hug too long - the guards were watching.

''I turned around and Jamie was sobbing as if his heart was going to break '' she said. ''He put his arms around his daddy and cried and cried, loud heart-wrenching sobs. I wanted to die to end this terrible suffering on Christmas.''

Somehow the indomitable Tammy Faye managed to pull through, however, and by the time she got to the airport for the trip home to Orlando, Fla., where she now lives, she was fighting mad over a cover story in The National Enquirer that claimed daughter Tammy Sue planned to pose nude for Playboy magazine.

''There is not one word of truth in it,'' Tammy Faye declared. ''Just like all the other articles, including the one about me divorcing Jim, they are nothing but lies from Satan.

''When Christians read magazines of this nature,'' she said, ''they enter into communion with the demon powers of darkness. Tammy Sue has never even talked to Playboy magazine about posing.''

Tammy Faye urged everyone to stop buying the ''filth that these purveyors of garbage continue to bring forth.''

Instead, she asked for Bakker followers to send the most generous gift possible so she can keep her husband's ministry together in his absence.

WASHINGTON (JAN. 25) UPI - A new breed of designer drugs appears to have the power to attack the deadly AIDS virus on a different front, researchers reported Thursday.

In a study published in the journal Science, Upjohn Co. researchers said a synthetic compound designed to block protease, a key enzyme of the AIDS virus, appears to thwart reproduction of the virus in the testtube.

Most past efforts to attack the human immunodeficiency virus, or HIV, which causes AIDS, have centered on drugs to block reverse transcriptase, another enzyme involved in virus replication, or to mimic a cell receptor, called CD-4.

The only government-approved AIDS drug, AZT, and the promising experimental drug, DDI, both inhibit reverse transcriptase. AZT has been shown to prolong lives of people with AIDS, but it is not a cure and often produces toxic side effects.

''We are working very hard in our industry to identify other targets for (AIDS) therapy other than reverse transcriptase,'' said W. Gary Tarpley, head of the Upjohn study.

Compounds similar to protease blockers have already been tested in animals for other disorders, like high blood pressure, and have not shown any serious side effects, Tarpley said. ''We do not expect any significant organ toxicities in drugs of this class,'' he said.

Tarpley speculated protease and reverse transcriptase blockers could be used together to deliver a one-two punch to the AIDS virus since they target different stages of the viral life cycle.

''One would think that both types of drugs together would be more powerful than one alone,'' said the senior research scientist for the Kalamazoo, Mich., firm.

The Upjohn compound, called U-81749, reduced the level of infectious virus particles in human immune cells infected with HIV more than 70 percent, compared with untreated cells, researchers said.

But a major drawback with the compound was that its virus-fighting action was not long-lasting, and HIV replication went back to normal as soon as

the compound was removed from the test tube, Tarpley said.

Earlier this month, researchers from Duke University in Durham, N.C., and Smith Kline & French Laboratories of King of Prussia, Pa., reported they also had produced a compound that blocks protease's action in the test tube. That study was published in the journal Nature.

Tarpley said his team is now trying to make protease blockers more potent and long-lasting, adding it has already produced molecules that appear to work better than U-81749. Tests of such compounds in animals are expected to begin ''very soon,'' he said.

SAN DIEGO (JAN. 25) UPI - Judy Bellomo, a member of the U.S. women's volleyball team, died during cancer surgery, it was reported Thursday. She was 23.

The USA Volleyball Team said in a release that Bellomo, a native of Glendale, Calif., and an All-America player at the University of California, Santa Barbara, apparently suffered a fatal reaction Wednesday to anesthesia administered during surgery on her cancerous thyroid gland.

Bellomo joined the San Diego-based U.S. team last June and was a reserve player.

Bellomo and her family were apparently unaware that she suffered from a genetic condition that caused the adverse reaction to anesthesia administered at Alvarado Medical Center in San Diego, the team said.

The surgery was scheduled after three cysts removed from Bellomo's neck were found to be malignant. She had continued practicing until last Friday.

Team doctor E. Lee Rice said Bellomo lapsed into malignant hyperthermia after the operation began around noon Tuesday.

Funeral arrangements were pending.

#90025u1333 01/25/1990 ~United Press International

DETROIT (JAN. 25) UPI - Officials at Detroit Receiving Hospital said Thursday it has not been determined that a hospital-acquired bacterial infection caused the deaths of seven patients since mid-November, even though all seven were infected by or had contact with the same bacterium.

Speaking at a hospital news conference, the officials stressed that all seven patients were extremely ill and could have died of other causes. They also said the type of bacterium involved does not pose a serious risk for anyone who is healthy.

''Suggestions that there is a direct correlation between the germ and the deaths are grossly distorted,'' said Dr. Brooks Bock, president of the medical staff at Detroit Receiving Hospital and the University Health Center.

Hospital officials also said there is no evidence at this time that the infection resulted from any violations in standard procedures, adding that the problem is now under control.

The hospital said 20 other patients who are either infected with the bacterium or show evidence of exposure have been separated from other patients at the hospital.

Earlier, hospital spokesman Dennis Archambault said the seven patients who have died since November contracted a ''nosocomial infection'' - in layman's terms, a hospital-acquired infection. All seven were critical-care patients recovering from surgeries, he said.

Unit 4P, a surgical intensive care ward, was closed at 9 p.m. Wednesday so hospital personnel could thoroughly clean it, said Archambault, director of public relations and marketing for the hospital and University Health Center.

''We started noticing a problem with the infection in mid-November,'' Archambault told the Detroit News. ''There are always bacterial infections in a hospital and many are routinely treated. This happens to be a particularly virulent form of bacterium infection.''

Detroit Receiving is a trauma hospital that does no elective surgery and treats critically injured patients taken to its emergency room.

Archambault said the 20 patients who were evacuated were placed in isolation. All are listed in critical to serious condition following emergency surgeries.

Archambault said the patients are receiving a variety of treatments, including antibiotics to treat the bacterium, identified as acinetobacter calcoaceticus varanitratus, or ACV.

No outside experts have been called in because the bacterium has been identified and treatment has started, he said.

''Our concern in evacuating the patients is that we have people with open wounds or who are physically weak from surgeries who are more susceptible to this kind of infection,'' he said.

''After identifying the problem and removing all patients from the unit, the next step in the treatment protocol is to clean the unit with special cleaning solvents to sanitize and sterilize the area.''

Hospital officials are interviewing patients to identify all other people with whom they may have come in contact so they can be tested for the bacterium.

Dr. Norman Hayner, chief of the division of disease control for the Michigan Department of Public Health, said bacteria such as ACV are transmitted in several ways, including personal contact and contamination of food, water, hospital materials, drugs and intravenous fluids.

WASHINGTON (JAN. 25) UPI - Sales of existing single-family homes decreased 1.1 percent in December to a seasonally adjusted annual rate of 3.55 million units and fell 4.6 percent for 1989 as a whole to 3.43 million units, the National Association of Realtors said Thursday.

Last year's total was down from the 1988 total of 3.59 million units, which ranked as the strongest year of the decade and was one of the top four sales years on record, the NAR said.

According to industry analysts, sales of existing homes, as well as of new ones, declines in 1989 under the pressure of high mortgage interest rates.

''Although sales declined in 1989, the resale volume in 1988 was the highest since 1979. A healthy level of existing-home sales was sustained last year,'' said NAR President Norman D. Flynn, a realtor from Madison, Wis.

The resale decline in December was due, in part, to a drop in the Northeast and South, where severe weather conditions prevailed. The largest regional decline occurred in the West.

In the Northeast, December resales of 570,000 units fell 3.4 percent from November's 590,000. The December figure was 18.6 percent lower than the December 1988 rate. The 1989 resale rate for the Northeast was 585,000 units, 13.1 percent below the 1988 level.

The Northeast median price of $143,100 last month was 0.1 percent higher than the December 1988 price of $143,000. The 1989 median price for the Northeast was 145,200, 1.5 percent higher the 1988 median.

Median is the middle reading in a statistical series.

The unchanged home prices in the Northeast reflect a continuing slump in many of the large metropolitan areas, said NAR Chief Economist John A. Tuccillo.

The decline in the West's existing-home sales reflected a market correction from an eight-month high in November, especially in California, Tuccillo noted. In the West, the resale rate of 600,000 units fell 6.3 percent from November's rate of 640,000 and 14.4 percent from December 1988. The 1989 home resale total for the West was 605,000 units, 5.8 percent below the 1988 total.

The December median price recorded for the West was $135,300, 5.1 percent higher than the December 1988 price of $128,700. The 1989 median price for the West was $139,900, up 12 percent from the 1988 median price.

The existing home sales rate in the South slipped 3.5 percent in December to 1.38 million units, from November's rate of 1.43 million units. Last month's rate was down 8 percent from the December 1988 rate of 1.5 million units.

For 1989, single-family resales in the South totaled 1.31 million units, 2.9 percent below the 1988 total. The median price in the South was $83,200 in December, 6.4 percent higher than the December 1988 price of $78,200. The 1989 median price was $84,500, 2.8 percent above the 1988 price.

In the Midwest, the only region posting an increase, the December resale rate of 990,000 units was 3.1 percent above the November rate of 960,000 units, but 2 percent below the December 1988 rate of 1.01 million. For the year, the Midwest total was 926,000 units, 0.3 percent below the 1988 total.

The median price for existing homes in the Midwest was $69,900 last month, rising $2,100 from January, and 3.9 percent from the February 1988 price of $67,300. The 1989 median price was 71,200, 4.1 percent above the 1988 price.

BOSTON (JAN. 25) UPI - An apparent amnesiac who remembered his name and asked the FBI to find out where he was from was behind bars Thursday because agents learned he was wanted in Florida for making a bomb threat.

Michael Placko, 28, attracted local attention for his tale of bewilderment. Placko, who became known as ''Tim Curry,'' had said he could not remember anything before he woke up homeless in a Boston bus station in January 1988.

Placko had lived since October in a homeless shelter in Woonsocket, R.I., and his court-appointed attorney said he suddenly remembered his name on Tuesday.

''His name came to him Tuesday night while he was driving around Woonsocket with a friend,'' lawyer Joan Needleman told The Boston Globe. ''He took the train and bus to Boston in the morning and went to the FBI. He asked them to find out where he was from.''

The FBI determined that Placko was wanted in Seminole County, Fla., on a charge of making a false bomb threat.

A warrants officer in Sanford, Fla., said a warrant was filed Feb. 23, 1988, after Placko failed to appear at a hearing on a charge of making a false bomb report, but specifics of the incident were not known.

A default warrant was also issued by East Boston District Court in 1988 stemming from his failure to return a rental car.

Placko waived extradition to Florida during arraignment Wednesday in East Boston and was jailed in lieu of $100,000 bail.

Needleman said her client remembered his Social Security number and the name of the woman who raised him and ''is very excited about finding his family.''

''I would have a greater likelihood of getting in contact with my family in Florida,'' Placo said during his arraignment.

Sandra Caggiano, an assistant court clerk, said Placko ''seemed fine and coherent'' during his court appearance.

Placko is due back in court Monday when Florida authorities are to take him back with them.

Caggiano said the rental-car charge would also be addressed Monday.

Ralph Guisti, of Bellingham, Mass., who was friendly with ''Curry,'' said, ''I don't think he knew he was wanted.

''If that was so, why would he have put himself in the papers and on television,'' Guisti told the Globe. ''We had already gone to the FBI for a fingerprint check. Nothing turned up. Everybody said he wasn't on any list.''

Mental health officials in Rhode Island examined Placko and speculated his amnesia could have been caused by mental trauma.

(JAN. 25) UPI - President Bush will unveil his anti-drug strategy this afternoon during a White House speech. Details of Bush's 10-BILLION-dollar plan come one day after Delaware Senator Joseph Biden revealed his 14-point-six BILLION-dollar proposal, which takes a gentler approach. Biden's proposal would cut the flow of drugs through economic aid, rather than military action.

A spokesman for China's Ministry of Foreign Affairs takes the U-S House of Representatives to task for over-riding President Bush's veto of a bill allowing Chinese students to remain in the United States. If the bill becomes law, an estimated 36-thousand Chinese students in the United States may legally seek permanent resident status without first returning to China.

The strife-torn Soviet republic of Azerbaijan has a new Communist Party leader. The Soviet news agency Tass says the new boss was chosen late late night. Tass also reports continued heavy fighting between heavily armed Azerbaijani nationalists and Soviet troops at a key barracks in the republic's capital of Baku. Two soldiers were killed.

The space shuttle Atlantis is scheduled to make snail-speed today on its trip to a Cape Canaveral launch pad for preparations before its scheduled February 22nd mission. Its exact launch time and flight duration are classified because of its secret military mission to put a Pentagon satellite into orbit. Atlantis will make the year's second shuttle flight and the 34th in the history of the program.

(JAN. 25) UPI - VIDEO REVIEWS:

MOVIES

''Uncle Buck'' - The very idea of John Candy as a babysitter conjures up a whole passel of funny situations, some of which are put to good use in this comedy about parenthood and the rigors of growing up. Candy's Buck is a carefree, boyish, 40-something bachelor, a pumped up Peter Pan who delights in skirting responsibility, a lovable slob reveling in his scruffiness. When an emergency puts him in charge of his brother's three kids, and puts on hold having to go to work for girl friend Amy Madigan, Buck gleefully plunges into his new duties, a Neanderthal nanny who goes from breaking dishes to mending a slightly fractured family. The two younger ones, Miles and Maizy, are quickly charmed by their unorthodox uncle, but Tia (Jean Kelly), a rebellious 15-year-old master of the cold stare and snide remark, is a project that takes some extra work. But, hey, Buck's up to it. And, so is John Candy in an entertaining showcase, written and directed by John Hughes. 1989. 100 minutes. MCA Home Video. Rated PG. $89.95.

''UHF'' - ''Wierd Al'' Yankovic, known for his musical takeoffs on Michael Jackson and Madonna, channels his whacked-out humor to television in this anything-but-subtle, chuckle-provoking farce. Al plays George Newman, a daydreaming loser who is Indiana Jones one minute, Rambo the next, hired, as a joke, to save a small TV station already given up for dead. With the help of a somewhat demented janitor (Michael Richards), who becomes a big hit with the kids, and some offbeat, original programming (''Wheel Of Fish'', ''Conan The Librarian''), George sends Channel 62 soaring to the top of its market, incurring the wrath of bitter rival Kevin McCarthy. The plot mostly serves as a staging area for ''Wierd Al's'' scattergun parodies that often hit their mark. No work of art, but lightheaded fun. 1989. 97 minutes. Orion Home Video. Rated PG-13. $89.98.

''Kickboxer'' - Jean-Claude Van Damme stars as a young man bent on revenge in this violent action flick aimed at fans of the current martial arts rage. Like others of its kind, it is familiar, predictable and improbable, but also well staged with a degree of fascination. When his brother is badly injured during a bout with the brutal Thai champ Tong Po, Kurt Sloane (Van Damme) vows to get even. To get ready, Kurt must go through long, grueling training sessions with master teacher Xian Chow (Dennis Chan), but once the match is set, his disabled brother is kidnapped and he is told he must lose. When Kurt faces Tong Po, their hands bound and covered with glass, he meekly submits to a ferocious beating until - well, not hard to figure what happens next. 1989. 97 minutes. HBO Video. Rated R. $89.99.

''Eat A Bowl Of Tea'' - Generations and traditions clash in Wayne Wang's gentle comedy-drama about a New York Chinese American family in the late '40s. Fresh out of the Army and with a bride imported from China, Ben (Russell Wong) is eager to sample the opportunities of his adopted

homeland but first must break free from the structured Old World life designed for him by his stubborn father (Victor Wong). 1989. 104 minutes. RCA/Columbia Pictures Home Video. Rated PG-13. $89.95.

MUSIC

''Rolling Stone Presents Twenty Years Of Rock & Roll'' (MGM-UA, 97 minutes $19.95) traces the sights and sounds of rock music from the '60s to the '80s with clips of most of the era's biggest names - The Beatles, The Who, Bruce Springsteen, Jimi Hendrix, Madonna, The Rolling Stones, etc. The ''rockumentary'' also offers interviews with Mick Jagger, Sting, George Harrison, Grace Slick and others with narration by Dennis Hopper. MGM-UA also is re-issuing some musical oldies like ''The Compleat Beatles'' and ''Pink Floyd: The Wall'' plus the video debut of ''The Fastest Guitar Alive'', a so-so 1968 film starring Roy Orbison as a Confederate spy with a gun in his guitar.

VIDBITS

Big hits on tap in February - leading off on the 1st with ''Indiana Jones And The Last Crusade'' ... followed by ''Lethal Weapon 2'' on Feb. 8 ... also on the 8th, ''Parenthood'' and coming on the 22nd, ''The Package'' ... ''When Harry Met Sally ...'' is the nation's favorite movie rental for the third straight week, according to Billboard Magazine, with ''Road House'' and ''Star Trek V: The Final Frontier'' moving up to second and third. ''Batman'' still leads among video sales ... After five years of costly legal battles, the controversial dual-deck Go-Video VCR is expected on the market this spring. It can copy VHS to VHS on one unit ... In perhaps an advance peek at the video store of tomorrow, Emc2 says it has the technology to deliver, in minutes, a recorded movie onto a blank tape by phone.

#90025u1400 01/25/1990 ~United Press International

CINCINNATI (JAN. 25) UPI - A bankruptcy judge, voicing concern for the morale of 101,000 employees working at Federated Stores Inc., ruled Thursday that employee benefits will continue to be paid.

U.S. Bankruptcy Court Judge J. Vincent Aug Jr. said he will continue to look favorably on future requests aimed at bolstering employees' loyalty to a company saddled with $7.7 billion in debts.

''I view loyalty, good will and morale as an important value in this case '' said Aug. ''At the early stages of this proceeding, Federated is entitled to protect its asset, to keep it from being frittered away. That will be the tone for the next several weeks.''

Aug made his comments in the first of what will be many hearings aimed at reorganizing Federated Stores Inc., which is operating under Chapter 11 of the Bankruptcy Code.

While Federated's bankruptcy filing last week gave it temporary protection from its creditors, it also means all money the company spends must be approved by the bankruptcy court until its debts are settled.

The court was expected to consider the company's request for $700 million in debtor-in-possession financing later Thursday.

Federated operates 10 department store chains, including trendsetting Bloomingdale's, with a total of 258 outlets. Burdine's, Abraham & Straus, Stern's, Rich's, Goldsmith's, The Bon Marche, Maas Brothers, Jordan Marsh and Lazarus also belong to the Federated fold.

Thursday's hearing was devoted to Federated's request that employees continue to receive health, education and retirement benefits, which Aug immediately approved.

Federated attorneys solicited testimony from a pair of company executives who said the retailer's future depends on keeping employees happy now.

''How our employees perceive this situation will determine how successful this reorganization will be,'' said Federated vice president Warren Rothman. ''Our employees are looking for stability. Some have already resigned and others are expressing concern about their benefits.

''We have people. We don't have robots. It's people who make our company work. We need to stabilize, motivate and retain our employees.''

Echoed another Federated executive, Joseph Vella, ''Our employees' attitude determines our bottom line.''

Vella noted that when Gimbels department store closed a few years ago, it lost thousands of dollars because ''disgruntled employees'' purposely made errors in sending out bills to credit card customers.

Federated's problems began after corporate raider Robert Campeau bought Federated Department Stores Inc. for $6.6 billion in 1988 and Allied Stores Corp. for $3.6 billion in 1987 in highly leveraged transactions to form Campeau (U.S). The company was renamed Federated just prior to the bankruptcy filing Jan. 15.

The debt-plagued retailers were forced into bankruptcy after failing to renegotiate the terms of their obligations with banks and bondholders. Worried suppliers, now assured that bills submitted after the bankruptcy filing will be given priority treatment, had threatened to cut off

shipments of spring merchandise.

''In the last two years, we've laid off 7,000 people as we restructured and streamlined,'' testified Rothman. ''We're at the point now where we need to keep employees.

''If employees see other employees not getting what they were promised (in negotiated benefits), it will hurt morale and therefore hurt sales.''

In a related development, three Campeau Corp. executives resigned from the company's board to concentrate on the troubled retail operations, a company spokesman said in Toronto Thursday.

G. William Miller, Ronald W. Tysoe and Byron E. Allumbaugh each resigned from Campeau's board, the company said.

Miller, a former U.S treasury secretary and former chairman of the Federal Reserve Board, was named chairman and chief executive officer of Federated Stores Inc. Jan. 16.

-30- 4172

#90025u1427 01/25/1990 ~United Press International

TORONTO (JAN. 25) UPI - Three Campeau Corp. executives have resigned from the company's board of directors to concentrate on Campeau's bankrupt U.S. retail operations, a company spokesman said Thursday.

Stepping aside were William Miller, Ronald W. Tysoe and Byron E. Allumbaugh, the company said in a short release.

Tysoe also resigned as president of Campeau Corp.

Miller, a former U.S treasury secretary and former chairman of the Federal Reserve Board, was named chairman and chief executive officer of Federated Stores Inc., formerly Campeau (U.S), on Jan. 16.

Federated includes the operations of Allied Stores Corp. and Federated Department Stores Inc., which operate 10 prestigious department store chains, and Ralph's Grocery Co..

Allied and Federated filed for Chapter 11 bankruptcy protection on Jan. 15 listing obligations of about $7.7 billion.

Campeau earlier said Tysoe, who was appointed president of Federated Stores Inc. on Jan. 16, intended to phase out his Campeau Corp. responsibilities in Canada. Tysoe oversaw operations at both Campeau Corp. and the U.S. holding company but moved to Cincinnati, where the retail businesses are based, some time ago.

Allumbaugh resigned from Campeau's board to focus his attention on Ralph's a 142-store California supermarket chain, of which he is chairman and chief executive officer. Ralph's did not file for bankruptcy protection.

Campeau said its board had appointed Anthony F. Griffiths and Paul D. Campbell as directors. With the changes the board now consists of 11 members, including Chairman Robert Campeau, who was ousted from management of the retail oprations prior to the bankruptcy filing.

Griffiths is chairman of Toronto-based Fairfax Financial Holdings Ltd. and a director of a number of other Canadian companies.

Campbell is president of Campeau Canada, the corporation's Canadian real estate and development division.

In a separate move, Campeau also said it had appointed three independent directors to its U.S. voting committee. The directors are Robert Butler, Robert Despres and Claude Ducharme.

The committee was set up Jan. 11 to vote the shares of Federated Stores Inc. until voting control over the U.S. holdings are transferred to trustees.

A federal bankruptcy court in Cincinnati Thursday approved the company's request that employees continue to receive health, education and retirement benefits.

#90025u1441 01/25/1990 ~United Press International

CRYSTAL LAKE, IL (JAN. 25) UPI - Lightning struck a telephone pole near a tool factory during a snowstorm Thursday, knocking out the plant's power and injuring at least 11 people, authorities said.

One of the 11 victims was in serious condition.

The strike occurred as a major winter storm unleashed a mixture of rain, winds and heavy snow in northern Illinois.

Crystal Lake Fire Chief Richard Nebel said firefighters were called to the Precision Twist and Tool Co. in the city 40 miles northwest of Chicago.

''When we arrived, we found 11 victims,'' Nebel said.

At least 10 of the 11 were employees of the drill bit maker.

The injured were taken to area hospitals, with at least one person in

serious condition, Nebel said.

Arthur Beck, president of Precision, said eight of the 11 victims were injured as they tried to push co-workers' cars out of a snowbound parking lot onto a street. The three others were hurt elsewhere in the plant area.

Beck said the bolt of lightning knocked out power at the plant for about 20 minutes.

#90025u1460 01/25/1990 ~United Press International

DANSVILLE, NY (JAN. 25) UPI - A ''Lassie-type'' collie who loyally waited at the emergency room entrance of a rural hospital for three weeks believing her master was inside was hit by a car and killed Thursday.

James McKinney, the village's dog warden, said he found the body of the well-groomed collie about 6 a.m., lying on a highway that runs by Noyes Memorial Hospital.

The collie first appeared at the hospital Jan. 4, and had waited outside the emergency room entrance each day ever since.

McKinney and hospital officials believed the collie - who bore a striking resemblance to ''Lassie'' of television fame - belonged to a patient who was rushed by ambulance to the hospital and either died or was transferred to another facility.

The dog would always happily bound to green cars that pulled into the hospital parking lot, but would run away when she determined her owner was not inside.

Harold Wolf, the county's deputy dog warden, said ambulance records and notices placed around the hospital, about 50 miles south of Rochester, failed to turn up the dog's owner.

McKinney said he considered the dog the smartest he had come across in his 17 years as dog warden, saying it had resisted every trick he knew to avoid capture.

McKinney said the collie ignored hamburger laced with tranquilizers, other dogs and his own grandchildren, instead riveting her eyes on the emergency room doors. He called the dog's death a ''shock.''

''I couldn't believe it,'' McKinney said. ''This dog was so smart. I have been watching her for weeks and she always stopped along the road and looked both ways - just like a human.''

The dog will be buried at the family farm of Carol Robinson, a hospital employee who had fallen in love with the animal.

#90025u1464 01/25/1990 ~United Press International

PORT-AU-PRINCE, HAITI (JAN. 25) UPI - Gen. Prosper Avril told an impromptu news conference Thursday he may lift the state of siege he imposed last week on Friday, but it was not clear if he would do it, diplomatic sources said.

Avril made the remarks Thursday morning while accepting credentials from newly appointed Brazilian Ambassador Guy Mendes Pinheiro de Vaconcellos in a ceremony at the Presidential Palace in the capital.

Responding to a reporter who asked when the siege would be lifted, Avril said, ''I think tomorrow,'' diplomatic sources said.

Dozens are believed to have been arrested and deported during the siege and crackdown on political opposition this week by the ruling military government. The government also imposed strict censorship on Haiti's independent press.

Avril, who took power in a 1988 coup, announced a 30-day state of siege last weekend to prevent what he said was the spread of ''terrorism'' following the assassination of a military officer.

But observers believe the political crackdown will disrupt democratic elections scheduled for April.

Avril, under worldwide pressure to restore democracy to the Caribbean nation, the poorest in the Western hemispher, had promised a series of elections, starting with contests for local officials April 29 and culminating in presidential elections next fall.

A diplomatic source said four or five opposition leaders were still believed being held without charge in Haitian jails, where there are reports prisoners arrested in the crackdown were beaten.

The rest have either been released or deported to the neighboring Dominican Republic, which shares the island of Hispanola with Haiti, or to the United States.

The Haitian Interior Minister said Wednesday that Haiti will allow exiled opposition politicians back into the country before October's presidential election, but not until the government has had a chance to organize the local April elections.

In the government's first detailed explanation of the mass arrests and deportations, Interior Minister Fritz Romulus said the measures were taken to prevent the disruption of the elections.

''These measures will be withdrawn as soon as the situation is clear,'' Romulus said on state-run television. ''This is a temporary deportation and this will allow the military government and the permanent electoral council to organize elections for communal sections and city mayors before the upcoming presidential election.''

Romulus said the political leaders were deported because of their lack of respect for Avril and because many of them were ''implicated in several terrorist actions that happened mostly at night.'' He gave no details.

A spokesman for the U.S. Embassy in Port-au-Prince, who asked not to be identified, cautiously said the United States would welcome the end of the siege but was concerned about the rights of the deported political prisoners and freedom of the press.

''We would certainly welcome that (the liftng of the siege) but there are other concerns to be addressed,'' the spokesman said.

The Interior Ministry earlier this week ordered all local media to show news reports to government censors before they were published or broadcast. The ministry also banned the republication or rebroadcast of news reports on Haiti originating outside of the country.

Romulus said the government was requiring any Haitian living abroad to obtain an entry visa before being permitted back into the country, including many opposition political leaders already overseas when the state of siege was announced.

Opposition leaders Sylvio Claude, a leader of the Christian Democrat Party and Gerald Philippe August, leader of the Peasants Workers Movement, were reportedly hiding in Haiti.

The scheduled April elections were to be only the second since Haitian dictator Jean-Claude ''Baby Doc'' Duvalier was toppled in February 1986 in a public uprising and replaced by a military junta.

Leslie Manigat was elected president early in 1988 but was overthrown in a military coup less than five months later by Gen. Henri Namphy, who in turn was ousted by Avril in September 1988.

#90025u1511 01/25/1990 ~United Press International

CHICAGO (JAN. 25) UPI - United Airlines' unions closed ranks behind a new

employee buyout of parent UAL Corp. and won backing Thursday from the company's biggest stockholder, Condor Partners, which had pressured UAL directors to consider a recapitalization.

Keith Golust, a principal in Condor Partners, Thursday encouraged employee buyout efforts that include employee investments and concessions worth $2 billion. He said the investment group would urge UAL directors to defer action on the recapitalization plan drafted under pressure from Condor, which owns 11.8 percent of UAL's stock. The UAL board was slated to meet later Thursday.

"An employee buyout has always been our preference and in view of the developments, we would hope the board will defer action. An employee buyout should be the first priority," Golust told United Press International.

A board source said that, in light of the new union agreement to work together on a buyuout and Golust's backing of those efforts, directors were virtually certain to put the recapitalization on the back burner and move swiftly to begin negotiations with the union-led buyout group.

The three unions - the Airline Pilots Association, the Association of Flight Attendants and the International Association of Machinists - presented a letter to UAL board representatives late Wednesday announcing they had agreed to team up with non-union employees in a buyout.

The buyout plan would give workers a 75 percent stake in the company through one or more Employee Stock Ownership Plans. The other 25 percent would be publicly held.

"The AFA, ALPA and the IAM have reached a historic written agreement in principle as to the key economic ingredients that would form the foundation of the acquisition, including agreement as to the allocation of ownership of the new company among the organized employees," union leaders said in the letter to the board.

The letter mentioned no purchase price, but said union employees and non-contract, non-union workers were prepared to offer a package of investments, including labor concessions, worth $300 million in the first year and $2 billion over five years.

A $6.75 billion, $300-a-share employee-led buyout collapsed for lack of financing in October, in part because potential lenders were scared off by the vehement opposition of the machinists' union.

The pilots' union was the only employee group committed to ESOP participation in the failed bid, although flight attendants were considering taking part when the deal fell apart.

Condor Partners, which includes the Coniston Partners group that forced UAL to sell its non-airline holdings in 1987, issued a stern warning following the collapse of the deal. It advised UAL it would move to seize control of the UAL board unless directors found a buyer or launched a restructuring to maximize shareholder value.

Condor had set a Jan. 8 deadline for the board to find a buyer or begin pursuing a recapitalization. With no bid on the table on that date, UAL directors instructed the company's financial advisers to draft a recapitalization plan.

They had been slated to act on that plan Thursday if no buyout bid was on the table. The new agreement among the three unions and non-contract employees, however, lifted the pressure to act.

Joseph Blasi, a professor at the Rutgers University Institute of Management and Labor Relations, said an employee buyout was the best course for UAL but cautioned against expections for a quick conclusion to the deal.

"I expect a period of extensive struggle between labor and management over both the details of a transaction and the specifics of their (union) contracts," Blasi said.

#90025u1518 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - Federal Reserve Chairman Alan Greenspan said Thursday foreign investments in the United States are necessary because of low domestic savings to help maintain the standard of living to which Americans are accustomed.

Greenspan, appearing before the House Ways and Means Committee, attributed the rise in direct foreign investments to a substantial decline in the U.S. savings rate.

"Current U.S. savings levels are inadequate to finance the domestic investment necessary to provide rising living standards for future generations on the scale enjoyed by previous generations," Greenspan told the committee, which is examining the rise of foreign investments in the United States. The most important step Congress could take to remedy this situation is to reduce the federal budget deficit, Greenspan said.

Between 1975 and 1988, the amount of foreign investments in the United States grew by more than 700 percent to exceed $1.7 trillion, according to a study prepared by the staff of the Joint Committee on Taxation.

Greenspan told the panel that foreign investment in the United States has

grown more rapidly than U.S. investments abroad. "Over the past decade, the United States bought more goods and services from the rest of the world than it sold and has paid for the difference, in essence, by borrowing from and selling assets to foreigners," Greenspan said.

The recent headline-grabbing acquisitions by Japanese conglomerates of Rockefeller Center and Columbia Pictures and the faltering Canadian acquisition of Bloomingdales have "given rise to fears about the selling of America at bargain basement prices," he said. These fears stem from perceived disruptions in the established patterns of doing business but are on the whole "overblown," he said.

Despite the attention foreign investments have received from Congress, such investments accounted for only 13 percent of U.S. assets and 11 percent of sales in 1987, according to the most recent data available. Greenspan told the panel that too little attention has been given to the benefits of direct foreign investments.

Trade between direct investment affiliates and their U.S. or foreign parents accounted for 35 percent of U.S. merchandise exports and 40 percent of U.S. imports in 1987, the most recent year for which data is available, he said.

"Foreign investment in the United States spurs competition, provides infusions of new capital and technology into industries like steel, and speeds the spread of technological advances," Greenspan said. The increasing globalization of international financial markets has made economic cooperation between nations all the more important.

Congressional efforts to limit or discourage the flow of foreign capital into the United States, rumblings of which have been heard recently, would aggravate the problem, Greenspan said, "by raising real interest rates in the United States and lowering domestic investment towards levels consistent with already low domestic savings."

Greenspan also warned the panel that measures to isolate the United States from foreign capital could lead to other problems as well. "As unfolding events in Eastern Europe indicate, countries that attempt to isolate their economies from the rest of the world and do not heed market signals in allocating scarce resources pay a high price in terms of low levels of economic welfare," he said.

#90025u1531 01/25/1990 ~United Press International

DETROIT (JAN. 25) UPI - Get ready, Lamborghini owners. It's nearly time to trade in that Countach or risk being seen in an exotic supercar that is unable to reach 202 mph.

Chrysler Corp., which bought the Italian carmaker in 1987, said Thursday it will use the Chicago Auto Show to debut the Diablo, the first new Lamborghini in 19 years.

The Diablo is faster and more powerful that the legendary Countach, which could only muster about 180 mph. It is expected to cost between $180,000 and $190,000 when it goes on sale this summer. That's about $40,000 more than the Countach, which at last look cost $145,000 for the 25th Anniversary Edition.

Still, Chrysler says the Diablo's production run of about 500 cars a year at Lamborghini's Sant' Agata Bolognese factory is virtually sold out until 1993 - meaning no guaranteed rebates, distress sales, or loud television ads touting this car.

"While keeping the Lamborghini design mystique, the Diablo is even more outrageous looking than the Countach," said Tony Richards, Chrysler's director of design for the marque. "If the Countach gave you goosebumps when you saw it, the Diablo will make your knees buckle."

The Diablo retains the "scissor door" design of the Countach. It is powered by a midship-mounted 5.7 liter, 48-valve V12 engine that propels it to 60 mph in four seconds. With a top speed of 202 mph, it also is the fastest car in the world, Chrysler claims.

The Diablo has no actual parts supplied by Chrysler - something that may have doomed the Maserati TC, a $33,000 roadster based on Chrysler's LeBaron convertible.

"The Diablo is fully built by Lamborghini," Chrysler spokesman Tom Kowaleski said. "But we lent our engineering and design expertise to the project. "Lamborghini had access to our super computers at our engineering facilities in Highland Park," he said, adding that Chrysler aided in the development of the Diablo's sophisticated electronic engine management system.

While the Diablo's original design was penned by Lamborghini, refinements were made by Chrysler's U.S. design staff, mostly to make the car more "producible," Kowaleski said. "The new car is more equalized than the Countach in areas of performance and handling," he said.

Yet despite its G-force handling characteristics, early Diablos will have only motorized seat belts instead of air bags, which are now standard on all of Chrysler's North American-made cars.

The Diablo is sure to be a crowd pleaser at the Chicago Auto Show. But what about those unlucky folks who are in the market for a new car but may

be unable to dole out nearly $200,000 for one?

What about industry observers who say Chrysler should be concentrating on getting its house in order with products that will more effectively add to its profits or stock price?

"I can only say that we have major refinements in engines, suspensions and steering for 1991," Kowaleski said, noting that Chrysler's capital spending is pegged at $15 billion during the next five years. "We also have a new model called the Dodge Stealth, and just about everybody knows we have a redesigned minivan on the way."

#90025u1554 01/25/1990 ~United Press International

ENTERPRISE, AL (JAN. 25) UPI - An attorney Thursday advised junk dealer Robert Wayne O'Ferrell to stop cooperating with FBI agents who have spent the past four days slogging through his pond and septic tanks and searching his home for mail-bombing evidence.

O'Ferrell called in Paul Harden, an Evergreen, Ala., attorney and an old friend of O'Ferrell's family. Harden said his first advice to O'Ferrell was simple: Stop helping the FBI.

''I'm afraid he's been very cooperative. That concerns me,'' Harden said. ''We're going to look at this thing ... and see if he has maybe overextended himself on cooperation.''

Harden said O'Ferrell asked for his help because the agents' lengthy stay is beginning to worry the junk dealer.

''The involvement and the length of time that the federal authorities have been here caused him some concerns,'' Harden said. ''We're just going to look at it, and it may be that he does not need an attorney.''

As Harden spoke, FBI divers searched a pond near O'Ferrell's home. His house and business have been the target since Monday in the investigation of mail bombings that killed a federal judge and civil rights lawyer.

Divers in scuba gear scoured the muddy farm pond with metal detectors and other equipment, but investigators would not say whether any evidence was found.

About nightfall Wednesday, agents removed yellow tape that had restricted access to O'Ferrell's salvage warehouse and drove away in a rented truck that had been backed up to the warehouse door.

Agents had draped tarpaulins between the back of the truck and the

warehouse door to shield their activity from public view.

O'Ferrell and FBI agents were not available to confirm that the search of his home, his former business location and his current salvage warehouse was officially over. The septic tanks at O'Ferrell's home and business, which had been pumped and dug up earlier, were covered Wednesday night.

O'Ferrell insisted again that ''I'm not guilty'' and denied reports he failed a lie detector test during two days of interrogation about the fatal bombing last month of a federal judge in Birmingham, Ala., and a black civil rights attorney in Savannah, Ga.

''I have not been told I am a suspect and I have not been told I failed a lie detector test,'' he said.

FBI agent Chuck Archer said O'Ferrell is not in custody and he would not call him a suspect.

Archer said FBI agents had seven search warrants to serve: one for O'Ferrell's Old and New Surplus Salvage Warehouse, one for the downtown storefront where he used to operate the business, one for his home in nearby New Brockton, and two others for the septic tanks.

Agents gave no details on the remaining two warrants, but O'Ferrell's father, J.C. O'Ferrell, 74, of McKenzie, Ala., said agents took him to a local hospital Monday and took blood and hair samples and fingerprints.

He said agents also searched the homes of his other son, James Douglas O'Ferrell, and his daughter, Jeannett Griffin.

O'Ferrell, 46, said he did not know the whereabouts of the key item in the federal agents' search: a typewriter with a unique typing pattern reportedly linked to the bombings. O'Ferrell said he ''supposedly'' sold the typewriter.

''We don't have any idea who it was sold to, when it was sold,'' he said. ''We don't keep a record of that stuff. That's all they want to know about is the typewriter - what we know about it.''

Federal investigators believe the typewriter used to prepare a lawsuit for O'Ferrell is the same machine used to write letters claiming responsibility for the December bombings.

The FBI found similarities between the type in the letters and in documents O'Ferrell submitted in his lawsuit against Gulf Life Insurance Co., which fired O'Ferrell several years ago for representing other insurance companies.

#90025u1556 01/25/1990 ~United Press International
(JAN. 25) UPI - A tornado ripped through a trailer park in southern Alabama just after dawn today, injuring at least nine people. State police say the twister destroyed at least eight mobile homes, downed powerlines and blew over trees. NO deaths are reported, but authorities say two people were missing. The county emergency management director says up to 18 people were hurt by the sudden wind storm. There's NO immediate word on the extent of the injuries.

The embattled Soviet republic of Azerbaijan has a new communist leader. The official Tass news agency says Ayaz Mutalibov, who is also premier, was selected first secretary as Red Army troops battled heavily armed Moslem militants at a barracks in the capital of Baku. Reports say two soldiers were killed. The deaths raise to 95 the number of people killed in the Battle of Baku now in its sixth day.

The shuttle Atlantis- mounted atop a huge transporter- is making the slow crawl to its launch pad at Cape Canaveral, Florida, today. The reusable spaceplane began the three-and-one-half-mile trip from the Vehicle Assembly Building to pad 39-A just before sunrise. The shuttle and its mobile launch platform are expected to be in place early this afternoon. Engineers will then continue preparations for its secret military mission next month.

#90025u1565 01/25/1990 ~United Press International
(JAN. 25) UPI - TODAY'S PEOPLE:

SON OF SHATNER: A 28-year-old woman is trying to beam herself aboard William Shatner's bank account. Vira Montes filed a $6 million suit against ''Star Trek's'' Capt. Kirk, claiming they had a five-year relationship during which he repeatedly promised to divorce his second wife, Marcie, and marry her. The suit was filed by palimony attorney Marvin Mitchelson, who says Montes gave up her job as a medical assistant to devote herself to serving as a ''companion, confidante and homemaker'' to Shatner, 47. The suit says Shatner spent more than half his time at the home near Los Angeles that he bought for Montes and her 8-year-old son. ''I'm taking the position that they were living together,'' Mitchelson said. ''He was paying for everything.'' Court papers say Montes even changed her first name to Vira at Shatner's request.

BARR GOES SHOPPING: Roseanne Barr caused a brief stir at the University Coop in Austin, Texas, when she and her new husband, Tom Arnold, stopped in Wednesday to load up on University of Texas sweatshirts and T-shirts. ''They drove up in a big, black-and-brown stretch limo parked in front of

the store and came in,'' said George Mitchell, president of the coop. ''He was very jovial. He said, 'Hi everyone. Here's Roseanne.' He announced that it was their honeymoon. They both seemed very happy.'' Barr and Arnold were married at her Los Angeles home last weekend.

BABY BHUTTO: Pakistani Prime Minister Benazir Bhutto delivered a daughter Thursday in Karachi in what apparently is the first time in modern history that a head of state has given birth. ''Almighty Allah has blessed my daughter, Benazir, and her husband, Asif Ali Zardari, with a daughter at 9:35 this morning,'' Bhutto's mother, Nusrat, said in a statement. The girl, whose name was not announced, weighed 7 1/2 pounds. Bhutto, 36, had been in Karachi on business and decided not to go home to the capital of Islamabad when it became apparent she was about to give birth. Bhutto and Zardari, whose marriage was arranged by their parents, also have a year-old son.

BASINGERVILLE: Actress Kim Basinger is thinking about building a recording studio or movie-making facility in her new town, Braselton, Ga. Basinger closed the $20 million deal to purchase the rural town Wednesday. ''This is God's little 1,800 acres,'' the Georgia-born actress said at a reception at a hotel in Atlanta, 40 miles from Braselton. ''It's a perfect area for filming.'' The 1,728 acres, which include Braselton's downtown area, bank, post office, retail stores and a 671-acre industrial park, was sold by the Braselton family, whose business has dominated the town of 500 for over a century. ''With her background and publicity, I think (the deal) will put Braselton on the map, make it a tourist attraction,'' said Harrison W. Braselton, one of three sons of the family business's founder.

MRS. BARRY AT WHITE HOUSE: Effi Barry attended a White House function Wednesday in her first scheduled public appearance since her husband, Washington Mayor Marion Barry, was charged with smoking crack last week. Mrs. Barry was kept in an area away from the media when she went to the White House for a welcoming ceremony for the president of North Yemen. The mayor and his wife regularly go to such functions as part of protocol and the Barrys had been scheduled attend before the mayor entered a substance abuse treatment program in Flordia.

BASEBALL NEWS: Steve Garvey has struck out as a radio talk-show host. The former Los Angeles Dodgers star, who was the target of two paternity suits last year, was fired Wednesday after six months of low ratings on San Diego station XTRA. ''Steve's attitude was totally professional,'' said XTRA general manager Tom Jimenez, who reached a contract settlement with Garvey. ''He understands what we're doing here. We're good friends. He's a true Hall of Famer in my eyes. He's one of my heroes'' ... In another baseball matter, Lisa Clayton of St. Louis wants $11,000 a month from New York Mets outfielder Darryl Strawberry, who she says is the father of the child she gave birth to in 1988.

#90025u1573 01/25/1990 ~United Press International
MINNEAPOLIS (JAN. 25) UPI - A stolen $18,000 diamond ring is back in the hands of its owner thanks to a dose of laxative and patience.

Michael Weatherspoon, 23, St. Paul, was arrested Jan. 17 after a robbery he took a 2 1/2-carat diamond ring from a manager at the National Jewelry Co. He was wrestled to the ground after a chase by a former Israeli soldier and professional soccer player who happened to be passing by, but no ring was found.

The ring's disappearance and blood coming from Weatherspoon's mouth suggested to police he had swallowed the ring.

''You have no evidence, you have no evidence,'' Weatherspoon told the jewelry store manager who was asked to identify him.

But police got a search warrant from a judge who authorized the ''proper medical techniques, excluding surgery,'' to recover the ring.

The next day, with the help of some laxative, a portable latrine and a six-hour wait, the ring suddenly appeared.

''I'm glad that's out now,'' Weatherspoon said.

The ring was returned to the store and Weatherspoon was charged with theft. He is being held on $10,000 bail.

As for the ring, the store manager said it will be electronically steam cleaned.

''Everybody doesn't have to know where it's been,'' store manager Sandra Greer said.

#90025u1576 01/25/1990 ~United Press International
HENDERSONVILLE, NC (JAN. 25) UPI - More youngsters testified Thursday against the heir to a textile fortune, saying he molested them at a summer camp he ran for rich kids, but three counselors said they believed the stories were untrue.

Jones Yorke Pharr III, director of Falling Creek Camp and grandson of a founder of Pharr-Stowe textile mills, is accused of taking two Florida youngsters on overnight outings and then molesting them as they slept.

The mother of a 10-year-old Arizona boy Pharr is also accused of molesting

said when her son returned from camp he asked what caused homosexuality and then burst into tears when she told him some homosexuals get AIDS.

Pharr, 41, sat passively in Henderson County Superior Court beside his wife Barbara as the children testified. He was expected to testify in his own behalf late Thursday or Friday.

Pharr was arrested last Sept. 20 and charged with taking indecent liberties with two West Palm Beach, Fla., boys, ages 10 and 11, who testified he took them on several overnight camping trips, watched them skinny dip and later fondled them.

He was also indicted on four additional charges involving boys from Florida, Maryland and Arizona.

A boy from Scottsdale, Ariz., testified his sleeping bag mysteriously disappeared while he was on an outing with Pharr and the camp director invited him to share his own sleeping bag after telling the child to take off his clothes.

The boy said he was unable to sleep most of the night because Pharr kept making sexual advances toward him.

''He put his arm around me, pulling me toward him,'' the boy said. ''I tried to pull away, but he would pull me back.''

Another 10-year-old from Baltimore said his sleeping bag also disappeared on an outing with Pharr. He said he, too, was invited to share Pharr's sleeping bag but became ''really scared when he patted me on the butt for about 15 minutes.''

''I just wanted to get out of there,'' he said. ''I thought he was weird. He's a creep.''

But three counselors said they do not believe the allegations about Pharr, who until the charges were filed was a well-respected member of the Presbyterian church in Hendersonville, a picturesque resort community in the western Carolina mountains.

Royce Butler, of Amarillo, Texas, said he was a cabin counselor for one of the Florida boys and the child ''could tell the greatest made-up stories.''

Steve Hopkins, a counselor who attends Tulane University in New Orleans, said he counted the number of outings another Florida child attended and it was one, not three, as the child testified Tuesday.

A third counselor, Justin Schmidt, of New Orleans, also described Pharr as a caring person unlikely to abuse the children.

''He is a person who cares a lot about his kids,'' Schmidt said, adding when campers were homesick, Pharr was ''always there.''

#90025u1594 01/25/1990 ~United Press International

NEW YORK (JAN. 25) UPI - A witness in the assault case against reputed mob boss John Gotti, accused of ordering a labor union leader wounded, was barred from testifying that Gotti congratulated the assailants for ''a job well done.''

The conversation between Gotti and James Coonan, leader of the murderous Irish gang called the Westies, allegedly occurred about two weeks after John O'Connor of Carpenters Union Local 608 was shot four times in the buttocks on May 7, 1986.

Acting Justice Edward McLaughlin, who is presiding over Gotti's assault trial at state Supreme Court in Manhattan, said he would not allow admitted Westies member James McElroy to testify about the conversation because it is ''hearsay'' evidence.

In the conversation, a court source said, ''Gotti allegedly congratulated the Westies for a job well done.''

Gotti, 49, the reputed head of the Gambino crime family, is accused of ordering the hit in retaliation for union members trashing a Gambino-linked restaurant that was using non-union labor.

The Westies allegedly volunteered to carry out the job to curry favor with the Gambinos.

McElroy, slated to testify in Gotti's trial Friday, was among four Westies involved in the shooting and is an unindicted co-conspirator. He is serving a 60-year sentence on a federal racketeering conviction for a series of murders.

McElroy was described by federal authorities as ''Coonan's right-hand man and chief enforcer'' who has ''committed loansharking and extortion.''

In a federally prepared laundry list of his alleged crimes, McElroy is accused of several murders, of offering his services as a professional assassin to undercover police and telling them he ''actually enjoys killing people.''

In one killing he is accused of shooting William Walker after an argument in a bar on the Oct. 3, 1978, and dumping his body at the 79th Street Boat Basin. He was acquitted of murder in 1980.

He also is accused of extorting his way into a no-show job with the Teamsters Union.

''McElroy told the union president that he would kill one member per week until he received his union card. McElroy's threat had the desired effect; on January 1, 1984, he became a member of the union, and began receiving $1,700 per week for doing virtually no work,'' authorities said in court papers.

#90025u1611 01/25/1990 ~United Press International

LONDON (JAN. 25) UPI - Ava Gardner, who left the Carolina tobacco fields to become one of Hollywood's greatest sex symbols, died Thursday, a friend and her business manager said. She was 67.

Paul Mills, who identified himself as a friend of Gardner's, told the Press Association domestic news agency and the British Broadcasting Corp. that Gardner died of pneumonia at her London home.

Gardner's business manager in Los Angeles, Jess Morgan, confirmed that she had died in London but released no details.

Mills said Gardner's body would be flown to Smithfield, N.C., where she would be buried next to her parents and brother. Kenneth Baker, owner of Underwood Funeral Home in Smithfield, said he was making the arrangements for Gardner's burial at Sunset Memorial Park, but did not yet know when the services would be held.

Gardner's leading men included Burt Lancaster, Clark Gable, Humphrey Bogart, Gregory Peck, Tyrone Power, Paul Newman, Kirk Douglas, Charlton Heston and Richard Burton. But her husbands - Frank Sinatra, Mickey Rooney and Artie Shaw - perhaps brought her more notoriety.

Among Gardner's best known films are ''One Touch of Venus'' in 1948, ''Show Boat'' in 1951, ''The Snows of Kilimanjaro'' in 1952, ''Mogambo'' in 1953, ''The Barefoot Contessa'' in 1954, ''The Sun Also Rises'' in 1957 ''On the Beach'' in 1959, ''55 Days at Peking'' in 1963 and ''Seven Days in May'' and ''The Night of the Iguana'' in 1964.

''I was never the world's greatest actress,'' Gardner once said, ''but it's still the only thing I know how to do.''

Gardner left North Carolina at age 19 with a Southern drawl so thick the filmmakers shut off the sound track on her first screen test. But with her luminous beauty, sultry voice, talent and romances, she succeeded Rita Hayworth as Hollywood's reigning love goddess.

Gardner was a novice Hollywood starlet in 1942 when she became the talk of the town by marrying Rooney, then the nation's top box-office star. The Rooney match lasted only a year, as did her marriage to band leader Artie Shaw, which ended in 1946. Her third and last marriage, to Frank Sinatra in 1951, ended in divorce in 1957.

Ava Gardner was born on Christmas Eve in 1922, the seventh child of tobacco farmer Jonas Gardner in Smithfield.

''We were poor but where we lived everybody was poor,'' she once said. ''Everyone in the family worked. If you didn't work you didn't eat. As soon as I was old enough there were chores for me to do.''

As she grew up, she said, her parents' obsession with virtue - ''you were either a prude or a prostitute'' - engendered complexes that affected her later life.

''I grew up believing everything you enjoy is horrible,'' she said.

She went to New York at a sister's invitation to look for a job and the sister's husband took some pictures of her that he sent to the MGM talent department.

The Hollywood studio summoned her for an interview. The talent scouts were stunned by her accent and even more astonished by her natural beauty since she wore no makeup.

In 1946, after her starring role opposite George Raft and Victor McLaglen in ''Whistle Stop,'' she was paired with an unknown actor, Burt Lancaster, making his screen debut in ''The Killers'' and stardom came for both.

When Gardner's studio contract expired, her asking price soared and she was financially secure the rest of her life.

In 1950, Gardner met Frank Sinatra at the lowest point of his career, desperately hoping for a movie role that would rehabilitate him as a star. The meeting came at a dance in Palm Springs, Calif., where Gardner was with eccentric billionaire Howard Hughes, who had pursued her for eight years. The actress said, many years later, that Hughes was a boring man with only two interests - money and big breasts - and she couldn't get rid of him.

She said Hughes once slapped her and she laid him out with a brass bell. But her dark, flashing beauty - brunet hair, green eyes and exquisite figure - drew him back and that night they came across Sinatra dancing with his first wife, Nancy.

They changed partners and the romance was on. They married in 1951 after Sinatra got his divorce and the next six years were filled with long stretches of ecstatic love-making, Gardner said. But they increasingly were interrupted by quarrels and violence and Sinatra once threatened suicide, fired a gun into their bed and threw her out of the house.

#90025u1616 01/25/1990 ~United Press International

(JAN. 25) UPI - Phillips Petroleum Co., the nation's tenth-largest oil company, Thursday reported a $255 million fourth-quarter loss and a 66 percent drop in yearly earnings as a result of output delays at a controversial offshore field in California.

The loss of $255 million on revenues of $3.03 billion compared with earnings of $155 million, or 55 cents a share, on sales of $2.86 billion in the fourth quarter of 1988, the Bartlesville, Okla.-based company said in a statement.

Total 1989 earnings dropped 66 percent to $219 million, or 90 cents a share, on revenues of $12.49 billion, from $650 million, or $2.72 a share, on revenues of $11.49 billion in 1988.

"The overriding negative factor affecting the company's performance in the quarter as well as the year was the writedown of our offshore California investments stemming from the protracted delays in gaining regulatory approval to begin production of the Point Arguello field," said Phillips Chairman C.J. Silas.

Phillips announced last week that it intended to write off $280 million on its California investments as a result of the delays. Excluding the write-off, Phillips said its 1989 fourth-quarter earnings would have been $25 million and yearly earnings would have been $499 million.

In addition, Silas said earnings suffered as a result of an Oct. 23 explosion and fire that destroyed polyethylene production at Phillips' chemical complex in Houston.

#90025u1618 01/25/1990 ~United Press International

(JAN. 25) UPI - Officials at a Detroit hospital have closed a surgical ward and moved 19 patients into isolation after seven patients died of a virulent bacteria in the past three months. All of the patients placed in isolation are in critical to serious condition following surgeries. Detroit Receiving Hospital spokesman Dennis Archambault says the seven patients who died since November contracted a hospital-acquired infection. Officials closed the surgical intensive care ward yesterday so it could be

thoroughly cleaned.

Libyan officials grounded and searched a West German plane today, just one day after West German police searched a Libyan Arab Airlines jet at Frankfurt, arresting three armed men. Officials at the German air carrier Lufthansa report Flight L-H 19-96 was grounded by Libyan security forces in Tripoli yesterday. But the Airbus was released today. Yesterday, the pilot of a Libyan jet refused to takeoff from Frankfurt, saying three men arrested for carrying weapons were members of his crew.

Actor William Shatner has been slapped with a six-Million-dollar palimony suit by a woman who says she's had a five-year relationship with him. Vira Montes charges that Shatner broke off the relationship a few weeks ago, though she claims that until then he spent about half his time at the San Fernando Valley, California, home he bouught for her. Shatner... best known as Captain Kirk in the ''Star Trek'' t-v show and films... could NOT be reached for comment. He is currently married to his second wife, Marcie.

#90025u1623 01/25/1990 ~United Press International

ORLANDO, FL (JAN. 25) UPI - Braniff Inc. surrendered 20 leased jetliners to their owner for non-payment - the second time in less than a week the bankrupt carrier has lost aircraft to repossession.

The Boeing 727s were returned to BRNF Liquidating Trust of Wilmington, Del. U.s. Bankruptcy Judge C. Timothy Corcoran III ruled Monday that BRNF was entitled to reclaim the planes.

"That evening, Braniff and liquidating trust officials met, and Braniff agreed to turn the planes over voluntarily. Technical people both from Braniff and (BRNF) liquidating trust are working together to get that accomplished," Ann Cook, a Braniff spokeswoman in Kansas City, said Thursday.

Braniff had been keeping the planes in Orlando, Kansas City and Dallas, said David McFarlin, BRNF's attorney. "They've been turned over. It's a matter of moving them," Cook said.

Braniff had made no lease payments on the 20 planes since filing for bankruptcy Sept. 28 and owed BRNF about $8 million, McFarlin said. The repossession was the second for Braniff in a week. On Jan. 19, Polaris Aircraft Leasing Corp. of San Francisco seized seven 737s at Orlando International Airport for non-payment.

And on Dec. 21, Braniff agreed to return five European-built Airbus A320s to GPA Group PLC of Shannon, Ireland, the leasing company, also for non-payment.

The 727s surrendered Monday originated with Braniff International, the Dallas carrier that went bankrupt in 1982. BRNF was formed during the Chapter 11 reorganization in Dallas and leased the new Braniff the 727s and other equipment.

At Monday's hearing, Sanford Denison, an attorney for the Teamsters, one of Braniff's creditors, asked Corcoran to delay a ruling on the 727s, saying the former chief executive officer of an airline was negotiating a deal centered on the 727s. Cook said Thursday that a second airline chief executive officer was involved in separate negotiations but would provide no details.

#90025u1653 01/25/1990 ~United Press International

NEW YORK (JAN. 25) UPI - NBC Thursday announced the creation of a new consortium to bring advanced television technology to U.S. viewers by 1993 as an intermediate stage toward producing high-definition television in the decade.

The network said it has joined forces with Philips Consumer Electronics Co., Thomson Consumer Electronics Inc. and the David Sarnoff Research Center to produce a new television technology capable of competing with Japanese and European state-of-the-art systems.

Advanced Television Research Consortium will pool resources of the four companies to design a new enhanced television system expected to vie for approval from the Federal Communications Commission by 1992, and be on the market the following year - if successful.

"Our plan is to jointly develop and support a dual television transmission system that meets the requirements of American viewers and programmers," said Michael Sherlock, president of NBC operations and technical services and spokesman for the new consortium.

Sherlock stressed that the new system - Advanced Compatible Television or ATV - will not be a substitute for HDTV but be a "widescreen, movie-like system with improved picture resolution." "In parallel development, the evolutionary program would also develop an HDTV system for subsequent introduction to American consumers," Sherlock said.

The ATV signal is derived by breaking the camera signal into three subsignals and encoding them, resulting in a central panel flanked by two side panels to provide a wider image.

The system will not require any modification in filming programs nor major or costly alterations at studios. The same programs will be viewed by owners of old and new sets alike.

The two other main competitors for FCC approval of a single new television system in the United States are NHK, the Japanese television giant, and Zenith Electronics Corp.

"Zenith has a high-definition television proposal which is different from enhanced television as proposed by NBC," said John Taylor, a Zenith spokesman. "We will present a simulcast system and we are convinced that it works."

Sherlock had expressed reservations over the simulcast system, saying there was no evidence so far that it works. "The perception that the Japanese are way ahead as far as HDTV is concerned is wrong at least for the U.S. market," Taylor said. "The Japanese system was initally developed for direct satellite broadcasting for home reception, which is not taking into account the nature of the U.S. market."

NBC unveiled its experimental version of the widescreen system at its New York headquarters and aired excerpts from the playoff games of the Denver Broncos, a Super Bowl XXIV participant.

The widescreen, advanced television display offers a more comprehensive view of the game, comparable to scenes shown in 70-millimeter panoramic movies, and with an image sharper than in current broadcast.

"Without an easily implementable widescreen television system, American viewers could soon be left behind what will be available in other areas of the world such as in the Far East and Europe," Sherlock said.

High-definition television systems will be introduced early this decade in Japan and Europe, while the U.S. companies have not managed yet to develop their own HDTV technology.

Sherlock said the footage aired on wide-screen television was filmed by two standard cameras during the live coverage of the football game, which

also was shot by about 20 cameras for regular broadcast.

(JAN. 25) UPI - Ava Gardner made her Hollywood screen debut in 1942 in a little-remembered comedy, ''We Were Dancing,'' and appeared in a score of pictures before she was chosen in 1946 to co-star with a newcomer, Burt Lancaster, in ''The Killers.'' Suddenly recognized as a star, she subsequently had top billing in many pictures, including:

''The Hucksters,'' 1947

''One Touch of Venus,'' 1948

''East Side, West Side,'' 1949

''Show Boat'' 1951

''Pandora and the Flying Dutchman,'' 1951

''The Snows of Kilimanjaro,'' 1952

''Mogambo,'' 1953

''The Barefoot Contessa,'' 1954

''The Little Hut,'' 1957

''The Sun Also Rises,'' 1957

''The Naked Maja,'' 1959

''On the Beach,'' 1959

''55 Days at Peking,'' 1963

''Seven Days in May,'' 1964

''The Night of the Iguana,'' 1964

''The Bible,'' 1966

''Mayerling,'' 1968

''The Life and Times of Judge Roy Bean,'' 1972

''Earthquake,'' 1974

''The Cassandra Crossing,'' 1977

''The Sentinel,'' 1977

WASHINGTON (JAN. 25) UPI - Low-level electromagnetic radiation from computers and even electric blankets requires further study because there is not evidence to dismiss the potential health risk, a study showed Thursday.

For the past several decades, scientists have debated the possible health threat of very weak electric and magnetic fields, such as those generated by common household applicances, radar emitters and utility power lines.

Some critics say they doubt low-level electrical fields endanger health because natural heat fluctuations within living cells would be greater than any disturbances caused by electromagnetic radiation.

But researchers from Massachusetts Institute of Technology and the National Institute of Standards and Technology said their calculations show heat variations within cells do not always override the impact of weak electrical fields.

In a study published in the journal Science, MIT's James C. Weaver and NIST's R. Dean Astumian said their mathematical model shows that is not the case.

''Estimates presented here argue that concerns related to possible biological effects due to very weak environmental electric fields cannot be dismissed on the grounds of being swamped by thermal fluctuations,'' they wrote.

The study also found enzymes and other molecules embedded in the cell's outer membrane appear more vulnerable to effects of electromagnetic radiation than chromosomes and other molecules in the cell's interior, Weaver said.

The MIT scientist emphasized his work does not prove that electromagnetic fields pose a health threat.

''It would be premature to make strong conclusions. But this does show that maybe this (issue) should be taken a bit more seriously, seeing as one of the often cited objections appears not to hold up,'' Weaver said.

''We should look at this area more closely, without presumptions. It really deserves more careful scrutiny,'' he added, noting few studies are currently being done on the impact of electromagnetic fields on cells.

Society's widespread dependence on electromagnetic devices may be one reason for the lack of enthusiasm in exploring their possible hazards, Weaver said. Another difficulty is that any effects of electromagnetic radiation would likely be far more subtle than well-known health threats, like toxic chemicals or nuclear radiation.

''Someone isn't going to walk into a room containing electromagnetic radiation and fall over,'' Weaver said in a telephone interview.

In November, researchers from Johns Hopkins University in Baltimore released preliminary findings that show abnormally high rates of cancer among cable splicers for New York Telephone Co.

While researchers emphasized their work did not establish that radiation given off by telephone power lines actually caused cancer, the findings added weight to previous population-bsed studies that have suggested a link between cancer and power-line radiation.

TORONTO (JAN. 25) UPI - Falconbridge Ltd. said Thursday it will close its Sudbury East nickel mine in April as a result of deteriorating conditions in the nickel market. Falconbridge said 250 workers will be affected by the shutdown, which was originally set for 1991.

The mine closing will cut Falconbridge's nickel output for 1989 by five million pounds. The company said its 1990 planned output will now be reduced in total by 15 million pounds, or ten percent.

Falconbridge was the target of a takeover battle last summer between New York-based Amax Inc. and Noranda Inc. Noranda teamed up with Swedish conglomerate Trelleborg AB for a successful $30.70-a-share, or $1.83 billion bid, for Falconbridge.

Noranda and Trelleborg own and manage Falconbridge operations on an equal basis. Falconbridge is an international mining company with operations in Canada, Norway, and the Dominican Republic.

#90025u1697 01/25/1990 ~United Press International

NEW YORK (JAN. 25) UPI - Authorities Thursday searched for a second

suspect in the slaying of a mentally disabled Vietnam veteran who police say was stabbed to death because his attackers believed he was homosexual.

Police said the murder of James Zappalorti, 44, marked the first time someone had been killed in an anti-gay attack in New York City since the cops began recording such crimes in 1980.

Gay rights groups decried the slaying and said they would urge top city officials to show their sympathy by attending the funeral for Zappalorti.

''The reaction of the city to this crime has to be the same degree of anger and outrage as every other bias crime such as the Howard Beach murder,'' said Matt Foreman, executive director of the Gay & Lesbian Anti-Violence Project, referring to the notorious 1986 racial killing in Queens.

A neighbor of the slain man, Michael Taylor, 20, has been arrested in connection with the killing of Zappalorti.

Zappalorti was found dead from multiple stab wounds Monday on an isolated beach near his Staten Island home.

Police were searching for a second suspect, Philip Sarlo, 26, who, along with Taylor, was convicted of the attempted murder of a homosexual on Staten Island in April 1986.

Sarlo was paroled last February and Taylor, who was 16 at the time of the murder, was tried as a juvenile and served 1 1/2 years behind bars.

In that incident, a police official said the two friends beat and then dumped their victim into the truck of a car and were about to set fire to the vehicle or push it into the water when police arrived.

Authorities charged the killing of Zappalorti was motivated by the suspects' hatred of homosexuals and were treating the incident as a ''bias'' crime.

Capt. Charles Senzel, of the police Bias Investigating Unit, said although there are numerous assault cases reported against homosexuals each year, the slaying was the first time in 10 years someone had been killed in a bias attack against gays.

Zappalorti's body was found by his brother not far from a shanty he had built on the beach near the foot of the street where he lived with his elderly parents, police said. He was stabbed in the neck and chest and his throat was slit.

A knife believed to be the murder weapon and a pair of pants and shoes

were found near the dead man's body, police said.

After the slaying, Zappalorti's killers took his keys and went to his parent's home and began ransacking the house, police said. The victim's family was at home at the time and, following a confrontation with Zappalorti's 75-year-old mother, the suspects fled with a set of rosary beads, police said.

After the killing, Taylor reportedly bragged to friends about the slaying. He was nabbed early Wednesday as he was leaving a South Beach bar, police said.

BINGHAMTON, NY (JAN. 25) UPI - New York State Gas & Electric Corp. said

Thursday fourth-quarter earnings were $20.8 million, or 36 cents per share, down from last year's fourth-quarter earnings of $21.8 million, or 39 cents per share. Revenues for the three-month period rose to $349.9 million from $336.2 million in the previous year.

Net income for the fourth quarter was $24 million, which dropped from $25.2 million in 1988. Net income for the year was $157.8 million, down from $171.5 million in 1988.

Revenues for the 12-month period ended Dec. 31, 1989 were $1.4 billion, which was up from $1.3 billion for 1988. Earnings available on common stock for the year were $2.53 a share, compared to $2.81 a share in 1988.

The decrease in earnings per share for the fourth quarter of 1989 was due primarily to high electricity production costs and purchased gas costs during an unusually cold December, company officials said.

The decrease was partially offset by an adjustment made to the 1987 Nine Mile Point 2 write-off and by higher profits from the sale of electricity to other utilities.

#90025u1779 01/25/1990 ~United Press International

ATLANTA (JAN. 25) UPI - Adults should keep up their tetanus shots to avoid becoming one of the small number of Americans stricken by the deadly wound-related disease, federal health officials warned Thursday.

The federal Centers for Disease Control reported tetanus has steadily declined since the early 1950s when a vaccine for the bacterial infection was first widely administered. But about 50 people each year still get the disease, 20 percent of whom die.

''The key thing we would like to bring out is that the disease is obviously much lower than in the pre-vaccine era, but that some people are still in danger and the age group predominantly affected now is the adult over the age of 50,'' said Dr. Peter Strebel, an epidemiologist with the CDC.

Tetanus, typically occurring as a result of accidents causing skin puncture or laceration, was found in 101 people in 1987 and 1988, the CDC said in its Weekly Morbidity and Mortality Report.

Of the 101 cases, 67 involved patients over 50. Twenty-one percent of the patients died.

Thirty-one percent of the patients reported never having had a tetanus shot. Only 3 percent said they had 4 doses.

An estimated 560 tetanus cases were reported in 1947 before the vaccine was available to the general public. The vaccine was developed in 1944 and mainly restricted for use by World War II soldiers.

Tetanus in rare cases can be cured after its onset using a combination of the vaccination and antibodies against the disease that commonly causes lockjaw, muscle spasms, neck stiffness and swallowing difficulties.

''It is a severe and often fatal disease,'' Strebel said. ''That is why we put emphasis on prevention instead of cure. Once you have the disease, it is not easy to cure.''

He said the federal health agency recommends a triple dose of the tetanus vaccine for infants starting at six weeks of age and spaced by one to two months thereafter, with a final booster shot given before entering kindergarten.

The next dose is recommended at age 15 and then every 10 years for life, he said.

''If you look at the proportion of cases, about three-quarters are occurring in adults over 50,'' Strebel said. ''That is largely due to the fact that adults don't have regular boosters with tetanus and diphtheria toxoids.''

For children, the tetanus shot is accompanied by a diphtheria-fighting serum as well as one for whooping cough. Adult boosters combine only the tetanus and diphtheria serums.

The tetanus toxin is found in the soil and the intestinal tracts of animals and humans and thrives better in the warm and moist regions of the country. In 1987 and 1988, 53 percent of the cases were found in the Southern states of North Carolina, South Carolina, Florida, Alabama, Georgia, Louisiana, Texas, Arkansas and Oklahoma, the CDC said.

#90025u1780 01/25/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (JAN. 25) UPI - Helicopters have become a mainstay of action-adventure flicks, and perhaps the most dangerous contraption on any movie set.

Actors and stunt men have been killed. So have pilots and people on the ground. No one has kept track of the near-misses.

The most notorious Hollywood helicopter accident involved the deaths of two child actors and veteran Vic Morrow on location for ''Twilight Zone - The Movie.''

Director Boris Sagal was killed when he backed into a whirling chopper blade while filming on location on a mountain peak.

Less than two years ago a military helicopter hired for ''Braddock: Missing in Action III'' plunged into Manila Bay, killing four passengers and injuring five. Then last May on the set of ''Stranglehold: Delta Force II,'' again in the Philippines, another chopper malfunctioned and crashed, killing five and injuring three of the film crew.

Both Philippine tragedies took place during the production of Chuck Norris films.

Published reports pointed fingers in all directions, including producers who hired what was purported to be a poorly maintained chopper in the ''Delta Force II'' film.

Norris was not aboard either chopper when the accidents occurred, but he'd been on the set that day during the helicopter shots in ''Delta Force II.''

''I'd been aboard the chopper,'' he said, ''but I left before the last, fatal flight. Stunt doubles had been used for the other actors until John Ryan took the last ride, which was just a lift-off.''

But the lift-off was beside a cliff, and when the chopper was a few feet in the air, it veered and plunged down a couple of hundred feet and crashed and burned.

''When I got back to the hotel my telephone was ringing,'' Norris said. ''It was my makeup lady telling me about the crash. I hyperventilated. My brother (director Aaron Norris) had been on that helicopter most of the day. Luckily, he was not aboard when it crashed.

''I rushed to the hospital where Aaron had everyone in the company give two pints of blood. Aaron gave three pints.''

Apparently no one knows what caused the helicopter to crash. The film company had been using it for weeks without mishap.

''Helicopters are unpredictable machines,'' said Norris, who has worked around and in them in several films. ''They are flying rocks. Any little thing can go wrong and you're down. There's no gliding to a safe landing.

''Look at how many crashes the military has had in recent years. Donald Trump's helicopter was supposed the be the safest thing in the air, and it

went down. I'd been in it a couple of months earlier last year.

''Half my movies have involved helicopters. I've dangled beneath them and sat with my feet hanging out, but I am always aware they can be treacherous.

''I dangled 2,000 feet over rocks for this film. Of course, I'm secured by a cable. I wouldn't do anything to jeopardize my life or expect anyone else to do so.''

Norris said some reports about the most recent accident have been misleading.

Although the Philippine military reportedly refused to supply the film company with a helicopter because of the ''Missing in Action III'' crash, he says the civilian chopper hired was carefully maintained and in top condition.

''Delta Force II'' currently is in post-production and probably will be released to theaters this spring. Will Norris' close calls with helicopters deter him from climbing aboard in the future?

''No. I'm a fatalist about such things,'' he said. ''I can cross the street and get killed by a car. You can't get paranoid. It makes your life miserable.

Death, he said is ''predestined.''

''If I'm destined to be killed in a helicopter, so be it. I don't worry about that sort of thing,'' he said.

''I'm terribly depressed and sorry about the deaths of my friends and fellow workers in the crash, but there is nothing I could have done. I suppose there isn't anything anyone could have done to prevent it.

''You try to reduce risks to a minimum. We took every possible precaution. I would not have gotten aboard the chopper, nor would any of the stunt men if I felt there was any type of unsafe situation.

''My heart goes out to the families of the people who lost their loved ones. I'm just lucky I wasn't aboard when the accident happened.''

#90025u1791 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - Acknowledging limited success to date, President Bush proposed a $1.1 billion escalation of America's war against drugs Thursday through military might, more federal agents and the death penalty for drug lords.

''It's clear we're only really getting started,'' Bush said in announcing the updated national strategy, crafted by federal anti-drug chief William Bennett, to spend a total of $10.6 billion for fiscal 1991.

While claiming ''we've made some notable progress'' since the original initiative was set in motion in September, the president contended illegal drugs ''remain this nation's No. 1 concern.''

''We're willing to spend more to limit the drug supply. Simply put, we're willing to do whatever it takes,'' Bush pledged to a group of newspaper publishers at a White House luncheon. ''But the real issue, of course, is not 'how much'; it has got to be 'how well.'

Bennett, speaking to reporters later, acknowledged the funding was short of what he had asked for, but said he was ''more optimistic about our prospects than I was when I first took this job.''

''Things will get better if we stay at it,'' Bennett declared.

The outspoken drug czar also jabbed back at Sen. Joseph Biden, D-Del., who beat Bush to the punch in the battle of competing drug strategies by revealing details of his own, better-funded plan on Wednesday.

''The fact that Senator Biden would come forward with a program calling for more money was no surprise to us,'' Bennett said. But he also noted the two proposals have much in common. ''We all agree we need to do better '' he added. ''It now comes to what I call budget ball.''

The Bush-Bennett plan for 1991 differed little from the one for 1990 and will be included in the budget going to Congress next week. There it faces an uncertain future in this election year as lawmakers weigh its details and financing.

Bush, however, told the publishers he was hopeful the Congress would act quickly.

''I would like to see it implemented, crossing the T's and dotting the I's the way Bill Bennett has proposed,'' he said. ''But I'm not naive enough to believe that will happen.''

Biden, who drafted the law giving Bennett his job, said his proposal was not intended as ''wholesale rejection'' of the administration program and told a news conference Thursday he welcomed a debate with the administration.

"This is my best compilation of what I think our national drug strategy should be," Biden said. "I hope that the result of having submited this comprehensive strategy will be that we will engage in a debate" on what the plan should be.

The administration proposal called for $10.6 billion in drug-related funding for fiscal year 1991 - a $1.1 billion, or 12 percent increase over fiscal year 1990.

The Biden plan, more ambitious, would cost $14.6 billion.

Though Bush has emphasized the need to attack both the supply and demand sides of the drug crisis, the budget for 1991 continues to direct federal dollars more toward law enforcement and interdiction than use reduction.

Details of the Bush-Bennett package have been surfacing for weeks and, as expected, it sought an increased role for the military in drug interdiction, with spending set for $1.2 billion to pay for a more active role in detecting and intercepting drugs shipments along U.S. borders and in the Caribbean.

It also set aside $151 million to hire more FBI and Drug Enforcement Administration agents, recommended more prosecutors and judges, and recommended the designation of New York, Los Angeles, Miami, Houston and the Southwest border as ''high-intensity drug-trafficking areas'' eligible to divvy up a meager $50 million in new funds.

#90025u1802 01/25/1990 ~United Press International

BRUSSELS (JAN. 25) UPI - The European Commission, concerned that consumers feel "duped," said Thursday it would launch an independent probe of wide variations in auto prices in Western Europe.

A study released this month by the European Bureau of Consumer Unions showed a huge divergence in pre-tax car prices among the 12 nations of the European Community.

For example, prices in Ireland, Italy, and Spain were found to be 45 percent to 49 percent higher than in Denmark, with costs in Belgium and Holland in the middle.

"Consumers have the impression of being duped," said Karel Van Miert, the EC commissioner for transportation policy. He said the commission would undertake a "thorough inquiry" of car prices and take the "appropriate measures" if the consumer group's findings are verified.

Those findings fly in the face of Western Europe's pet economic project, 1992, in which the European Community's 320 million people are to be considered a single market by the end of that year, guaranteeing the free flow of goods between the 12 member states.

Although great progress has been made to harmonize technical specifications, Europe's dreaded value-added tax still varies widely by country, resulting in huge discrepancies in consumer prices for highly taxed goods like automobiles. In 1985, the commission recommended that price variations for autos not exceed 12 percent.

"What we found was that after an initial period of price convergence, the prices began again to drift further apart," said Tony Venables, director of the consumer organization.

He said his group would file a formal complaint with the commission next week, alleging not only price discrepancy but also the refusal of many dealers to sell to people from other EC countries or to honor warranties on cars bought elsewhere in the European Community. "The 1992 program says there should be an absolute right for people to buy cars at the most attractive prices in the Community," Venables said.

Automobile distribution networks in the EC have been granted an exemption to the Community's antitrust rules, providing that prices do not vary widely. One remedy available to the commission, a spokesman said, is to withdraw the exemption if the consumer group's charges are upheld.

"When one sees how most car manufacturers and garage owners eagerly pass on to the consumers the costs of equipment like air pollution controls, one can only deplore that they don't show the same enthusiasm to give the consumers the benefts of the single market," Van Miert said.

#90025u1804 01/25/1990 ~United Press International

WARSAW, POLAND (JAN. 25) UPI - The Communist Party agreed Thursday to draw up a list of all its buildings and properties by mid-February in response to a government request, the Polish news agency PAP said.

Besides agreeing to the Feb.15 deadline for the list the party also promised to present information on its giant publishing house, RSW Prasa by Feb. 28.

Representatives of the party's Central Committee met with representatives of a government commission investigating the legal status of the vast assets of the party and its affiliated youth organizations.

''Understanding the social needs as well as the aims of the commission, the representatives of the Central Committee declared their will to cooperate with the commission,'' PAP said.

The commission was set up Wednesday by the government of Solidarity Prime Minister Tadeusz Mazowiecki to work out procedures for reclaiming state

property that has been under control of the communists for decades.

A bill before Parliament proposes outright confiscation of all party assets, whose extent has never been publicly revealed.

In Hungary, the Communist Party, which was dissolved in August, is in the process of turning over its assets to the government.

Meanwhile, the occupation of party properties continued. About 40 members of the nationalist Confederation for an Independent Poland and a youth group occupied the party building in the southern city of Tarnow.

KPN demanded that the building be turned over to the city, that communist President Wojciech Jaruzelski resign and that all party property be confiscated.

The Tarnow incident was the latest of a wave of similiar occupations across Poland.

#90025u1819 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - A Senate committee chairman warned Agriculture Secretary Clayton Yeutter against undue criticism of environmental activists Thursday but Yeutter said he is not obligated to offer "an olive branch" to unreasonable groups.

In the past several months, Yeutter has warned farm industry groups to expect environmental meddling in farm programs. At a hearing on groundwater policy, Agriculture Committee Chairman Patrick Leahy, D-Vt., urged Yeutter to avoid divisive tactics.

"It takes two to tango," Yeutter replied. "I expect sensible, reasonable, rational proposals to emanate from the so-called environmental community if there's to be an olive branch from me or anyone else."

As an example of irresponsibility, Yeutter renewed his charges that use of the fruit-ripening chemical Alar was attacked a year ago "without scientific basis." Apple sales plummeted and the chemical eventually was withdrawn from the market. Yeutter claimed one group, which he declined to name, wants to eliminate use of all pesticides by 1995.

"The secretary of agriculture cannot be intimidated by folks who take positions that do not make good sense from the standpoint of American farmers," Yeutter said.

Leahy encouraged Yeutter to look for ways to achieve a consensus on federal policy, warning, "You don't divide and conquer." He said it was

wrong to claim that environmentalist favored "needless and unwanted" farming regulations. Agricultural chemicals have been identified as a leading source of contamination in groundwater.

Yeutter and William Reilly, head of the Environmental Protection Agency, told the Senate Agriculture Committee to expect "significant" funding for groundwater research in the fiscal 1991 budget, due for release next week. Yeutter said there would be "a healthy increase" in the funding at his department. Groundwater research was given $155 million this year.

Reilly said an EPA task force was studying groundwater protection issues but has not completed its work. "I am not prepared to say if we do or do not need additional legislation in this area," he said.

But Reilly told the panel, "This year, we will propose a 'restricted use rule' to identify pesticide products ... due to the pesticide's potential to contaminate ground water." Such a rule would mean the pesticides could be handled only by trained applicators.

Yeutter said research and efforts to show farmers how to voluntarily adopt methods that protect water supplies was a better approach than new regulations, although he agreed more rules are inevitable.

Leahy said studies that show increasing contamination demonstrate that action is needed. "No comprehensive legislation has been developed to address the threat of groundwater pollution," Leahy said. "As we begin discussing the 1990 farm (policy) bill and other ground water legisltion, we are armed, perhaps for the first time, with enough information to move forward with a federal response."

#90025u1844 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - President Bush proposed a $1 billion aid package Thursday to help rebuild battle-scarred Panama and its crippled economy in the aftermath of the U.S. invasion that toppled Gen. Manuel Noriega from power.

''The economic challenges that Panama faces are great,'' Bush said in announcing the Panama initiative at a White House news conference, ''but we will work with the people to build a prosperous democratic nation.''

Vowing to work with Congress ''to ensure its prompt implementation,'' Bush said the plan would provide about $500 million in humanitarian assistance and an additional $500 million for public investment and economic restructuring.

The plan, comprising direct aid - some of it drawn from other programs -

as well as loans, loan guarantees and export incentives, was announced on the eve of a fence-mending and show-the-flag trip by Vice President Dan Quayle to Honduras, Panama and Jamaica.

Its combination of cash, credits and trade benefits to jump-start the Panamanian economy reflects budget realities at a time when a wave of democracy is increasing competition for U.S. economic assistance.

President Guillermo Endara, who was installed by the U.S. ouster of Gen. Manuel Noriega, appealed Jan. 18 for a ''generous amount of aid'' to rebuild an economy badly battered by corruption, capital flight and U.S. sanctions.

Although he attached no dollar figure to his request, Endara was reported to be seeking $1.5 billion from the United States alone. U.S. officials are looking for additional support to come from Japan and Western Europe.

Bush said he had spoken earlier in the day by telephone to Endara, who ''seemed very pleased'' with the offer of assistance. Bush said he asked to be informed of any other ways the United States can be of assistance.

Estimates of the total amount of foreign assistance Panama will need to place its economy back on track go as high as $2 billion. A joint U.S.-Panamanian task force estimated the costs from the U.S. invasion alone at $600 million.

Long-term recovery will require a return of foreign investment and capital driven from Panama by the political turmoil that existed under Noriega, particularly while the United States was trying to force him from power through economic strangulation.

Meanwhile, however, Bush described his aid package as ''a very good'' first step.

''Whether it's the last step or not, I don't know,'' he said. ''We've got to see how that private sector responds to how the economic recovery goes forward. But I woulnd't say this is the end of the road in terms of what we can do to help them.''

#90025u1848 01/25/1990 ~United Press International

BOSTON (JAN. 25) UPI - Massachusetts security regulators Thursday moved to shut down a New York-based penny stock brokerage firm and announced plans to issue tough new regulations governing the unlisted, low price stocks.

The securities division requested a cease and desist order against J.T. Moran & Co., a New York firm with offices in Boston and Wethersfield,

Conn., along with brokers John C. Gaudio and Kevin T. Grennan.

The complaint filed by Secretary of State Michael Connolly cited six different sales of unregistered stock, including the bankrupt City Gas and Transmission Co., by a firm that failed to meet minimum net capital requirements. Penny stock is usually sell for less than $1 a share, although it may rise above $10 after its initial offering due to heavy brokers' promotion.

The firm was also charged with failing to inform Massachusetts of the failure to meet the capital requirements, a disclosure that was made to the federal Securities and Exchange Commission.

The complaint seeks to prevent the firm, which ceased operations Jan. 16, from re-opening in Massachusetts. "The inquiries we placed to their office I believe had a direct link to their actually ceasing operations," said Connolly. Efforts to reach company officials for comment were unsuccessful.

Connolly said the complaint highlights the growing problem of penny stocks low price, unlisted securities usually sold over the telephone without the benefit of written contracts or disclosure forms.

"We stand incredulous that people invest based on a cold call from someone they don't know, and they do it without signing a written contract," said Connolly.

He cited a new national report that projects penny stock sales as one of the emerging telemarketing schemes of the 1990s. The North American Securities Administrators Association estimated phone scams will cost American consumers $10 billion annually, roughly $2 billion involving penny stock fraud.

The Massachusetts regulations, slated to take effect in mid-February, would require brokers to make sure their customers know the true market price of the stock, the company's financial condition and any potential conflict of interest with the broker or dealer selling the security.

The regulations would also allow Massachusetts to revoke the license of any company that attempts to sell unregulated penny stock in Massachusetts even if the calls are made from another state.

VONORE, TN (JAN. 25) UPI - Ford Motor Co. will build an auto glass plant in a joint venture with the Japanese, creating 400 jobs with an annual payroll of $10 million in eastern Tennessee, company executives announced Thursday.

Japan's Central Glass Co. will own 51 percent of the new Carlex Glass Co., which will make windshields and windows for one million automobiles a year at a $95 million plant at Tellico Lake. Construction on the 350,000 square-foot factory will begin in March with completion in late 1991.

Carlex, with 400 employees and an annual $10 million payroll, is the second and largest U.S.-Japanese automotive parts venture to locate in the Tellico Reservoir Industrial Park in the last two years.

"Joint ventures are becoming popular as Americans take advantage of Japanese manufacturing technology," said Charles Hall of the Tellico Reservior Development Agency, which lured the venture to Tennessee.

Japanese companies Koyo and Matsushita operate plants at Tellico Lake along with U.S.-owned Sea Ray and Cobia boats. Koyo is building an $80 million automotive parts plant with Cleveland-based TRW.

"Carlex will certainly generate hundreds of thousands of dollars in taxes and millions in wages and supplies," said Larry Colaw of the development agency. So far, 400 acres have been sold for commercial use in the

industrial park, putting more than 2,000 people to work, Hall said.

Hall said Carlex officials chose Vonore over several other sites because of existing Japanese and U.S. auto factories in Smyrna and Spring Hill, Tenn., and in Kentucky and the availability of inexpensive land and labor. There are more than 80 Japanese-owned plants in Tennessee accounting for 16,000 workers and $2.7 billion in investment.

#90025u1865 01/25/1990 ~United Press International

(JAN. 25) UPI - China is warning the Senate NOT to follow in the footsteps of the House when it votes today on overriding a presidential veto of a bill to allow Chinese students to stay in the United States. Beijing blasted the House for overturning President Bush's veto yesterday, saying the law is certain to harm U-S-Chinese relations should it become law.

On Capitol Hill, an intense lobbying effort is under way as the White House tries to convince senators to uphold the veto. Senate Republican leader Robert Dole predicts Bush's veto will be sustained.

The Soviet Union is moving to restore order in strife-torn Azerbaijan. The Soviet interior minister says a curfew may be lifted soon in the capital of Baku. However, a three-day general strike continues, leaving industrial plants idle in the Soviet Union's fifth largest city.

Soviet ships reclaimed control of sea lanes in Azerbaijan as vigilantes battled Red Army troops at their barracks in Baku, killing two soldiers. The Soviet news agency Tass says the killings bring the death toll to 95 in six days of fighting,

East German opposition groups are meeting today to talk over Prime Minister Hans Modrow's reported offer to temporarily resign from the Communist Party. Opposition leaders are expected to respond tomorrow to

Modrow's offer to leave his party if the opposition joins his troubled government.

Officials now say as many as 21 people were injured when a tornado hit a trailer park in southern Alabama early this morning. Officials say the twister destroyed eight mobile homes and damaged several others... as well as blowing apart chicken houses and downing trees and power lines.

-30- 1849

#90025u1873 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - The Senate voted Thursday to support President Bush on a sensitive foreign policy issue by upholding his veto of a bill guarding against forcing Chinese students to return home to face political persecution.

The vote was 62 to 37 to oppose Bush's veto. The Senate needed 66 votes to override the veto.

The House rejected the veto in a 390-25 vote Wednesday.

The only senator who did not vote was Sen. John Breaux, D-La., who was absent because of the death of his mother.

''No Chinese student in this country is going to be sent back against his or her will,'' Bush told reporters at the White House shortly after the Senate vote, ''and we will continue to urge the Peoples Republic of China to recognize the human rights of its citizens, to participate in the affairs of the world community,''

The president had ''personal thanks'' to GOP leaders ''who led this effort with courage and determination.''

China had criticized the House, warning of ''certain harm'' to Sino-U.S. relations should the legislation become law. It urged the United States ''to take prompt and effective measures to prevent deterioration of the situation.''

Sen. Alan Simpson of Wyoming, the deputy Republican leader, charged before the vote the Democrats were trying to sacrifice America's foreign policy interests for their political gain.

'''Our foreign policy should not be a salve for our own offended sensibilities, a mechanism for making us feel noble and true,''' Simpson quoted Richard Nixon, who reopened relations with China in 1972 after a generation of Cold War rhetoric and hostilities.

The bill would have put into law guarantees that Chinese scholars would

not be forced to return home, where they say they faced political persecution by the leaders who crushed the pro-democracy movement last year.

Bush condemned the atrocity but said he did not want to isolate China while seeking political moderation in Beijing and trying to stabilize the strategic relationship opened by Nixon.

The president said the bill was was unnecessary because he was already provided protections through an executive order and that the legislation would have upset U.S.-Chinese relations.

Bush secured his victory by holding 37 of the Senate's 45 Republicans.

Senate Democratic leader George Mitchell of Maine, a fomer federal judge, argued the executive order could be easily reversed unless written into law.

''This is a serious, legitimate legal question,'' Mitchell said. ''There is only one way to deal with this - change the law.''

Simpson said that was not the real dispute.

''Whoever says this president is returning Chinese students to a situation of insecurity and fear for their safety is misleading you, either intentionally, or unwittingly, or lying just a tad,'' Simpson said.

Sen. Edward Kennedy, D-Mass., mocked Simpson's charge that the issue is riddled with ''narrow, mean politics, grubbing to fund-raisers. that's hogwash.''

''This is a referendum on fundamental issue of human righrts,'' Kennedy said.

Sen. Alan Cranston, D-Calif., said it was not the desire of any Democrat to inflict a political defeat on Bush, and noted that all but 25 Republicans in the House voted to overturn the veto Wednesday.

''We are concerned with a foreign policy issue that relates directly to the concern and fate of these students,'' Cranston said. ''Our desire is to make sure they are protected to the best of our ability.''

Senate Republican leader Robert Dole of Kansas delivered a harsh, politically cutting closing statement.

''''If you don't believe the president of the United States, you ought to stand up and say so,'' Dole said of doubters that Bush would allow Chinese students to return home to face political persecution.

#90025u1886 01/25/1990 ~United Press International

SALEM, OR (JAN. 25) UPI - A 7-year-old boy taken from his natural parents because of child abuse was in fair condition Thursday suffering from burns authorities said were inflicted by his carefully chosen adoptive parents.

Marion County sheriff's deputies arrested cabninetmaker Andrew Kerp, 37, and his wife, Diane, 30, Tuesday on charges of criminal mistreatment and assault.

Authorities said the couple disciplined their adoptive son Sunday night for failing to complete some arithmetic problems, forcing him to stand naked from the waist down close to a fireplace.

The boy was hospitalized Monday with second-degree burns on his legs and buttocks.

Officials of the Oregon Children's Services Division say the boy was taken into state custody because he was abused by his natural parents. The Kerps were allowed to adopt him Dec. 12.

CSD supervisor Sharon Gustafson said the Kerps underwent an extensive background check and several interviews before they were allowed to adopt the child. They were chosen over two other couples as the best parents for the boy.

''It seemed like a fine, sincere couple who could handle one of our children,'' said Gustafson.

The Kerps were released from jail and declined interviews. But a brother of Mrs. Kerp, Duane Klopp, said the boy was burned when he voluntarily stood by the fire in his underwear.

CSD spokeswoman Alice Galloway said the Kerps' 5-year-old daughter was also taken to a shelter after case workers found bruises on her body.

The Kerps face a hearing Thursday on the custody of their daughter, and are scheduled for arraignment Feb. 13 on the child abuse charges.

#90025u1889 01/25/1990 ~United Press International

PITTSBURGH (JAN. 25) UPI - Financially troubled Allegheny International Inc., maker of Sunbeam and Oster appliances, has offered to pay 60 headquarters workers a total of $400,000 in bonuses to stay through its bankruptcy reorganization.

The bonuses would be offered to employees in addition to severance payments that were limited by a federal bankruptcy judge, according to company documents. The plan has not been submitted to U.S. Bankruptcy Court for approval nor reviewed with AI's creditors, who are owed more than $740 million.

AI Chairman Oliver Travers lost half his headquarters staff in two years since the company filed for Chapter 11 bankruptcy. Travers wrote employees in a letter that the bonuses are to give financial security to employees nervous about losing jobs in the reorganization.

The letter said employee who stay with AI until June 30 or are fired before that date are eligible for two monts' salary and severance pay. Workers who accept a job with the company after restructuring are not eligible, the memo said.

June 30 is the date by which AI expects to emerge from bankruptcy if its reorganization plan is not derailed. All AI 60 remaining full-time employees at headquarters are eligible for payments, said company spokesman Edward Romanoff. Some "key employees" are also eligible for addition money because the company believes they occupy critical positions he said Wednesday.

Romanoff defended the bonus plan as a modest one, noting that Donaldson, Lufkin & Jenrette Securities Corp. of New York had planned to pay $5 million in similar bonuses had it acquired AI last year.

#90025u1890 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - Democrats on a House panel studying gun control legislation Thursday denounced a Justice Department plan to prevent felons from buying firearms as unrealistic and unworkable.

Calling the country's homicide rate ''a national shame,'' Rep. Larry Smith D-Fla., said the Justice Department proposal to have gun dealers check purchasers for criminal records using a touch-tone telephone system was ''unrealistic.''

''That technology doesn't exist today,'' said subcommittee chairman Rep. William Hughes, D-N.J.

The Justice Department proposal came in response to legislation included in the Anti-Drug Abuse Act of 1988 requiring the attorney general's office to develop a system for ''immediate and accurate identification of felons who attempt to purchase firearms.''

Under the plan, gun dealers would use a touch-tone telephone to tap into computerized state and federal criminal records at a central location in each state. If the computer raised a red flag on a given name, the purchaser would have to undergo further verification before receiving permission to buy a gun.

Assistant Attorney General Edward Dennis told the subcommittee the department considers the telephone system the most viable for ''immediate'' verification until a cost-effective way can be found for gun dealers to use on-the-spot fingerprinting for identification.

It is already a federal crime for a convicted felon to purchase a firearm. Rep. Bill McCollum, R-Fla., also a member of the Judiciary subcommittee, wrote the 1988 legislation aimed at verifying the criminal records of gun purchasers.

But Hughes accused McCollum of backing on-site verification ''basically as a way to fight the Brady Amendment,'' a proposal that would require a seven-day waiting period for anyone to buy a gun.

In addition to complaining that the telephone-computer idea is currently not feasible, Democrats said federal and state records on felon convictions are too incomplete to make it workable.

''We're not going to be able to set up this kind of system, and if we do set up a system it's not going to be able to weed out the people it's aimed at,'' Smith said.

''If we don't do something about making it a little harder to get a gun, the slaughter will continue,'' Smith said.

Noting felons are likely to circumvent legitimate gun dealers to obtain firearms, Smith said a waiting period would more likely lower homicide rates because about half of slayings are committed during domestic disputes by people with no police record.

Smith said Congress has been afraid too long of the powerful National Rifle Association, ''and they don't want anything to do anything about anything.''

''What's another seven days?'' Smith asked. ''When are we going to have the guts to stand up and do this?''

#90025u1906 01/25/1990 ~United Press International

SRINAGAR, INDIA (JAN. 25) UPI - Thousands of troops poured into the violence-torn state capital of northern Jammu and Kashmir state Thursday

hours after a Moslem radical gunman killed four Air Force servicemen and wounded 10 others.

Authorities imposed a virtual news blackout and attempted to prevent journalists from reporting on the tense situation in Srinagar, 400 miles north of New Delhi, by closing public telephone and telegraph offices.

Thousands of Indian troops and hundreds of trucks entered the state capital city during the day - the eve of Republic Day, a holiday that commemorates the 1950 adoption of the Indian constitution.

The government feared pro-secession Moslem fundamentalists who want the state to secede from India would use the holdiay to unleash a day of violence.

Kashmir is a predominately Moslem state of India that has been claimed by both Hindu-dominated India and neighboring Moslem Pakistan. The region is currently divided, with the majority of it ruled by India, but most of Kashmir's 3 million Moslems want to secede from Indian control.

The Jammu and Kashmir Liberation Front, the most popular of the underground groups engineering the drive for Kashmir's independence, urged supporters to fly black flags, burn copies of the Indian constitution and flag, shut off power supplies and boycott official Republic Day celebrations scheduled for Friday.

Thousands of combat-ready troops, armed with assault rifles and machine guns took up positions throughout the city Thursday, with soldiers deployed every 10 feet along the main roadways.

They had orders to shoot on sight anyone caught violating a curfew that was slapped on the region to curtail violence that has claimed more than 50 lives since the weekend.

A government official, speaking on condition of anonymity, said a gunman toting a Chinese-made assault rifle fired on the group of Air Force personnel about 7:30 p.m. as they waited for a bus along the side of a road near the Srinagar airport.

The official said the gunman fired from the pillion seat of a motorscooter as it raced by the group, raking the servicemen with gunfire and killing four before speeding off.

Security forces cordened off the area and launched a search but no arrests were announced.

Afterward, the city resembled an armed camp. Cars were stopped in the city's intersections and searched for weapons.

As evening descended, Moslem radicals sounded a cachphony of calls for independence, shouting anti-government slogans that echoed across the city from loudspeakers on mosques for the second night in a row.

Foreign reporters were confined to their hotel rooms, a measure district magistrate Ghulam Abbas said was for their own safety.

''You will be arrested, if you leave the hotel,'' a senior police officer said to foreign correspondents staying in the Broadway Hotel.

Governor Jagmohan, who took control of the state last week on behalf of New Delhi, said in a message broadcast on public television and radio, that authorities had learned of militant plans for violence on Friday.

''If any loss of life takes place, the responsibility will lie solely with the mischievous and misguided elements,'' he warned.

Dozens of youths gathered early Thursday on street corners in the city of 800,000 when the curfew was relaxed, trading rumors, staging small demonstrations, and taunting security forces with cries of ''Indian dogs go back.''

About 50 people chanted ''We want freedom'' near a bridge in the Gallkadal area, where numerous residents charged that security forces had opened fire Saturday night on a procession of thousands of peaceful demonstrators.

''Without any provocation they opened fire,'' said 35-year-old businessman Ghulam Nabi Khan.

Residents claimed some 200 people died and that authorities disposed of most corpses in secret, but the reports could not be immediately verified.

The movement toward secession is widely supported by Moslems in Kashmir, who claim India reneged on promises after the 1947 partition of the subcontinent to allow them to decide on whether to remain part of the country, join neighboring Islamic Pakistan or become independent.

They also charge that the overwhelmingly Moslem region has been neglected for years by the Hindu-dominated government of India.

#90025u1917 01/25/1990 ~United Press International

(JAN. 25) UPI - The Bush administration and Congress are consulting on an aid package for Panama to be announced today. Officials say the assistance may involve as much as one-BILLION dollars to help Panama get back on its feet. A task force has estimated the U-S invasion alone cost Panama's

economy 600-Million dollars.

Police in New Haven, Connecticut, arrested a 10-year-old boy on drug charges after officials at a private Catholic school allegedly saw the youth offering to sell marijuana to other children. Police say the boy told them he got the pot from a relative.

The Florida state Supreme Court delayed indefinitely the execution of Judy Buenoano, dubbed by prosecutors the ''black widow'' killer. Buenoano had been scheduled to die in the electric chair tomorrow for the 1971 poisoning death of her husband. She was also convicted of killing her invalid son and trying to kill a boyfriend.

The International Association of Machinists is joining two other United Airlines unions to support an employee buyout of parent company, U-A-L Corporation. Unitil now, I-A-M has opposed any employee buyout plan requiring concessions. The union changed its stance when Coniston Partners the firm's largest shareholder, demanded a recapitalization.

Police say a retired Knoxville, Tennessee, policewoman killed her husband and then turned the gun on her retarded son. Dorothea Sweeten held police at bay for two hours yesterday before police managed to overpower her. Police say the woman wrote a suicide note saying she killed her husband to end years of abuse.

LUVERNE, AL (JAN. 25) UPI - A pair of tornadoes ripped through rural south Alabama early Thursday, destroying a mobile home park and sending 28 people to the hospital, including three young brothers with critical head injuries.

Officials at Humana Hospital in Montgomery said Eric Thompson, 7, was listed in critical condition and was still being evaluated in the emergency room. His brothers, Quentin, 4, and Demario, 3, were in intensive care in critical but stable condition.

The three were among those injured when two tornadoes tore through a rural area about 30 miles south of Montgomery around 6:15 a.m. The first tornado cut a swath about eight miles long and 100 yards wide, destroying eight mobile homes in an unnamed trailer park in the Fullers Crossroads area.

''The frames were bent and debris was scattered miles out in the woods,'' said Lee Helms, operations director for the state Emergency Management Agency. ''They're totally destroyed. It's amazing that there were no more serious injuries or deaths because the mobile homes were completely gone.''

Officials said a second tornado took a parallel path about three miles long and 200 yards wide, damaging mostly farm buildings.

In all, officials said the two twisters destroyed nine mobile homes and eight chicken houses. Another mobile home and a travel trailer suffered major damage and two mobile homes and four houses received minor damage. Thirteen farm buildings suffered various degrees of damage, Helms said.

Nancy Williams, social services director at Crenshaw County Hospital, said 28 people, including 13 children, were treated for injuries.

''There were a lot of children involved in this,'' she said. ''Most of them have gone home. We had one broken collarbone on a small child and a lot of lacerations and stitches, but no fatalities.''

Only about 10 people remained hospitalized Thursday afternoon and Williams said most would be released by Friday. She said one of those who was still in the hospital Thursday afternoon was the mother of the Thompson brothers.

Another of the people hospitalized had suffered a back injury when he lifted part of a mobile home under which several children were trapped, Williams said. Officials said wreckers had to be used to lift debris off other victims.

Helms said about 100,000 chickens were killed when the poultry houses were destroyed. He said health officials and county crews were helping farmers remove the carcasses to the county landfill.

Helms said the American Red Cross had established a shelter in the basement of the county courthouse in Luverne for those left homeless by the twisters. He said state welfare officials would work with the families to help them find permanent housing.

#90025u1924 01/25/1990 ~United Press International
WASHINGTON (JAN. 25) UPI - Members of Congress, saying the nation's unemployment compensation system is outdated and insufficient, introduced overhaul legislation Thursday that includes raising federal unemployment taxes.

The bill, sponsored by Reps. Sander Levin, D-Mich., Donald Pease, D-Ohio, and Thomas Downey, D-N.Y., would increase the federal unemployment taxable wage base by 43 percent from the current $7,000 to $10,000 in 1993.

It also will allow the federal unemployment tax rate to drop by 25 percent in 1991.

Downey, citing a new report by the Congressional Research Service that warned of ''potential trouble ahead'' in state unemployment compensation programs because unemployment benefits have grown more rapidly than unemployment taxes, said the increases are necessary to avoid a collapse of the system during bad economic times.

''We can pay additional unemployment taxes now during good economic times, or we can pay more unemployment taxes later when we have another recession '' Downey said. ''If we are to have an effective counter-cyclical unemployment compensation program, taxes must be low during bad times and relatively higher during good times. Unfortunately, we have been doing the opposite.''

Pease said the bill also requires the use of a more realistic measure of a state's unemployment level when determining eligibility for extended benefits.

''The present system considers a state's overall unemployment rate to determine whether it qualifies for extended benefits,'' Pease said. ''In many cases, benefits have been denied because the overall unemployment level isn't high enough in spite of pockets of extremely high unemployment in that state.''

The legislation would also expand eligibility for full unemployment compensation benefits to newly discharged military personnel.

Levin said a key provision of the bill requires states to address the problems of the unemployed who run out of their 26 weeks of benefits without finding a job.

''First, all the research shows that the longer someone is out of a job, the harder it is to find one,'' Levin said. ''Second, those who need retraining have to have something to live on while they are in school. Unemployment compensation can provide that support, but only if we get to those who need help early.''

Levin said the loss of a job increasingly means that a person will have to change careers, unlike the short-term unemployment that was commonplace in the past.

''Our unemployment comp system is not geared for today. It is shaped for yesterday,'' Levin said.

The congressmen acknowledged that their proposed legislation would be blasted by many with the argument that workers would be hurt by paying higher unemployment taxes, but said it is better to do so now with the current low level of unemployment - 5.3 percent - than to raise taxes during recessions.

Downey noted that in 1977 the federal unemployment tax rate was increased by 40 percent when the unemployment rate was 7.1 percent, and by 14 percent when the unemployment rate was 9.6 percent in 1983.

''As far as the tax side is concerned, it all comes down to one word - timing,'' Downey said. ''We're prepared to live with the theoretical consequences of a wage base increase.''

WASHINGTON (JAN. 25) UPI - The chairmen of the Senate and House Budget Committees presented competing deficit reduction proposals Thursday to replace the Gramm-Rudmann balanced budget law that both said is a failure.

Senate Budget Committee Chairman James Sasser, D-Tenn., proposed slashing Social Security payroll taxes $17 billion a year, but only if Congress removes the growing Social Security surplus from deficit calculations and cuts the deficit $30 billion a year for seven years.

Doing so would produce an $18 billion budget surplus by fiscal year 1997, he said, and would reduce Social Security taxes about $600 a year for the average worker and employer.

Sasser told reporters at a news conference that while he is "not prepared" to endorse the controversial Social Security tax cut bill introduced Tuesday by Sen. Daniel Moynihan, D-N.Y., he credited Moynihan with inspiring his plan.

President Bush, who is scheduled to present his fiscal 1991 budget to Congress next week, rejected the Moynihan plan and charged it is part of a plot to either cut benefits for the elderly or force another tax increase.

At a separate news conference, House Budget Committee Chairman Leon Panetta, D-Calif., outlined a "pay as you go" deficit reducution plan that also would dump Gramm-Rudman and replace it with what Panetta called a slower but more honest balanced budget schedule.

Panetta's plan, which aims to balance the budget by 1998, cuts the deficit $30 billion a year through fiscal 1993 and then at $20 billion a year until it disappears. He said in an interview he does not like Sasser's approach. "The payroll tax issue, once you remove Social Security (from deficit calculations), ought not to be tied to the budget process," Panetta said.

Panetta said his plan would freeze spending at this year's levels and require that any increase in spending - even to offset inflation - must be paid for by a corresponding spending cut elsewhere, by a tax increase or with additional money the government collects each year from existing taxes.

Tax cuts that reduce revenue - such as President Bush's call for a lower capital gains tax rate, which loses money in later years, or Democratic proposals for renewed tax-deductible IRA accounts - also would have to

have their costs offset, he said.

Panetta said the only exception would be for annual Social Security cost of living increases geared to inflation. All other spending increases or revenue losses would have to be on a "pay as you go" basis.

Sasser said he would replace Gramm-Rudman's "negative inducements" to cut the deficit with the positive inducement of a payroll tax cut if $30 billion in real deficit savings was obtained each year.

The 1985 Gramm-Rudman law requires across-the-board spending cuts, split evently between defense and domestic programs, if annual deficit targets are missed. The threat of automatic cuts was designed to ensure that Congress and the administration would meet the targets.

But last year, a deadlocked Congress failed to meet its $100 billion Gramm-Rudman deficit target by Oct. 15, forcing $16 billion in automatic cuts. Congress and the administration finally agreed to four months and one week worth of automatic cuts as the only way to reach the target.

"Gramm-Rudman simply has not been working," Sasser said, noting that lawmakers have evaded the budget limits with bookkeeping gimmicks and one-time savings schemes, such as shifting a pay date from one budget year into the next.

SANTA ROSA, CA (JAN. 25) UPI - Francis Ford Coppola, director of ''The Godfather'' and ''Apocalypse Now,'' and his Zoetrope Productions, filed for bankruptcy protection Thursday in federal court.

San Francisco-based Zoetrope Productions, listing $28.8 million in debts and $22.1 million in assets, sought protection and reorganization under Chapter 11 along with Coppola.

The filings allow Coppola and Zoetrope to put creditors on hold while the firm reorganizes and tries to find new financing.

Coppola's personal filing, doing business as Sophia Properties and Niebum-Coppola estates, does not list assets and debts.

A related Coppola company, Hollywood General Studios, filed for voluntary bankruptcy in 1983 in Los Angeles.

Among the largest creditors listed for Zoetrope were Hot Weather Films/Ponyboy at $16.2 million, Orion Pictures of Los Angeles, $6.2 million and Zoe Corp. at $2.8 million.

Coppola listed a debt of $3 million to Darion Development of Los Angeles in his filing.

Zoetrope started out as American Zoetrope, formed by Coppola and director George Lucas.

It ran into serious financial trouble before Coppola made ''The Godfather '' a smashing success that kept the company alive.

Coppola followed with ''Godfather II,'' which claimed seven academy awards including best director and best picture.

He also made ''Apocalypse Now,'' delayed in release by huge budget costs in 1979.

Coppola is also know for such films as ''American Graffiti,'' which he produced in 1973, and ''The Conversation,'' with Gene Hackman in 1974.

#90025u2000 01/25/1990 ~United Press International

LONDON (JAN. 25) UPI - A blinding storm lashed the British Isles Thursday with snow, rain and hurricane-force winds, felling trees, blasting roofs off buildings and leaving at least 33 people dead in various weather-related accidents.

Police and news reports said winds of more than 100 mph caused disruptions across Britain. Downed utility poles interrupted telephone and electrical services in several areas and wind-blown debris and rain-slick road made driving hazardous.

Authorities advised the public to remain indoors and suspended all ferry services across the English Channel because of rough seas.

Independent Radio News said civil authorities around the country reported at least 33 fatalities related to the storm, which meterologists said was the worst to hit the nation since a 1987 hurricane.

The station said reports were still coming in and the toll would probably rise.

''This one is a real bad one,'' said Coast Guard spokesman Peter Baker as slates flew off the roof of his office at the port town of Falmouth. ''It's quite dangerous just to step outside the door.''

An aviation official said that while many flights had been delayed, services were not interrupted at the main international airports of Heathrow and Gatwick.

Meterologist Nigel Gate of the London Weather Center predicted the rains and high winds would diminish overnight, but reported northern Scotland and Ireland would be hit by frost and gales.

London transport officials cancelled many double-decker bus services, closed all main train stations except Victoria and reduced the underground railway schedule. Police imposed a 30 mph speed limit on motorways around

London to curb a spate of accidents caused by slippery roads, fallen trees and flying debris.

Many office workers left for home early to avoid being stranded by the reduced transport services.

Independent Radio News said the dead included two schoolchildren, one killed when the roof collapsed in her classroom in the west country town of Swindon. A policemen was killed by flying debris and an elderly woman died in London when a wall fell on her as she waited for a bus, the radio said.

The British Broadcasting Corp. reported that shards of glass from shattered windows injured 14 children in their classroom in Totton town, near the hard-hit coastal city of Southampton.

It said more than 1 million people were without power. Winds flipped over two trucks in southwestern Cornwall and tore the roof off a hotel, trapping dozens of guests, it said.

Independent Radio News reported that 33 people were temporarily trapped inside a plane that blew over at Bristol Airport.

#90025u2008 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - Protections for the spotted owl and ancient forests under a Northwest timber compromise are being subverted by efforts to meet logging levels set by the law, a congressman said Thursday.

Rep. Jim Jontz, D-Ind., a key player in forging the ''timber truce'' adopted as part of the Interior Department spending bill, based his assessment on a weeklong visit this month to national forests in Oregon, Washington and northern California.

The Indiana Democrat appeared before a House Interior subcommittee on parks and public lands for a hearing on the role of land management agencies in dealing with environmental problems.

One focal point of the hearing was the ongoing controversey over logging old-growth forests in the Pacific Northwest, regarded by scientists as among the most biologically rich ecosystems on Earth.

Virtually all that remains of the ancient forests is managed by either the U.S. Forest Service or the federal Bureau of Land Management.

Lawsuits challenging the timber sale practices of those two agencies led to court injunctions placing thousands of acres of federal land off limits to logging in Oregon and Washington for much of 1989.

The resulting shortage of timber led to closures of numerous lumber mills in the region, and industry officials predicted thousands more layoffs in the near future.

Congress stepped in to strike a greater balance between environmental and economic concerns with a compromise package adopted as part of the Interior spending bill.

While sharply restricting court challenges to timber sales, the measure also aims to give greater protection to the spotted owl, shift logging to less environmentally sensitive areas and reduce fragmentation of undisturbed old-growth stands.

The package also includes a modest reduction in the quantity of timber to be made available for sale, but Jontz said that level remains ''much too high.''

Jontz, a member of the House Agriculture subcommittee that oversees national forest policy, said he made the trip to the Northwest to review progress by the Forest Service in implementing environmental provisions of the timber compromise.

''I was dissappointed that its intent is largely being subverted by the extremely high (timber sale quantities) also included in the law, and the belief by the Forest Service that (the package) is 'timber driven,''' he said.

''Repeatedly I was told by ... Forest Service personnel that they were forced to put sales in areas they would prefer to avoid, and that the practical effect ... was not to further the various environmental values ... but to ignore them,'' he said.

Outside the hearing, Jontz added that timber ''cuts are coming out of owl areas ... just the areas we're trying to protect.''

The Forest Service is obliged to meet its Northwestern sale quantity of 7.7 billion board feet set by the law, but that would ''not come at the cost of the environmental sections of the bill,'' said Len Carey, a spokesman for the agency.

Nevertheless, fragmentation of some ancient forest stands is unavoidable because ''90 percent of the (timber) sales in the Northwest are in old growth and a lot of them are in owl habitat,'' he said.

The timber package ''is not going to protect all the owl habitat, but it is going to protect a great part of it,'' he added.

#90025u2011 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - President Bush, discussing the forceful Kremlin

response to ethnic violence in Azerbaijan, said Thursday that the political survival of Soviet President Mikhail Gorbachev is ''really the best hope'' for the West.

Speaking to a group of newspaper publishers at the White House, Bush offered his strongest endorsement to date of how Gorbachev has dealt with civil unrest that has presented an unparalleled challenge to his leadership.

''I wouldn't speculate on totality of survival,'' Bush said when asked to assess Gorbachev's prospects for success or failure, ''but I think we have a lot at stake in continuing to deal with this man.''

Continued unrest in Azerbaijan, where Soviet troops have struggled to prevent all-out civil war, and in Lithuania has spurred speculation of a challenge to Gorbachev by Kremlin hardliners.

And though Bush has suggested Eastern Europe could never return to orthodox communism with ''the genie'' of freedom now ''out of the bottle '' U.S. officials acknowledge the pace and shape of further reform depend on Gorbachev.

Despite the use of Red Army troops, tanks and naval shelling to quell fighting between religious factions in Azerbaijan, Bush said Gorbachev could not be faulted for the problems he faces and has ''done a remarkable job'' in continuing to promote ''peaceful change.''

''It's not for some president of the United States to start saying who he thinks ought to be in that job,'' Bush said. ''But as I look around, I think Mr. Gorbachev is really the best hope for what our interests are.''

For some months, the official U.S. position has been that Gorbachev's reform programs are consistent with Western interests, but that the West should not, in effect, bet those interests on any one individual in the Kremlin.

In the aftermath of the Malta summit and the face of rising nationalist and ethnic tensions, encouraged perhaps by the success of popular democratic movements elsewhere in Eastern Europe, the U.S. approach to Moscow has become more personalized and more closely focused on Gorbachev's fate.

NEW YORK (JAN. 25) UPI - The president of the Federal Reserve Bank of New York told bankers Thursday that financial market safeguards must be widened, including "significantly higher" futures trading margins. But he

urged self-discipline to avoid an unhealthy reliance on such safety nets.

U.S. financial institutions and markets this decade should as a priority move to prevent volatility and market shocks, New York Fed President E. Gerald Corrigan told the New York State Bankers Association. He spoke of "the need to reform and modernize the basic structure of our financial system."

The head of the New York branch of the Federal Reserve, the American central bank, said in particular that financial futures trading margins were set too low, "at least from the vantage point of their role as a financial shock absorbers" in market clearing and settlements.

He noted that the Chicago Mercantile Exchange, where stock futures trading is conducted, was obliged to boost margins immediately following the precipitous Oct. 13 drop in the Dow Jones industrial average. Margins are minimum cash deposits required to establish futures positions.

Corrigan said that "margins should be high enough in the first instance that they don't need to be raised in emergency situations. He added, "the mere fact that margins must be raised in emergency situations suggests that they may have failed to perform their functions."

A "significantly higher margin - perhaps as high as 15 percent or so - is always called for" in the case of the Standard & Poors 500 futures contract traded on the Chicago exchange, Corrigan said.

Corrigan also advocated raising capital requirements for the parent companies of securities firms. He voiced support for Senate Bill 648, which would expand the powers of the Securities and Exchange Commission in overseeing and enforcing regulations in financial markets.

More directly addressing his banker audience, Corrigan said he was "very troubled" by calls to extend federal insurance to deposits made in the foreign branches of U.S. banks. The lack of such coverage obliges banks to exercise prudent enough judgement to retain global clients, he said.

#90025u2067 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - Drug law reform groups Thursday criticized President Bush's revised war on drug strategy as a hoax that will do little to solve the problem, but law enforcement officials called it a ''a game plan that will work.''

On Captiol Hill, reaction was mixed, with Republicans calling the plan ''bad news for drug dealers,'' but mayors on the front line of the war called it ''woefully inadequate.'' Some critics questioned whether Bush was even fighting the right war.

''We believe the president's revised strategy carries forward the simplistic solution of the past 75 years,'' said Eric Sterling, president of the Criminal Justice Policy Foundation. ''Prohibition failed for alcohol. It is failing for drugs and it will continue to fail.''

''Only a sophisticated, carefully developed public health solution will work,'' Sterling said.

The American Civil Liberties Union legislative counsel, Gene Guerrero, also critiziced the plan, saying it is ''a non-solution designed to pander to the fears of America.''

''The war on drugs is creating a major erosion of our rights and nowhere is that more evident than in (the growing use of drug testing) in the workplace,'' he said.

New York Mayor David Dinkins, whose city is one of four designated as a high-intensity drug area, called the proposal ''woefully inadequate.'' Asked to assign a grade to the plan, Dinkins said, ''Whatever grade equates to inadequate.''

Houston Mayor Kathryn Whitmire, whose city also is one of the target cities, also criticized the proposal. ''We appreciate the steps that have been taken but we feel it does not go far enough,'' said Whitmire, president of the U.S. Conference of Mayors, which is holding its annual winter meeting.

Rep. Charles Rangel, D-N.Y., chairman of the House Committee on Narcotics Abuse and Control, welcomed the strategy, but said it was incomplete.

''He's given us pieces of a strategy that is far more than we've ever had '' Rangel said. ''It adds on to the piece that we got initially with the first presentation.

''I think the ball is in the Congress's court. We have to fill in the patches that are there and we have to build up the political courage to say that you can't take care of the problems and the root causes of drug addiction unless you are prepared to give our people a decent education, job skills.''

Sens. Max Baucus, D-Mont., Richard Pryor, D-Ark., and Tom Harking, D-Iowa, all said Bush's plan does too little for rural areas. All three said more Drug Enforcement Administration agents should be allocated to their states.

''We cannot fight the war on drugs if we just isolate it to urban America, so-called high intensity areas,'' said Pryor. ''If they run out of these high intensity areas, where do they go? They go to rural areas, Arkanasas, Montana, Iowa.''

Charles Gruber, chief of police in Shreveport, La., and president of the International Association of Chiefs of Police, however, hailed the plan.

''Like the first strategy issued last September, he said, ''Bennett has given us a game plan that will work.''

He said Bennett's new plan reaches ''virtually every part of the federal establishment that can play a role in our efforts in thh United States to combat the drug problem.''

Rep. Larry Coughlin, R-Pa., ranking Republican on the House drug panel, called the plan ''bad news for drug dealers and good news for the American people.''

Coughlin said the plan ''enhances our capacity to make drug criminals pay for their heinous crimes, provides more help for the drug users trying to break free from the grip of addiction, and supports critical programs to help teach our youth to stay away from illegal drugs.''

But Rufus King, a board member of the Drug Policy Foundation, dismissed Bush's call for the death penalty for drug kingpins as ''political grandstanding.''

''Anyone who looks at the experiences of countries that use the death penalty in drug cases knows that it doesn't deter drug criminals,'' King said.

#90025u2069 01/25/1990 ~United Press International
WASHINGTON (JAN. 25) UPI - President Bush acknowledged Thursday there have been some ''ugly incidents'' but said he would like to think there is no rising tide of racism in the nation.

Bush told a news conference that some civil rights leaders with whom he has been in contact recently do believe there is growing racism in the United States.

''I'd like to think there isn't a rising tide of racism,'' he said, ''but there are some ugly incidents.'' He apparently re- ferred to the recent mail bombs sent to a judge and a councilman in the South.

Bush said he wanted to use his White House platform to speak out against racism.

By JOSEPH MIANOWANY - UPI

WASHINGTON (JAN. 25) UPI - President Bush's win in the Senate Thursday on legislation involving Chinese students followed one of his hardest pushes

to whip Republican senators into line, and he admitted afterward that party politics was a key to his success.

However, the president, speaking immediately after the Senate refused to follow the House and override his veto of the bill, flatly denied he had promised GOP lamakers specific favors in exchange for their votes.

Nonetheless, Bush, who complained Wednesday the Democratic effort to defeat him on the issue was ''crass politics,'' admitted Thursday that ''there was some politics in it - on both sides.''

Republican Party officials, meanwhile, said the showdown was magnified from their point of view because they believed a defeat for Bush in the first week of the new congressional session could have a lasting negative effect and give Democrats the precise ammunition they need to shoot holes in the president's extremely high approval ratings.

''I think there was some politics in it - on both sides,'' Bush said shortly after the Senate sustained his veto on a 62-37 vote. Sixty-seven votes were needed for the override to succeed, but Bush managed to hold 37 of the Senate's 45 Republicans and beat back the Democratic effort.

''Some of them said, 'Look, let's stand with the president,''' Bush said of the GOP senators. ''Clearly there was plenty (of politics) on the other side when you don't see one single vote come across the aisle - not one, not one.''

At stake was Bush's veto of a bill - passed by Congress with virtually no opposition last year - which would have guarded against Chinese students in the United States from being sent back to their home country where they could face persecution.

Bush argued the bill was unneeded because he has already protected the students through an executive order. He contended the measure would be an unneccessary slap at China when the United States should be working to preserve relations with the nation and improve conditions there.

But by the time the override vote came to a head in the Senate Thursday, the issue had mushroomed into a battle over the prestige of the president, who had served as the American envoy to China.

The White House and Bush's best allies in the Senate engaged in a hard-sell to wavering Republican senators, contending the vote was critical to keeping intact the 70-80 percent approval ratings the president has enjoyed for the last several weeks.

Former President Richard Nixon joined the fight for Bush and Republican National Committee Chairman Lee Atwater contacted numerous GOP senators,

arguing, according to one party aide, that Republicans ''cannot let the session open and have Bush questioned.''

Speculation was rampant that Bush might try to win votes with the promise of porkbarrel projects for senators, or threats about how much help they would receive from the White House in coming re-election campaigns. But both Bush and party officials denied any deals were made.

Meanwhile, Senate Democratic leader George Mitchell of Maine argued that his party had no intention of trying to politically embarrass the president on the issue.

''In reality, the politics of it is in the effort to sustain the veto,'' Mitchell said immediately before the vote. ''The argument is not being made (by the White House) about the wisdom of the policy. ... In the Senate, the appeal has been a very direct one to Republican senators - support the president out of personal loyalty.''

#90025u2101 01/25/1990 ~United Press International

(JAN. 25) UPI - Authorities in Alabama say strong winds ripped through a trailer park just after dawn, injuring 28 people- including three children. Authorities say either a tornado or high winds from a thunderstorm hit near the town of Luverne, demolishing eight mobile homes. Two of the injuried children are hospitalized in stable condition.

The latest battle between the White House and Congress is being played out today in the Senate, with Republican leader Robert Dole predicting victory for President Bush. Dole says Democrats are playing politics on foreign policy as they try to overturn Bush's veto of a bill protecting Chinese students against deportation. Dole predicts the veto will be sustained.

F-B-I divers are searching a fishing pond in Enterprise, Alabama, today for clues in mail bombings that killed a federal judge and a civil rights lawyer. The pond is near the home of junk dealer Robert O'Ferrell... whose house and business have been searched during a four-day hunt. Federal investigators are NOT saying whether any evidence has been found.

Winter storms moved into the Midwest today bringing snow and frigid air that broke the spell of mild weather that dominated the region during January. A fast-moving storm hurled winds of up to 40 miles per hour across northern Illinois, bringing the possibility of up to 10 inches of snow.

#90025u2111 01/25/1990 ~United Press International

(JAN. 25) UPI - In Poland, Solidarity founder Lech Walesa, in an interview with U-P-I, says the old Soviet empire is collapsing and predicts a new ''partnership'' of several republics linked with Moscow. Walesa says the breakdown of the Soviet empire began when Soviet President Gorbachev launched a series of UNpredecented political reforms.

An American Heart Association plan to put a seal of approval on foods has drawn fire from the Food and Drug Administration. Acting F-D-A chief James Benson told the association that companies in the ''Heartguide'' food labeling plan may face government regulatory action if the effort begins February 1st. Heart Association head Dr. Myron Weisfeldt says the F-D-A's stance is UNfair to the American public. The plan grants a seal of approval to processed foods that meet fat, cholesterol and salt guidelines set by the heart association.

NEW YORK (JAN. 25) UPI - Stocks closed sharply lower Thursday, with the blue chips slammed down 30 points in the last hour of trading by wave after wave of computerized program selling.

The Dow Jones industrial average, which fell 10.82 Wednesday, sank 43.46 to close at 2561.04.

Among broader market gauges, the New York Stock Exchange composite index closed down 2.03 to 180.61 and Standard & Poor's 500-stock index fell 4.18 to close at 326.08. The price of an average NYSE share fell 38 cents.

Declines pounded advances 933-524 among the 1,945 issues crossing the NYSE tape. In early trading, advances had led by a 2-to-1 margin.

Big Board volume totaled 172,270,000 shares, compared with 207,830,000 shares traded Wednesday in the heaviest trading day of the year thus far.

Analysts said the market was bombarded with several waves of computerized program selling in the last hour of trading, a technique used to profit on brief price differences between stocks and stock index futures.

They said the market first turned lower, after posting modest gains in

early trading, when a decline in Treasury bonds revived fears of higher interest rates and pressured prices.

The market extended its declines on reports that Federal Reserve Chairman Alan Greenspan told the House Ways and Means Committee that reinstating a withholding tax on the U.S. investment income of foreigners was an idea that should be looked at.

In a market already jolted by higher interest rates and weak corporate earnings, analysts said the reports sparked further selling on fears that foreigners might be driven away from investing in the U.S.

But later reports clarifying Greenspan's position on the tax quoted the Fed as saying he did not favor reinstating it, which sparked a slight rebound in prices before the sell programs sent prices tumbling, analysts said.

"It was the programs and the fact that there was just nobody buying," said Jack Baker, head of the equity block trading desk at Shearson Lehman Hutton Inc.

In addition, the government is scheduled to report on fourth-quarter growth in gross national product Friday morning and Baker said there was speculation that even if the report shows a weak economy, it has already been factored into the market and will not pressure the Fed into cutting interest rates. The talk made investors even more nervous about what will happen to a slowing economy without a rate cut, he said.

On the trading floor, New Germany Fund was the most active NYSE issue on its first trading day, up 1/8 from its opening bid to 22.

Du Pont followed, tumbling two to 37 3/8 after reporting Wednesday a slight rise in earnings that fell short of forecasts. Telefonica De Espana was third, up 1/8 to 23 1/4.

Among the blue chips, AT&T finished down 1/8 to 41 1/8 after reporting earnings of 65 cents a share compared with a loss in the year-ago period. Procter & Gamble plunged 3 1/2 to 62 3/4 after reporting a slight rise in earnings for its second quarter but one that included a gain from the sale of its Crush soft drink business. IBM slumped 1 5/8 to 95 7/8, Alcoa dropped 1 1/8 to 62 3/8 and Coca-Cola lost 1 7/8 to 68 3/4.

Among takeover-related issues, UAL, the parent of United Airlines, tumbled three to 158 1/2 after surging Wednesday. The company reported a sharp drop in fourth-quarter earnings. Also, unions representing pilots, machinists and flight attendants were expected to tell the company's board at its meeting later Thursday that they have agreed to get together on a bid for the company, but not actually present a formal bid.

Elsewhere on the earnings front, another major airline, USAir, was down 7/8 to 27 3/8 after reporting a fourth-quarter loss. The results were worse than expected.

Copperweld soared 4 1/4 to 15 3/4 after reporting a slight drop in earnings but reports late Wednesday said Imetal of France has offered to buy the 35 percent stake in the company it doesn't already own.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 203,232,740 shares, compared with 244,431,940 shares traded in the previous session.

Prices closed lower in moderately active trading on the American Stock Exchange. The Amex Market Value index lost 1.03 to close at 353.64. The price of an average share fell four cents. Declines led advances 318-213 among the 768 issues traded. Composite volume totaled 15,514,900 shares, compared with 25,535,900 traded Wednesday.

Texas Air led the Amex issues, down 3/8 to seven. One of the company's units, Eastern Air Lines, faced creditors Thursday to present a revised business plan.On Wednesday, a major holder sold its stake in Texas Air.

The National Association of Securities Dealers composite index closed down 0.42 at 425.24.

#90025u2178 01/25/1990 ~United Press International

NEW YORK (JAN. 25) UPI - The dollar slid in New York trading Thursday in reaction to a remark by Federal Reserve Chairman Alan Greenspan, later disavowed by a Fed spokesman, that the United States should consider imposing a withholding tax on foreign investment gains in U.S. markets.

Testifying on foreign investment in the United States before the House Ways and Means Committee, Greenspan said foreign investment is necessary to provide capital which the U.S. savings rate is unable to provide. He said Congress should not act to inhibit foreign investment.

Asked whether a withholding tax should be imposed on foreign profits made in U.S. markets as a means of increasing federal revenues and reducing the budget deficit, Greenspan said it was "an interesting idea that should be looked at." But he said this could stnflows of capital.

His comment had an immediate effect in foreign exchange markets, as the value of the dollar rises or falls in proportion to the flow of foreign investments, which increase demand for the unit. But later in the day a Fed spokesman said Greenspan did not support a withholding tax.

Near the end of trading in New York the dollar was quoted at 1.6860 German marks, off from 1.6910 late Wednesday. The dollar was trading at 143.98

Japanese yen, also down from 145.65.

"I think there was a lot of confusion over what he said," commented Francoise Soares-Kemp, a Credit Suisse treasury vice president. If a withholding tax were reinstated, she said, "I think that the dollar would definitely suffer, investments here would definitely suffer." "It's not a doable thing if you want foreign investment," she concluded.

Another feature of the day's trading, Soares-Kemp said, was an erosion of the dollar's former strength against the yen, "part of what most people are suggesting is a correction of the yen."

Relatively low interest rates and inflationary pressures in Japan, as well as a strong outflow of capital towards West Germany, have kept the yen from matching deutsche mark gains on the dollar. Now, said Soares-Kemp, the market perceives dollar weakness allowing a yen climb.

Propelling it was a market rumor citing a report by Smick-Medley International, a Washington consulting firm which has achieved some following, saying the Fed and the Bank of Japan agreed 135 yen to the dollar was a more desireable exchange rate for trade and other reasons.

The market also was bracing for release in the morning of fourth-quarter data on the Gross National Product. Growth in the period is expected to have been flat or even negative - bearish for the dollar.

In New York trading the British pound rose to $1.6580 from $1.6535. Other dollar rates: 1.4872 Swiss francs, off from 1.4945; 5.7280 French francs, down from 5.7415; and 1,254.25 Italian lire, off from 1,258.

In Europe the dollar closed mostly higher. It moved up in Frankfurt to finish at 1.6905 marks against 1.6835 Wednesday, but it declined in Zurich to 1.4895 Swiss francs against 1.4925 the day before.

The dollar was higher in Paris at 5.7385 French francs against 5.7330, and also rose in Brussels to 35.33 Belgian francs against 35.20. In Milan it moved up to ,256.40 Italian lire against 1,256.10. In London the pound advanced to $1.6567 against $1.6565.

Republic National Bank in New York closed cash gold at $416.25 an ounce, off from $417.50. The New York Commodity Exchange settled gold at $416 an ounce, off from $417.20. Gold moved down in Zurich to $416 an ounce against $420, and was lower too in London at $415 an ounce against $420.25.

Republic closed cash silver at $5.23 an ounce, unchanged. Comex spot silver fell to $5.212 against $5.215. Silver was down in Zurich to $5.25 an ounce from $5.30. A closing figure from London, where markets closed early because of a massive gale-force storm, was not available. Silver had

closed in London the day before at $5.34 an ounce.

#90025u2326 01/25/1990 ~United Press International

NEW YORK (JAN. 25) UPI - The narrow definition of the nation's basic money supply known as M1 fell $2.9 billion in the latest reporting week, while the broader aggregate M2 rose and M3 fell, the Federal Reserve Board said Thursday.

M2 increased by $2.2 billion and M3 fell $3.5 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - fell to a seasonally adjusted average of $791.1 billion in the week ended Jan. 15 from a revised $794.0 billion the week before.

For the latest 13 weeks, M1 averaged $792.6 billion, a 6.4 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,218.3 billion in the latest week, up from a revised $3,216.1 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,038.7 billion in the latest week, up from a revised $4,042.2 billion, the Fed said.

#90025u2336 01/25/1990 ~United Press International

PHOENIX, AZ. (JAN. 25) UPI - A four-year undercover investigation resulted in theindictment of 21 people on charges of stealing rare cactuses and selling them for up to $15,000 each, federal officials announced Thursday.

The investigation, which included federal agents running a phony nursery operation, uncovered the theft of thousands of protected plants in the desert, said Stephen M. McNamee, U.S. attorney for Arizona. The stolen

plants included about 150 giant saguaro cactuses, which are protected by federal law, McNamee said.

The rare ''crested'' saguaros have arms spreading out into fans or crests as large as 12-feet across.

The saguaros, which generally grow only in the Sonoran Desert of southern Arizona, bring as much as $15,000 each on the black market, McNamee said. Regular saguaros sell for about $100 a foot.

Richard Marks, agent-in-charge of the U.S. Fish and Wildlife Service in Washington, D.C., said the phony nursery was set up to help agents become acquainted with people allegedly dealing in stolen cactuses. He declined to give further information about the investigation.

McNamee said the investigation was important to Arizona because of the state's fragile desert environment and the fact that ''people come from all over the world to see these giant saguaro cactus.''

Plants protected under Arizona law can be removed only with a state permit which is issued only when a plant is in danger of destruction from construction projects.

Some of the defendants were charged under a federal law prohibiting the trafficking in plants collected in violation of state law. Other charges pertained to the theft of cactuses from federal property within Arizona.

McNamee said in some cases, the suspects were accused of using specially-modified trucks and trailers that allow a saguaro weighing several tons to be dug up and moved within minutes.

Marks said the probe showed that the black market for cactuses was ''extensive'' and was even an ''international market.'' He said once the plants were removed from their native areas, they had to be grown in controlled areas such as a greenhouse.

Of those indicted, 18 were from Arizona, one from Florida and one from California. The address of one of the defendants was not known.

McNamee said 17 of the suspects had been arrested and arrest warrants were issued for the others.

#90025u2358 01/25/1990 ~United Press International

NEW YORK (JAN. 26) UPI - Business expectations for higher sales and profits in the first quarter of 1990 have held steady after declining in two consecutive quarters, a Dun & Bradstreet Corp. survey showed Thursday.

Regionally, expectations were mixed, with the optimism of business executives in New England and the Pacific states declining, the survey said.

Expectations for gains in first-quarter sales increased in the Midwest, central Southwest and South, the survey showed.

In the Mountain states, first-quarter expectations for gains in sales decreased, while expectations for higher profits increased, the survey said.

''Consistent with the 'soft-landing' scenario, the downward trend in business optimism during the last two quarters of 1989 has subsided,'' said Joseph W. Duncan, corporate economist and chief statistician for D&B.

''Business optimism has reached a turning point and businesses are regathering strength for the second half of 1990,'' he said. ''Prices have moderated, inventories are in line and new orders are respectable.''

Expectations for sales, profits and employment showed marked declines in the third and fourth quarters of 1989, the survey showed.

The survey of 1,500 executives in manufacturing, retailing and wholesaling was conducted between Nov. 2 and 22. The regional data was drawn from a sample of 3,000 business executives.

Overall, optimism regarding sales dropped slightly from the fourth quarter of last year, the survey showed. Retailers' expectations remained unchanged, while wholesalers' and manufacturers' expectations dropped.

Expectations for profits also dropped just slightly, with retailers' expectations higher and wholesalers' and manufacturers' expectations lower.

Expectations for higher selling prices and increased inventories also declined slightly.

-30- 2057

#90025u2362 01/25/1990 ~United Press International

NEW YORK (JAN. 25) UPI - Assets of the nation's 490 money market mutual funds increased $1.64 billion to $383.07 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets increased $771.8 million to $162.58 billion, assets of general purpose funds increased $1.16 billion to $128.08 billion and institutional fund assets decreased $294.2 million

to $92.41 billion.

''Individuals kept building up their money market fund balances, but the rate of asset buildup has slowed sharply from the torrid pace of the previous several weeks,'' said Dr. Jacob Dreyer, vice president and chief economist at the institute.

''Yield relationships among investment instruments available to individuals showed little change last week and are unlikely to have contributed to asset movements,'' he said. ''However, jittery stock and bond markets have probably induced some people to wait out the market turbulence in the safety of their money market fund accounts.''

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds fell to 7.70 percent from 7.74, while 30-day simple yields dropped to 7.83 percent from 7.88.

The average maturity of fund portfolios rose to 41 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mixed in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.13 percent, down from 6.14; Super-Now accounts 5.01 percent, unchanged; six month certificates of deposit, 7.66 percent, unchanged; one-year CDs 7.69 percent, up from 7.68; 2 1/2-year CDs 7.67 percent, up from 7.65; and five-year CDs 7.68 percent, up from 7.66.

The average rate for a one-year adjustable rate mortgage rose to 8.45 percent from 8.40 percent last week.

The average rate on a 15-year fixed-rate mortgage rose to 9.59 percent from 9.45 percent and the average rate on a 30-year fixed-rate mortgage was up to 9.84 percent from 9.69 percent.

The average rate for a four-year automobile loan rose to 12.11 percent from 12.09 percent.

-30- 2551

#90025u2416 01/25/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - President Bush on Thursday announced the nomination of John Dunne, a former New York state senator, to the

sensitive top civil rights job at the Justice Department, which has been vacant for more than a year.

If confirmed by the Senate, Dunne would succeed William Bradford Reynolds, who played a controversial role in civil rights cases during the Reagan administration.

Reynolds resigned in December 1988 and the job has been vacant ever since, prompting continued criticism from civil rights leaders.

The Dunne nomination is important for the Bush administration, whose previous civil rights nominee, Detroit lawyer William Lucas, went down in defeat in July 1989 before the Senate Judiciary Committee.

Lucas, former sheriff of Wayne County, Mich., currently works in a Justice Department job not requiring Senate confirmation. Lucas, who is black, was roundly criticized for a lack of civil rights experience and failing to understand recent restrictions in the scope of civil rights law.

Civil rights leaders reacted with initial caution to the Dunne nomination. Dunne is white.

''We know very little about Mr. Dunne's record,'' said Ralph Neas, executive director of the Leadership Conference on Civil Rights. The coalition of labor, religious and civil rights groups was instrumental in scuttling the Lucas nomination.

Although it is too early for his civil rights group to judge Dunne, Neas said, ''It is disappointing and perplexing that the Bush administration was not able to find a nominee who has both legal and civil rights experience.''

Neas said, ''Civil rights does not seem to be a priority for this administration.''

Dunne, 59, served in the New York Senate from 1966 to 1989 and became deputy majority leader. He is a partner in the law firm of Rivkin, Radler & Bayh in Uniondale, New York.

Dunne resigned from the New York state Senate in September after losing a fight for a leadership post. His civil rights nomination was supported by Attorney General Dick Thornburgh, who recently told reporters that Dunne has long been a personal friend.

In a prepared statement, Thornburgh said, ''John has a wide range of bipartisan support.''

The attorney general said, ''I've known John for many years and I am

certain that upon confirmation he will prove to be an excellent addition to the department.''

Late last year, Dunne resigned from an all-male club to which he had belonged for more than 30 years - an issue certain to be raised during the confirmation process. Thornburgh said it was appropriate for Dunne to quit the Garden City Golf Club.

Dunne earned relatively low marks from the New York Civil Liberties Union for votes cast while he served in the state Senate.

Dunne worked in Albany for 24 years and was largely known for his role in drafting environmental and prison legislation - not for involvement in civil rights issues.

He was viewed as a maverick in the Nassau County Republican Party and frequently bucked the party leadership.

In 1972, New York Gov. Nelson Rockefeller named Dunne as vice chairman of a panel examining prison conditions after the bloody Attica riots a year earlier.

Dunne reportedly secured the administration nomination over a chief competitor, conservative San Francisco lawyer Lawrence Siskind, who had served in the civil rights division at the Justice Department during the Reagan administration.

Dunne was born in Mineola, N.Y., in 1930 and was admitted to the New York bar in 1955. He lives in Garden City, N.Y.

#90025u2422 01/25/1990 ~United Press International

(JAN. 25) UPI - The nation's anti-drug war would get a 12 percent boost in funding under a Bush administration budget plan UNveiled today. President Bush is expected to offer details in a White House speech later today... but federal anti-drug director William Bennett says the proposal calls for spending 10-point-six-BILLION dollars in fiscal 1991.... up one-point-one BILLION from last year. It includes money for more military might and federal agents.

The White House is engaging in some heavy lobbying as it tries to convince Senate Republicans to uphold President Bush's veto of a bill shielding Chinese students from deportation. The Senate is expected to vote today on the veto that was overwhelmingly rejected in the House yesterday. Senate Democratic leader George Mitchell dismisses suggestions that his party is playing politics.

In Moscow today, Kremlin spokesman Gennady Gerasimov says NO shots were fired as Soviet troops broke a blockade by merchant ships on Baku Harbor. Gerasimov denied earlier reports of a gunbattle, saying Red Army soldiers boarded two ships to reclaim control of sea lanes into the Azerbaiani capital. The blockade was imposed to hamper the evacuation of Armenians from the troubled republic.

An Indian government spokesman, speaking on condition he NOT be identified says a Moslem radical opened fire today on a group of Indian Air Force workers in a northern state... killing four and wounding 10 others. Authorities tried to stop journalists from reporting the killings, closing a public telex office to reporters in an effort to prevent the potentially explosive situation from being relayed around the country.

-30- 1831

#90025u2507 01/25/1990 ~United Press International

BOSTON (JAN. 25) UPI - The family of Carol Stuart, the pregnant woman believed to have been killed by her husband in a murder hoax, announced Thursday the creation of a scholarship to help heal racial wounds in the racially diverse neighborhood where she was slain.

At an emotional news conference, the lawyer for her parents, Giusto and Evelyn DiMati of Medford, said the couple never suspected that their son-in-law, Charles Stuart, had hatched the hoax that derailed the investigation and learned the truth only through the media.

''The family had a good relationship with Charles Stuart,'' said the lawyer, John Wortmann Jr. ''The family thought that Charles Stuart was a good husband and that the recent events and what's happened has been a shock to them as it was to everyone else.''

Carol Stuart, 30, of Reading, was fatally shot, and her husband Charles, 29, badly wounded on Oct. 23. Doctors delivered the woman's 7-month-old fetus by emergency surgery, but the child died 17 days later.

Charles Stuart, who recovered from his wound, told investigators he and his wife had been attacked by a black gunman, an accusation that reignited racial tensions in Boston. Since his suicide Jan. 4, investigators believe Stuart himself committed the crime in an elaborate scheme to collect insurance money.

Stuart committed suicide by plunging from a bridge into Boston Harbor Jan. 4 as police sought to arrest him in the shootings, based on evidence provided by his brother, Matthew.

Thursday's news conference marked the first time the DiMaiti family offered public statements on the case, but they chose to focus on Carol

Stuart's life rather than on her slaying. Her father thanked the community for an outpouring of support in the form of flowers, cards and masses.

''Mere words cannot express the terrible emptiness we feel or how much we miss her now and we'll miss her for the rest of our lives,'' Giusto DiMaiti said. ''All (Carol) ever wanted was to be a good mother, wife and daughter and be happy in her life.''

DiMati struggled to remain composed and his wife, Evelyn, wept openly at one point.

The case has outraged Boston's black leaders, who accused the media of giving it wide coverage because the victims were white surburbanites. They alao accused police of harassing black men in the search for the killer and unfairly targeting a black Boston resident, William Bennett, who was initially considered a prime suspect in the case.

Hoping to close racial wounds opened by the case, the DiMatis announced the creation of The Carol DiMaiti Stuart Foundation Inc., a scholarship fund for residents of Mission Hill, the racially diverse neighborhood where the shootings occurred.

''The DiMaiti family believes that Carol would not have wanted her death to be remembered as a cause of such divisiveness. She would not want to be remembered as the victim of a sensational murder, but rather as a woman who left behind a legacy of healing and of compassion,'' attorney Marvin Geller said in announcing the fund and a $10,000 donation from his firm.

Mayor Raymond Flynn, who has come under fire for ordering a massive manhunt in Mission Hill following the shootings, praised the family for setting up the scholarship fund, and predicted the tensions that erupted following the shootings would soon subside.

''After every storm will come calm,'' Flynn said in a statement. ''After every division will come unity. After every wound, healing will take place.''

But the state Legislature's Black Caucus and Boston's elected black officials Thursday officially called for a special commission to investigate events surrounding the case.

''The black community remains very troubled in the aftermath of the startling revelations in the Carol Stuart and Christopher Stuart murders '' the lawmakers said in a statement. ''This commission will be able to get at the truth of whether there was a breakdown of the investigative mechanisms brought to bear on this case.''

The panel would determine whether investigators acted properly and whether

they had information casting suspicion on Charles Stuart. It would also look into who leaked detals of the probe to the news media and how reporters corroborated tips.

#90025u2688 01/25/1990 ~United Press International

(JAN. 25) UPI - Federal anti-drug chief William Bennett unveiled a proposal for a one-point-one-BILLION-dollar escalation in the nation's drug war, while admitting what he termed ''limited success'' thus far. The new plan keeps the emphasis on law enforcement and interdiction and would raise overall federal spending to 10-point-six-BILLION dollars in fiscal 1991.

Illinois authorities say lightning that struck a telephone pole near a Crystal Lake tool compnay knocked out power in the area and sent at least 11 people to hospitals... one in serious condition. The lightning preceded a near-blizzard, which blanketed the Chicago area with up to nine inches of snow.

Actress Ava Gardner died at her London home today. A man identifying himself as a friend of Gardner told the B-B-C the 67-year-old actress died of pneumonia. Paul Mills says Gardner, whose chiseled beauty and thick Southern accent stunned Hollywood talent agents, will be buried in Smithfield, North Carolina, next to her parents.

There more signs today that Soviet forces are restoring order in the violence-wracked republic of Azerbaijan. The Soviets broke the blockade of Baku Harbor and disbanded the command center committee that organized the resistance and co-ordinated Moslem attacks on Christian Armenians.

Republican Senator Alan Simpson says Democrats are trying to- quote- ''trash'' President Bush by attempting to override his veto of a bill that would protect Chinese students from being forced to return home. Senate Republican leader Robert Dole is predicting victory when the Senate votes this afternoon.

#90025u2868 01/25/1990 ~United Press International

LOS ANGELES (JAN. 25) UPI - He doesn't have the flashy nickname of Utah's Karl Malone, but soft-spoken A.C. Green of the Los Angeles Lakers does own something the Mailman's missing - a starting spot in next month's NBA All-Star Game.

In the closest fan balloting by position, Green nipped Malone for the Western Conference's second forward berth. He collected 160,788 votes, just 2,265 behind Laker teammate James Worthy and 1,226 ahead of Malone.

''I was surprised,'' Green said Thursday night before heading out to watch alma mater Oregon State play Southern Cal in a Pacific-10 basketball game at the Sports Arena.

''I knew I was up in the balloting, in the position (to earn a starting berth). But I didn't know for sure. I've never seen any numbers as far as where I was ranked.''

Green, averaging 14.4 points and 9.6 rebounds in his fifth NBA season, will make his first All-Star appearance. He and Worthy will be joined by teammate Magic Johnson in the West's starting lineup at Miami Feb. 11. Los Angeles' Pat Riley will coach the team.

''I'm real happy James and Earvin will be there,'' Green said. ''I feel like now it's more like a Laker game. They will take some of pressure and the jitterbugs out.''

Malone, named the Most Valuable Player of last year's game, certainly has statistics superior to his Laker counterpart. He entered Thursday night's game among the NBA leaders in scoring with 30.4 points a game and rebounds with 10.9.

''I'm not worried about (not starting),'' Malone, who should make the team as a reserve, said before Utah's game with New York at the Salt Palace.

''I'm worried when the All-Star Game is going to be played because we're on a role right now (the Jazz had won seven straight). I don't want to see anything interfere with that.''

Green, 26, would not defend his selection. ''I have nothing to say in that sense,'' he said. ''This is the fans' vote. It's always out of our control.''

One of the league's hardest workers, Green has missed just three games in his NBA career. The 6-foot-9 power forward is on pace to set career highs in scoring and rebounding for the fourth straight season.

Green came to the Lakers in 1985-86 as the 23rd selection in the NBA draft. The son of a minister, he then replaced Kurt Rambis in the starting lineup early the next season, and has become more of a force each season. This year he worked on Developing a perimeter game.

''That's been a key for us,'' he said. ''We're always double-teamed (underneath), and with me taking the outside shot, that's only helped our offense. Now everyone can be a threat.''

The All-Star news came one day after one of Green's best games. Against the Pacers Wednesday night, Green sank 12 of 13 shots - he tipped in his only miss - and finished with 24 points and 11 rebounds.

#90025u3038 01/25/1990 ~United Press International

(JAN. 25) UPI - The Senate comes up four votes short in an effort to override a presidential veto... Soviet troops gaining upperhand in Azerbaijan... and India sends in troops to a northern state. The top stories, and more, next from U-P-I

President Bush scored another big victory on Capitol Hill today, when the Senate failed to come up with enough votes to over-ride his veto of a popular bill to prevent Chinese students from being forced to return home.

The Senate voted 62ride the Bush veto... coming up four votes short of the 66 needed for a two-thirds majority. The House dealt Bush a crushing blow

yesterday, voting 390ride.

Chinese officials in Beijing blasted the move to over-ride in a news conference with Western reporters, saying the action would trigger retaliation.

Bush argued against an over-ride, saying his executive order effectively protected Chinese students who might be forced to return home because of pro-democracy activity after the massacre at Tiananmen Square last summer.

Bush says it is more important to retain high-level contacts with China, a super-power with the United States and the Soviet Union.

Senate Minority Leader Bob Dole of Kansas had predicted victory in the Senate, where he had to hold onto 34 of the 45 Republican votes to assure that the veto would stand.

-30- 1491

#90025u3074 01/25/1990 ~United Press International

(JAN. 25) UPI - Soviet troops are restoring order in the rebellious republic of Azerbaijan today, and the area's Communist officials chose a new leader. Official reports from Tehran- monitored in Athens- said Iran has offered to mediate the dispute.

The official Iranian news agency says Iran is offering its services as go-between for the Soviets and secessionist Moslem rebels. Fighting still is reported in some areas.

The Soviet forces have ended a blockade of Baku's Harbor and disbanded the committee that had served as co-ordinator for resistance and for Moslem moves against Christian Armenians in the republic.

The official Soviet news agency Tass reported that the republic's Communist Party Central Committee elevated Ayaz Mutalibov to lead the government. Mutalibov was the nation's prime minister.

The Soviet Foreign Ministry reported that troops had boarded two merchant vessels that were blockading the harbor at Baku, the Azerbaijani capital. A spokesman says the action effectively ended the blockade.

Thousands of Indian government troops are positioned in Srinagar , the state capital of northern Jammu and Kashmir, 400 miles north of New Delhi. Authorities have imposed a virtual news blackout by closing public telephone and telegraph offices.

The troops arrived as preparations were finalized for tomorrow's Republic Day holiday that commemorates the 1950 adoption of the Indian

consititution. The government fears that pro-secession Moslem fundamentalists will use the holiday to UNleash a day of violence.

Kashmir is a predominantly Moslem state of India, claimed by both Hindu-dominiated India and neighboring Moslem Pakistan. The region currently is divided, but most of Kasmir's three-Million Moslems want to secede from Indian control.

-30- 1962

#90025u3092 01/25/1990 ~United Press International

(JAN. 25) UPI - President Bush today unveiled his proposal to escalate the war on drugs by putting another one-point-one-BILLION dollars into the program to fund more military involvement, more federal agents and the death penalty for drug lords.

In announcing his updated drug strategy, Bush said it is clear that- quoting now- ''we're only really getting started.'' He admitted what he termed only ''limited success'' so far.

Bush said illegal drugs are still the nation's top worry... adding there has been what he termed ''some notable progress'' since the drug policy took effect in September.

The plan was formulated by federal anti-drug chief William Bennett. It will go to Congress next week in the administration's budget proposal for fiscal 1991. It calls for spending 10-point-six-BILLION dollars to fight drugs.

That figure is four-BILLION dollars less than the proposal unveiled yesterday by Democratic Senator Joseph Biden of Delaware. The Biden plan would shift emphasis from military action to the economic front in the form of more aid to Andean farmers dependent on cocaine crops for a livelihood.

The Bush proposal directs spending more toward law enforcement and interdiction than use reduction.

Bush said he wants to- quote- ''emphasize our determination to win this fight without adding to the budget deficit- and yes, I repeat, without raising taxes.''

-30- 1571

#90025u3185 01/25/1990 ~United Press International

(JAN. 25) UPI - The family of Carol Stuart... the pregnant Boston attorney allegedly slain by her husband... says it has created a college scholarship fund to help heal racial wounds in the Mission Hill

neighborhood where she was shot.

During an emotional news conference, the lawyer for Carol Stuart's parents said they NEVER suspected her husband, Charles Stuart, planned the elaborate hoax. Stuart said a black man abducted and shot him and his wife after a birthing class.

Boston's black community was outraged at the way authorities handled the investigation of the case that received massive media coverage.

Stuart committed suicide after becoming a prime suspect.

In the words of the slain woman's father- ''Mere words canNOT express the terrible emptiness we feel or how much we miss her.'' Carol Stuart's mother wept openly.

The family lawyer said the DiMaiti family does NOT believe Carol would want her death to be remembered as the cause for such divisiveness, but- quote- ''rather as a woman who left behind a legacy of healing and compassion.''

An alliance of consumer, business and government groups is warning that telephone marketing fraud is costing Americans up to one-Million dollars an hour... 10-BILLION dollars a year.

The Alliance Against Fraud in Telemarketing says the scams include ''900'' telephone numbers that promise credit cards but only deliver generic information. It says others involve ''look-alike'' envelopes that appear to be from the government... and overseas operations that push penny stocks.

A spokeswoman says consumers are being warned that con artists are using telemarketing techniques for high-pressure sales pitches that carry little concrete information.

She says the scams also involve phony health-care promotions... bank-financed precious metals that involve commissions so high that a profit is NOT possible... mortgage scalpers, and phony foreign banking schemes.

-30- 2130

#90025u3361 01/25/1990 ~United Press International

(JAN. 25) UPI - President Bush is proposing a one-BILLION-dollar aid package to help Panama get back on its feet. Bush told a White House news conference ''the economic challenges that Panama faces are great.'' The Central American nation has requested U-S aid as it rebuilds its crippled economy and political system in the wake of the U-S invasion.

The Senate today upheld President Bush's veto of a bill that would have protected Chinese students from being forced to return to China. The lawmakers voted 62-37 to oppose Bush's veto. 66 votes were necessary to override.

The president says the bill is UNnecessary because he already has implemented protections for the students through an executive order. The House rejected the veto yesterday by an overwhelming majority, 390-25.

New Jersey Democratic Senator Frank Lautenberg and Congressman Richard Durbin of Illinois say some airlines are NOT telling passengers booking flights that the smoking ban on all flights in the United States goes into effect February 25th.

British officials say at least 28 people have been killed in the worst storm in two years. Police and news reports say 100-mile-per-hour winds downed telephone and electricity lines and blasted roofs off buildings.

Federal health officials warn adults need to keep up their tetanus shots to avoid becoming one of the small number of Americans stricken by the deadly wound-related disease. One doctor says the disease mostly affects those over age 50.

One of Hollywood's greatest sex symbols died in London today. Ava Gardner was 67. She was born in Smithfield, North Carolina, where a funeral director said he was arranging burial for the star next to her parents and brother.

The Solidarity government in Poland today appointed a new manager for the Gdansk shipyard where the union movement was born. The action reverses a decision of the ousted Communist government, which ordered the shipyard closed.

The national Centers for Disease Control is adding mascara to the list of potentially disease-causing substances that American consumers need to worry about. They say the problem arises from a bacteria that apparently develops in mascara that has sat around for a long time.

Tammy Faye Bakker declared war on the devil today and said- quoting here- ''the demon powers of darkness'' have destroyed her husband's ministry and are pursuing his family.

Authorities in Minneapolis, Minnesota, used a dose of laxative and patience to recover a stolen diamond ring valued at 18-thousand dollars. They say they obtained a court order to administer the laxative to the suspected thief... and patiently waited for the ring to re-appear.

#90025u3680 01/25/1990 ~United Press International

(JAN. 25) UPI - Britain was pummeled today by its worst storm since a 1987 hurricane. Authorities say at least 33 people died as more than 100 mile-per-hour winds blasted the nation, tearing roofs off buildings and downing telephone and power lines. Authorities advised Britons to stay indoors and closed the English Channel because of rough seas.

Authorities say three young brothers suffered critical head injuries when two tornadoes roared across rural southern Alabama, destroying a mobile home park about 30 miles south of Montgomery. Police say 28 people were injured by the storms, which destroyed nine mobile homes and eight chicken houses. The three boys are age seven, four and three.

The Senate fell four votes short today in the Democratic-led battle to over-ride a presidential veto that killed a bill to prevent Chinese students from being forced to return home. The chamber voted 62-37 to over-ride. The measure grew out of the Chinese suppression of the pro-democracy movement last summer. President Bush opposed the bill, contending it would harm Chinese-American relations.

President Bush is proposing one-BILLION dollars in aid to help restore the Panamanian economy and rebuild the nation in the wake of the U-S invasion. Bush vowed he would work with Congress to ensure quick passage of the aid package, which includes direct funding, loans, loan guarantees and export incentives.

Actress Ava Gardner is dead at the age of 67. A friend and her business manager confirm the Hollywood star with the thick Southern drawl succumbed to pneumonia at her London home today. Actor Mickey Rooney, Gardner's first husband, reacted to the news, saying- '' My heart has been broken with the loss of my first love.''

Democrats on a House panel studying gun control are blasting a Justice Department plan to prevent felons from buying firearms. Democratic Congressman Larry Smith of Florida says the department's proposal to have gun dealers check purchasers for criminal records by using a touch-tone telephone system is UNrealistic. Democratic Congressman William Hughes of New Jersey says- ''That technology doesN'T exist today.''

Researchers at Tufts University in Boston say, contrary to predictions, there'll be NO glut of doctors in the United States in the near future. Dr. William Schwartz and researcher Daniel Mendelson analyzed doctor work patterns and income between 1982 and 1987. They say that the demand for physician's services has been rising faster than the supply of physicians.

-30- 2712
#90025u3938 01/25/1990 ~United Press International
(JAN. 25) UPI - At least 37 people are dead following a violent storm which battered the British Isles and much of western Europe with snow, rain and hurricane-force winds. The storm toppled trees and ripped roofs off buildings as its winds reached more than 100 miles an hour. A British news service says damage reports continue to come in and the death toll is expected to rise.

President Bush won a big victory in the Senate today on his veto of a bill guarding against sending Chinese students home to face possible political persecution. Senators failed to muster the 66 votes necessary to override the veto... voting 62O-P leaders and assured the Senate that NO Chinese student would be sent home against his or her will.

Soviet forces are making further headway in restoring order to the Azerbaijani capital of Baku. Troops broke a merchant ship blockade on Baku Harbor late yesterday without firing a single shot. But two soldiers were killed as fighting continued with heavily armed Azerbaijani militants at a key military barracks. 95 people have died in the fighting, now in its sixth day.

President Bush today announced his economic aid plan for battle-scarred Panama. Bush is proposing one-BILLION dollars in aid to help the Latin American nation along the road to recovery following the December 20th U-S invasion to oust military ruler Manuel Noriega . He promises Washington will work with Panamanians to build a prosperous democratic nation.

-30- 1632
#90025u3972 01/25/1990 ~United Press International
(JAN. 25) UPI - President Bush says Soviet President Gorbachev is- quote- ''really the best hope'' for the West. Addressing a group of publishers at the White House today, Bush offered his strongest endorsement to date of how Gorbachev has dealt with the civil unrest in Azerbaijan. Quoting Bush- ''I think we have a lot at stake in continuing to deal with this man.''

Thousands of Indian government troops arrived in the violence-torn city of Srinagar, 400 miles north of New Delhi today. The state capital of northern Jammu and Kashmir is tense following increased violence on the part of pro-secession Moslem fundamentalists. Earlier today, Moslem radical gunmen killed four Air Force servicemen and wounded 10 others at the Srinagar airport.

Ava Gardner's first husband, actor Mickey Rooney says- ''The beauty and magic of Ava will forever be in all our hearts.'' Gardner died today at her London home following a bout with pneumonia. She was 67. A funeral

home director in Smithfield, North Carolina, says the sultry screen legend will be buried next to her parents and brother. Gardner was well-known for her roles in movies like ''Show Boat'' and ''The Snows of Kilimanjaro.''

Researchers at the Upjohn Company say several new designer drugs appear to have the power to attack the deadly AIDS virus in a different way. In a published study, researchers say a synthetic compound designed to block a key enzyme of the deadly disease appears to stop the virus from reproducing in the test tube. Most other efforts to thwart the virus have concentrated on a different enzyme.

-30- 1762

#90025u4276 01/25/1990 ~United Press International

(JAN. 25) UPI - President Bush says the war on drugs is only getting started and he wants to add more fuel to law enforcement's firepower. Bush is proposing a one-point-one-BILLION-dollar increase in the funding to fight illegal drugs. The president is calling for the use of military might, more federal agents and the death penalty for drug lords. There was mixed reaction to the plan on Capitol Hill.

Predictions of a Senate defeat for President Bush failed to materialize today. Senators upheld the president's veto of a bill aimed at protecting Chinese students from being deported and facing possible political persecution. The House voted to override the veto yesterday, but the Senate could NOT raise the two-thirds majority needed to block the action. The Senate fell four votes shy, with a 62-37 tally.

The Soviet news agency Tass says Armenians and Moslem Azerbaijanis who are fighting in the breakaway province of Nakhichevan have agreed to a cease-fire along their border. Nakhichevan is an autonomous Moslem enclave within Christian Armenia. Elsewhere in the region, Soviet forces broke through a merchant ship blockade in Azerbaijan's Baku Harbor today and reclaimed control of sea lanes.

Central Europe- made up of Poland, Hungary and Czechoslovakia- appears to be trying to define its role as a collection of emerging democracies. In Warsaw today, visiting Czechoslovakian President Vaclav Havel proposed the creation of a ''central European federation.'' And in Gdansk, Solidarity leader Lech Walesa suggested a ''partnership'' of several republics linked by Moscow.

-30- 1762

#90025u4293 01/25/1990 ~United Press International

(JAN. 25) UPI - In New York, a former Bronx police officer suspected of killing and dismembering his wife has been arrested on federal bank fraud charges. Authorities say Robert Fioretti pleaded innocent and is being

held without bond. Fioretti allegedly withdrew more than 17-thousand dollars from his wife's bank account in October 1986, two months after her disappearance. NO one has been charged in her death but Fioretti has been named as the prime suspect.

Consumer advocacy groups and Democratic Senator Howard Metzenbaum of Ohio say the poor have little access to basic banking services. The Consumer Federation of America and a coalition of other consumer groups released survey results today to support legislation proposed by Metzenbaum that would provide affordable banking services. The consumer groups say some low-income consumers spend up to 480 dollars a year just to cash payroll checks.

Pakistan's Prime Minister Benazir Bhutto is believed to be the first head of government in modern history to give birth while in office. Bhutto gave birth to a seven-and-a-half-pound girl... her second child. Hundreds of people danced and sang in the streets of Karachi at the news of the birth. Both mother and daughter were reported to be in good health and resting comfortably.

A number of Hollywood figures are mourning the loss of actress Ava Gardner who died of pneumonia today at her London home. Mickey Rooney... the first of Gardner's three husbands... says his heart is broken with the loss of his first love. Gregory Peck... who co-starred with Gardner in several films... praised her acting ability and said she was smart, as well as beautiful. Gardner was 67.

-30- 1855

#90025u4504 01/25/1990 ~United Press International

(JAN. 25) UPI - Saying his administration is willing to do whatever it takes to fight illegal drugs, President Bush today proposed a one-point-one-BILLION-dollar escalation in America's war on drugs.

Bush says ''some notable progress'' has been made but adds that illegal drugs- quote- ''remains this nation's number one concern.''

The updated national strategy now calls for spending a total of 10-point-six-BILLION dollars to fight drugs in fiscal 1991.

The president's latest addition calls for more federal agents, an active role for the military and use of the death penalty for drug lords.

The nation's top anti-drug officer, William Bennett, says although the figure announced today is less than what he asked for, he's more optimistic about the battle than when he first took the job.

Bush's plan will be included in the budget that'll be sent to Congress

next week. But it's already receiving a lukewarm greeting on Capitol Hill... with some lawmakers saying more needs to be done.

President Bush is proposing one-BILLION dollars in economic aid to battle-scarred Panama. The president announced the initiatives at the White House today and said- ''The economic challenges that Panama faces are great, but we will work with the people to build a prosperous democratic nation.''

Through loan guarantees, promises of commercial credits and trade benefits amounting to some 540-Million dollars, Bush hopes to stimulate other investment.

Deputy Secretary of State Lawrence Eagleburger says 42-Million dollars of that money will be spent on re-building or repairing homes damaged or lost during the U-S invasion to oust General Noriega . An estimated 25-hundred people were left homeless after the attack.

The only new money Bush is asking Congress for is an additional 500-Million dollars for debt relief, public project investment, and the rehabilitation of the once-thriving Panamanian banking system.

-30- 2121

#90025u4528 01/25/1990 ~United Press International

(JAN. 25) UPI - Soviet forces have reclaimed control of sea lanes near the troubled city of Baku as they continue to fight for control of the Azerbaijani capital.

Soviet news agencies say a team of crack paratroopers and amphibious forces last night boarded merchant ships forming a blockade in Baku Bay. One soldier was reported killed and another wounded in the assault which opened the bay.

Reports say two more soldiers were killed as troops battled heavily armed Azerbaijani vigilantes at a key barracks in the capital. The deaths raised to 95 the number of people killed in the so-called Battle for Baku. The fighting is now in its sixth day.

Political forces in the troubled area also were making moves today as the local Communist Party chose the republic's prime minister as its new party leader.

Officials believe the new party boss's unprecedented power is just what's needed to restore Communist authority in the troubled republic.

Baku was reported quiet late today.

There's talk of uniting central Europe into a partnership to strengthen the region's crippled nations.

Czechoslovak President Vaclav Havel spoke before the Polish Parliament today and suggested creating a ''central European federation'' comprised of Czechoslovakia, Poland and Hungary.

All three nations face similar problems as they seek aid to finance their move toward democracy and free-market systems.

Havel said the federation would help the nations come to terms with the western world as a- quote- ''friendly association of independent, democratic countries.'' He also called for the withdrawal of Soviet troops from the nations.

Polish Solidarity leader Lech Walesa predicted the formation of a similar ''partnership'' linked with Moscow during an interview with United Press International. Walesa also urged the removal of Soviet soldiers from the area.

East Germany made a move to solve some of its financial problems today by adopting legislation allowing foreigners to set up joint ventures in the communist country.

-30- 2226

#90025u4533 01/25/1990 ~United Press International

(JAN. 25) UPI - A study released in Washington today indicates further study of low-level electromagnetic radiation is necessary. Researchers from the Massachusetts Institute of Technology and the National Institute of Standards and Technology say there isn't enough evidence to dismiss potential health risks.

For the past several decades, scientists have debated the possible health threat from very weak electric and magnetic fields, such as those emitted from computers and common household appliances.

Some critics say the human body's natural heat fluctuations override any disturbance caused by electromagnetic radiation. But the researchers at M-I-T and N-I-S-T say human cells are NOT always able to override the impact of weak electrical fields.

Their study finds certain enzymes and molecules in the cell's outer membrane appear more vulnerable to effects of electromagnetic radiation than those molecules in the cell's interior.

Federal officials in Phoenix, Arizona, say a four-year undercover investigation has resulted in the indictment of 21 people involved in a

cactus-stealing ring.

Authorities say the operation uncovered the theft of thousands of protected plants from Arizona's desert. Federal agents operated a phony nursery to get close to the suspects.

The point of stealing the cactuses is that they're hot items on the black market... with one variety, the giant saguaro cactus, selling for as much 15-thousand dollars each.

Officials say the cactus ring had become so sophisticated that it had specially modified trucks and trailers that allowed the suspects to dig up and move a saguaro cactus weighing several tons within minutes.

Authorities say 17 of the suspects have been arrested and arrest warrants were issued for the others.

-30- 1964

#90025u4642 01/25/1990 ~United Press International

(JAN. 25) UPI - Bush administration officials say a proposed aid plan for Panama would provide 42-Million dollars to repair homes and businesses damaged in the U-S invasion last month. The total plan calls for one-BILLION dollars in aid.

Panama's new president today thanked the United States for the aid proposal. President Endara says the total is NOT as much as he had hoped, but he called it- ''a generous amount of aid.''

The Soviet news agency Tass says thousands of people have been evacuated from Azerbaijan and Armenia. Tass cited ''the serious deterioration of inter-ethnic relations'' which has caused suffering for ''thousands of innocent people.''

Telephone marketing fraud costs Americans more than one-Million dollars an hour. That's according to an alliance of consumer, business and government groups. The Alliance Against Fraud in Telemarketing released a list of the top 10 telemarketing scams.

The Federal Reserve chairman says foreign investment in the United States is necesary because domestic savings in this country are low. Chairman Alan Greenspan told a House panel today that the best remedy is to cut the federal budget deficit.

A new study has some grim news about violence in American television. The study released by Senator Paul Simon and two university professors says violence has become a cornerstone on prime-time and is reaching excessive levels on children's programs as well.

-30- 1598
#90025u4653 01/25/1990 ~United Press International
(JAN. 25) UPI - Authorities in Florida say the mayor of Sweetwater and three city council members were indicted by a federal grand jury on extortion charges. They're charged with demanding money from a businessman who needed council approval to sell part of a shopping plaza.

A committee of the U-S Conference of Mayors approved a ''peace dividend'' resolution today, calling on Congress and the Bush administration to agree to a long-term cut in defense spending. The mayors' group wants the savings channeled to the cities.

The military ruler of Haiti told a news conference that he might lift a state of siege tomorrow, but diplomatic sources say it's NOT clear whether he will actually do it. The state of siege was ordered last weekend.

Good news for the prime minister of Italy. He won a vote of confidence today for his six-month-old government, with the coalition government voting 353-112 with two abstentions. But his political future was clouded by a split in his Christian Democrat party.

In Tunisia, the death toll rose to 24 today from six days of floods caused by heavy rains. 32 people are missing. Officials say 13-thousand homes were destroyed or seriously damaged by the floods that washed over roads and bridges.

In Colombia, the president of a leading professional soccer club is recuperating after he was shot last night by motorcyclists in northern Bogota. Police say the man was shot in the left shoulder and legs.

#90025u4803 01/25/1990 ~United Press International
(JAN. 25) UPI - President Bush announced his choice to fill the Justice Department's sensitive top civil rights job... a post that's been vacant for more than a year. Bush nominated former New York state senator John Dunne. If confirmed by the Senate, Dunne would succeed William Bradford Reynolds... who resigned in December 1988. One civil rights leader says it's ''disappointing and perplexing'' that the Bush administration has NOT been able to find a nominee who has both legal and civil rights experience.

President Bush's revised anti-drug strategy drew praise and blame after it was announced today. Mayors of cities hit hard by the drug problem call it ''woefully inadequate.'' And the president of the Criminal Justice Policy Foundation says the president's plan- quoting now- ''carries forward the simplistic solution of the past 75 years.'' But law enforcement officials

are embracing the proposal, calling it ''a game plan that will work.''

Winds of more than 100 miles an hour lashed the British Isles and much of Northern Europe today, killing at least 47 people. Authorities have advised the public to remain indoors and have suspended all ferry services across the English Channel because of rough seas. In addition to stranding thousands of travelers, the storm also ripped apart roofs and knocked down trees.

In Enterprise, Alabama, a lawyer has advised junk dealer Robert O'Ferrell to stop co-operating with F-B-I agents who have spent the past four days searching his house, business, septic tanks and farm pond. The agents apparently are looking for clues to the fatal bombings of a federal judge and a Georgia civil rights attorney. Attorney Paul Harden says of O'Ferrell- quote- ''I'm afraid he's been very co-operative and that concerns me.''

#90025u4840 01/25/1990 ~United Press International

(JAN. 25) UPI - NASA says the shuttle program needs at least one new shuttle to maintain a ''viable'' manned space program well into the next century. Shuttle program manager Robert Crippen says- ''an on-going production line'' is needed. Crippen says a request for funds will NOT be included in the fiscal 1991 budget, but he adds that such a request could be submitted by the mid-1990's. NASA currently operates three shuttles- Atlantis, Discovery and Columbia.

The U-S Mine Safety and Health Administration says 67 miners nationwide died in 1989, with 12 deaths occurring at union-represented mines. United Mine Workers of America chief Richard Trumka says the 12 fatalities in union mines are a record low and calls it- ''clear proof'' that union-represented mines are safer. One U-M-W-A official says the federal statistics point to an alarming problem at small mines with 50 or fewer employees.

Several of Hollywood's great leading men are mourning the loss of one of the Silver Screen's greatest sex symbols. Ava Gardner died of pneumonia today at her London home. She was 67. Charleton Heston says Gardner was one of the- quote- ''great glamour stars of the great era of Hollywood and surely also one of the most beautiful women in the world.''

An apparent amnesiac may wish that he never remembered his name. The man recalled his name and asked F-B-I agents in Boston to find out where he was from. And now he's behind bars. Agents learned that Michael Placko was wanted in Florida for making a bomb threat. Placko will be taken back to Florida next week to face charges.

LAKEWOOD, COL (JAN. 26) BUSINESS WIRE - K N Energy Inc. (NYSE:KNE) Friday announced that its coal mining subsidiary, Wyoming Fuel Co., had reached agreements with The Kansas Power and Light Co. (KP&L) and with BoxCrow Cement Co. L.P. (BoxCrow) to sell a total of up to 400,000 additional tons of coal in 1990.

The contract with KP&L calls for delivery of up to 300,000 tons of coal for use by KP&L's Lawrence, Kan., electrical generation plant. This volume will supplement supplies that KP&L currently purchases from Wyoming mines.

BoxCrow will purchase 100,000 tons of coal in 1990, to fuel its cement plant south of Dallas.

The announced agreements are in addition to a long-term sales contract with Arizona Electric Power Cooperative Inc. of Benson, Ariz., and a contract to supply Lone Star Industries Inc.'s Maryneal, Texas, cement plant. Total Wyoming Fuel coal sales from its southern Colorado operation for 1990 are anticipated to exceed 1.4 million tons, more than doubling 1989 sales of 675,000 tons.

''With the 1989 installation of our longwall mining unit at the Golden Eagle mine west of Trinidad, Colorado, our operation has been able to compete successfully in the marketplace for new coal contracts,'' said John Corsentino, vice president marketing, Wyoming Fuel Co.

''These new agreements are helping us make this mine a profitable Colorado business; we are delivering a high-quality, low-sulfur coal to markets demanding cleaner burning fuels.''

K N Energy, with operations in seven states, supplies natural gas to residential, commercial, industrial and agricultural customers through three pipeline systems. As stated above, K N Energy's Wyoming Fuel subsidiary mines and sells high-Btu, low-sulfur coal from its Golden Eagle Mine in southern Colorado.

Principal natural gas operations serve over 300 communities and 221,000 direct customers in Colorado, Kansas, Nebraska and Wyoming. Operating one of the 10 longest natural gas pipeline systems in the United States, K N Energy has annual sales exceeding $340 million and assets in excess of $510 million.

#90026b0027 01/26/1990 ~Business Wire

PHOENIX (JAN. 26) BUSINESS WIRE - Residents of Phoenix and nine surrounding counties are being asked to nominate excellent teachers in their communities as part of a national THANKS TO TEACHERS campaign announced Friday by Apple Computer Inc., KPNX-TV, Honeywell and the Phoenix Junior League.

Teachers in Apache South, Gila, Graham, Greenlee, La Paz, Maricopa, Mohave Navajo, Pinal and Yavapi counties are eligible to participate.

THANKS TO TEACHERS is a national effort created by Apple Computer, the National Foundation for the Improvement of Education (NFIE), the National Alliance of Business (NAB) and Group W Television to recognize and reward excellent teachers in 25 metropolitan areas across the country.

The campaign invites the general public to nominate local teachers who have shown outstanding dedication to their profession and their students. In June, five awardee teachers from each participating metropolitan area will attend a national awards ceremony and leadership institute in Washington, D.C.

Besides an all-expense-paid trip to Washington, each awardee also will receive an Apple Macintosh computer system. Call For Nominations

To nominate a teacher, local residents must complete a form available at area schools, libraries or at selected Apple computer dealers. The deadline for nominating a teacher is Feb. 16.

Every nominated teacher will be asked to submit an application to the Phoenix Junior League, which is coordinating the application review process. A local panel of business, education and civic leaders will choose final awardees based on individual excellence in the classroom as well as a teacher's ability to effectively use community resource to expand students' learning experiences. Washington Leadership Institute

All awardee teachers will attend a national awards ceremony and have an opportunity to discuss with business leaders some of the major issues facing education reform at the NAB-sponsored Leadership Institute slated for June in Washington.

While in Washington the teachers will work together to develop a set of recommendations for education reform. Upon their return, the teachers will be asked to share that information with their local communities. NFIE will also prepare and distribute a report reflecting the awardees' recommendations.

''Apple is sponsoring THANKS TO TEACHERS because we believe teachers are the key to solving the educational problems facing our nation,'' said Tom Moman, regional manager, Apple Computer.

''In Apple's more than 10 years of working with educators, we have benefited enormously from listening to teachers about their needs in the classroom. We think the general public and policy makers should hear more of what teachers have to say about reforming our education system. This program is a way to make that happen,'' he said.

''In comparison to cultures where teaching is among the most esteemed professions, the United States gives little credit to its teachers,'' said Bernard Gifford Ph.D., Apple's vice president of education. ''This country needs to wake up to the fact that educating children is among the most essential tasks any society must accomplish if it is to survive and

prosper.'' Prime-Time Docudrama

As part of the THANKS TO TEACHERS campaign, KPNX-TV will air in the spring an original, prime-time, one-hour drama about real teachers. The program will be produced by the Entertainment Group's Frank Doelger and Howard Meltzer, veterans of award-winning public affairs and issues-oriented programming.

The station will also broadcast public service announcements about the program and television spots highlighting excellence in teaching.

Apple Computer, the national corporate sponsor of THANKS TO TEACHERS and the prime-time drama, also will contribute over $1 million in computer systems and software -- including one Macintosh computer to each awardee teacher across the country and to each local non-profit THANKS TO TEACHERS partner for tracking and evaluating teacher applications.

BEVERLY HILLS, CA (JAN. 26) BUSINESS WIRE - Salick Health Care Inc. (NASDAQ: SHCI) Friday announced that it has signed a letter of intent to acquire, for an undisclosed amount of cash, more than 90 percent of the equity interest in TeamCare Inc., a privately held regional home care infusion therapy company specializing in oncology and services to hospitals and managed care providers.

TeamCare currently provides services in Pennsylvania, Maryland, Virginia, and the District of Columbia and has present annual revenues of approximately $10 million. The transaction is subject to, among other things, completion of due diligence, execution of definitive agreements and board approval.

"This acquisition would complement our existing outpatient Comprehensive Cancer Center operations and allow for immediate expansion of TeamCare into other geographical areas where we already have a significant presence in oncology and dialysis," said Dr. Bernard Salick, chairman of the board and chief executive officer.

He continued, "The home care option will further extend the comprehensive range of services available at our existing facilities and provide us with additional access to hospitals and managed care providers for all aspects of our business."

Salick Health Care, a leading provider of outpatient, disease-specific

health care, now operates cancer centers in seven locations in Los Angeles Miami, Palm Springs, Palm Beach, and Philadelphia. It operates seven dialysis centers throughout Southern California, maintains over 20 acute hospital inpatient dialysis contracts and distributes medical supplies.

PALO ALTO, CA (JAN. 26) BUSINESS WIRE - Watkins-Johnson Co. (NYSE:WJ) Friday reported net income of $679,000, or 8 cents per share, on sales of $77,130,000 for the fourth quarter of 1989.

Fourth-quarter earnings were lowered by an after-tax provision of $1,780,000, or 21 cents per share, for pending claims. Acquisitions and earthquake disruption also adversely impacted earnings.

Unaudited results for the year ended Dec. 31, 1989, showed net earnings of $18,724,000, or $2.23 per share, on sales of $310,701,000. Included in 1989 net income was a net after-tax increase of $651,000, or 8 cents per share, resulting from various claims and settlements, including the favorable judgment from the Iran-U.S. Claims Tribunal announced in August 1989, and the above provision for pending claims.

In 1988, fourth-quarter earnings were $5,624,000, or 67 cents per share, on sales of $80,560,000. For the year 1988, net earnings amounted to $20,598,000, or $2.46 per share, on sales of $292,205,000.

The company's firm order backlog on Dec. 31, 1989 was $294,396,000, compared to $299,577,000 at the end of 1988. Of the 1989 year-ending backlog, 79 percent is shippable within 12 months, compared to 78 percent one year ago.

Watkins-Johnson's annual meeting of shareowners is scheduled for 10 a.m. Saturday, April 7, at the offices of the company in Palo Alto.

SOLANA BEACH, CA. (JAN. 26) BUSINESS WIRE - Chart House Inc. (NYSE:CHT) Friday announced the opening of a new Chart House restaurant in Haleiwa, Hawaii, and the purchase of an existing restaurant in Scottsdale, Ariz., which will be converted to a Chart House.

The Haleiwa restaurant, located on the North Shore of the island of Oahu, was acquired by the company in October 1989 and reopened as a Chart House in January 1990.

The Scottsdale restaurant is located in the prestigious McCormick Ranch resort development and is scheduled to reopen in late 1990.

The company has four other Chart House restaurants under development in Vero Beach, Fla., Alexandria, Va., Kaneohe, Hawaii, and Greenwich, Conn. All are projected to open in 1990.

The company also announced that it has sold its Chart House restaurant in Tahoe City, Calif. Under an agreement with the buyer, the company will continue to operate the restaurant through March 1990.

Chart House Enterprises Inc. operates 75 restaurants, including 60 Chart House restaurants, one Peohe's and 14 Paradise Bakery restaurants. The company's Chart House restaurants are located in 17 states, Puerto Rico and the U.S. Virgin Islands; Peohe's is located in California; and the company's Paradise Bakery restaurants are located in California, Hawaii and Texas.

In addition, the company's franchisees operate 12 Paradise Bakery restaurants in Northern California, Colorado, Arizona and Oklahoma.

HONOLULU (JAN. 26) BUSINESS-WIRE - Matson Navigation Company Inc. plans to add an eighth vessel to its Pacific Coast-Hawaii fleet, R.J. Pfeiffer, chairman of the board, president and chief executive officer of Matson and its parent company, Alexander & Baldwin Inc. (NASDAQ:ALEX) announced Friday.

Matson's board of directors today approved the purchase of the 791-foot, roll-on, roll-off vessel S.S. Caguasz, a sister ship of the S.S. Kaimokuz which was acquired by Matson in August of 1989.

The Caguasz will be purchased from the Puerto Rico Maritime Shipping Authority and is expected to be delivered to Matson at Jacksonville, Florida about March 26.

''This vessel is being added to Matson's fleet to assure Hawaii customers of superior service, particularly in view of the imminent departure of Hawaiian Marine Lines from Hawaii container service,'' Pfeiffer said.

''Purchase of Caguasz continues Matson's tradition of dedication to meeting the needs of Hawaii's shippers and consignees.''

Caguasz and her sister ship Kaimokuz will be modified to enable containers to be carried on deck in addition to carrying autos and rolling stock below deck. The purchase price of the vessel, including associated modification costs, is $37.6 million.

Caguasz and Kaimokuz were built by Sun Ship Building and Dry Dock Company in 1974 and 1976, respectively. Both formerly operated in the U.S. Atlantic Coast-Puerto Rico service. The Caguasz will be renamed at a later date.

Headquartered in Honolulu, A&B's principal operations are in ocean transportation, property development and management, and agribusiness.

CHANDLER, AZ (JAN. 26) BUSINESS WIRE - ShareData Inc. Friday announced that the Philadelphia Stock Exchange (PHLX) has just begun trading its common stock under the ticker symbol "SDI."

The PHLX is the nation's oldest securities exchange. Founded in 1790, the PHLX originated trading in foreign currency options and today is the world's leading market for these options.

Michael S. Williams, president of ShareData Inc., said, "We're very pleased to add the PHLX to our list of traders in ShareData stock. It was my stated objection in the 1988 annual report to increase the company's exposure and the liquidity of its stock and we continue to work at meeting that objective." H.T. Greenwood and Co. is the registered specialist unit for the shares of ShareData Inc.

The Consumer Products Division of ShareData Inc. develops and markets affordable computer software for a number of computers including IBM, Apple and Commodore. The Business Systems Division markets easy-to-use office automation software. The company is located at 7400 W. Detroit St., Chandler, Ariz. 85226. Telephone number, (602) 961-7519.

CARLSBAD, CA (JAN. 26) BUSINESS WIRE - GASCARD Inc., of Carlsbad, Friday announced its earnings for its first quarter ended Nov. 30, 1989.

Revenues were $1,255,693 for the three months ended Nov. 30., compared with $1,002,715 for the like period last year. The company earned $63,076 or $0.001 per share, its second consecutive quarterly profit, for the three months ended Nov. 30. This represents a dramatic improvement over last year's first-quarter loss of $276,196, or $0.004 per share.

Additionally, GASCARD reported positive cash flow from operations of $166,463 for the first quarter ended Nov. 30, compared with negative cash flow of $1,234,398 in the first quarter of last year when the company made $775,147 of payments related to its Chapter 11 reorganization.

Thomas L. Jewell, president and chief operating officer, said that ''with GASCARD's continued profitability, we can now concentrate on expanding the business and strengthening our position as the dominant fleet fuel management system in the country.'' Background

GASCARD provides fuel management services to tens of thousands of commercial fleets, which transact over 10 million gallons per month, through more than 1,700 locations operating in 39 states.

GASCARD has developed and markets nationally a comprehensive card-activated fuel management system designed to reduce the costs of fueling commercial and governmental fleets by preventing unauthorized purchases; eliminating or lessening the environmental risks associated with underground fuel storage tank ownership or operation; and lowering accounting, administrative and other costs associated with fleet fueling.

Through the company's franchisees, which are typically independent petroleum marketers, the GASCARD system is marketed primarily for use by operators of local and regional delivery, sales and service vehicle fleets such as fuel and beverage distributors, overnight package delivery services, taxis, public utilities and governmental agencies.

The company was originally organized in May 1981 and went public through an offering of its common stock in March 1987. It is traded on the over-the-counter market.

MOUNTAIN VIEW, CA (JAN. 26) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) has announced the availability of the Adobe Plus Pack typeface software for the NeXT computer system.

This is the first Adobe typeface software available for the NeXT platform.

The Adobe Plus Pack for the NeXT computer system is an optical disk containing Palatino, ITC Bookman, ITC Zapf Chancery, ITC Zapf Dingbats, ITC Avant Garde Gothic, New Century Schoolbook, Helvetica Condensed and Helvetic Narrow and has a recommended retail price of $495. The font programs begin shipping Jan. 26, 1990.

''The Adobe Plus Pack contains some of our most popular typeface packages '' said Brian Heuckroth, Product Marketing manager, Adobe's Application Products Division. ''We plan to continue to expand our NeXT computer system font offering to include the entire Adobe Type Library. We intend to offer typefaces on both an individual basis and as a complete set.''

The Adobe Plus Pack for the NeXT computer system is now available from Businessland. For ordering information, customers may contact Adobe at 1-800-83-FONTS.

Vice President of Businessland's Advanced Systems, Kevin Compton, stated: ''the Adobe Plus Pack continues to strengthen NeXT's position as the workstation publishing platform for the 1990s.

''The Plus Pack, for the NeXT, combined with the powerful workstation publishing features of FrameMaker, scanner technology and graphic software now available offer the publishing community a powerful, fully featured, state-of-the-art platform that is extremely easy to use.''

The NeXT computer system is the first implementation of the Display PostScript system developed by Adobe Systems. The Display PostScript system is used as the imaging model both for the display and NeXT's 400 dots-per-inch printer. This is the first system to use a PostScript interpreter to drive an interactive display and a printer.

Adobe Systems was founded in 1982 by Dr. John Warnock and Dr. Charles Geschke. In addition to the Adobe Type Library, Adobe has forms automation, desktop publishing and graphic illustration retail software programs.

Adobe is also the developer of the PostScript page description language and offers its PostScript interpreter on a royalty basis to major computer printer and typesetter manufacturers. Revenues for fiscal 1989 were over $121 million.

#90026b0089 01/26/1990 ~Business Wire

PHOENIX (JAN. 26) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL/PSE:AWA) Friday announced that the carrier has ordered two Boeing 747-400 aircraft and has taken options on two more.

Expected delivery dates for the two firm orders are May 1996 and April 1997.

Don Monteath, senior vice president of operations said, ''The 747-400 is the largest commercial airplane made today.'' America West recently acquired two 747-200 aircraft from KLM and initiated daily service to Hawaii.

He continued, ''By the end of 1990, we will have four 747-200s in our fleet. We are making plans to provide our own 747 maintenance through the expansion of our current technical support facilities as our fleet continues to grow in number as well as aircraft type.

Monteath noted that the carrier has not yet made a decision on the type of engine to be used on the new 747s, but indicated that a decision will be made by mid-1990.

Michael Conway, president and chief operating officer stated, ''While the delivery dates are five to six years from now, this order is in keeping with our long-term strategy of providing service throughout the Pacific Rim.''

He concluded, ''America West currently utilizes one of the world's most modern fleets, an all-Boeing fleet of 747s, 757, 737s and de Havilland Dash 8s, and the addition of these new 747-400s will enhance our operation dramatically.'' The average age of the carrier's fleet is approximately six years.

America West, which began operations on Aug. 1, 1983, has recently been recognized by the Department of Transportation as a major carrier, based on the airline's annual revenues.

America West flies coast-to-coast and to Hawaii with 747s, 757s, 737s and the de Havilland Dash 8 aircraft. With the addition of Boston, the carrier will serve 59 destinations in the United States and Western Canada. America West is also vying for Tokyo route authority and has received the DOT Public Counsel recommendation.

RENO, NV (JAN. 26) BUSINESS WIRE - Sierra Pacific Resources (NYSE:SRP) Friday reported net income per share for the 12-month period ended Dec. 31 1989 of $2.05, up 3 percent compared to $1.98 for the 12-month period ended Dec. 31, 1988.

This increase is due primarily to increased electricity sales by Resources' utility subsidiary to mining customers.

Fourth quarter net income per share was 57 cents compared to 59 cents for the fourth quarter of 1988. The decrease was due in part to a general rate decrease in electric revenues for Sierra Pacific Power Co. which became effective Oct. 1, 1989, and also to decreased natural gas sales attributable to abnormally warm weather in December.

Operating revenues for the quarter ended Dec. 31, 1989, were $113,425,000, up from $105,503,000 a year ago. Operating expenses for the like quarter

were up $91,763,000, up from $82,686,000 a year ago.

For the 12 months ended Dec. 31, 1989, operating revenues were $445,411,000, up from $408,423,000 for the like period in 1988.

DENVER (JAN. 26) BUSINESS WIRE - The Toen Group Inc. Friday announced it has entered into a letter of intent to acquire all of the issued and outstanding common stock of Brentwood Communications Inc., a private Oklahoma corporation, with its principal place of business located in Los Angeles.

The proposed acquisition, as presently contemplated, will involve a 1-for-10 reverse stock split of the company's outstanding shares of common stock and warrants and will also involve the issuance of a controlling block of common stock in exchange for all of the outstanding common stock of Brentwood Communications Inc.

There will be a change of management and the corporate offices of the company will change along with the corporate name. These matters will be subject to shareholder approval and a notice of shareholders meeting and proxy statement is expected to be distributed by the company sometime in the near future.

At the present time the company has only signed a letter of intent and there can be no assurance offered that the transaction will be consummated.

Additional disclosure regarding terms of the transaction and the business and financial condition of Brentwood Communications Inc. will be forthcoming in the proxy materials of the company.

Brentwood Communications Inc. was incorporated in May 1988 and is in the business of manufacturing and distributing prerecorded video tapes. It began selling its first three video tapes (exercise series) in November 1988.

In January 1989 it added two Tom Kite golf instruction tapes and now has approximately 30 videos under exclusive license plus over 50 titles under distribution agreements with other labels.

LAS VEGAS (JAN. 26) BUSINESS WIRE - TGN Inc. - The Gaming Network - (formerly known as Celesta Corp.) announced that the company has been granted a six-month extension by the Federal Communications Commission (FCC) to complete its satellite uplink.

''We are very appreciative of the FCC's granting us an extension,'' said Donald Mustain, chairman of the company's board of directors. ''The extension allows us ample time to complete our satellite uplink and allows us an opportunity to pursue our business plan to raise capital needed to fund operation of our planned cablecast service, TGN, The Gaming Network '' he said.

Mustain indicated that the company is currently pursuing a number of sources to raise needed working capital, including government-sponsored small business loans and the refinancing of its Las Vegas facilities.

Mustain also announced that John Locke has rejoined the company as an executive officer replacing Gary Thompson who resigned as an officer and director on Jan. 22. Locke was formerly an executive with station KVVU in Las Vegas, president of Broadcast International Network Inc. and president of Celesta Corp.

''We are very happy to have John Locke rejoin the company,'' said Mustain. ''His significant broadcasting experience will be invaluable to us as we move toward becoming operational,'' he added. The company also announced that it had resolved to extend the expiration date for outstanding ''A'' and ''B'' Warrants until March 5. The Warrants had previously been extended until Jan. 5.

Each ''A'' Warrant entitles the holder to purchase one additional share of Common Stock at an exercise price of three cents per share. Each ''B'' Warrant entitles the holder to purchase one additional share of Common Stock at an exercise price of five cents per share.

H.T. Fletcher Securities Inc., a market maker, reported that the Common Stock of TGN Inc. closed at 10 cents bid, 15 cents asked on Jan. 25.

TGN Inc. - The Gaming Network - is a development stage company planning to transmit entertainment and gaming programming via satellite to cable television subscribers and satellite dish receivers.

The Common Stock and Warrants of TGN Inc. are traded over-the-counter.

SAN FRANCISCO (JAN. 26) BUSINESS WIRE - AIFS Inc. (ASE/PSE:AIF), a San Francisco-based international educational services company, Friday announced that negotiations are continuing between a special committee of the company's board of directors and a management group led by Roger O. Walther, president and chief executive officer, concerning the group's proposal last month to acquire all the publicly held shares of the company.

In these negotiations, a representative of the company indicated that the special committee has requested an increase in the group's initial offer of $5.25 per share. The company's representative further indicated that the initial offer was subject to numerous conditions and there is no assurance that the continuing negotiations will result in an accepted buy-out offer.

In 1989, approximately 48,500 young people participated in programs offered by the company's three subsidiaries: The American Institute for Foreign Study provides opportunities for American college and high school students to study and travel abroad and brings foreign youths to the United States on a variety of cultural exchanges (including the Au Pair in America program).

ELS Educational Services operates 20 centers throughout the United States for intensive English language training for foreign students. American Council for International Studies is a leading operator of overseas educational travel programs for high school students and teachers.

SEATTLE (JAN. 26) BUSINESS WIRE - Key Bank of Puget Sound Friday announced the addition of 10 new branches to its banking network.

The acquisition is a result of the merger between Key Bank and Western Community Bank's parent company, Washington Community Bankshares Inc.

With its acquisition of the Tacoma-based Western Community Bank, Key Bank of Puget Sound becomes a 42-branch institution with over $1.2 billion in assets.

Hans F. Harjo, president and chief executive officer of Key Bank of Puget Sound, said the acquisition of the Western Community branches was a logical step in the bank's expansion plans. Eight of the new branches are located in Pierce County and one each in West Olympia and Federal Way.

''The merger fills a gap between our existing branches in King and Thurston counties,'' said Harjo. ''Key Bank also plans to open a 43rd branch in the retail plaza of Seattle's AT&T Gateway Tower in June of this year.

''The effective date of the merger was midnight on Jan. 25, 1990,'' said Harjo. ''On the 26th, the branches opened as Key Bank offices and we are ready and eager to serve our newest customers.''

The 10 branches are located in Federal Way, downtown Tacoma, Fircrest, Gig Harbor, Lakewood, Old Town, Parkland, Steilacoom, West Olympia and 35th & South Union Avenue.

KeyCorp (NYSE: KEY) is a mulit-regional bank holding company with assets of $15.5 billion and more than 580 banking offices in eight states. Key Bank subsidiaries provide service to the growing consumer middle-market and small- to medium-size business enterprises. Non-bank subsidiaries provide trust, brokerage, insurance and other financial services in Key Bank markets and other locations where the need for these specialized services exist.

WASHINGTON, DC (JAN. 26) BUSINESS WIRE - Toshihiko Hirai and Mark Jordan, two members of the team that designed and developed the successful Mazda MX-5 Miata sports car were awarded the 1990 Golden Gear Award in a ceremony held last night at the National Press Club in Washington.

The award is given annually by the Washington Automotive Press Association (WAPA) to persons making ''a significant contribution to the automobile.''

Hirai, product program manager for the Miata at Mazda Motor Corp. headquarters in Hiroshima, Japan, is credited with successfully guiding the Miata project from initial design to its introduction. Hirai is acknowledged as having stayed true to the original purity of the Miata concept or, as he puts it, ''a oneness between horse and rider.''

Jordan, assistant chief designer at Mazda Research and Development of North America in Irvine, Calif., was part of the team that drew up the initial design concept for the Miata. ''With the Miata, we wanted to create a timeless design, one that would look as good in 10 years as it does today,'' said Jordan.

While Hirai and Jordan are only two of the many people at Mazda responsible for the ultimate success of the Miata, they are representative of the extensive international cooperation that developed during the project between Mazda in Japan and Mazda's U.S. operations.

Previous ''Golden Gear'' recipients include: J. David Power, of the automotive market research company, and Carroll Shelby, noted racer and entrepreneur.

WAPA members include Washington-area automotive media, government officials, members of the domestic and import automobile industry and others. The group was founded in 1986.

ST. JOSEPH, MO (JAN. 26) BUSINESS WIRE - St. Joseph Light & Power Co.'s 1989 per share earnings were a record $2.45, up 11 cents from 1988, Terry F. Steinbecker, president, announced Friday.

The increased per share earnings resulted primarily from the company's

program to repurchase some of its common stock which reduces the number of shares outstanding. Net income for 1989 was $10.7 million, about the same level as reported in 1988.

Record electric usage for the fifth consecutive year also contributed to the record earnings. Electric sales totaled 1.3 million megawatt-hours. This is an increase of 2.7 percent from the previous record set in 1988.

''To achieve this record after a cool summer is an indication that the area economy continues to improve,'' Steinbecker said. ''While the hot summer was primarily responsible for the sales record in 1988, sales to industrial and commercial customers led the way in 1989.''

Operating revenues for the year also set a record, totaling $79.1 million compared to $76.9 million in 1988. The previous high in revenues were the $78.1 million reported in 1986.

The company's effective annual dividend rate, as a result of the recent 2-cents-per-quarter increase, is now $1.60 per share of common stock. Light & Power has about 4.2 million shares of common stock outstanding.

#90026b0161 01/26/1990 ~Business Wire

ST. LOUIS (JAN. 26) BUSINESS WIRE - Invitron Corp. (NASDAQ/NMS:INVN) announced Friday that it had submitted to the United States Food & Drug Administration, a product license application (PLA) in connection with a pending PLA submitted by NeoRx Corp. for its OncoTrac Small Cell Lung Cancer Imaging Kit.

In addition, Invitron has submitted an establishment license application (ELA) to the FDA.

NeoRx Corp., a Seattle-based biotechnology company, submitted a PLA to the FDA on Dec. 26, 1989, for approval to market its products as the primary imaging procedure to be used in determining the stage to which small cell lung cancer has progressed.

Invitron manufactures the purified antibody for NeoRx under a manufacturing agreement entered into by the companies in July 1989.

Invitron's PLA describes the cell culture, purification and testing procedures used in the production of the monoclonal antibody for NeoRX's kit. The ELA describes Invitron's plant, equipment and manufacturing

controls.

''The submission by Invitron of establishment and product license applications is another major milestone in Invitron's development,'' commented Dr. Joseph Feder, Invitron's president and chief executive officer. ''These filings put Invitron in a position to facilitate the development of additional NeoRx products, as well as those of Invitron's other customers.''

The PLA and ELA filings by Invitron represent its first such filings and are the culmination of over three years of developmental efforts by Invitron in support of NeoRx's product.

The FDA review of the PLA and ELA will be a lengthy procedure. No significant effect on Invitron's near-term revenues is expected as a result of the PLA and ELA submission.

NeoRx has previously announced that it believes its Phase III clinical trial data show that this product can determine the stage of cancer progression of small cell lung cancer patients with virtually the same accuracy as a standard battery of tests comprising a CT scan of the head, a CT scan of the abdomen, a bone scan, and bone marrow aspiration.

However, whereas these traditional staging procedures can take up to a week to perform, OncoTrac imaging can be performed in less than a day and for less cost.

The OncoTrac Small Cell Lung Cancer Imaging Product is the first of a series of cancer imaging products to employ NeoRx's proprietary pancarcinoma monoclonal antibody, NR-LU-10, manufactured by Invitron.

NeoRx has reported that this antibody binds homogenously to virtually all carcinoma forms of cancer, which account for approximately 75 percent of all cancers in the United States and that NeoRx is currently completing Phase II studies using this antibody for non-small cell lung cancer and anticipates initiating Phase III studies for that disease during 1990.

NeoRx is in various stages of development using this antibody for other cancers and has performed limited human imaging studies on cancers of the prostate, colon, breast, ovary and liver, as well as two Phase I cancer therapy trials using NR-LU-10 linked to a therapeutic radionuclide.

Invitron Corp. is engaged in the development, commercial-scale manufacture and purification of complex, mammalian cell-derived biopharmaceuticals, including monoclonal antibodies.

Using its patented continuous perfusion technology, the company provides a broad range of production services to pharmaceutical and biotechnology

companies, as well as develops its own proprietary products.

SAN JOSE, CA (JAN. 26) BUSINESS WIRE - International CMOS Technology Inc. (NASDAQ:ICTI) Friday announced the company achieved record shipments and revenues for the quarter ended Dec. 29, 1989.

For the first quarter ended Dec. 29, the company's product revenues for the quarter were $3,239,000 compared with $1,751,000 for the comparable quarter of the previous year. The company did not report development and technology licensing revenues for the quarter ended Dec. 29, 1989, but in the like period in 1989 reported $825,000 under the terms of development and licensing agreements.

Total revenues for the quarter were $3,245,000 compared with $2,576,000 for the like period last year.

The net loss for the quarter ended Dec. 29, 1989, was $901,000 compared with a net income of $164,000 for the first quarter of the previous year. However, the net income in the prior year included development and technology licensing revenues of $825,000 while the current year did not include such revenues.

Loss and income per share during the first quarter of fiscal 1990 and 1989 were 17 cents and 2 cents, respectively.

International CMOS Technology Inc. designs, develops and markets user-programmable logic and memory devices. The company's CMOS process technology offers the advantages of high speed, low power consumption and re-programmability.

These features allow the customer to reduce size, power supply and cooling requirements, and allow the producer to test each unit for defects before release.

#90026b0200 01/26/1990 ~Business Wire

SAN FRANCISCO (JAN. 26) BUSINESS WIRE - On weekdays from Jan. 29 to Feb. 16, the San Francisco Municipal Railway (Muni) will test a double-deck bus in public service, both to see how well the bus operates in revenue service on the city's streets and to test the public's reaction to the bus as a service vehicle.

Gray Lines Inc., which uses double deckers for their city tour service, has graciously lent the bus to Muni at no charge. The red double-deck bus was manufactured by the Leyland company and is a 40-feet long and 13-feet-9-inches high. A standard Muni diesel bus is also 40 feet long, but is only 10-feet-5-inches high.

From Monday, Jan. 29, through Wednesday, Feb. 7, the double decker will be in weekday, daytime service on the 1AX and 1BX California Express lines and the 38L Geary Limited line. From Thursday, Feb. 8, through Friday, Feb. 16, the double decker will be in weekday, daytime service on the 42 Downtown Loop line.

There will be signs in front and side windows of the bus identifying it as a Muni vehicle and which line it is operating on.

A double decker is being tested because these buses can carry more people than a standard 40-foot vehicle, but take up less storage space and have lower maintenance costs than a 60-foot articulated (bend-in-the-middle) vehicle. The double deckers can seat 83 people, while a Muni articulated bus seats 57 and a standard-sized vehicle seats 40.

Muni will survey riders' responses to the double decker by handing out a questionnaire on a post card that can be mailed to Muni postage free.

After the testing, Muni's transportation and maintenance departments will evaluate the bus' performance and the public's reaction to it, to determine whether double deckers would be suitable for use in regular service.

SACRAMENTO, CA (JAN. 26) BUSINESS WIRE - Bill D. Ellis of Indio and Charles P. Valdes of Sacramento were recently re-elected to fill the two member-at-large seats on the 13-member board of administration of California's $57 billion Public Employees' Retirement System.

Both will represent the more than 860,000 active and retired PERS members until their four-year terms expire in 1994.

In addition, at its January meeting in Sacramento, the board unanimously re-elected Ellis president and Valdes vice president for a period of one year.

Ellis, an equipment mechanic for the Desert Sands Unified School District, has served on the board since 1976. Valdes, an attorney for the California Department of Transportation, was elected to the board in 1984.

SEATTLE (JAN. 27) BUSINESS WIRE - Alaska Airlines frequent fliers will receive triple mileage credit on all flights between Jan. 29 and April 6.

The bonus mileage also applies to all flights on Horizon Air, Alaska's sister carrier.

Under the program, a round trip flight between Anchorage and Seattle will earn the carrier's mileage incentive plan members more than 8,600 miles, while one between Seattle and Los Angeles will earn them more than 5,800 miles.

The triple mileage plan is different from frequent flier promotions recently introduced by other carriers -- a minimum number of flights are not required in order to receive awards.

Alaska frequent fliers can redeem a round trip coach ticket on Alaska for

travel in the United States when they have accumulated 15,000 miles and on Horizon at 10,000 miles.

Alaska and Horizon serve more than 60 cities in Alaska, Mexico, Canada and seven Western states.

SAN FRANCISCO (JAN. 26) BUSINESS WIRE - ACA JOE Inc. announced Friday that it continued to lose money on its operations throughout the third fiscal quarter, which ended Oct. 28, 1989.

Peter Muller, the presient of ACA JOE, estimated that the company lost approximately $2,018,000 on revenues of approximately $3,182,000 during the third quarter.

Muller noted that the retail industry as a whole experienced a slow down in sales. Muller said that the loss was mainly due to sluggish sales coupled with costs associated with its completion of its Chapter 11 Plan of Reorganization, which was approved June 19, 1989. Muller also said that he expects the company to continue to lose money on operations through the end of the current fiscal year.

Since Oct. 28, 1989 ACA JOE has made payments aggregating $450,000 to United Trend Holdings to pay down the outstanding balance on its $15 million Line of Credit with United Trend.

The balance, which currently exceeds that limit, stands at $15,205,000 (including a $1.5 million reserve for payment of a promissory note issued in accordance with the Plan of Reorganization). This amount includes advances for spring inventory purchases to be delivered to ACA JOE stores.

For the two month period ended Dec. 31, 1989, sales were equal to $3,058,000 equalling company expectations. The company experienced an operating loss of $1,181,500 for that period.

Management is continuing discussions with investment banking firms regarding infusion of capital through a private placement of equity or debt securities.

Muller stated that he expects the company to achieve profitability after the second quarter of 1990 with the reduction of restructuring costs and the expansion of licensee sales in the United States and abroad.

In December 1989 Carson Wen tendered his resignation as a director of the company. Wen cited the difficulty in performing such duties while working and residing in Hong Kong.

George Foos has been elected to the board of directors. Foos is a former chief executive officer of the California Division of The May Co., part of a retail group with aggregate annual sales volume in excess of $11 billion. He brings 40 years of valuable and varied retail experience to the board.

Effective Jan. 1, 1990, Dennis Cutter became chief financial officer of ACA JOE Inc. Cutter was chief financial officer of Weinstocks (a division of Carter, Hawley, Hale) from 1979 - 1989. Cutter joined ACA JOE in October 1989 as vice president finance.

OAKLAND, CA (JAN. 26) BUSINESS WIRE - Don R. Livingston, M.D., president and chief executive officer of Occupational Medical Corporation of America Inc. (NASDAQ:OMCA), Friday announced the operating results for the second quarter ended Dec. 31, 1989.

Second quarter results are an after-tax profit of $12,060, or $0.005 per share, compared with an after-tax profit of $255,377, or 10 cents per share, for the corresponding quarter of fiscal year 1989.

Pre-tax income was $21,060 vs. $325,377 for the second quarter of fiscal year 1989. Earnings and loss per share are based on the average number of shares outstanding of 2,519,550 shares.

Year to date results are an after-tax profit of $283,669, or 11 cents per share, compared with an after-tax profit of $656,593, or 26 cents per share, for fiscal year 1989.

Pre-tax income was $483,669 vs. $834,593 for fiscal year 1989. Earnings

and loss per share are based on the average number of shares outstanding of 2,519,550 shares.

Revenues for the second quarter of fiscal year 1990 were $1,512,468 compared with $1,607,987 for the corresponding quarter of fiscal 1989, a decrease of 5.94 percent. Revenues for the quarter were adversely affected by the disruptions and closures caused by the earthquake in October.

Revenues for six months ended Dec. 31, 1989 were $3,274,922 compared with $3,516,130 for the six months ended Dec. 31, 1988, a decrease of 6.86 percent.

Expenses for the quarter ended Dec. 31, 1989, were $1,491,408 compared to $1,282,610 for the corresponding quarter in fiscal year 1989, an increase of $208,798 or 16.28 percent.

Expenses for six months ended Dec. 31, 1989, were $2,791,253 compared to $2,681,537 for the six months ended Dec. 31, 1988, an increase of $109,716 or 4.09 percent.

Reasons for the increase included developmental and start-up costs related to Chx, certain non-recurring health insurance charges, and the addition of Work Fitness Institute. Chx is the new medical bill audit review company which OMCOA started in this quarter.

OMCOA operates eight occupational medical facilities and three rehabilitation centers in California, Washington and Oregon.

AUSTIN, TX (JAN. 26) BUSINESS WIRE - The state of Texas has awarded Andersen Consulting a $2.6 million contract to develop a one-of-a-kind information system to give elected officials, state agency administrators and the public greater access to state management information.

''Andersen Consulting will design and install an Executive Information System (EIS) and a Decision Support System (DSS) to link with the state's new Uniform Statewide Accounting System (USAS) which we helped design,'' said Warner Croft, an Austin-based Andersen Consulting partner. ''This unique system will enable Texas legislators, other officials and the public to access state management information instantly and easily.''

Croft said Texas will be the first state with this capability. The system is to become operational in January 1991, in time for the Legislative session.

Croft said system users will be able to access financial and workload performance data for state services, develop trend forecasts and perform simulation exercises. This information will be delivered on-line in understandable, layman terms.

''The Texas Legislature is replacing its existing accounting system with USAS to run the state's financial operations more efficiently,'' Croft said. ''The EIS and DSS will translate financial data into meaningful management information so officials can make more informed budgetary and planning decisions on important state services, such as education, health, welfare and public transportation.''

State lawmakers will be able to access information on terminals in legislative committee rooms and offices. Officials at state agencies will be able to retrieve information using terminals in their offices. Details on Andersen Consulting's design and installation of the new systems, as well as required hardware and software, will be available upon completion of the design phase, scheduled for later this year.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954, when it installed the first computer application for commercial use. The firm helps clients use information in all phases of their management activities -- strategic, industry, operations and financial.

The organization's worldwide client base has access to more than 18,000 highly trained consulting professionals. Andersen Consulting is a member firm of the Arthur Andersen Worldwide Organization.

#90026b0621 01/26/1990 ~Business Wire

DALLAS (JAN. 26) BUSINESS WIRE - Tuesday Morning, the Dallas-based deep discount retail chain achieved record 1989 sales of $96.8 million, an 18.6 percent increase from 1988's $81.6 million.

Comparable store sales rose 10.6 percent.

Preliminary, unaudited results indicate that full-year earnings per share increased 22.2 percent to a record $1.10 from the 90 cents posted in 1988. ''We had an outstanding year,'' according to Lloyd L. Ross, chairman of the board and president.

''Both sales and profits increased dramatically despite severe pricing pressures from the department stores. Campeau Corp. created a 4th quarter pricing environment beyond anything I've ever experienced,'' Ross said. ''We had to match their markdowns which eroded some of our profit margin percentages,'' Ross added.

In the fourth quarter, revenues rose 18.5 percent to $42.6 million from $35.9 million. Comparable store sales advanced 11.3 percent.

Tuesday Morning is a growing chain of 114 stores in 19 states. The company is a deep discount retailer selling famous-maker, first quality giftware, usually found in better known stores, at 50-80 percent off retail prices.

SARASOTA, FL (JAN. 26) BUSINESS WIRE - Elcotel Inc. (NASDAQ/NMS: ECTL), a leading manufacturer of privately owned public communications equipment

Friday announced unaudited results of operations for the third fiscal quarter and nine-month period ended Dec. 31, 1989.

Earnings from operations for the third fiscal quarter ended Dec. 31, 1989, were $278,000, or 5 cents per share, on sales of $4,802,000, as compared to earnings from continuing operations of $47,000, or 1 cent per share, on sales of $3,413,000, for the fiscal quarter ended Dec. 31, 1988.

For the prior year third quarter the company reported a loss from discontinued operations of $1,684,000, or 31 cents per share, resulting in a net loss of $1,637,000, or 30 cents per share, for the quarter ended Dec. 31, 1988.

Earnings from operations for the nine month period ended Dec. 31, 1989, were $494,000, or 9 cents per share, on sales of $12,124,000, as compared to $1,461,000 from continuing operations, or 27 cents per share, on sales of $13,968,000 for the comparable period in the preceding fiscal year.

For the nine-month period of the prior year the company reported a loss from discontinued operations of $2,237,000, or 41 cents per share, resulting in a net loss of $776,000, or 14 cents per share, for the nine-month period ended Dec. 31, 1988.

George C. Pierce, chief executive officer, commented that the company has now reported four consecutive profitable quarters, and he further expressed confidence that the trend of increasing profitability would continue. Pierce noted that three new products had contributed to increased revenue and net profit in the third quarter, specifically the Series 5 Line Powered Payphone, the PAOF Store and Forward Retrofit Kit, and the Automatic Call Processor, which in combination accounted for about 45 percent of the quarterly revenues.

He further commented that a PAOF call processing revenues were growing rapidly and would make a meaningful contribution in the near future. Lastly, Pierce stated that the company's new Access Phone and Faxmatic 101 Public Facsimile product would also begin to make contributions in the next quarter, completing the broad product diversification effort the company planned and began implementing more than a year ago.

KANSAS CITY, MO (JAN. 26) BUSINESS WIRE - W. Thomas Grant II, president and chief executive officer of BMA Corp., announced Friday that the corporation is currently engaged in negotiations with a potential buyer of its insurance subsidiary, Business Men's Assurance Company of America.

If agreement is reached, it is anticipated that BMA Corp. would retain certain assets currently held by the insurance company.

There is no assurance that negotiations will result in an agreement or that any transaction will be completed if an agreement can be reached. BMA Corp. disclosed in October 1989 that it was giving considerations to the possible sale of its insurance operations.

BMA Corp., a Missouri corporation, based in Kansas City, is primarily a holding company with diversified operations in insurance, real estate and laboratory testing. BMA Corporation engages in life and health insurance through Business Men's Assurance Company of America, which has over $30 billion of life insurance inforce.

NORTH STONINGTON, Conn.(JAN. 26) BUSINESS WIRE - Analysis & Technology Inc., a major supplier of professional and technical services to the U.S. Navy for submarines and antisubmarine warfare (ASW), continued its uninterrupted record growth during its third quarter ended Dec. 31, 1989, with earnings up 14 percent on a 24 percent advance in revenues, A.T. Mollegen Jr., president and chief executive officer announced Friday.

Record December quarter earnings of $873,000 were equal to 40 cents per share this fiscal quarter compared with $767,000, or 35 cents per share, in the previous December quarter.

With volume gains from Applied Science Associates (ASA), A&T's training subsidiary acquired last June, total revenues surged in the December quarter just ended to a record $23,800,000 compared with $19,246,000 in the December 1988 quarter.

Revenues of ASA - which sells services primarily to non-military customers - increased to $3,280,000 in the just-ended December quarter. As a result of interest expense and amortization of goodwill related to the acquisition, the ASA unit, as anticipated, did not contribute to A&T net earnings for the December 1989 quarter.

A&T's overall business continued to expand. Total contractual backlog at the end of December 1989 stood at $325.3 million, more than 19 percent higher than at Dec. 31, 1988.

''We are continuing to win major contracts in the U.S. Navy's high priority areas of submarines and ASW,'' Mollegen commented, ''and we are gaining market share in Navy work at the same time, resulting in a record quarter for contract value won.'' He added ''ASA, our civilian market business, is also continuing to expand in the fast-growing, relatively new industry of providing custom-optimized training programs and systems. ASA's clients include major corporations and some governmental entities.''

PHOENIX (JAN. 26) BUSINESS WIRE - In an unprecedented action by any financial institution, a buyer-protection plan against loss, theft or damage is now available, at no extra cost, to personal checking account customers.

Beginning Monday, Jan. 29, Valley National Bank of Arizona begins protecting purchases made with Valley Bank checks, including those written on Money Market Savings and credit line accounts, by automatically adding a protection program, called Shopper's Assurance, to its checking plans.

The bank's Student Express, Choice, and business checking accounts are excluded from the program.

Although Valley Bank currently provides this type of coverage to its credit card customers, as do other financial institutions and credit card companies, the bank is first in the country to provide protection for check purchases.

Purchases are protected two ways: Warranty Extension doubles the manufacturer's original U.S. warranty on new retail products up to one additional year for warranties up to five years: 90-day Protection insures new retail purchases for a full 90 days from the date of purchase against loss, theft, accidental breakage or fire.

Purchases do not have to be registered in advance to receive coverage, and the claims process is simple due to the fact that one toll-free number is used for credit card, checking, Money Market Savings, and credit line account purchases.

If an item purchased with the personal check breaks while still under its original warranty, customers are to follow the manufacturer's instructions to arrange for repair. If the manufacturer's warranty has expired, but Warranty Extension is still in effect, repairs can be arranged by calling the toll-free number and mailing compies of required documents to Warranty Extension.

If a check purchase is lost or damaged within 90 days of purchase, a claim for repair, replacement, or a cash reimbursement of the item is made by calling the toll-free number and completing a Loss/Damage Form.

Coverage under Warranty Extension includes any new retail product, not being used for business purposes, that has a U.S. manufacturer's written warranty for five years or less and is purchased with a Valley Bank check. Motorized vehicles are not included.

The 90-Day protection covers almost any new retail item, although some of the more common exceptions include travelers checks, art objects cash or its equivalent, tickets of any kind, negotiable instruments, animals and living plants.

Shopper's Assurance is a service provided to the bank's customers through National Card Control Inc. for credit card purchases, and Telecredit

Marketing Services Inc. for checking and other products.

#90026b0637 01/26/1990 ~Business Wire

GREENVILLE, S.C. (JAN. 26) BUSINESS WIRE - Span-America Medical Systems Inc. of Greenville announces the following results for the first quarter of fiscal 1990, according to Donald C. Spann, chairman.

For the first quarter of fiscal 1990, ended Dec. 29, 1989, total revenues were $5,411,806, a 27 percent increase compared to $4,254,865 in revenues for the first quarter of fiscal 1989. Net income totaled $225,571, or 7 cents per share compared to $232,153, or 7 cents per share in the first quarter last year.

''Compared to the first quarter of last year,'' said Spann, ''we experienced sales growth in each of the major product lines of our foam and contract packaging operations. We saw particularly strong growth in our medical foam segment.

''Our slight decline in net income came primarily from increased sales and marketing expenses. These additional expenses resulted from increased marketing efforts for existing products and for the development of our new Leisure Mat for the consumer market. We are pleased with the continuing strong demand for our products.''

The board of directors of Span-America Medical Systems, at its Jan. 25, 1990 meeting, declared a quarterly dividend of 2 cents per share, payable on March 1, 1990 to shareholders of record as of Feb. 15, 1990.

''It has been one of our primary goals, particularly in the past few years to provide a meaningful return to our shareholders,'' stated Spann. ''After a number of years of investing heavily back into the business, we are proud to have reached the point where the board felt we could pay this dividend to our shareholders.''

Also at its Jan. 25 meeting, the board elected Donald C. Spann to the position of chairman of the board, chief executive officer and chairman of the executive committee. Spann has served as chairman of the board, president and chief executive officer since the company commenced operations in 1975.

Further, the board elected Charles B. Mitchell to the position of president and chief operating officer. Mitchell joined Span-America as

director of manufacturing in February 1982. He was elected executive vice president and secretary in April 1982, and a director in March 1983.

From 1974 to 1982, Mitchell served as plant manager for C.B. Fleet Co. Inc., a pharmaceutical manufacturer in Lynchburg, Va. Mitchell holds a B.S. degree in engineering from the University of Virginia and an M.B.A. from Lynchburg College.

''We are fortunate to have a man of Charlie Mitchell's considerable talents here at Span-America'' stated Spann. ''His impact on this company has been clearly demonstrated by the tremendous progress we have made since he came aboard in 1982. We look forward to continued success under his leaderhip as president of the company.''

WHITE PLAINS, NY (JAN. 26) BUSINESS WIRE - IBM Corporation and Worldwide Chain Store Systems, Inc., (WCSS) Friday announced that IBM has agreed to acquire a minority equity interest in WCSS, a pioneer in the development of integrated application software used to manage retail distribution functions. WCSS is headquartered in Chicago.

Under the terms of the equity agreement, IBM will make an investment in WCSS in the form of newly issued voting convertible preferred stock. Additional details of the equity agreement were not disclosed.

The two firms also entered into a marketing and development agreement that will enhance WCSS's application offerings for the IBM System/370 (a) and Application System/400 (a) platforms.

WCSS, Inc., is a new corporation comprised of WCSS, Ltd. and WCSS Engineered Standards, Inc. The company is an IBM Business Partner - Authorized Industry Application Specialist.

WCSS designs, develops, and installs customized computer systems to control all facets of chain store operations. It provides consulting and data processing services to some of the world's largest retail food and merchandise distribution companies in North America, Europe, Asia and Australia. Functions supported include online warehouse management, online labor management, online purchasing/investment buying and order/management billing.

"Our investment in Worldwide Chain Store Systems is an indication of IBM's continuing commitment to provide our customers with the application solutions they need," said Marvin L. Mann, IBM vice president and president, Services Sector Division. "We look forward to working more closely together to expand our support to customers in the retail industry."

"This agreement with IBM will help us further improve and broaden our comprehensive set of software products," said Charles C. Fitzmorris, chairman and chief executive officer, WCSS, Inc. "Our customers in the U.S. and abroad will benefit from enhanced applications to meet their growing business needs."

Fitzmorris also announced that Kenneth Kelly, formerly executive vice

president, WCSS, Ltd., has been named president of the newly-formed WCSS, Inc.

CHARLESTON, S.C.(JAN. 26) BUSINESS WIRE) - First Financial Holdings Inc. (NASDAQ:FFCH) Friday announced that the board of directors has declared a regular quarterly cash dividend of 12 cents per share payable Feb. 26, 1990 to shareholders of record as of Feb. 9, 1990.

It was also announced that at its annual meeting of stockholders on Jan. 24, 1990, D. Van Smith and Howard F. Burky were elected to three year terms to the board of directors, to expire in 1993. Smith serves as chairman of the board of directors of First Financial and its subsidiary, First Federal of Charleston.

He is president and co-owner of Van Smith Building Material Co. Burky is the retired president of First Federal of Charleston.

In his report to stockholders, A.L. Hutchinson Jr., president and chief executive officer, stated: ''The company has achieved another year of profitability and solid performance. Assets are now in excess of $923 million and our capital exceeds all regulatory requirements.

''We are pleased to have our stockholders continue to share directly in the success of the company through payment of regular quarterly cash dividends.''

The common stock of First Financial Holdings Inc. is traded in the Over-The-Counter National Market System under the NASDAQ symbol FFCH.

RICHMOND, VA (JAN. 26) BUSINESS WIRE - Cadmus Communications Corp. (NASDAQ: CDMS) reports increased sales and earnings for the quarter ended Dec. 31, 1989. Sales increased for the six-month period while earnings were level.

Net income for the second quarter was $1,342,000, up 63.7 percent from second quarter fiscal 1989 net income of $820,000. Sales for the quarter

were $43,603,000, up ten percent over second quarter fiscal 1989 sales of $39,644,000. The company attributed the increase in earnings for the quarter to stronger performance in its retail catalog business.

Net income per share for the quarter was 22 cents on average outstanding shares of 6,077,000, compared to 13 cents per share on average outstanding shares of 6,066,000 for the second quarter of last year.

For the six-month period, net income was $2,052,000 compared to $2,062,000 for the same period of fiscal 1989. Sales for the first six months of fiscal 1990 were $82,087,000, up 4.9 percent over the same period of fiscal 1989.

Net income per share for the six months was 34 cents per share on average outstanding shares of 6,064,000, which was unchanged from the 34 cents per share on average outstanding shares of 6,054,000 last year.

Headquartered in Richmond, Va., Cadmus is a graphic communications holding company specializing in publication production services, promotional, and financial printing, point-of-purchase advertising, and direct marketing.

#90026b0666 01/26/1990 ~Business Wire

SEATTLE (JAN. 26) BUSINESS WIRE - Burlington Resources Inc. announced Friday that it has added more than half a trillion cubic feet of natural gas equivalent reserves to its asset base.

After accounting for 1989 production, divestitures and reserve revisions, proved reserves increased by seven percent to 4.6 trillion cubic feet of gas equivalent at December 31, 1989.

This total should rank the company as the ninth largest U.S. producer based on domestic gas reserves.

This addition to reserves reflects the continued success of the company's aggressive acquisition program, additional coal seam development, horizontal drilling in the Williston Basin in North Dakota, and other domestic drilling activities. While the company added coal seam reserves in the San Juan Basin during 1989, activities in that area were primarily concentrated on developing the proved undeveloped reserves that were booked at year end 1988.

The 1989 reserve addition of approximately 560 billion cubic feet equivalent is more than double Burlington Resources' annual production, placing it well above recent industry averages.

WICHITA, KS (JAN. 26) BUSINESS WIRE - David Novak, senior vice president of marketing for Pizza Hut Inc., and Rich Cronin, senior vice president of marketing for Nickelodeon/Nick at Nite, Friday announced that a multi-year multi-million dollar agreement has been reached between the nation's largest pizza restaurant chain and the nation's largest television network for children.

''Without question, this partnership marks the first major comprehensive kids' marketing effort in the 32-year history of Pizza Hut,'' Novak explained.

As part of the arrangement, Pizza Hut will have an active roll in the launch of a Nickelodeon magazine, develop premiums and promotions based on Nickelodeon shows, participate in a variety of Nickelodeon special events and run commercials on the network.

Complimentary copies of the premiere issue of Nickelodeon magazine will be distributed via Pizza Hut's more than 6,000 units nationally. The giant pizza chain will also be a featured advertiser in the inaugural issue.

Pizza Hut will also become a presenting sponsor of Nickelodeon Studios, which is part of Universal Studios Florida, in Orlando.

Finally, Pizza Hut will participate as a co-sponsor of the Nickelodeon Studios Audition tour, scheduled to begin in May, 1990. The multi-city tour will find contestants, age 6-12, to participate in Nickelodeon Studios productions.

''We think Pizza Hut is the perfect marketing partner for Nickelodeon, because pizza is the number one choice for food among kids. By teaming with our resources, Pizza Hut will be able to leverage our integrated multi-media marketing network to even more effectively reach kids and their parents,'' said Nickelodeon's Cronin.

Novak added, ''We're very pleased with the agreement we've reached with Nickelodeon. We think it will set a new benchmark for marketing partnerships in the consumer products industry. By tapping into the power of Nickelodeon, we will send a clear message to all the kids in America

that Pizza Hut is now the best place for great pizza and great times.''

In 1989, the Pizza Hut system sold well in excess of 500 million pizzas from more than 6,200 traditional restaurants, delivery outlets and Express units located in all 50 states and for more than 1,200 units in nearly 60 foreign countries. Pizza Hut Inc. is headquartered in Wichita and is a wholly-owned subsidiary of PepsiCo Inc.

Nickelodeon is a registered trademark of MTV Networks, a division of Viacom International Inc. MTV Networks owns and operates three cable television programming networks -- MTV: Music Television, VH-1 and Nickelodeon/Nick at Nite all of which are registered trademarks of MTV Networks.

MENLO PARK, CA (JAN. 26) BUSINESS WIRE - Liposome Technology Inc. (LTI), a pharmaceutical company focused on developing liposome-based delivery systems for therapeutic products, Friday announced it had executed an agreement for a private placement of common stock and warrants with David Blech, a New York investor.

The agreement calls for Blech to purchase 2,240,000 shares of LTI's common stock for $1.25 per share, or approximately 25 percent of the company. Blech also paid $200,000 for a warrant, exersiseable over a two year period, to purchase an additional 800,000 shares at $3.50 per share.

''We are pleased that David Blech has chosen LTI for this significant investment,'' said Nick Arvanitidis, LTI's chairman and chief executive officer. ''Mr. Blech has successfully invested in the biotech industry and enjoys a reputation for working with management to build a business out of developing technology companies.''

''This investment reflects my respect for LTI's pharmaceutical know-how and its core technology, in particular the company's long-circulating Stealth liposomes,'' said David Blech. ''I am also impressed by LTI's experienced management team and storng patent position.''

Located in Menlo Park, LTI is developing liposome-based delivery systems designed to improve the safety, efficacy and convenience of pharmaceutical products.

CONCORD, NH (JAN. 26) BUSINESS WIRE - Robert L. Gable has been elected chairman of the board of directors of New Hampshire Savings Bank Corp. (NASDAQ:NHSB), succeeding Nathan Wechsler who continues to serve as a director of the company.

Gable joined the board in 1984 and has chaired the company's Audit and Compensation Committees. A certified public accountant with extensive business experience, Gable also serves on the boards of directors of three other public companies: Artel Communications Corp. of Hudson, Mass., Symbolics Inc. of Burlington, Mass., and Unitrode Corp. of Lexington, Mass.

In recent years he has also served on the boards of directors of Apollo Computer and H.K. Webster Co.

Prior to becoming an independent management consultant in 1988, Gable was

president and chief executive officer of Computervision Corp. until it was acquired by Prime Computer.

A resident of Andover, Mass., Gable is chairman of Outward Bound Inc. and director of the Lawrence, Massachusetts Boys Club. In 1989 he was honored by the Greater Lawrence Massachusetts Chamber of Commerce for his outstanding contribution to the betterment and welfare of the community.

GASTONIA, N.C.(JAN. 26) BUSINESS WIRE - On Jan. 26, 1990, the board of directors of Public Service Company of North Carolina Inc. (NASDAQ: PSNC), increased the company's quarterly dividend on common stock by 1.5 cents per share, from 26 cents to 27.5 cents, payable April 1, 1990 to shareholders of record March 9, 1990.

This is the 129th consecutive quarterly dividend on the company's common stock. With this 5.8 percent increase, the indicated annual dividend is now $1.10 per common share.

The directors also declared regular quarterly dividends on all series of the company's cumulative preferred stock, payable April 1, 1990 to

shareholders of record March 9, 1990.

Public Service Company distributes natural gas to over 222,000 customers in 87 cities, towns and communities in 26 counties ranging from the Raleigh, Durham and Chapel Hill areas in the northeast; the Concord, Statesville, Gastonia and Forest City areas in the Piedmont; to the Asheville, Hendersonville and Brevard areas in the western part of the state.

Public Service Company, through subsidiaries of its wholly owned subsidiary, PSNC Natural Resources Corp., also participates in oil and gas exploration and production, and retails propane gas.

WESTON, MA (JAN. 26) BUSINESS WIRE - Eastern Enterprises (NYSE:EFU) announced Friday that Richard R. Clayton has been elected chief operating officer and Gail Deegan has been elected chief administrative officer of the company.

In his new position, Clayton will be responsible for all of Eastern's operating subsidiaries, including Midland Enterprises Inc., Boston Gas Co. and the two companies in Eastern's new Water Products Group.

Deegan will direct all corporate legal, financial, treasury, insurance and corporate relations functions for the company.

Clayton and Deegan will continue as executive vice president and senior vice president, respectively, of Eastern. They report to Robert W. Weinig president and chief executive officer.

The elections are effective Feb. 1.

Clayton, 51, joined Eastern in 1987 as executive vice president and chief administrative officer. From 1984-87 he was chairman, president and chief executive officer of Vermont Castings Inc. From 1974-84 he held management positions with SPS Technologies Inc., including executive vice president, domestic operations, and served as a director from 1977-84.

His business experience also includes sales, marketing and management positions with The Trane Co. from 1960-73.

A 1960 graduate of Purdue University with a BA degree in industrial economics, Clayton has three children and lives in Concord, Mass., with

his wife, Leigh.

Deegan, 43, joined Eastern in 1978 as a financial analyst and held financial management positions from 1979-82. She was elected assistant treasurer in 1983, treasurer in 1985, vice president and treasurer in 1986 and senior vice president, chief financial officer and treasurer in 1988. Prior to joining Eastern, Deegan was an elementary school teacher in public schools in Massachusetts and California from 1969-77.

Deegan, a 1968 graduate of College of St. Rose, hold an MS degree in history from Ohio State University and an MBA degree from Simmons College Graduate School of Management. She lives in Newtonville, Mass., with her husband, William Huddleston, and their two sons.

Eastern Enterprises is the parent company of Midland Enterprises Inc., the leading barge operator on the nation's inland waterways; Boston Gas Co., New England's largest distributor of natural gas; and a Water Products Group serving municipal, commercial and industrial markets with water system components and purification systems.

In addition, Eastern owns a 15.01 percent equity interest in Peabody Holding Co. Inc., the nation's largest coal producer. For 1989 Eastern earned $56.6 million, or $2.43 per share on revenues of $840 million.

LOS ANGELES (JAN. 26) BUSINESS WIRE - Mergers with key accounting and management consulting services firms in Switzerland, France, Germany and Denmark during the past year have given the Price Waterhouse worldwide organization a powerful presence overseas as the world prepares for the economic unification of Europe in 1992.

''While a lot of attention has been focused on the Pacific Rim due to our location, it is important to remember that most West Coast firms still go to Europe first when they reach out to international markets,'' said J.J. Coneys, International Tax Partner for Price Waterhouse.

''The economic unification in 1992 should make business opportunities even more attractive in Europe, and we feel that Price Waterhouse has positioned itself very strongly to take advantage of it.''

Price Waterhouse Europe recently announced an agreement to acquire a significant minority shareholding in Revisuisse, a prominent Swiss

accounting firm. Upon fulfillment of existing obligations, Revisuisse will become a full Price Waterhouse member and will be merged with Price Waterhouse Switzerland.

The professional practices of both firms will be combined to offer comprehensive professional services, including auditing, taxation, management consulting, and insolvency and receivership services.

In early 1989, Price Waterhouse merged the practice of its affiliate in France, Petiteau Scacchi et Associes, with Befec, a leading independent French accounting firm. The new Befec group will represent Price Waterhouse in France ad French speaking Africa.

The Paris office of Befec will be the third-largest Price Waterhouse office in the world in staff size, following New York and London.

Also in 1989, Price Waterhouse Germany reached an agreement with Germany's third-largest bank, Commerzbank AG, under which it will provide management consultancy services through Baumgartner and Partner, a well known German consultancy, specializing in personnel recruitment.

This move follows the trend of German banks toward offering comprehensive services to their customers, including management consulting.

Price Waterhouse expanded in Scandinavia as well in 1989. The Price Waterhouse Danish practice merged with the Danish management consultancy firm, IKO Group A/S.

Price Waterhouse is a leading worldwide professional organization of accountants and auditors, tax advisers, and management consultants.

Through a global network of firms practicing in 420 offices in 103 countries and territories, Price Waterhouse professionals provide advisory services to businesses, individuals, nonprofit organizations, and government entities. The Southern California practice of Price Waterhouse employs more that 900 men and women in eight offices.

EAST HARTFORD, CT (JAN. 26) BUSINESS WIRE - Japan Air System (JAS) is to buy ten McDonnell Douglas MD90-30 aircraft powered by the internationally-developed V2500(a) engine.

Value of the engines, including spares, for the aircraft will be US$120 million.

The airline will operate the quiet MD90s at Osaka which enforces the most stringent rules restricting noisey aircraft of any airport in Japan.

Advanced acoustic design throughout the engine has resulted in V2500-powered aircraft that are exceptionally quiet externally with quiet, vibration-free passenger cabins. The engine also features low fuel consumption.

The Japanese order brings to $570 million the value of V2500 orders this week. On Tuesday (January 23), Alaska Airlines of the U.S.A. said it will buy V2500 engines worth up to $450 million to power 40 MD90s.

JAS is the first airline in Japan to select the V2500. Japanese Aero Engines Corporation is one of the five companies in five nations collaborating in the development and manufacture of the engine.

The V2500 began airline service in May last year powering the latest version of the Airbus A320. It also has been ordered to power the larger Airbus A321, as well as the new McDonnell Douglas MD90.

TIMONIUM, MD (JAN. 26) BUSINESS WIRE - Kirschner Medical Corp. reported a Friday decision was rendered in the patent action brought against Kirschner by ALM Equipment Hospitaliers, S.A. in the United States District Court of South Carolina.

The jury concluded yesterday Kirschner's Chick II Light infringed ALM's Hubert patent. The jury awarded ALM $820,000 in compensatory damages with the possibility that the court may assess additional damages. The company intends to appeal the decision.

Kirschner management and the company's attorneys continue to believe the Chick II Light possesses a number of unique features that substantially differentiate it from the Hubert patent. In fact, the company was recently notified by the United States Patent Office that a patent would be issued on its Chick II Light.

The decision follows an award rendered by a panel of American Arbitration Association arbitrators on Aug. 21, 1989 in favor of Kirschner in which they determined that ALM had intentionally and without justification breached its agreement to supply surgical lights to the company and that ALM had engaged in unfair competition against the company in a number of respects.

A hearing to determine the amount of damages payable by ALM to be awarded to Kirschner is scheduled to commence on Feb. 12, 1990 before the same panel of arbitrators.

Kirschner develops, manufactures and markets orthopedic instruments and implants including Reconstructive Surgery and Trauma Devices, Orthopedic Support Products, Surgery Tables, Surgery Room Lighting and Medical Endoscopic Systems. The company operates facilities in Timonium, Md.; Fair Lawn, N.J.; Delray Beach, Fla.; Greenwood, S.C.; Marlow, Okla.; Hopkinton, Mass.; and Valencia, Spain.

ROTTERDAM, NETHERLANDS (JAN. 26) BUSINESS WIRE - Early last year Nedlloyd Lines, a division of the Royal Nedlloyd Group N.V., announced its intention to enlarge its container vessel fleet.

In the course of 1989, orders were placed for five 3100 TEU panamax type vessels with extended cell guides with Ishikawajima-Harima Heavy Industries (IHI) and Mitsubishi Heavy Industries.

In addition to these five vessels and in line with Nedlloyd's new building plans, a letter of intent has now been signed for the construction of two 3950 TEU postpanamax type vessels with extended cell guides. Delivery of these two vessels is scheduled for late 1992 or early 1993.

The main characteristics of the two postpanamax vessels are:

Length	279.00	meters
Breadth	37.75	meters
Depth	23.25	meters
Design draught	12.50	meters
Corresponding deadweight	50,000	tons
Total capacity	3,950	TEU
Service speed	23.00	knots

The vessels will also be built by Ishikawajima-Harima Heavy Industries (IHI) and Mitsubishi Heavy Industries and will complete Nedlloyd's newbuilding program for the time being.

#90026b0712 01/26/1990 ~Business Wire
EL DORADO, AR. (JAN. 26) BUSINESS WIRE - Murphy Oil Corp.'s net income for the fourth quarter of 1989 was $21 million, 61 cents a share, Jack W. McNutt, president, Friday announced.

These earnings compare with net income of $25.7 million, 75 cents a share, for the last quarter of 1988 and $2.5 million, 8 cents a share, in the third quarter of 1989.

Recovery of $3.9 million from third parties, which related to the sinking of a drilling barge in a prior year, enhanced earnings for the quarter, while the last quarter of 1988 benefited $9.4 million from one-time items.

Earnings from exploration and production for the fourth quarter were $17.5 million compared to $5.2 million in 1988. Average crude oil and gas liquids prices were up $4.94 a barrel in the United States, $5.78 in Canada, $6.76 in the United Kingdom, and $6.22 in other areas.

Production increased 302 barrels a day in Canada and 2,411 in the United Kingdom (downtime at Ninian in 1988), but declined 1,097 barrels a day in the United States and 349 in other areas. Natural gas production was 3 percent higher; average prices were down 10 cents an MCF in the United States, 16 cents in Canada and 8 cents in Spain. Exploration expenses were

$9 million compared to $14.5 million a year ago.

Refining, marketing and transporation operations earned $11.1 million, down from $24.8 million a year ago. U.S. operations earned $7.8 million compared to $19.3 million in 1988. Operations in the United Kingdom and Western Europe earned $2.1 million, down from $3.5 million a year ago.

Profits from purchasing, transporting and reselling crude oil in Canada declined from $2 million in 1988 to $1.2 million due to lower volumes and a decrease in unit margins.

Losses from contract drilling were $9.1 million compared to $8.5 million in the 1988 fourth quarter. ODECO's utilization rate was 60.3 percent compared to 57.6 percent in the 1988 fourth quarter and average day rates were up marginally, but these improvements were more than offset by higher mobilization and reactivation costs. The diving business earned $1.6 million, up substantially from $.1 million a year ago.

Earnings from farming, timber and real estate declined from $1.5 million in 1988 to $1.2 million. Lower margins on sales of lumber and farm commodities more than offset profits on lot sales at Chenal Valley. Corporate functions incurred losses of $5.3 million in the current quarter and $6.8 million in the 1988 fourth quarter.

Revenues for the quarter were $453.6 million compared to $415.1 million for the fourth quarter of 1988. Crude oil and gas liquids production averaged 45,232 barrels a day compared to 43,965 in 1988. Natural gas production averaged 245 million cubic feet a day, up from 239 million a year ago.

Refinery crude runs were 126,109 barrels a day compared to 127,956 in 1988. Petroleum product sales were 136,680 barrels a day, down from 145,244 a year ago.

Net income for 1989 was $46.6 million, $1.37 a share, compared to $38.8 million, $1.14 a share, earned in 1988. The 1989 results included the $3.9 million recovery from third parties related to the drilling barge. Results for 1988 included gains of $16.3 million from asset dispositions and $10.9 million from settlement of tax, land rental and natural gas take-or-pay disputes.

Revenues for 1989 were $1.7 billion compared to $1.5 billion in 1988. Crude oil and gas liquids production averaged 44,052 barrels a day compared to 47,704 in 1988. Natural gas production averaged 232 million cubic feet a day, up from 193.9 million last year. Refinery crude runs were 122,821 barrels a day compared to 116,415 in 1988. Petroleum product sales were 133,385 barrels a day, up from 127,950 a year ago.

CAMBRIDGE, MA. (JAN. 26) BUSINESS WIRE - Lotus Development Corp. Friday announced that Garry Harvey has joined the company as general manager, Latin America.

Based in Sao Paulo, Brazil, Harvey will direct all sales, service, and marketing activities for the company throughout South America, Central America, Mexico, and the Caribbean. He will be responsible for administering the network of sales offices and authorized resellers through which Lotus markets its products in the region, in Spanish, Portuguese, and English-language versions.

Harvey comes to Lotus after 17 years at Technicon Instruments, a major supplier of chemical and medical-analysis equipment. As Area Manager for Latin America for the past 10 years, he was responsible for developing Technicon's business in the region into a profitable enterprise.

Previously, he had managed the company's after-sales marketing in the Asia/Pacific region, and served as assistant managing director of its Belgian subsidiary.

''Latin America is already one of the fastest-growing portions of Lotus' business,'' said James Meehan, Lotus' vice president for international operations. ''Particularly in the past year, as a result of our efforts to combat software piracy in the region, we have seen dramatic growth in the legitimate use of Lotus software. As we build the infrastructure of service and support that this expanding base of customers will require, Garry's knowledge of the region and business-development skills will be invaluable assets.''

Harvey, 47, received a Bachelor of Arts degree from Macquarie University, Sydney, Australia. He holds qualifications from the New South Wales Technical Institute in analytical chemistry, industrial electronics, and biology. He is fluent in English, French, Portuguese, and Spanish.

Lotus Development is the leading developer of application software and information services delivered on compact disk. Lotus' international operations have developed versions of the company's products in nine local languages, and distribute them in 65 countries.

LYNN, MA. (JAN. 26) BUSINESS WIRE - GE (USA)(a) Aircraft Engines' CT7-9C turboprop engines will power CASA-IPTN CN235 military transport aircraft selected by the Republic of Turkey for the Turkish Air Force's 52 lightweight airplane transport program.

Aircraft deliveries will begin in 1991 and continue through 1997. The CT7-9C engine, a 1,870 shaft horsepower turboprop, entered service on the CN235-100 in 1989 with the Ecuador Armed Forces.

Bruce Gordon, general manager of GE's Small Commercial Engine Department, said, ''We are very pleased with the Republic of Turkey's decision. The performance, technology, and maintainability features of the CT7 are major contributors to the aircraft's ability to meet the mission requirements of the Turkish Air Force. This program also expands GE's relationship with Turkey as a major aircraft engine supplier and partner.''

GE's CT7 turboprop engines enetered service in 1984 and, since then, have accumulated nearly 1.9 million engine flight hours powering 195 aircraft in 16 countries.

#90026b0730 01/26/1990 ~Business Wire

BOWLING GREEN, KY (JAN. 26) BUSINESS WIRE - Trans Financial Bancorp Inc. (NASDAQ:TRFI), a bank holding company serving southcentral Kentucky, reported record earnings of $2,787,000 for 1989.

The company said its 1989 earnings were 37.5 percent higher than 1988 earnings of $2,027,000. On a fully diluted, per share basis, earnings were $1.92 vs. $1.45 for 1988.

Fourth quarter earnings were $723,000 (51 cents per share), compared with $793,000 (55 cents per share) for the like quarter in 1988. Fourth quarter earnings for 1989 included a provision for loan losses of $500,000.

The corporation also utilized certain income tax credits which reduced the current year's tax liability by $240,000. Fourth quarter earnings in 1988 included gains from the sale of investment securities of $300,000. Total assets increased to $360 million from $342 million a year ago.

Chairman and Chief Executive Officer Douglas M. Lester attributed the substantial earnings increase to corporate and consumer loan growth, fee income generated from deposits, income from other fee-based services, and the corporation's cost containment program that began last year. He emphasized that the additional provision for loan losses in the last quarter did not relate to any specific credits but were prudent in light of the current economic and real estate climate.

Trans Financial, a holding company for The Citizens National Bank of Bowling Green and Citizens Bank and Trust Co., Glasgow, serves southcentral Kentucky through nine offices. Its stock is traded in the NASDAQ National Market System under the symbol TRFI.

#90026b0732 01/26/1990 ~Business Wire

HAVERHILL, MA. (JAN. 26) BUSINESS WIRE - Family Bancorp (NASDAQ:FMLY) Friday announced a net loss of $1.6 million, equivalent to 59 cents per share, for the fourth quarter ended Dec. 31, 1989, and earnings of $879,000, equivalent to 28 cents per share, for the full year.

Bancorp reported earnings of $1 million, or 30 cents per share, in the fourth quarter of 1988, and $3.4 million, or 94 cents per share, for all of 1988.

As previously announced, Bancorp made a fourth quarter provision for possible losses on loans and othet assets of $3 million. Bancorp's provisions for the full year total $5.8 million. These charges against earnings are a reflection of the increase in the level of non-performing loans and real estate assets throughout 1989.

Non-performing assets were $20.3 million at Dec. 31, 1989, vs. $12.6 million at Sept. 30, 1989, and $10 million at Dec. 31, 1988. During 1989, Bancorp incurred actual charge-offs on loans of $2 million; however, fourth quarter net charge-offs were only $228,000. The balance of the allowance for possible losses at year end was $5.8 million, and represented 29 percent of non-performing assets.

Bancorp conducted an aggressive stock buy-back program throughout 1989 which was concluded at year end. The total number of shares outstanding at Dec. 31, 1989, was 2,608,150, vs. 2,770,350 at Sept. 30, 1989, and 3,293,150 at Dec. 31, 1988. The capital-to-asset ratio at Dec. 31, 1989, remained a very strong 10.1 percent.

Family Bancorp is the parent company of The Family Mutual Savings Bank, a state-chartered savings bank with assets of approximately $485 million serving northeastern Massachusetts and southeastern New Hampshire.

BELLEVILLE, IL (JAN. 260 BUSINESS WIRE - William S. Badgley, chairman of the board, announced the appointment of a prominent St. Louis businessman, William E. Cribbin, to the Magna Group Inc. board of directors effecitve March 1, 1990.

Cribbon is president of N-K Scratch Pads/Print-Graphics and Cribbin Properties. Prior to his current position, Cribbin had been with Nies/Kaiser Printing Co. in St. Louis for approximately 30 years.

Cribbon is a native of St. Louis. He is a graduate of St. Louis University with a BS in accounting. Cribbin has been very active in various civic and professional associations: Printing Industries of St. Louis and America, Independent Petroleum Association, Missouri Athletic Club, and Allied Food Club of St. Louis.

Bill is on the board of directors and is past finance chairman of Catholic Charities' Child Center of Our Lady Hospital. He is active in the Immacolata Catholic Church, Belleville Economic Progress and Christian Brothers College High School.

Cribbin has been on the board of directors for Magna's lead bank, Magna Bank, N.A., Belleville, Ill., since 1982 and has been associated with the bank for over 30 years. He will continue in that capacity until March 1, 1990.

Cribbin and his wife, Clare, reside in St. Louis. They are the proud parents of eight children and have seven grandchildren.

Badgley commented, ''Bill Cribbin is a good businessman and we look forward to having a person of his caliber on our board.''

Magna Group Inc., a multi-bank holding company headquartered in Belleville owns 9 banks with 46 locations throughout central and southern Illinois, a trust company and a data processing company.

NEW ALBANY, IN. (JAN. 26) BUSINESS WIRE - Robinson Nugent Inc. (OTC:RNIC) reported net sales of $12,995,000 for its second quarter ended Dec. 31, 1989, an increase of 5 percent over reported sales of $12,360,000 a year ago.

Net income for the quarter was $269,000, or 5 cents per share, compared to $280,000, or 5 cents per share, in the prior year.

Net sales for the six months ended Dec. 31, 1989 were $26,007,000, compared to $25,124,000 for the like six-month period in the prior year. Net income for the six months was $299,000, or 5 cents per share, compared to $751,000, or 12 cents per share, for the prior year.

Gross margins advanced in the quarter ended Dec. 31, 1989, principally from increased sales. Margins for the six months ended Dec. 31, 1989 were comparable to the results of a year ago.

Selling, general and administrative expenses advanced in both the quarter and six months ended Dec. 31, 1989. The company had higher selling expenses in both quarters and higher one-time consulting expenses in the first quarter.

The company completed the quarter ended Dec. 31, 1989, with a backlog of customer orders of $12 million compared to $11 million a year ago.

The company also announced that Richard A. Lindenmuth had resigned as president and chief executive officer and as a member of the board of

directors of the company effective as of Jan. 25, 1990. Larry W. Burke, executive vice president of the company, has been named as chief operating officer and will report directly to the board of directors.

The company said that Lindenmuth intends to pursue other business interests. The company will recognize a pretax charge of $650,000 in the quarter ending March 31, 1990, under the terms of an agreement with Lindenmuth.

Robinson Nugent Inc. designs, manufactures and markets electronic connectors and integrated circuit sockets. Its products are sold throughout the world for use by manufacturers of computers, data terminals telecommunications equipment, automobiles and a wide variety of other products to interconnect components of electronic systems.

MELBOURNE, FL. (JAN. 26) BUSINESS WIRE - Alexander Trowbridge, former president of the National Association of Manufacturers, and Allan Huber, executive vice president of 3M Corp., Friday were elected to the board of directors of Harris Corp.

Their elections fill a vacancy and expand the Harris board to 11 directors.

Trowbridge, president of Trowbridge Partners Inc., of Washington, was president of NAM for 10 years until December 1989. Prior to joining NAM, Trowbridge's career included positions as vice chairman of Allied Chemical Corp., president of The Conference Board, and president of the American Management Association.

He also held positions with the U.S. Dept. of Commerce, serving as the Assistant Secretary for Domestic and International Business from 1965-67 and as Secretary of Commerce from 1967-68.

A graduate of Princeton University's School of Public and International Affairs, he has served on the White House Task Force on Private Sector Initiatives and the President's Board of Advisors on Private Sector Initiatives. He serves on the boards of NAM and other business, education and civic organizations.

Huber is executive vice president, 3M Commercial and Consumer Sector and a member of the 3M board of directors. He joined 3M in 1953 as a salesman in the company's Printing Products Division, where he was later promoted to area sales manager and marketing manager.

His management positions at 3M have included; managing director of 3M's German operations, vice president of Photo and Graphic Arts Group, executive vice president of Graphic Technologies Sector, and executive vice president of the Electronic and Information Technologies Sector.

Huber is a graduate of the University of California and serves on the City of Hope Pilot Medical Center board of trustees.

Harris Corp., with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronic systems, communications, semiconductors, and an office-equipment distribution network.

#90026b0771 01/26/1990 ~Business Wire

AVON, MA. (JAN. 26) BUSINESS WIRE - Westerbeke Corp. (NASDAQ:WTBK) announced Friday the results of its operations for the fourth quarter and the fiscal year ended Oct. 28, 1989.

Net sales for the quarter ended Oct. 28, 1989, were $3,366,200 compared to $4,197,100 for the quarter ended Oct. 29, 1988, a decrease of 20 percent.

The company reported a net loss of $140,200, or 7 cents per share, for the quarter ended Oct. 28, 1989, compared to a net profit of $37,900, or 2 cents per share, for the quarter ended Oct. 29, 1988.

For the fiscal year 1989, the company reported net sales of $14,336,200 compared to $18,228,900 for fiscal 1988, a decrease of 21 percent. The company reported a net loss of $399,400, or 20 cents per share, for the fiscal year 1989, compared to a net profit of $114,700, or 5 cents per share, for fiscal 1988.

Mark P. Sullivan, executive vice president and chief operating officer of the company, stated,

''Our financial performance directly reflects the 21 percent sales decline experienced during fiscal 1989. We believe that the sales decline is attributable to general business conditions in the domestic recreational marine market, in particular decreased demand for new boats.

''The lower sales and associated production levels resulted in higher average unit labor and overhead costs and consequently a lower gross profit margin. Although we reduced the combination of operating and interest expenses by 16 percent during the fiscal year, this reduction was insufficient to compensate for the sales volume decline.

''During 1989, we initiated several programs to improve sales volume and market share in the shrinking and still highly competitive marine market. We performed a complete review of our U.S. sales and marketing activities and as a result made significant changes to our U.S. distribution network and caused re-allocated resources to our National Account Sales program.

''We restructured our distribution center and enhanced our spare-parts information systems. Finally, through an acquisition in January 1990, we diversified our marine market product line by adding marine air conditioning products.

''On Jan. 5, 1990, Westerbeke acquired Rotary Marine Inc. of Sarasota, Fla., a manufacturer of high quality marine air conditioners and accessories. The company, which markets its products under the Rotary Aire trademark, was acquired primarily because the product is consistent

with Westerbeke's goals of superior product quality and design innovation. Also, the product line is compatible with our manufacturing, sales and service capabilities.

''Finally, we believe that offering complementary marine products through our existing distribution and service channels provides us with a competitive advantage over our competitors.

''We do not expect the recreational boating market to rebound appreciably in the near future. However, we believe that Westerbeke is adequately positioned both strategically and financially to compete in today's market.''

Westerbeke Corp. designs, manufactures and markets marine products intended principally for recreational marine applications.

SPRINGDALE, AR (JAN. 26) BUSINESS WIRE - Cannon Express Inc. (NASDAQ/NMS:CANX) announced its operating results for the second fiscal quarter of 1990, ended Dec. 31, 1989.

	Cannon Express Financial Highlights Inc.
Net income	9 cents vs. 22 cents
	$152,806 vs. $367,007
Revenues	$4,171,117 vs. $3,999,924

Net income for the second fiscal quarter was $152,806, compared to $367,007 for the comparable 1989 quarter.

Operating revenues for the 2nd fiscal quarter were $4,171,117 vs. $3,999,924 for the comparable 1989 quarter.

Increased expenses during the quarter were the reason for the lower earnings. Higher fuel costs were the most significant portion of the increased expenses during the second quarter, and are largely responsible for the lower earnings.

During the second quarter the company completed delivery of the 36 new tractors which were ordered during fiscal 1989. The company has ordered an additional 39 tractors that will be added to the fleet during the third fiscal quarter ending March 31, 1990.

Cannon Express Corp. the operating subsidiary of Cannon Express Inc. is an irregular route common and contract truckload carrier, which provides transportation for manufacturers and retailers products throughout the United States.

MILWAUKEE (JAN. 26) BUSINESS WIRE - Shareholders of Federated Financial Savings (NASDAQ:FEDF) approved all proposals presented for action at the company's annual meeting held yesterday.

Over 72 percent of the 1.38 million shares were represented at the meeting with over 92 percent of those voting in favor of all questions on the agenda.

Among those items presented, shareholders:

-- Elected Donald J. Ripp for a two-year term to the board of directors. Ripp is the founder and president of Fair Finance Corp., a West Allis business providing personal loans, leasing and mortgage financing. Shareholders also re-elected six incumbent directors.

-- Approved changing its name to Federated Bank, S.S.B.

-- Approved an increase in the number of authorized shares from 4 million to 10 million.

In commenting on the outlook for fiscal 1990, Robert B. Pieters, president

noted that ''Net income will be substantially improved compared to 1989. Higher-yielding shorter term consumer and adjustable rate mortgages in our portfolio have doubled since December 1987, so we are better protected from interest rate fluctuations.

''Our projected merger with Hopkins will add substantial value to the Federated franchise by virtue of the locations it adds to our branch network in Milwaukee, Washington and Waukesha counties. Hopkins' healthy penetration in the checking account market and core of residential real estate loans with low delinquency rates are important assets,'' Pieters said.

Federated will also assume executive space at Hopkins' Mayfair office in an effort to join more operating functions in that location and to reduce costs, he announced.

''The addition of 'Bank' to our name is not insignificant. It is a visible confirmation of the transition we have made in recent years and signifies that our firm intends to strengthen our position as a full service financial institution,'' he commented.

Pieters said that the market surveys indicated that 40 percent of consumers use only banks vs. savings and loans solely because banks have a stronger image and are perceived to provide more services to consumers.

''Federated has provided all of the financial services consumers have needed for many years including consumer loans, credit cards, checking accounts, safe deposit boxes and more,'' he added.

Federated has 10 branch offices in southeastern Wisconsin.

WASHINGTON (JAN. 26) COMTEX - The 8-K report filed at the SEC shows on Jan. 24, 1990, Capt. Crab Inc. announced that a wholly owned subsidiary, Cryotech Industries Inc., has negotiated the use of an existing seafood processing plant in Africa. Cryotech has also purchased equipment and supplies which are to be shipped to the plant for use.

Crab products will begin being processed at the plant on a small scale, and Cryotech estimates that it will be three to six months before the venture's true potential can be determined. Due to a lack of sufficient working capital for these operations, their success will depend upon financing arrangements.

The executive offices of Cryotech Industries Inc. are located at 10800 Biscayne Blvd., Miami, FL 33161. The company's telephone number is (305) 895-9505.

WASHINGTON (JAN. 26) COMTEX - The 10-Q report filed at the NASD shows Princeton Electronic Products Inc. lost $21,465, or $0.00 per share, on revenues of $72,726 for the quarter ended Nov. 30, 1989.

This compares with a loss of $15,067, or $0.00 per share, on revenues of $124,029 for the same period in 1988.

-30- 473

#90026c0076 01/26/1990 ~Comtex

WASHINGTON (JAN. 26) COMTEX - Frontier Adjusters of America Inc. filed a Form 8-K with the NASD stating on Jan. 3, 1990 its wholly-owned subsidiary Frontier Adjusters Inc., purchased the office building occupied by both firms. The purchase price was $1 million of which $600,000 was paid in cash and $400,000 by promissory note.

The executive offices of Frontier Adjusters of America Inc. are located at 45 East Monterey Way, Phoenix, AZ 85012 and the telephone number is (602) 264-1061.

-30- 665

#90026c0077 01/26/1990 ~Comtex

WASHINGTON (JAN. 26) COMTEX - Votrax Inc. filed a proxy statement with the NASD stating its originally scheduled Dec. 13, 1989 annual shareholders meeting has been rescheduled for Feb. 7, 1990.

The company states in the proxy statement that it is in a serious financial condition, having marginal liquidity and no current outside means of financing.

A topic at the meeting will be whether the company should turn to outside sources for funding in order to have a chance to survive as a going concern. The consequences of obtaining such outside funding could result in a substantial dilutive effect on the current capital structure and could result in a change of control.

TUNIS (JAN. 26) - Thirty-four people have died and 22 are unaccounted for following the recent floods in Tunisia, the Interior Ministry said Friday.

It said figures from the National Relief Committee showed nearly 15,000

homes had been damaged or destroyed in the floods which swept the southern and central parts of the country earlier this week.

The ministry said numerous roads and bridges had been made unusable by the floods. Rail links and electricity supplies had been cut.

The ministry said some regions had seen twice as much fall in two days as normally falls in an entire year.

#90026d0530 01/26/1990 ~French/German News Agency

MAPUTO (JAN 26) - U.S. President George Bush has signed a decree taking Mozambique off the ''blacklist'' of Marxist-Leninist countries prevented from receiving loans or guarantees from the U.S. Export-Import Bank, according to a statement from the U.S. Embassy here Friday.

The statement said Mr. Bush signed the decree on Wednesday.

The official Mozambican news agency AIM quotes a source in the embassy as saying that Mozambique was put on the list on October 2 1986, and that the official announcement was made by the then President Ronald Reagan on October 15 of that year.

Mozambique's ruling FRELIMO party dropped all reference to Marxism-Leninism in its programme adopted at a congress in July last year.

TOKYO (JAN. 26) - Japan's industrial production rose 5.9 percent in 1989, its third successive yearly gain, the International Trade and Industry Ministry said in a prelimary report issued Friday.

The 1989 index of the nation's manufacturing and mining stood at 119.7 against 100 for the base year of 1985, the ministry report said.

General, electric and transport machinery rose 10.5 percent, 7.3 percent and 10.0 percent respectively from 1988, it said.

The index covering domestic shipments and exports went up 6.1 percent in 1989, while the inventory index rose 8.6 percent, the report said.

The ministry also announced that Japan's industrial output index stood at 120.7 in December, down 0.1 percent from November.

Ministry officials attributed the drop to a slowdown in exports.

-30- 974
#90026d6920 01/26/1990 ~French/German News Agency
Frankfurt (JAN. 26) - The German Futures Market (Dtb) was launched here Friday to put Frankfurt on the international forward trading map.

The fully computerised market initially will permit forward trading on shares of 14 of the largest West German corporations, officials said.

The Dtb targets a business volume of some 10,000 options contracts per day during the first year, modest by comparison to the 450,000 contracts registered each day on the world's leading forward trading market, the Chicago Board Options Exchange (Cboe).

Later on, the Dtb is to be expanded to include all shares covered in the German Share Index Dax.

Finance industry analysts believed the Frankfurt futures exchange could eventually lure billions of dollars' worth of business away from the current leading European forward trading markets, the ''Liffe'' in London and the ''Matif'' in Paris.

#90026d7090 01/26/1990 ~French/German News Agency
Frankfurt (JAN. 26) - The West German airline Lufthansa said here Friday it carried more than 20 million passengers for the first time ever last year, a 5.4 percent increase from 1988.

Without disclosing financial results for 1989, a Lufthansa spokesman said the airline recorded robust growth in all categories. Overall, the airline achieved a 67.6 percent capacity utilisation, up 0.6 percent from 1988.

The airline carried 869,000 tonnes of freight, a 10.8 percent increase over 1988.

The number of total flights for the year increased 7.6 percent to 291,000, covering a distance of 360 million kilometres, a seven percent increase over 1988, the spokesman said.

For 1990, Lufthansa planned to increase its capacities by 17 percent to cope with demand.

#90026d7150 01/26/1990 ~French/German News Agency
PARIS (JAN. 26) - French computer company Bull SA France is to axe 1,200 jobs this year to cope with "the slowdown and changes in the market", the

management said.

Most of the layoffs will be in administration and management, with more executives losing their jobs than in previous cutbacks. The manufacturing work force will remain almost stable, according to the statement released Thursday.

Bull said it would try to offer personnel who lose their jobs alternative employment in the company, rather than simply sacking them.

Bull SA France has already chopped 1,800 jobs since 1988.

#90026d7160 01/26/1990 ~French/German News Agency

PRETORIA (JAN. 26) - South Africa's official inflation rate, as measured by the Consumer Price Index (CPI), hit a five-month high in December at a year-on-year 15.3 percent, the government's Central Statistical Services (CSS) said here Friday.

Since July when it was pegged at 15.5 percent, the CPI inflation rate has been hovering at the 14.8 percent level, with a rate of 14.9 percent being recorded in November.

But CSS said a seasonally adjusted 2.6 percent CPI for food in December had boosted that month's inflation rate.

Large monthly increases occurred mainly in the prices of vegetables ((8.2 percent), fruits and nuts (4.8 percent) and coffee and cocoa (3.6 percent).

The average inflation rate for 1989 as a whole was 14.7 percent, compared with 12.9 percent for 1988, 16.1 percent for 1987 and 18.6 percent for 1986.

Inflation reached a peak of 20.6 percent in January 1986 but dropped to 12.3 percent in August last year.

#90026d7190 01/26/1990 ~French/German News Agency

TOKYO (JAN. 26) - After enjoying near-zero inflation for four years, Japanese consumers were hit with price increases in 1989 which could herald

enduring inflationary pressures, economists said Friday.

Last year's inflation rate was 2.3 percent, breaking the two per cent barrier for the first time since 1984, according to government figures released Friday. By comparison, 1988 inflation was 0.7 percent after 1987'S 0.1 per cent rate.

The administration of Prime Minister Toshiki Kaifu cites the three per cent consumption tax on most goods and services introduced last April as the main reason for the price rise.

But economists at the state Economic Planning Agency said that the tax accounted for 1.2 percentage points of last year's total inflation.

That leaves "pure inflation" of just over one percent, a new phenomenon here, according to other economists.

Experts explain this inflation primarily by the depreciation of the yen, which slipped 15 percent against the U.S. dollar in 1989, boosting the cost of imports. At the same time, labor shortages pushed up wages by about five per cent.

Other inflationary factors included hikes in the cost of imported raw materials, especially oil which jumped six percent, soaring real estate prices, a boom in household consumption and a swelling money supply, they said.

The clothing industry led the advance with various labels hiking prices by an average of 4.4 percent, while the cost of school supplies increased four per cent, leisure activities 3.2 percent and rents three per cent, according to government figures.

The Bank of Japan tightened its monetary policy largely in response to these inflationary pressures, raising its discount rate - which had been unchanged since the start of the decade - three times in 1989.

The central bank is particularly concerned with the rise of wholesale prices, which climbed 2.5 percent in 1989, the first increase in seven years, with the consumption tax accounting for only 1.7 percentage points of the rise.

#90026d7220 01/26/1990 ~French/German News Agency

Biel (JAN. 26) - The Swiss watch industry said Friday it achieved record exports of 6.04 billion francs (4.03 billion dollars) in 1989, up 19.6 percent from the year before.

The Swiss Watch Industry Assocaition (Fh) said the number of wristwatches exported climbed 5.6 percent to 42.5 million. An additional 30 million clockwork assembly kits were exported.

Altogether, the value of Swiss watch production reached about 6.5 billion francs, roughtly half the world total, the Fh said.

#90026d8040 01/26/1990 ~French/German News Agency

WASHINGTON (JAN. 26) - The U.S. economy grew at a sluggish annual rate of 0.5 per cent in the fourth quarter of 1989, the Commerce Department reported Friday.

The modest rise in the gross national product (GNP), though slightly above the 0.4 per cent increase expected by most analysts, signals a significant cooling in the U.S. economy in the final three months of last year. The GNP rose at an annual rate of three per cent in the third quarter of 1989.

For the year, the GNP rose 2.9 per cent, compared to 4.4 per cent in 1988 and 3.7 per cent in 1987.

The 1989 figure was the smallest increase since a 2.7 per cent rise in 1986.

Inflation as measured by an index linked to the GNP stood at 3.8 per cent in the fourth quarter and at 4.5 per cent for the year, the department said,

compared to 2.9 per cent in the third quarter and 4.2 per cent for all of 1988.

The consumer price index for December, released last week, showed an annual inflation rate of 4.6 per cent, compared to 4.4 per cent in both 1988 and 1987.

ATHENS (JAN. 26) - The United States and Greece have agreed to close down two of the four U.S. military bases in this country, an Athens daily reported Friday.

The agreement is to be announced officially on Monday, Ethnos said quoting authoritative sources in Washington.

The move was aimed at improving relations between the two countries and took into account recent democratic changes in Eastern Europe, the paper added.

The U.S. facilities, located at Hellenikon and Nea Makri, are also said to be outdated. The U.S. military runs two other bases on the southern island of Crete. A total of 5,000 U.S. troops are stationed in Greece.

#90026d8930 01/26/1990 ~French/German News Agency

PARIS (JAN. 26) - The current account of the French balance of payments showed a seasonally-adjusted surplus of 400 million francs (70 million dollars) in November, according to finance ministry estimates released Friday.

In October France posted a current-account deficit of 6.5 billion francs (11 billion dollars).

-30- 497

#90026d8950 01/26/1990 ~French/German News Agency

BEIJING (JAN. 26) - Car sales in China last year slowed due in part to the closure of many auto sales rooms, steep price rises, and tightened controls on state spending, the China Daily newspaper said Friday.

Mr. Miao said the market was sluggish because the government had cut the number of auto trading companies to 117 from about 2,000 in 1988, and had

tightened control over spending by state bodies, the country's main purchasers of vehicles.

The three major overseas manufacturers - Volkswagen in Shanghai, Peugeot in southern Guangzhou and AMC in Beijing - were hit hard by the austerity measures and have cut back operations. According to forecasts 510,000 cars will be built this year in China against 560,000 in 1989.

Cars are status symbols in China and a Fiat-Polski, similar to a Fiat-600 compact, sells for 30,000 yuan (6,883 dollars) or the equivalent of 16 years pay for the average worker in China.

#90026d9380 01/26/1990 ~French/German News Agency

TOKYO (JAN. 26) - Saudi Arabia's Petroleum Minister Sheikh Hisham Mohi ed-Din Nazer told Japanese Prime Minister Toshiki Kaifu here Friday that his country wanted to open an oil refinery in Japan, a Japanese official said.

Saudi Arabia's participation in the refinery business in Japan would benefit both countries, creating a stable oil supply from the Middle East, Mr. Nazer was quoted as saying.

The Saudi minister made similar remarks in a separate meeting with Japan's Foreign Minister Taro Nakayama Friday, a government official said.

It was not immediately known if Mr. Kaifu and Mr. Nakayama had made any commitment.

Mr. Nazer arrived here Thursday on a week-long visit for talks with Japanese government and business leaders.

-30- 911

#90026d9390 01/26/1990 ~French/German News Agency

TOKYO (JAN. 26) - Japan's crude oil imports rose 8.2 percent to 209.7 million kiloliters (1.32 billion barrels) in 1989, the International Trade and Industry Ministry said Friday.

The United Arab Emirates was the top supplier of crude oil to Japan last year, exporting 37.8 million kiloliters (237.4 million barrels), it said.

Saudi Arabia was the second largest supplier, followed by Indonesia, Oman and China, the ministry said without specifying the volumes.

Japan's dependence on the Organization of Petroleum Exporting Countries (OPEC) for crude oil imports last year rose 4.5 percentage points from

1988 to 69.2 percent, the ministry added.

MADRID (JAN. 26) - An Iranian suspected of heading a major drug smuggling ring has been arrested along with his Spanish girlfriend after dlrs 22 million worth of heroin was found at their Madrid homes, officials said Friday.

A police spokesman said the Iranian, Ali Reza Salehi, and his girlfriend Virginia Esteva were taken into custody earlier this month following raids on their luxurious suburban residence and on an apartment in the city center owned by Esteva.

Police seized 10 kg of heroin, with an estimated street value of dlrs 22.5 million, along with a revolver, several rifles, a silencer, ammunition, false passports, a powerful motorcycle, four cars and dlrs 36,000 in cash.

The spokesman said Esteva's sister, Cristina, another Iranian and three more Spaniards had also been arrested in connection with the drug haul.

Salehi, considered by authorities to be a violent and dangerous criminal, is wanted by Danish police. The spokesman said the couple's opulent life style and absence of visible means of support first attracted their attention.

#90026f2119 01/26/1990 ~United Press International
(JAN. 26) UPI - Friday's Credit Market Yields:

Security	Friday	Thursday	Year ago
Federal funds rate	8.22	8.24	9.18
91-day Treasury bills	7.94	7.95	8.32
182-day Treasury bills	8.04	8.01	8.34
1-year Treasury bills	8.05	8.05	8.31
3-year Treasury notes	8.38	8.32	9.07
7-year Treasury notes	8.45	8.39	9.00
30-year Treasury bond-(new)	8.57	8.47	8.77
10-year US West Corp -(new)	9.08	9.01	9.53
30-year Bell Telephone bond	9.59	9.49	9.70
GNMA 8.5 15-year mortgage	9.27	9.20	9.78
GNMA 8 30-year mortgage	9.36	9.29	9.79
FNMA 8.5 30-year mortgage	9.49	9.44	9.73
Freddie Mac30-year mortgage	9.46	9.42	9.70

Quotations are representative of all sectors and maturities of the credit markets: Treasuries; top-rated corporates as represented by telephone issues; quality municipal AA- and A-rated bonds and the increasingly important government-backed mortgage bonds.

Municipal General Obligation year-ago yields are weekly averages. Government mortgage yields are corporate bond equivalents.

ADDIS ABABA (JAN. 26) XINHUA - SPAIN WILL EXTEND A LOAN OF 16 MILLION U.S. DOLLARS TO ETHIOPIA UNDER AN AGREEMENT SIGNED BY THE TWO COUNTRIES HERE TODAY.

THE ACCORD STIPULATES THAT THE LOAN SHOULD BE USED TO PURCHASE IRRIGATION EQUIPMENT AND RELATED MATERIALS FROM SPAIN.

THE ETHIOPIAN NEWS AGENCY SAID THAT THE LOAN IS INTENDED TO SUPPLEMENT THE IMPLEMENTATION OF THE FINCHAA SUGAR PROJECT SITUATED SOME 200 KILOMETERS WEST OF ADDIS ABABA.

THE PROJECT IS JOINTLY FINANCED BY THE AFRICAN DEVELOPMENT BANK, SWEDEN, AUSTRALIA, SPAIN AND THE GOVERNMENT OF ETHIOPIA.

MAPUTO (JAN. 26) XINHUA - THE MOZAMBICAN GOVERNMENT TROOPS STORMED FOUR CAMPS OF THE ANTI-GOVERNMENT MOZAMBICAN NATIONAL RESISTANCE (MNR) AND KILLED 80 MNR REBELS FROM JANUARY 10 TO 17, RADIO MOZAMBIQUE SAID TODAY.

DURING THOSE MOPPING-UP OPERATIONS, THE GOVERNMENT FORCES ALSO CAPTURED 10 MNR REBELS AND FOUR MNR COLLABORATORS, ADDED THE RADIO REPORT.

MAPUTO HAS CLAIMED THAT THE GOVERNMENT FORCES KILLED 310 MNR REBELS AND CAPTURED 25 OTHERS IN THE NORTHERN PROVINCE OF NIASSA IN 1989.

AN EARLIER REPORT SAID THAT MNR REBELS ATTACKED THE VILLAGES OF MAGENE AND MANGAISSA IN THE SOUTHERN PROVINCE OF GAZA ON WEDNESDAY, KILLING TWO PEOPLE AND KIDNAPPING AN UNDETERMINED NUMBER OF LOCAL PEOPLE.

ADDIS ABABA (JAN. 26) XINHUA - AFRICA NOW LOSES 3.7 BILLION U.S. DOLLARS ANNUALLY AS A RESULT OF NOT PROPERLY UTILIZING ITS HIDE-AND-SKIN RESOURCES SAID ETHIOPIAN VICE MINISTER OF INDUSTRY BEDRI YUSUF TODAY.

QUOTING A SURVEY OF THE UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION MR. YUSUF NOTED THAT ALTHOUGH AFRICA IS ENDOWED WITH A CONSIDERABLE SHARE OF THE WORLD LIVESTOCK POPULATION, ITS CONTRIBUTION TO THE ANNUAL WORLD LEATHER TRADE IS ONLY ONE PERCENT.

HE MADE THE REMARKS WHEN OPENING A SYMPOSIUM ON THE LEATHER INDUSTRY IN THE PREFERENTIAL TRADE AREA FOR EASTERN AND SOUTHERN AFRICA (PTA).

PTA SECRETARY GENERAL BAX NOMVETE TOLD THE SYMPOSIUM THAT CLOSER INTRA-PTA COOPERATION IN THE LEATHER PROCESSING SECTOR IS BADLY NEEDED IN VIEW OF THE DIFFERENT DEVELOPMENT LEVELS IN THE MEMBER STATES.

HE RECOMMENDED THAT PTA GOVERNMENTS SHOULD, AT NATIONAL LEVEL, IMPROVE ANIMAL HUSBANDRY TO UPGRADE THE QUALITY OF RAW MATERIALS AND ENCOURAGE HIGHER RECOVERY OF HIDES AND SKINS THROUGH PRICING AND TAXATION.

#90026h0123 01/26/1990 ~Chinese News Agency
LONDON (JAN. 26) XINHUA - THE IRISH GOVERNMENT BANNED THE SALE OF COAL IN SMOG-RIDDEN DUBLIN AND PLEDGED TO PHASE OUT SEWAGE DUMPING IN THE SEA TODAY IN A ONE BILLION PUNT (1.5 BILLION DOLLARS) "GO GREEN" DRIVE TO CLEAN UP THE COUNTRY.

IRELAND HAS PLEDGED TO "GO GREEN" AND MAKE THE ENVIRONMENT A TOP PRIORITY DURING ITS SIX-MONTH PRESIDENCY OF THE EUROPEAN COMMUNITY.

ACCORDING TO A REPORT FROM DUBLIN, ENVIRONMENT MINISTER PADRAIG FLYNN, ANNOUNCING THE BAN ON THE SALE OF BITUMINOUS COAL IN DUBLIN FROM NEXT OCTOBER, PROMISED MEASURES FROM CHEAP UNLEADED PETROL TO REPAIRS FOR THATCHED COTTAGES.

THE MEASURES ALSO INCLUDE THREE MILLION PUNTS (4.5 MILLION DOLLARS) IN AID FOR POORER PEOPLE SWITCHING TO SMOKELESS FUEL AND PEAT.

DUBLIN, WITH ITS 320,000 OPEN COAL FIRES WHICH BILLOW OUT SMOKE OVER THE CAPITAL CITY, HAS BEEN ENVELOPED SEVERAL TIMES THIS WINTER BY THICK SMOG FOUR TIMES ABOVE EC POLLUTION SAFETY LIMITS. HOSPITAL EMERGENCY WARDS HAVE BEEN FILLED WITH DUBLINERS SUFFERING FROM RESPIRATORY COMPLAINTS.

FLYNN ALSO PROMISED TO END DUMPING AT SEA. "TO PROTECT OUR SEAS, THE GOVERNMENT HAVE DECIDED TO ELIMINATE UNTREATED DISCHARGES OF SEWAGE FROM MAJOR COASTAL TOWNS BY THE YEAR 2,000," HE SAID. "ULTIMATELY TOO WE ARE SINKING THE SLUDGE BOAT."

AS FOR NEW FIRMS INVESTING IN IRELAND, FLYNN SAID THE GOVERNMENT WOULD OFFER HIGHER GRANTS TO INDUSTRIES THAT PROTECT THE ENVIRONMENT. "WE WANT TO MAKE IRELAND THE SITE-OF-CHOICE FOR GREEN INDUSTRIES," HE SAID. RECYCLING PLANTS ARE TO BE ACTIVELY PROMOTED.

#90026k0117 01/26/1990 ~Japanese News Agency

MANILA (JAN. 26) KYODO - JAPAN'S TOYOTA MOTOR CORP. AND ROHM CO. ARE SET TO EXPAND THEIR OPERATIONS THIS YEAR IN THE PHILIPPINES, A SENIOR GOVERNMENT OFFICIAL SAID FRIDAY.

TRADE AND INDUSTRY UNDERSECRETARY LILIA BAUTISTA TOLD REPORTERS THAT TOYOTA'S 3.2 BILLION PESO AUTOMOTIVE TRANSMISSION PROJECT WILL BE A PART OF ASEAN'S ''BRAND-TO-BRAND COMPLEMENTATION PROGRAM.''

SHE SAID TOYOTA WILL SET UP A NEW PHILIPPINE COMPANY, THE TOYOTA TRANSMISSION MANUFACTURING CORP. (TTMC), TO CARRY OUT THE VENTURE AND EXPECTS THE FIRM TO BEGIN OPERATIONS IN 1992.

BAUTISTA NOTED THAT THE PROJECT IS BIGGER THAN THOSE ESTABLISHED BY TOYOTA IN MALAYSIA AND THAILAND WHICH INVOLVE THE MANUFACTURING OF STEERING GEARS AND FLOOR PANELS.

SHE SAID THAT PRODUCTION WILL BE LIMITED TO ABOUT 50,000 AUTOMOTIVE TRANSMISSION UNITS IN THE COMPANY'S FIRST YEAR. OUTPUT IS EXPECTED TO

INCREASE TO 139,000 UNITS BY 1996, 90 PERCENT OF THEM FOR EXPORT.

THE ASEAN BRAND-TO-BRAND COMPLEMENTATION SCHEME IS PART OF THE REGIONAL GROUPING'S ''INDUSTRIAL COMPLEMENTATION PROGRAM'' APPROVED BY ITS ECONOMIC MINISTERS IN MANILA IN 1987.

UNDER THE PROGRAM, PARTICIPING COMPANIES GET A 50 PERCENT MARGIN OF PREFERENCE WHEN TRADING WITHIN THE SIX-NATION ASSOCIATION WHICH GROUPS THE PHILIPPINES, INDONESIA, MALAYSIA, SINGAPORE, THAILAND, AND BRUNEI.

DURING THE SAME PRESS CONFERENCE, BAUTISTA ALSO ANNOUNCED THAT ROHM ELECTRONICS PHILIPPINES INC., A SUBSIDIARY OF ROHM CO. OF JAPAN, WILL PUT UP A 1.65 BILLION PESO MICROCHIP RESISTORS PLANT IN THE COUNTRY BY OCTOBER.

THE NEW ROHM VENTURE COMES THREE MONTHS AFTER IT REGISTERED AN 876.82 MILLION PESO INTEGRATED CIRCUITS OPERATION IN THE PHILIPPINES.

BAUTISTA SAID THE NEW ROHM PLANT WILL SELL ITS ENTIRE PRODUCTION OF 7.44 BILLION UNITS ANNUALLY STARTING 1992 TO ROHM CO. IN KYOTO.

#90026m0001 01/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JAN. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The Fed in very simple language is saying 'don't expect lower interest rates in the very near future'" says JEFF LANDLE of STOVALL/20-FIRST ADVISORS, who sees rates holding steady or possibly moving higher. (FNN, 1/26)

The U.S. bond market is in trouble, says ROBERT FALCONER, senior vice-president of CHICAGO RESEARCH & TRADING. Overseas interest rates and equity markets, particularly in Europe, have become more attractive to foreign capital. "It's not people running away from America but the relative attractiveness has been diminished." (CNN's "Business Day", 1/26)

"We still believe that the long Treasury bond yield will go below 7% eventually," says KEVIN BARRY of 1838 INVESTMENT ADVISORS, which manages about $2.5 billion in fixed-income assets.

For the time being, Mr. Barry generally favors Treasury securities because their yields have risen relatively close to the returns on both corporate and mortgage-backed obligations. "Yield spreads are too narrow to justify chasing after a small [yield] pickup in other sectors, especially after

the transaction costs for switching are factored in." ("Investor's Daily", 1/26)

A report that FED CHAIRMAN ALAN GREENSPAN told Congress he favored a tax on foreign investment sent shudders through the credit markets, pushing down prices of Treasury notes and bonds. It later was clarified that Mr. Greenspan, responding to questions, merely said it was an idea worth looking at, but it would be a "tricky" proposition.

"If the tax were reimposed, it would be wildly negative," says MICHAEL MORAN, chief economist at DAIWA SECURITIES AMERICA. "You would have thought that the market would have recovered after the Fed denied the report. But the fact that someone in Congress voiced the thought raised the specter that there are people in Washington who are thinking along these lines." (NYT, 1/26)

THE ECONOMY:

"The weakness [in GNP] will be explained away" by such things as Hurricane Hugo and the California earthquake, predicts BILL WOLMAN of "BusinessWeek" and CNBC.

But he quickly adds: "I don't believe that argument. I think GNP was weak and that's the best news we have right now because it increases the probability that monetary policy around the world will in fact turn easier." Mr. Wolman's comments were in anticipation of a 4th quarter GNP number ranging from plus 1% to minus 2%. (CNBC's "Market Wrap-Up", 1/25)

IN WASHINGTON:

FED CHAIRMAN ALAN GREENSPAN says concern about foreign investment in the United States is understandable because foreign owners sometimes disrupt established business patterns, yet it is overblown as an economic problem.

"Foreign investment in the United States spurs competition, provides infusions of new capital and technology into industries like steel, and speeds the spread of technological advances," he told the HOUSE WAYS AND MEANS COMMITTEE Thursday. (NYT, 1/26)

FED CHAIRMAN ALAN GREENSPAN says the best way to increase foreign investment in the United States is to increase domestic savings by cutting the deficit. "We should focus increasingly on something which we know will increase domestic savings. That is getting the budget deficit down, eliminating the drain on private savings." (CNBC's "Business View", 1/25)

PRESIDENT BUSH has approved an effort to boost the quality and accuracy of federal economic statistics, says MICHAEL BOSKIN, chairman of the COUNCIL OF ECONOMIC ADVISERS. ("USA Today", 1/26)

The BUSH ADMINISTRATION hopes to stimulate savings by proposing to exempt from income taxes savings kept on deposit for at least seven years. (NYT, 1/26)

-30- 4025

#90026m0002 01/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JAN. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

WHAT'S AHEAD:

THE COMMERCE DEPARTMENT reports that the U.S. economy rose 0.5% in the fourth quarter of 1989. Although the consensus among economists was for slight growth of 0.3% in the GNP, many had expected a negative figure. Today's figure is the preliminary estimate. It will be revised at least twice.

The department said December durable goods orders rose 2.5%. The consensus expectation had been for a decline.

NBC, PHILIPS CONSUMER ELECTRONICS and THOMSON CONSUMER ELECTRONICS are forming a consortium to develop high-definition television. ... CAMPBELL SOUP's board of directors says it will not pursue a sale or merger.

The SECURITIES AND EXCHANGE COMMISSION suspends trading in BOLAR PHARMACEUTICAL through Feb. 3. ... UAL CORP. is instructing advisers to continue working on a recapitalization plan as talks continue with UNITED AIRLINES' unions about a 75% buyout.

EASTERN AIRLINES has revised its bankruptcy reorganization plan to give creditors a 40% stake in the company. ... The bankruptcy judge in the CAMPEAU case approves interim financing for FEDERATED DEPARTMENT STORES and ALLIED STORES. ... AT&T reports profits up 18.8% in the fourth quarter over a year ago.

FROM THE BULLS:

"I think we are in the final stages now of a downward adjustment which reflects the confusion that has built up in the market over the month," says JOE McALINDEN, director of research at DILLON, READ & CO. Once fourth quarter earnings reports are out of the way, he says, "I think the market is going to stabilize and we are going to go higher." (CNBC's "Market Wrap-Up", 1/25)

"According to the many advisory services we monitor, the bearish ones now

outnumber the bulls by 44.6 to 39.9 percent, which in our experience is good news for the market," says MARTIN ZWEIG, publisher of the market letter bearing his name. For the short term, however, Mr. Zweig says the market continues under poor monetary conditions. (NYT, 1/26)

FROM THE BEARS:

"It doesn't look like this decline will be down and out and over," says KENNETH SPENCE, director of technical analysis at SALOMON BROTHERS. "The earnings decline that we're seeing is not going to reverse in two or three months, and there's nothing else to move stock prices up." (WSJ, 1/26)

"It's tough to envision any good news for the next two or three months," says JEFFREY SHAMES, chief equity officer at MASSACHUSETTS FINANCIAL SERVICES, a $30 billion mutual-fund family in Boston.

"Short-term the market is getting very oversold. We may get some technical rallies here, but that's about it." Because of rising interest rates Mr. Shames says that "people have a tough time looking out 12 to 18 months." Currently his mutual funds are about 15% in cash - their highest position ever. ("Investor's Daily", 1/26)

JOHN BOLLINGER's technical "Trendwatch" is negative for the short term [ten days] and intermediate term [ten weeks]. He is neutral long term [ten months]. (FNN, 1/26)

STOCK MARKET:

"This is merely a game for program traders and floor traders," says GENE JAY SEAGLE, director of technical research at GRUNTAL & CO. ("USA Today", 1/26)

"While it does tremendously exacerbate these intraday swings, it [program trading] really doesn't set the level of stock prices on a longer term, even [on] just a matter of a few weeks or few months basis," says JOE McALINDEN, director of research at DILLON, READ & CO.

"Stock prices will go to where they are going to go based on the fundamentals with programs or without programs. It may be a choppier trip with the programs." (CNBC's "Market Wrap-Up", 1/24)

"This market is totally derived from programs," says BRAD WEEKES, trader at DONALDSON, LUFKIN & JENRETTE. ("USA Today", 1/26)

"It's virtually impossible for the market to act well when earnings disappointments are coming out and [interest] rates are going up," says JON GROVEMAN, president and head of equity trading at LADENBURG, THALMANN & CO. (WSJ, 1/26)

JAY GERKEN, portfolio manager for SHEARSON LEHMAN HUTTON, believes interest rates are going to turn down soon and thus sees the stock market as "indeed perhaps a buying opportunity." He agrees that a week GNP number "is one of those cases of bad news being good news." (CNBC's "Market Wrap-Up", 1/25)

"As if the market's sentiment wasn't bearish enough, Fed chairman Greenspan's vague comments about the possibility of a new tax on foreign investors unsettled an already wobbly market and killed any chance of a late rally," says ROBERT STOVALL, president of STOVALL/20-FIRST ADVISORS INC. (NYT, 1/26)

"No matter how carefully [Fed Chairman Alan] Greenspan said it, the market was going to interpret it in a bearish way anyway," says JOHN CONNOLLY, chairman of the investment committee at DEAN WITTER REYNOLDS. He was commenting on reaction to Greenspan's remark before a House committee that higher interest rates abroad are draining investment from the United States. (WSJ, 1/26)

"Everybody is very nervous and cautious," says PETER VANDENBURG, vice-president of equity trading at SHEARSON LEHMAN HUTTON INC. "That's just the kind of market we're in right now." (UPI, 1/25)

The market's decline is only half over, says SMITH BARNEY's MARSHALL ACUFF who sees the Dow falling to 2300 - 2400. "At that point, many people will be looking at even lower levels and I think the capitulation will be setting in." (CNBC, 1/26)

ROBERT ANTOLINI, head of over-the-counter trading at DONALDSON, LUFKIN & JENRETTE, says the market is increasingly difficult to read because the investing horizon has shrunk to a matter of minutes instead of days. "We're so driven by outside things now, you just can't watch them all," he adds. (WSJ, 1/26)

SHEARSON's PETER GRENNAN says, "The last hour [Thursday] was very, very choppy and very, very volatile. From what I could see a lot of the traders in bonds and stocks were sort of lightening up." (CNN's "Moneyline", 1/25)

STOCK TIPS:

BARRINGTON RESEARCH ASSOCIATES recommends stock in JACOBSON STORES INC., a Michigan-based company with a chain of speciality clothing shops in the Midwest and Florida. The brokerage says earnings are up consistently for the past several years, focusing on upper-income shoppers, who should make for a stable market even in an economic downturn. ("USA Today", 1/26)

JAY GERKEN of SHEARSON LEHMAN HUTTON likes steels, chemicals, and paper

stocks in the current market. In particular, he recommends GEORGIA PACIFIC saying the market has discounted its "on-again, off-again" takeover effort for Great Northern Nekoosa, leaving it "quite cheap right now" and trading at seven or eight times earnings. (CNBC's "Market Wrap-Up", 1/25)

Utilities, engineering, and drug issues are the "very, very conservative" and high yielding stock picks from KIDDER PEABODY's RALPH ACAMPORA: CENTRAL & SOUTHWEST is a utility stock yielding near 7%; JACOBS and FLUOR are strong in the engineering group, and BRISTOL-MYERS SQUIBB in the drug group. (CNN's "Business Morning", 1/26)

"Investor's Daily" picks FLUOR as its "Stock of the Week". The giant engineering and construction company is on a roll and could be the star of the 1990s.

"Anytime a stock has run up as much as Fluor has [56% in 1989], it's bound to be vulnerable to a slight correction," says DEBORAH THIELSCH, an analyst who follows Fluor for FIRST BOSTON CORP. "But we think the long-term outlook for this company is bright and [the stock] still has a long way to go." ("Investor's Daily", 1/25)

DAN DORFMAN writes in "USA Today" that he is not keen on publicly held limited partnerships, especially six being sold by DEAN WITTER REYNOLDS: PUBLIC STORAGE PROPERTIES 14, PUBLIC STORAGE PROPERTIES 18, CENTURY PROPERTIES 20, CENTURY PENSION INCOME 23, U.S. EQUIPMENT 2, and DEAN WITTER REALTY 2.

"We'll buy anything we can sell, but there's no demand for most partnerships" says RON BAKER, president of PARTNERSHIP SECURITIES EXCHANGE of Oakland, Calif., one of ten companies that make markets in limited partnerships. "They're very illiquid relative to any other security I know. The only thing I can think of that's less illiquid: Third World debt." ("USA Today", 1/26)

"The Wall Street Journal" features a rundown today on how ten big brokerage houses have performed by asset-allocation recommendations over the past 12 months, along with their current recommendations.

Here is the rundown of 12-month performance: PRUDENTIAL-BACHE 28.5%, SHEARSON 25%, DEAN WITTER 23.7%, SMITH BARNEY 23.4%, GOLDMAN SACHS 22.2%, MERRILL LYNCH 21.3%, RAYMOND JAMES 19.1%, KIDDER PEABODY 18.5%, A.G. EDWARDS 17.6% and PAINEWEBBER 14%. (WSJ, 1/26)

ROBERT HERWICK of HAMBRECHT & QUIST likes MIPS, a major supplier of rise technology for computer systems. The stock dropped two points yesterday and Mr. Herwick says, "It was one vulnerable to profit-taking. The stock has done well since its initial public offering." He expects Mips' 1989 earnings to more than double to 80 cents a share from 1988's 36 cents.

("Investor's Daily", 1/26)

"Maybe someday management will give a hoot but you can also believe in Alice in Wonderland," says CNN's DAN DORFMAN. Dorfman criticizes the management of such companies as AMR, AVON, UAL, DWG and CML GROUP for not accepting bids to increase stock value. (CNN's "Moneyline", 1/25)

HOWARD SEIFE of WINSTON & STRAWN, COLE & DEITZ predicts turbulence for EASTERN's Chapter 11 filing. "I think they're going to have a tough sell to the Creditor's Committee. This plan doesn't provide for payments in full to unsecured creditors and previous Eastern pronouncements had provided for such payment." (NBR, 1/25)

KEMPER's STEVEN DEXTER says UAL's earnings decline indicates the volatility of the airline industry. "I think the discipline in earnings here reinforce the fact that this is a very cyclical industry. When times are good they make huge amounts of money but when times are bad it's a real problem industry and there's a lot of red ink." (CNN's "Moneyline", 1/25)

CONISTON PARTNERS' KEITH GOLLUST says the deadline for UAL employees to announce a new buyout proposal has arrived. "What we'd ideally like to see happen is an acquisition by the company's employees long- term benefits for everyone involved, us obviously included, but this is not a situation where we expect to make money at anyone else's expense." (CNN's "Moneyline", 1/25)

#90026p0002 01/26/1990 ~PR Newswire

SALT LAKE CITY (JAN. 26) PR NEWSWIRE - ALTA Health Strategies Inc. the largest independent health care cost management company serving the self-insured corporate market, announced today that it has assumed management responsibility of BATUS Healthcare System in Louisville, Ky., effective Jan. 1, 1990.

ALTA plans to offer employment to approximately 30 BATUS health care administrative employees and open a regional health care management and administration office which will provide health care management services to Louisville-based British American Tobacco U.S. (BATUS) and five of its subsidiaries: Appleton Papers, Brown and Williamson Tobacco, Ivey's, Marshall Field's and Saks Fifth Avenue.

On the company's latest expansion efforts, ALTA President and CEO, W. Terry Nofsinger said, "ALTA has long had a plan of steady, aggressive growth into key markets, and this move is further evidence of that plan."

Commenting on the BATUS facility itself, Nofsinger continued, "We are

delighted to be able to build upon the resources, good will and excellent reputation of the BATUS Healthcare System, and feel fortunate to have a substantial number of well-trained, experienced health care professionals already in place there."

ALTA Health Strategies is a privately-held managed health care company with revenues of over $100 million serving 2.5 million lives in all 50 states. The company offers a full range of integrated health care cost management services, including Utilization Management, Provider Networks, Data Analysis and Claims Administration. ALTA clients include Baxter Healthcare, Hewlett Packard, Ralston Purina, The Pillsbury Co., Cincinnati Milacron, NBC and Wal-Mart Stores.

#90026p0012 01/26/1990 ~PR Newswire

ATLANTA (JAN. 26) PR NEWSWIRE - Telecom USA today announced that its Board of Directors has adopted a Shareholder Rights Plan in which preferred stock purchase rights have been granted as a dividend at the rate of one Right for each share of Common Stock held of record as of the close of business on Feb. 15, 1990.

The Rights Plan, similar to plans adopted by more than 1,000 publicly traded companies, is designed to deter coercive or unfair takeover tactics.

O. Gene Gabbard, chairman and chief executive officer of Telecom USA, stated, "The Shareholder Rights Plan seeks to protect our shareholders' interests. The Plan is designed to deal with actions taken by hostile entities which attempt to deprive the Board of Directors and shareholders of the opportunity to obtain the highest price for their shares."

In implementing the Plan, the Board has declared a dividend of one Right for each outstanding share of Telecom USA Common Stock. Each Right initially would entitle the holder to purchase 1/100th of a share of a new series of Preferred Stock at an exercise price of $100 per 1/100th of a share. One one-hundredth of a share of Preferred Stock is intended to be the economic equivalent of one share of Common Stock. The Rights will expire on Feb. 6, 2000.

At the time the Shareholder Rights Plan is adopted, the Rights are neither exercisable nor traded separately from the Common Stock. The Rights will be exercisable only if a person or group in the future becomes the beneficial owner of 15 percent or more of the Common Stock. Telecom USA presently has one shareholder which owns more than 20 percent of the stock; the Plan permits that shareholder to maintain ownership of no more than 22 percent of the outstanding stock. Ten days after a public

announcement that a person has become the beneficial owner of 15 percent or more of the Common Stock, each holder of a Right other than the 15 percent acquiring would be entitled to purchase Common Stock of the company at one-half of the then-current market price. If the company is acquired in a merger, or 50 percent or more of the company's assets are sold in one or more related transactions, each Right would entitle its holder to purchase Common Stock of the acquiring company at half the then-current market price, or a value of twice the exercise price of the Rights.

The Board of Directors generally may redeem the Rights at any time until 10 days following the public announcement that a person or group has acquired beneficial ownership of 15 percent or more of the outstanding Common Stock. The redemption price is $.01 per Right. At any time after a person or group becomes the beneficial owner of 15 percent or more, the Board of Directors may exchange one share of Common Stock for each Right, other than Rights held by the 15 percent acquiring stockholder.

#90026p0013 01/26/1990 ~PR Newswire

PALO ALTO, CA (JAN. 26) PR NEWSWIRE - Mark Wozniak has been named vice president of marketing for ERA Computers/Computer Plus, one of the largest independent computer dealers in Northern California.

Wozniak, 35, has developed a strategic marketing plan for ERA Computers/Computer Plus, whose operations include retail sales, outside sales, systems integration, networking, educational sales, training, repair and service. "We'll be relying on the two main things that have made us successful thus far: our award-winning customer service and product knowledge, and our emphasis on key vertical markets and horizontal applications, like desktop publishing and office productivity systems," said Wozniak.

"We've grown at an average rate of 132 percent per year over the last five years, a time period during which many computer dealers experienced downturns," said Lillian Kellogg, president of ERA Computers/Computer Plus. "Mark's challenge is to sustain and improve upon our growth."

When Wozniak co-founded Computer Plus in 1978, it was one of the first Apple dealerships in the nation. His long-standing expertise in the industry led to a listing in Newsweek as one of the country's "Super Dealers" and presentations to over 100 specialty business conferences, including Apple University, the American Electronics Association, and Ashton-Tate Developers' Conference.

He is an oft-quoted source in Time, Newsweek, and Business Week as well as industry publications such as MacWeek, Macintosh News, InfoWorld and Computer Reseller News. ERA Computers acquired Computer Plus in September 1989. ERA Computers/Computer Plus is one of Northern California's largest independent computer dealers, with four retail locations and an outbound sales force that targets business, governmental and educational markets. ERA Computers/Computer Plus is the top Hewlett-Packard re-seller in Northern California, and the largest Apple Education dealer in the Bay Area.

From 1983-88, ERA Computers' profit grew by an average of 254 percent per year, earning it a spot on the 1988 "Inc. 500," Inc. Magazine's list of America's fastest growing private companies.

ERA Computers went public in October 1988 and is publicly traded as J.B. Capital in the over-the-counter "Pink Sheets."

TORRANCE, CA (JAN. 26) PR NEWSWIRE - As indicated in its announcement on Nov. 20, 1989, P. Leiner Nutritional Products Corp. (AMEX: PLI) incurred a non-recurring charge in its third fiscal quarter ended Dec. 31, 1989 due to the recall of L-tryptophan products. This charge amounted to $1,540,000 after tax, equal to 30 cents per share.

As a result, net income for the period was $21,000, equal to zero cents per share, compared with $1,190,000, or 23 cents per share, a year ago, as adjusted for the three-for-two stock split effected Oct. 24, 1989. Net sales for the quarter were $40,162,000, an increase of 3 percent from $39,135,000 in the prior year.

Michael Leiner, chairman and chief executive officer, said: "The one-time charge eclipsed the achievements of an otherwise solid quarter. Without the charge, net income would have totaled $1,561,000, equal to 30 cents per share, representing a 31 percent increase over the comparable quarter of last year.

"The operating results benefited from reduced expenses which reflected our effective cost control programs and continued progress with the integration of our acquisitions. The positive impact of these efforts will be increasingly evident in the fourth quarter.

"Sales comparisons were with a strong year-ago quarter, and the recall restrained growth. L-tryptophan products, which accounted for only four of our more than 350 products, previously contributed about four percent of annual sales. We are working closely with our customers to replace those sales with alternative products."

Net income for the nine months was $1,962,000 after the non- recurring charge, equal to 38 cents per share, compared with $2,549,000, or 49 cents per share as adjusted for the previously mentioned stock split. Net sales for the first three quarters increased 25 percent to $109,080,000.

P. Leiner Nutritional Products Corp. is the largest full-line supplier of vitamins and related products to mass-market retailers in America.

#90026p0019 01/26/1990 ~PR Newswire

ATLANTA (JAN. 26) PR NEWSWIRE - Telecom USA Inc. (NYSE: TTT) today reported revenue and earnings for the fourth quarter and the year ended Dec. 31, 1989.

The company's results for the fiscal year established record highs in all major line items: revenue, operating income, net income and earnings per share.

For 1989, revenue was $712.9 million, a 30.3 percent increase of 1988 revenue of $547.1 million. Revenue for the fourth quarter was $197.0 million, an increase of 31.7 percent over the same quarter a year ago. Operating income for the year rose to $65.4 million, an increase of 30.1 percent over 1988 operating income of $50.3 million.

Net income for the year was $36.9 million, or $1.27 per share, compared to $33.3 million and $1.21 per share for 1988, while net income for the quarter was $8.7 million vs. $8.5 million for the fourth quarter of 1988. Earnings for 1988 included an extraordinary gain of approximately $.08 per share from the sale of Southland Mobilcom Inc., while 1989 net income reflected the negative impact of a significant increase in the company's effective tax rate from 29 percent in 1988 to 37 percent in 1989. On a pre-tax basis, net income increased $15.0 million, or 34.3 percent over the prior year.

"Our year-end results highlight the consistent growth which Telecom USA has achieved through expanded product offerings, network reliability and careful attention to satisfying our customers' needs," said O. Gene Gabbard, chairman and chief executive officer of Telecom USA. "We are very pleased to achieve record financial results in a year in which we also

made tremendous progress in positioning ourselves for the future."

Telecom USA, the nation's fourth-largest long distance company, provides a wide range of long distance products to over 500,000 customers throughout the country. Headquartered in Atlanta, the company is publicly traded on the New York Stock Exchange under the symbol "TTT".

GREENSBORO, NC (JAN. 26) PR NEWSWIRE - Guilford Mills, Inc. (NYSE: GFD), today announced operating results for the company's first 26 weeks of the fiscal year ending July 1, 1990.

For the 26-week fiscal period ended Dec. 31, 1989, sales for the company were $257,139,000 as compared to $278,989,000 for the same period a year ago.

Before giving effect to the special charges discussed below, net income for the 26 weeks was $5,759,000 vs. $8,521,000 for the corresponding period last year. After these special charges, the company had a net loss of $18,541,000 for the period this year as compared to the $8,521,000 of net income in last year's comparable period.

Primary earnings per common share, before the special charges, for the 26 weeks were $.59 as compared to $.87 for the same period last year. After the special charges, the company had a net loss of $1.90 per share as compared to net income of $.87 per share for last year's corresponding period.

For the company's second fiscal quarter ended Dec. 31, 1989, net sales were $124,690,000 vs. $143,955,000 for the same period last year.

Net income for the quarter before the special charges was $1,694,000 as compared to $3,414,000 for last year's corresponding quarter. After the special charges, the company had a net loss of $22,606,000 for the quarter as compared to the $3,414,000 of net income for last year.

Primary earnings per common share for the quarter before the special charges were $.18 vs. $.35 for the same period last year. After the special charges, the company had a net loss of $2.34 per share as compared to last year's net income of $.35 per share.

The board of directors declared a dividend of $.20 per share for the quarter, payable on Feb. 21, 1990, to stockholders of record on Feb. 9,

1990.

#90026p0024 01/26/1990 ~PR Newswire

NEW YORK (JAN. 26) PR NEWSWIRE - American Express Travel Related Services Company, Inc. (TRS) and Societe Generale, S.A. today announced a reciprocal agreement which will provide American Express Cardmembers 24-hour, seven-day-a-week access to cash at the bank's Caisse Eclair and Service Eclair automated teller machines (ATMs) throughout France and Monaco. Holders of Societe Generale international cards will be able to withdraw cash and American Express Travelers Cheques from American Express-owned Express Cash machines worldwide.

Societe Generale is one of Europe's leading financial institutions and the premier private bank in France. It has more than 1.200 ATMs located throughout France and Monaco, accepting cards issued by the bank as well as Carte Bancaire, Carte Pluriel of Creg/Franfinance, and other international financial institutions. Most of its ATMs handle transactions in both French and English.

It is expected that the ATM networks will be available for mutual access by mid-1990. The agreement will also provide Societe Generale customers access to American Express' worldwide MoneyGram emergency funds transfer service, and specialized business and leisure travel services through a 24-hour telephone unit available exclusively to enrolled Societe Generale customers.

There are currently more than 29,000 ATMs, including more than 8,100 in Europe, in American Express' Express Cash network. In the past year, ATMs in Spain, Belgium, Italy, Greece, New Zealand and Portugal were added to the network, and American Express opened the first ATMs ever in the Soviet Union.

In addition to these ATMs, which are available to American Express Cardmembers worldwide, there are more than 13,000 Express Cash network ATMs in Japan. Because of local technical limitations, many of these machines are currently available only to Japanese Yen Cardmembers.

American Express TRS, a wholly owned subsidiary of American Express Company, is a family of travel, financial, insurance and communications businesses.

#90026p0025 01/26/1990 ~PR Newswire

ENGLEWOOD, CO (JAN. 25) PR NEWSWIRE - Jones Spacelink Ltd. (NASDAQ: SPLKA), today reported a 116 percent increase in revenues and a 240 percent increase in operating income before depreciation and amortization for the second quarter of fiscal 1990 compared to a similar period a year ago.

Jones Spacelink owns and operates cable television systems and owns 23 percent of the total shares outstanding of both classes of stock in Jones Intercable Inc. (NASDAQ: JOIN), one of the nation's ten largest cable television operators, and holds an 80 percent ownership interest in The Jones Group Ltd., a cable television brokerage company. The company also owns Jones Futurex Inc., a manufacturer of personal computer security hardward and software.

For Spacelink and its wholly-owned subsidiaries, not including Jones Intercable or The Jones Group, revenues increased for the second quarter to $3,472,000 from $1,606,000 the previous year. Operating income before depreciation and amortization for the period increased to $1,027,000 from $302,000 in the previous year.

While revenues and operating income showed strong growth, increases in depreciation, amortization and interest expense primarily relating to the acquisition of the cable television systems serving Hilo, Hawaii in October 1988 and Kenosha, Wis. in September 1989 resulted in a net loss of $217,000, compared with net income in the like quarter a year ago of $1,156,000, or 2 cents per share.

For the three and six month periods ended Nov. 30, 1989, subscriber service fees for Spacelink-owned systems totalled approximately $2,975,000 and $4,841,000, respectively, increases of approximately 132 percent and 121 percent. These increases are primarily the result of the acquisition of the cable television systems mentioned above, which collectively served approximately 32,500 basic subscribers at Nov. 30, 1989.

Fees for the management of cable television systems owned by Spacelink-sponsored limited partnerships totalled $231,000 for the second quarter of fiscal 1990, compared to $101,000 for the like period one year ago, an increase of approximately 129 percent. For the six-month periods ended Nov. 30, 1989 and 1988, management fees totalled $365,000 and $200,000, respectively, an increase of 83 percent.

This increase is primarily due to the formation and investment of Jones Growth Partners L.P. in October 1989 and Jones Spacelink Income/Growth Fund 1-A Ltd. in November 1988. The company recognized a significant increase in management fee revenue beginning in the second quarter of fiscal 1990 as a result of the October 1989 purchase by Jones Growth

Partners L.P. of the cable television systems serving approximately 34,000 basic subscribers in the areas in and around Wheaton, Ill., a Chicago suburb. Jones Spacelink anticipates net cash provided by operating activities to approximately double from the first half of fiscal 1990 to the second half as a result of increased management fees resulting from this purchase and the purchase of the Kenosha system mentioned above.

In the second quarter of fiscal 1990, operating, general and administrative expenses totalled approximately $2,445,000, an increase of 88 percent from the previous year, due largely to the acquisition of the Hilo and Kenosha cable television systems.

Depreciation and amortization totalled approximately $1,420,000 and $2,153,000, respectively, for the three and six month periods ended Nov. 30, 1989, compared to $611,000 and $1,116,000, respectively, for the like periods in the prior year. These increased expenses are largely due to the company's expanded capital asset base as a result of the Hilo and Kenosha system acquisitions.

CAMBRIDGE, MA (JAN. 26) PR NEWSWIRE - ImmunoGen, Inc. (NASDAQ: IMGN), today reported second-quarter revenues of $222,803, mainly from interest income derived from the company's recently completed initial public offering. As anticipated, revenue was below the $352,438 realized during the same period in 1988, $300,000 of which was attributable to a milestone payment by E. Merck.

The net loss of $2,086,415 for the second quarter was above the $872,442 recorded during the same period in 1988, a net loss per common share of $0.46 compared to $0.22 in 1988. Operating expenses, reflecting the continued product development effort, were $2,309,218 for the second quarter compared to $1,224,880 in 1988.

Mitchel Sayare, ImmunoGen's president and CEO, stated, "We are pleased that the expenses and loss were precisely in line with our expectations. Among other things, they reflect the costs of five ongoing clinical trials on our first two products and the increased staffing required of our GMP-qualified manufacturing facility."

#90026p0028 01/26/1990 ~PR Newswire

HONOLULU (JAN. 26) PR NEWSWIRE - Barnwell Industries, Inc. (AMEX: BRN), today reported net earnings of $4,550,000 ($3.10 per share, $3.09 per share on a fully diluted basis) for the three months ended Dec. 31, 1989, as compared to a net earnings of $440,000 ($0.31 per share) for the three months ended Dec. 31, 1988.

Cash flow from operating activities and net cash flow from the investment in Kaupulehu Developments, a 50.1 percent owned joint venture, totaled approximately $8,700,000 in the quarter ended Dec. 31, 1989.

Morton H. Kinzler, chairman and chief executive officer of Barnwell, stated, "These great results were due to the closing of a transaction in November which calls for the development of a 600-room Princess Hotel on a 40-acre site adjacent to the planned Four Seasons Hotel, both to be developed within the 600-acre Phase I Kaupulehu Resort located at Kaupulehu, North Kona, Hawaii. The other significant elements of the transaction provide for the development of a separate golf course to be operated by PGA Tour to serve the Princess Hotel and the development of a commercial parcel and several residential parcels within this golf course.

"Also contributing to these first quarter results were the earnings of our oil and gas and contract drilling operations. Oil and gas revenues increased 6 percent even though the volume of oil and gas sold decreased due to a significant increase (45 percent) in the price received by the company for oil. Contract drilling revenues increased 80 percent as the company's drilling subsidiary continued to improve its operations.

"This was Barnwell's best quarter in its history and I expect it to be the beginning of a great year."

Barnwell also declared a dividend of $0.075 (7-1/2 cents) per share payable March 26, 1990, to shareholders of record March 12, 1990.

LA JOLLA, Calif. (JAN. 26) PR NEWSWIRE - Agouron Pharmaceuticals Inc. (NASDAQ: AGPH) today announced net losses for the second quarter and first six months ended Dec. 31, 1989, of $1,352,000, or $.46 per share, and $3,031,000, or $1 per share, respectively. The net loss recorded in each comparable period of the prior fiscal year was $1,122,000, or $.46 per share, and $1,967,000, or $.78 per share. The company said that the loss for the first six months reflects its continuing commitment to self-funded development of proprietary products.

In October 1989, the company completed a successful second public offering of 1,500,000 new shares, raising over $15 million.

Agouron Pharmaceuticals Inc., based in La Jolla, is developing new drugs to treat a number of major diseases including cancer and AIDS. Using an advanced technology called "three-dimensional drug design," the company's scientists design drugs to interact specifically with proteins that play key roles in human disease.

#90026p0033 01/26/1990 ~PR Newswire
ELKON, MD (JAN. 26) PR NEWSWIRE - The Conowingo Power Co. (COPCO) announced today that effective Feb. 1, its customers will see an increase

in their monthly electric bills.

According to Samuel M. Gawthrop Jr., COPCO president, the typical monthly bill for a residential customer using 500 kilowatt-hours (kWh) of electricity will increase from its present level of $53.14 a month to $53.66, or $0.52.

Gawthrop said the change is due to an increase in the company's Energy Cost Rate (ECR), which reflects changes in the cost of purchased electricity.

The ECR is revised twice a year, Feb. 1 and Aug. 1, to reflect the company's actual cost of purchased energy, based on costs experienced in the last six-month period and a reconciliation of collections in prior periods.

In the current revision, the present ECR will increase from a credit of 0.025 cents per kWh to a charge of 0.079 cents per kWh.

Gawthrop said, "Although energy costs have been higher, resulting in prior period undercollections, we have voluntarily delayed recovery of approximately $480,000 until August 1990. We expect lower energy costs during the next six-month period which should offset the previous undercollection."

The purpose of the ECR is to enable the company to pass along to its customers additional savings or charges due to fluctuations in the cost of purchasing electricity.

The process is continually reviewed and audited by the Public Service Commission of Maryland.

#90026p0034 01/26/1990 ~PR Newswire

NASHVILLE, Tenn. (JAN. 26) PR NEWSWIRE - Service Merchandise Company, Inc. (NYSE: SME) today announced sales and earnings for the fourth quarter and the twelve months ended December 30, 1989.

Fourth Quarter Ended December 30, 1989 Net sales for the quarter ended December 30, 1989 increased 8.2 percent to $1,402,865,000 from $1,296,636,000 for the same period in 1988. Comparable showroom sales increased 3.3 percent for the same period.

Net earnings for the three-month period ended December 30, 1989 were $74,241,000, or $1.40 per share compared to $80,617,000, or $1.59 per

share for the same period a year ago. To a large extent, the quarterly earnings decline was attributable to the increased interest expense associated with bank loans incurred in connection with the $10.00 per share special dividend paid to shareholders in July 1989 as a part of the Company's recapitalization. Expenses occasioned by the Company's recapitalization and incurred during the quarter totaled $23.4 million, or $.29 per share. Of this amount, $3.6 million, representing amortization of deferred compensation associated with employee incentive plans, and $1.4 million of amortization of recapitalization fees and expenses were charged to selling, general and administrative expenses. Additional recapitalization interest expense during the fourth quarter amounted to $18.4 million.

Gross margin for the fourth quarter of 1989, after taking into account buying and occupancy expenses, decreased 1.0 percent as a percentage of net sales from 26.5 percent in 1988 to 25.5 percent in 1989. The 1.0 percent net decrease was a result of a combination of a decrease in the percentage of jewelry sales to total sales and a decline in hardlines margins as the hardlines mix shifted toward lower margin goods. This was offset by a decline in buying and occupancy expenses as a percentage of net sales this year compared to last year.

In spite of the additional costs associated with the recapitalization, selling, general and administrative expenses decreased slightly as a percentage of net sales from 13.9 percent in the fourth quarter of 1988 to 13.8 percent for the same period this year. Selling, general and administrative expenses for the fourth quarter, exclusive of the aforementioned effects of the recapitalization, declined to 13.5 percent of net sales in 1989.

Interest expense on debt and capitalized leases increased to $36,969,000 for the three months ended December 30, 1989 from $21,470,000 for the same period last year, an increase of $15,499,000 or 72.2 percent. Total long-term debt increased to $825.7 million at December 30, 1989 compared to $467.9 million at December 31, 1988, as a result of the recapitalization.

Year Ended December 30, 1989 For the year ended December 30, 1989, net sales were $3,307,110,000 compared to $3,092,817,000 in 1988, an increase of $214,293,000 or 6.9 percent with comparable showroom sales increasing 3.7 percent for the same period.

Net earnings for the year ended December 30, 1989 were $71,991,000 or $1.39 per share compared to net earnings of $76,487,000 or $1.51 per share for the prior year, a decrease of $4,496,000 or 5.9 percent. The decrease in net earnings was attributable to increased selling, general and administrative expenses as a percentage of net sales and increased interest expense on debt. Recapitalization expenses, including interest

for the period, totaled $45.9 million (of which $5.6 million, or $.07 per share, were nonrecurring), and reduced net earnings by $.57 per share.

1990 Outlook The Company intends to reduce the level of its recapitalization-related bank borrowings as quickly as possible. In March of 1990, the Company will utilize excess cash flow to prepay approximately $35 million of the existing term loan in addition to the required $20 million payment made in December 1989. In order to reduce the risk of unfavorable interest rate fluctuations, the Company has entered into interest rate swap agreements to fix the interest rate on $170 million of the incremental recapitalization debt.

Selling, general and administrative expenses for the full year in 1990 will include $9.2 million representing amortization of deferred compensation associated with employee incentive plans and $7.8 million representing amortization of recapitalization fees.

Service Merchandise Company, Inc., "America's Leading Jeweler," operates 334 showrooms and five Service Jewelry stores.

#90026p0036 01/26/1990 ~PR Newswire

ZANESVILLE, OH (JAN. 26) PR NEWSWIRE - The Board of Directors of Mutual Federal Savings Bank (NASDAQ: MFBZ), voted to suspend payment of quarterly cash dividends at their meeting on Jan. 24, 1990. Mutual Federal has paid quarterly cash dividends of $.10 per share for six consecutive quarters since its conversion to a stock savings bank on April 6, 1988. William A. Phillips, Chairman of the Board and Chief Executive Officer, stated that a dividend was not declared due to recent changes in federal regulations imposed by the Financial Institutions Reform, Recovery and Enforcement Act of 1989.

As previously announced, Mutual Federal signed a letter of intent to merge with Park National Corporation of Newark, Ohio, on Nov. 9, 1989. Consummation of the merger is subject to execution of a definitive acquisition agreement, approval of Mutual's and Park's shareholders and to certain regulatory approvals. The merger is expected to be completed in the next four to five months.

In the proposed merger, Mutual Federal's shareholders would receive an aggregate of 180,000 shares of Park common stock which would approximately be .2086 of a share of Park common stock for each share of Mutual Federal common stock. Total consideration is estimated to be approximately $9.9 million based on Park's recent share price of $55.00.

Phillips further stated that no projection of future dividends can be made but he did indicate that Park declared cash dividends of $2.65 per share

during 1989.

Mutual Federal operates ten branch offices and two mortgage lending offices in Central and Southeastern Ohio.

CLEVELAND (JAN. 26) PR NEWSWIRE - LESCO, Inc. (NASDAQ: LSCO) had net earnings of $1,416,000, or 35 cents a share, on sales of $106,475,500 for the fiscal year ended November 30, 1989, it was reported today by James I. FitzGibbon, chairman and chief executive officer.

In the prior year, the company earned $2,726,900, or 67 cents a share, on sales of $100,288,000.

For the fourth quarter, earnings were $1,600,400, or 40 cents a share, on sales of $33,193,800. In the year-ago fourth quarter, earnings were $1,759,600, or 43 cents a share, on sales of $34,334,800.

"Sales for the fourth quarter were disappointing and did not meet our objectives," FitzGibbon said. He said that volume was soft throughout the company's major product lines rather than in any specific market.

Earnings declined as the result of lower sales as well as a number of other factors including significantly higher interest costs and costs incurred in consolidating manufacturing facilities and in continuing to develop LESCO Service Centers.

FitzGibbon added that gross profit margins improved from the prior year and that "significant investment in positioning the company for future growth was completed in the year just ended."

LESCO, headquartered in Cleveland, operates a fleet of tractor-trailer sales trucks which call on golf courses nationwide, and regional service centers which supply the professional lawn care operator and landscaper. The company produces the majority of the fertilizers, turf control products and turf care equipment sold through the trucks, service centers, conventional sales representatives and telemarketing.

MIDDLETOWN, PA (JAN. 25) PR NEWSWIRE - Homestead Holding Corp. (NASDAQ-NMS: HMSD) announced today that its fourth quarter earnings per share is $.21 for a total $1.68 per share for year ended 1989 as compared to $1.44 for 1988.

Total consolidated income for the 12 months ended Dec. 31, 1989, was $1,937,381 which reflects a 16.36 percent increase over the $1,664,888 net income for 1988.

Continued profits have bolstered stockholders equity to $17,895,534 which is an 8.67 percent increase over December 1988. During 1989 Homestead has set a very strong goal to control asset growth and to preserve stockholders equity. Total assets grew 19.63 percent from $212,184,704 in 1988 to 1989 year-end total of approximately $253,855,000.

Homestead has set its goal to achieve a 1 percent Return on Average Assets (ROAA) by December 1990. The ROAA for year-end is approximately .83 percent as compared to .87 percent for 1988. Additionally, the average

Return on Equity (ROAE) for year-end is 11.27 percent.

Homestead Holding Corp. is a unitary savings and loan holding company incorporated under the laws of the commonwealth of Pennsylvania. Homestead Holding Corp. conducts operations through its wholly owned subsidiary, Homestead Savings Association.

#90026p0048 01/26/1990 ~PR Newswire

CANTON, OH (JAN. 26) PR NEWSWIRE - Today, The Timken Company (NYSE: TKR) announced consolidated financial results for the company and its subsidiaries for the year 1989.

Consolidated net sales for 1989 were $1.533 billion, reflecting a $21 million decrease or 1.4 percent from the 1988 record high net sales of $1.554 billion. While some price restoration was recognized by the company's Bearing and Steel Businesses during the year, reduced demand in both businesses caused consolidated net sales to decline from the 1988 level.

Net sales in the second half of 1989 were 19.4 percent lower than the first half of 1989 and 12.6 percent lower than the second half of 1988. The decline during the second half of 1989 can be attributed to a weakened sales demand in both the company's Bearing and Steel Businesses, which started during the third quarter and continued through the end of the year. In addition, sales in the fourth quarter declined as a result of a 37-day work stoppage that occurred from Sept. 25, 1989, through Oct. 31, 1989, at the company's plants represented by the United Steelworkers of America, AFL-CIO. A softening of steel prices, which started in the third quarter of 1989 continued into the fourth quarter, further reducing net sales. Net sales during the fourth quarter of 1989 were 20.3 percent lower than net sales in the fourth quarter of 1988.

Income before taxes in 1989 was $96.5 million (6.3 percent of net sales) compared to $111.9 million (7.2 percent of net sales) in 1988. The loss before taxes for the fourth quarter of 1989 was $7.0 million (2.1 percent of net sales) compared to income before taxes of $40.3 million (9.9 percent of net sales) for the fourth quarter of 1988. The loss before taxes for the fourth quarter of 1989 and the reduced income before taxes for the year of 1989 arose principally from the reduced business demand, the 37-day work stoppage and the corresponding reduced plant utilization. Softening steel prices, as previously mentioned, also contributed to the reduced income before taxes.

Taxes were provided in the fourth quarter on a before-tax loss primarily

due to tax rates outside the U.S., which exceed the U.S. tax rate, and unrealized foreign exchange losses, which are not deductible for income tax purposes.

Net Income in 1989 was $55.3 million (3.6 percent of net sales) compared to $65.9 million (4.2 percent of net sales) in 1988. The net loss in the fourth quarter of 1989 was $9.8 million (3.0 percent of net sales) compared to a $24.8 million net income (6.1 percent of net sales) in the fourth quarter of 1988. Net income per share decreased from $2.34 per share in 1988 to $1.88 per share in 1989 on 1.3 million more average shares outstanding.

#90026p0056 01/26/1990 ~PR Newswire

FT. LAUDERDALE, FL (JAN. 26) PR NEWSWIRE - QSR Inc. (NASDAQ: QSRI), a Florida based chain of fast service restaurants, today announced that its turnaround is continuing with the conversion of Taco Viva free-standing restaurants to the Mr. Submarine concept.

QSR, Inc., has reached an agreement with Gus Boulis, the majority shareholder of the company and the creator of the Mr. Submarine/Miami Subs restaurant concept, giving the company exclusive master franchisor rights for the Mr. Submarine/Miami Subs concept in the state of Florida.

In exchange for those rights, the company has issued warrants to Boulis for the purchase of an additional 1,550,000 shares of its common stock at near current market levels. The warrants are not exercisable until the 120th Mr. Submarine/Miami Subs restaurant is opened and operating and must then be exercised within a three-year period.

Boulis and the company have also entered into a management agreement whereby the company will become the franchisor/manager of up to 29 of Boulis' Florida Mr. Submarine/Miami Subs restaurants. Boulis will pay the company 2 percent of net sales as a management fee.

The company also announced that it has negotiated a loan from its primary lender, California Federal, for $1,897,000. The loan refinances the company's current $897,000 term loan and provides an additional $1,000,000 for conversion of more Taco Viva Restaurants to the Mr. Submarine/Miami Subs concept. The loan is subject to completion of definitive documents and other customary conditions.

Don Ryan, QSR's president, stated, "The company is pleased to become the sole franchisor of the Mr. Submarine/Miami Subs restaurant concept for the

State of Florida. The completion of negotiations for an additional $1 million loan is an important step in providing funding for conversion of Taco Viva units to the Mr. Submarine/Miami Subs concept. Other sources of capital are under study to fully solve the company's ongoing liquidity difficulties."

For the company's fiscal 1990 second quarter, ended Dec. 10, 1989, sales totaled $3,438,000, compared to $3,639,000 for the year-ago quarter. Franchise revenues amounted to an additional $21,000. There were no franchise revenues in the comparable period last year. The net loss for the period was $241,000, or $0.03 per share, compared to a net loss of $622,000, or $0.19 per share in the second quarter of fiscal 1989.

Sales for the first 28 weeks of the company's fiscal year were $8,030,000, versus $8,618,000 for the year-earlier period. The net loss for the period was $781,000, or $0.13 per share, compared to $1,216,000, or $0.37 per share for the comparable fiscal 1989 period. The 145 percent increase in weighted average shares in the quarter and 88 percent increase in the 28-week period resulted from shareholder approval of restructuring.

Ryan commented, "Our improved performance in the fiscal second quarter was primarily the result of closing losing units and a dramatic reduction in expenses. Some Taco Viva units that were reopened as Mr. Submarine restaurants also increased performance during the period."

The company currently has 37 Taco Viva Restaurants and eight Mr. Submarine Restaurants. Two Taco Viva and six Mr. Submarine units are franchised.

#90026p0060 01/26/1990 ~PR Newswire
DETROIT (JAN. 26) PR NEWSWIRE - First of Michigan Capital Corporation (Midwest: FMG) today announced that consolidated revenues for the quarter ending Dec. 29, 1989, were $14,075,210 compared to $8,568,183 for the quarter ending Dec. 30, 1988. Net income was $2,640,915 or $1.08 per share vs. $383,055 or $.16 per share for the previous quarter.

John G. Martin, president and chief executive officer, reported that the increase in revenues includes recognition of a gain of approximately $4.5 million on an exchange of security held in the investment account, increases in stock commission business and mutual fund sales, offset in part, by declines in municipal trading and underwriting, insurance commissions and sales of limited partnership interests.

Martin also reported that net income of $2,640,915 ($1.08 per share) recorded in the quarter ended Dec. 29, 1989, includes an unusual gain of $2,199,737 ($.90 per share), after taxes and other expenses, related to the exchange of a security. Net income from other operating activity for the first quarter of fiscal 1990 was $441,178 ($.18 per share) as compared to $383,055 ($.16 per share) for the quarter ended Dec. 30, 1988.

Martin also indicated that the results for the quarter are not necessarily indicative of the results to be expected for the full year.

He also reported that the company is continuing its cost-control efforts. He said First of Michigan Capital Corporation continues to be the strongest capitalized of any Michigan-based broker-dealer, with total capital at an all-time high of $25.1 million.

First of Michigan Capital Corporation is traded on the Midwest Stock Exchange, symbol FMG.

LONDON (JAN. 26) PR NEWSWIRE - London International Group (London Stock Exchange, U.S. OTC) announced today an agreement concerning the Biogel surgeons' glove marketing program in the United States.

The James River healthcare salesforce, which has been selling Biogel under a distributor agreement, will become full time employees of London International in April 1990.

The opportunity has arisen following the decision by James River

Corporation (NYSE: JR) to withdraw from the healthcare industry and concentrate on its core businesses.

"We have developed an excellent working relationship with the James River healthcare salesforce and are delighted that they will be joining our Regent Hospital Products management, already in place, in North America.

"The move will enable us to increase our sales effort as the total existing sales operation will be focused exclusively on the Biogel glove. All advertising and promotional programs will remain on schedule," said Alan Woltz, chairman and chief executive, London International Group plc.

WEST PALM BEACH, FL (JAN. 25) PR NEWSWIRE - Dycom Industries, Inc. (NASDAQ: DYCO) announced today that effective with the close of business on Jan. 29, 1990 it will voluntarily withdraw its common stock from trading under the National Market System.

The common stock will continue to be quoted over-the-counter in the regular NASDAQ system. The company is simultaneously making an application to list the company's common stock and cause it to be admitted to trading on the New York Stock Exchange.

The company has taken both steps at this time to facilitate the closing of its acquisition of stock of Ansco & Associates and its affiliates. Dycom had previously announced on Oct. 30, 1989 that it had agreed to purchase these companies for stock and cash.

The closing will occur on Jan. 30, 1990. In addition to the cash consideration, the shareholders of the acquired companies will receive 1,301,581 shares of Dycom common stock.

DALLAS (JAN. 26) PR NEWSWIRE - Tyler Corporation (NYSE:TYL) announced today that the waiting period under the Hart-Scott-Rodino Act regarding the proposed merger transaction between Tyler's Atlas Powder unit and Imperial Chemical Industries PLC (NYSE: ICI) has expired. In other transactions the Federal Trade Commission rarely has taken action to stop

a merger after allowing this waiting period to expire. The transaction, however, is still subject to other regulatory and due- diligence clearances and approval by Tyler Corporation shareholders before it can be consummated.

Tyler agreed to the merger of Atlas Powder with a unit of ICI in a tax-free transaction valued at $193 million in December. Assuming no approval delays, a shareholders' meeting is expected in late spring 1990 with a closing to follow immediately if the transaction is approved.

Tyler Corporation, with national headquarters in Dallas, provides goods and services to industrial customers. Its operations include industrial explosives and pipe and fittings.

HARRISBURG, PA (JAN. 26) PR NEWSWIRE - Keystone Financial, Inc. (NASDAQ: KSTN), a multi-bank holding company, today reported record results for the fourth quarter and year ended Dec. 31, 1989.

Fourth quarter net income climbed to $7,826,000, or 67 cents per share, from $1,711,000, or 14 cents per share, for the same period in 1988. The prior year's fourth quarter reflected a trust contingency reserve which reduced earnings by 30 cents per share.

Net income for 1989 reached $29,646,000, or $2.51 per share, from $17,236,000, or $1.42 per share, after a trust contingency reserve equal to 55 cents per share in 1988.

Net income for 1989 exceeded the previous record, set in 1987, by more than $5 million. Even before adjusting 1988 for the non-recurring reserve charge, 1989 earnings per share represents a 27.4 percent gain.

"1989 was an outstanding year with exceptional performance reported in all phases of Keystone's operations. Our strong financial position, the high quality and growth of our assets as well as the economic vitality of our market area also make us optimistic about the future," Carl L. Campbell, president and chief executive officer, said.

Total assets at the end of 1989 were $2,589,508,000, up 5 percent from $2,455,928,000 at the close of 1988. Deposits also increased 5 percent to $2,241,677,000 from $2,143,089,000 and loans rose 9 percent to $1,727,455,000 from $1,591,411,000.

Return on assets reached 1.18 percent vs. .73 percent in 1988, while return on equity increased to 15.07 percent from 9.08 percent.

"Our strong performance and confidence in the future resulted in a recent 23 percent increase in our quarterly dividend to 27 cents per share from 22 cents per share. The cash dividend has been increased each year since Keystone was formed, thus allowing our shareholders to participate in our success," Campbell concluded.

Keystone Financial has three member banks including Pennsylvania National Bank, Pottsville; Northern Central Bank, Williamsport; and Mid- State Bank Altoona. These member banks operate 93 community offices in 20

Pennsylvania counties.

EL PASO, TX (JAN. 26) PR NEWSWIRE - The exclusive license to market Vidal Sassoon personal care appliances and brushes and combs in nine nations in Western Europe has been awarded by Procter & Gamble Co. (NYSE: PG) to Helen of Troy Corporation (NASDAQ: HELE), based here, it was announced today.

Helen of Troy has similar exclusive licenses for the United States and Canada under which it develops, designs and markets such Vidal Sassoon products as hair dryers, curling and brush irons, hairsetters, lighted mirrors, and combs and brushes.

Helen of Troy obtained its Vidal Sassoon license for the United States in 1980 and sales for its products have grown from $10 million in 1981 to more than $100 million this year. It now represents about 85 percent of Helen of Troy's sales.

The European agreement gives Helen of Troy immediate rights in the United Kingdom, Ireland, Italy, Sweden, Finland, Belgium, Holland, Spain and Luxembourg, according to Gerald J. Rubin, chairman and chief executive officer.

"Procter & Gamble, through its Sassoon hair care liquids division, already

has invested significant amounts of money to establish the brand name with European consumers. As in the U.S., that goes a long way toward assuring our success," Rubin explained. "We believe the European business will be an important contributor to Helen of Troy's financial results beginning with the fiscal year ending in February 1992."

COLUMBUS, OH (JAN. 26) PR NEWSWIRE - William P. Boardman has been elected executive vice president of Banc One Corporation (NYSE: ONE) effective immediately, it was announced by John B. McCoy, chairman and chief executive officer of Banc One Corporation which is headquartered in Columbus, Ohio.

Boardman's principal responsibilities include heading the corporation's acquisition team and having administrative functions of the corporation reporting to him.

Boardman joined Banc One Corporation in 1984 as vice president-administration. He was promoted to senior vice president in February 1988 serving as Banc One's chief acquisition officer. Prior to joining Banc One, Boardman was a practicing attorney for 15 years, with 12 years as a partner in the Columbus law firm of Porter, Wright, Morris and Arthur in their corporate group. While there, he devoted a major portion of his efforts toward mergers and acquisitions.

A native of Columbus, Ohio, Boardman holds a bachelor of science degree from Washington and Lee University. In 1969, he graduated summa cum laude with a juris doctorate degree from the Washington and Lee Law School. He is a member of the American, Ohio State and Columbus Bar associations. Boardman serves as president of the board of trustees of Columbus School for Girls and is past president of Washington and Lee Alumni Association. Boardman, 48, is married with three daughters and resides in Granville, Ohio.

Banc One Corporation operates 51 affiliate banks and 563 branch offices in Indiana, Kentucky, Michigan, Ohio and Wisconsin. Banc One Corporation also operates several additional affiliates that engage in trust services, mortgage banking, consumer finance, equipment leasing, credit-related life insurance, investment management, data processing, discount brokerage and venture capital activities.

MOUNT AIRY, N.C. (JAN. 25) PR NEWSWIRE - Insteel Industries, Inc. (AMEX: III), one of the nation's largest wire products manufacturers, today announced results for its first quarter ended Dec. 31, 1989. Revenues were $55,704,000 compared with $45,178,000 in the same quarter of 1988, and net earnings were $353,000 or $.08 per share (primary), compared with $1,289,000 or $.30 per share (primary).

Commenting on the results, Howard O. Woltz, Jr., chairman, said, "As anticipated, our newest acquisition, Forbes Steel & Wire Corporation, created a considerable drain on earnings for the quarter. This is likely to continue to a lesser extent in the second quarter and Forbes is expected to become profitable in the third quarter. The start-up of our newest subsidiary, Insteel Construction Systems, which produces the Insteel 3-D wall component, is going very smoothly, with production in its new manufacturing facility at Brunswick, Ga., beginning this month. The operations which made up Insteel during the first quarter of 1989 showed improved profit performance in this year's first quarter. The gains made by those operations, however, were not sufficient to offset the substantial losses at Forbes and the moderate start-up costs at Insteel Construction Systems."

Insteel Industries, Inc., operating 11 manufacturing plants, mostly in the eastern and southern U.S., produces welded wire reinforcement, high and low carbon industrial wire, galvanized fencing products, specialty wire fabrics, and nails.

NEW YORK (JAN. 26) PR NEWSWIRE - Herman "Hy" Saporta, executive vice president of Russ Togs, Inc. (NYSE: RTS), today announced his retirement, effective Jan. 31.

Saporta, who headed the apparel company's manufacturing and distribution operations, will continue to serve on Russ Togs' board of directors and as a consultant to the company. Saporta has been an integral part of the company's development since its formation in 1947.

Simultaneous with the announcement of Saporta's retirement, Ken Sitomer, president and chief executive officer of Russ Togs, Inc., stated that Harris Bass, senior vice president of manufacturing, will be assuming the responsibilities previously held by Saporta.

In his new position, Bass' responsibilities will include supervision of all purchasing, production, warehousing and shipping for the company's Russ, The Villager, Crazy Horse and Diane Von Furstenberg operations. He reports to Steven Somers, chief operating officer.

"Harris Bass has accepted the challenge to move Russ Togs forward into the '90s," Sitomer stated. "He brings to our comany both extensive hands-on experience and an accute awareness of the dynamics of our industry. As the corporation expands in the years ahead, we will look to Harris Bass to seek out new technologies that will enable us to compete successfully and profitably."

Bass had joined Russ Togs as vice president-manufacturing in July 1989. Prior to joining the company, he was vice president in charge of manufacturing for the women's clothing division of the Palm Beach Company and served in a similar capacity with The Villager apparel company for 14 years.

SMYRNA, TN (JAN. 26) PR NEWSWIRE - Nissan Motor Manufacturing Corporation U.S.A. will produce V-6 engines for the new Nissan/Ford mini-van which Ford will assemble at its plant in Avon Lake, Ohio.

Jerry L. Benefield, president and chief exeuctive officer of Nissan in

Smyrna, said the engine operation, which will be launched in October 1992, will create 250 new jobs. Nissan will invest $25 million for an annual capacity of 150,000 engines.

The engine will contain 350 major parts, and Nissan will source as many of the parts as possible from domestic suppliers. The operation will require a building expansion and new assembly lines.

The Nissan/Ford joint project agreement was announced in September 1988. Nissan is currently designing the new mini-van at its U.S. vehicle development company, Nissan Research and Development in Ann Arbor, Mich. Nissan Motor Manufacturing Corporation U.S.A. will also supply all of the major stamping components and assembled metal closure panels for the mini-van.

Benefield said the new engine work is evidence of the commitment and expertise of Nissan's employees.

"The excellent tract record our employees have established since our company was founded over nine years ago has been the key to a great deal of new work for our company in the past two years," Benefield said.

In addition to the $25 million engine expansion, Nissan is already in the midst of a $490 million expansion to add the production of a third vehicle at its Smyrna facility. The company, which now produces light trucks and Sentra passenger cars, will begin production of the new four-door passenger car in 1992. The new vehicle expansion will create 2,000 new jobs and add 1.2 million square feet to its existing 3.4 million-square-foot facility.

Last year the company started producing truck axles and assembling engines for the Sentra. In July of 1990 Nissan will launch production of plastic bumper fascias for a new Sentra model.

When all of the announced expansion plans are complete, Nissan's employment exceed 5,400. Investment in the Tennessee company will exceed $1.2 billion.

HICKSVILLE, NY (JAN. 26) PR NEWSWIRE - New product sales continued to gain momentum for Metro Tel Corp. (NASDAQ: MTRO) as the company, settled

in after months of restructuring, was once again able to direct major attention to marketing and sales of its lines of telephone test equipment and customer premise equipment.

Showing an increase in revenues over the first quarter of the current fiscal year, Metro Tel today reported sales of $1,284,677 and net earnings of $39,188, or $.02 per share, for the second quarter ended Dec. 31, 1989. For the first half, sales were $2,438,317 with net earnings of $40,881 or $.01 per share.

This compared with fiscal 1989 second quarter sales of $1,643,125 and net earnings of $118,020, or $.06 per share. For the first half of fiscal 1989, sales were $2,927,515 with net earnings of $115,284, or $.05 per share.

V.J. Indelicato, Metro Tel president, noted that new product sales were on the rise and were beginning to offset some of the decline of the older and discontinued products. He attributed the lower sales and earnings compared to last year's second quarter and half primarily to the impact of the recently settled long telephone workers' strike at NYNEX and to the completion of shipments last year under a relatively large contract with Televerket, the Swedish postal, telephone and telegraph organization.

CLEVELAND (JAN. 26) PR NEWSWIRE - The Sherwin-Williams Company (NYSE: SHW) announced that for the year ended Dec. 31, 1989, net income per share increased 9.6 percent to $2.52 per share, from $2.30 per share in 1988. Net income increased 7.8 percent to $108,935,000 in 1989. Net sales increased 8.9 percent to $2,123 million compared with 1988's $1,950 million.

The Paint Stores Segment reported a 7.7 percent sales increase, with sales through comparable stores accounting for a majority of the improvements. Paint Stores Segment operating profit increased by over 29 percent for the year due primarily to the fact that last year's profits were reduced by provisions established for the closing of certain unprofitable stores. Excluding special charges and credits in both periods, operating profits in the Paint Stores Segment rose about 7.7 percent for year.

Coatings Segment sales increased 11.2 percent to $764 million, while operating profit increased 1.6 percent as last year's results included a significant gain on sale of the company's interest in a Canadian joint venture.

Excluding the net gain reported last year, the operating profits of the Coatings Segment increased over 16.0 percent for year. Coatings Segment operating profit improved due to price increases implemented during 1989 to cover the increasing costs of certain raw materials, especially titanium dioxide, that had caused lower operating profits the previous year.

Fourth quarter net income was $.46 per common share versus $.43 per share in 1988. Net sales increased 7.7 percent to $478,735,000 in the quarter. Net income for the quarter was $19.83 million as compared to $18.71 million for the same period last year.

Commenting on 1989's results, John G. Breen, chairman and chief executive officer, said, "We are pleased that we were able to report higher income per share for the year and to increase our market share. Raw material costs increased again in 1989 but at lower rates than the previous year.

"Prices were increased to offset some of the rising costs experienced over the past two years, and additional price increases will be needed in 1990, but the paint market remains intensely competitive. We are hopeful, however, for further slowing of raw material cost increases this year.

"As we begin 1990, the markets we serve appear to be weakening, however, the company is well-positioned to continue to gain market share and, as long as there is not a drastic economic downturn, we will again report improved results in 1990."

BELLOWS FALLS, VT (JAN. 26) PR NEWSWIRE - Imtec, Inc. (NASDAQ: IMTC) announced its operating results for the second quarter and first half of fiscal 1990 ending Dec. 31, 1989.

For the six months ended Dec. 31, 1989, Imtec's sales were $3,427,667, up 71 percent from last year's six month's sales of $2,004,415. Net income for the period was $258,304, or 22 cents per share, compared to a net income of $112,674, or 10 cents per share, for the same period at this time last year.

Second quarter sales were $1,821,717 up 63 percent over its sales for the same quarter last year. Net income was approximately $157,880, or 14 cents per share, compared to about $85,659, or 8 cents per share, for the the same three months, one year ago.

On Dec. 18, Imtec announced signing of a six-year lease, to "effectively expand its manufacturing facilities by 80 percent," according to Bruce E. Smith, Imtec's VP and COO. The additional floor space is required to accomodate Imtec's growing consumable supply business. Imtec expects to occupy the premises in the first quarter of calendar 1990.

Imtec develops and manufactures bar-code label printing equipment which it sells to manufacturing firms as part of bar-code data collection systems.

#90026p0114 01/26/1990 ~PR Newswire

JACKSON, MS (JAN. 26) PR NEWSWIRE - First Mississippi Corporation (NYSE: FRM) today reported earnings of $2.3 million, or $.11 per share, on sales of $234 million for the six months ended Dec. 31, 1989 vs. earnings of $10.5 million, or $.52 per share, on sales of $178.3 million last year.

The earnings decrease was due to fertilizer operating losses, lower profits in industrial chemicals and higher interest expense.

Earnings for the second quarter were $1.4 million, or $.07 per share, compared with $6.1 million, or $.30 per share, last year. Results reflect lower fertilizer and gold prices, high costs associated with start-up of the Getchell mill and higher interest expense.

Industrial chemicals pretax operating profits for the six months were $14.2 million vs. $15.5 million last year which included earnings from short-term nitrobenzene tolling arrangements. Second quarter pretax operating profits were $8.3 million, the same as last year.

Fertilizer results for the first half were a loss of $3.3 million vs. pretax operating profits of $2.8 million last year. The decrease was due to lower ammonia and urea prices and the temporary shutdown of the AMPRO ammonia plant during the first quarter.

Oil and gas pretax operating profits for the six months were $2.2 million compared with $2.3 million last year. Pretax operating profits for coal were $0.5 million, up from $0.4 million last year.

Minerals pretax operating profits for the six months were $0.3 million vs. $0.5 million last year. The decrease was due to start-up costs and lower

gold prices.

Other -- technology and new ventures had a pretax operating loss of $2.3 million, vs. a $3.2 million loss first half last year. Corporate expenses, interest income and expense, taxes and other income and expenses in the first half were a net expense of $9.3 million vs. $8.8 million last year. Interest expense was up over prior year due to increased debt.

Industrial ammonia and urea results, previously reported as part of the industrial chemicals segment, are now included in the fertilizer segment. Prior year comparative results have been adjusted to reflect this change by reclassifying sales and pretax operating profits.

First Mississippi Corp., headquartered in Jackson, is a diversified resource company with primary interests in chemicals, fertilizers, energy, and gold, and growing interests in technology based ventures.

PITTSBURGH (JAN. 26) PR NEWSWIRE - J. Richard Eshleman, president and chief executive officer of Landmark Savings Association (AMEX: LSA) of Pittsburgh, announced that all necessary approvals have been been given by state and federal authorities to sell two branch offices in State College, Pa., to Central Bank of Hollidaysburg.

"The sale is part of our strategy to concentrate our retail banking activity in southwestern Pennsylvania," Eshleman stated. "It was a good business decision for Landmark and we are confident that we're leaving the offices in good hands."

Central Bank signed a letter of intent in July to purchase the offices which are located at 116 College Ave. and 1276 N. Atherton Ave. They will officially take over the operation of the State College franchise March 23.

The purchase does not include Landmark's mortgage subsidiary which will continue operation at its present location under the name Landmark Mortgage Services Inc.

Landmark Savings Association is a publicly owned savings association with assets of approximately $1.6 billion. It is the 148th largest thrift institution in the United States. Landmark common stock is listed on the American Stock Exchange (AMEX), trades under the symbol "LSA" and is reported in the financial press as "LdmkSv."

WILMINGTON, DE (JAN. 26) PR NEWSWIRE - ICI Advanced Materials has been awarded a contract by the Naval Research Laboratory (NRL) to build a practical, operating microwave resonator using bulk high-temperature superconductors, the company announced today.

The resonator is to be included on the Navy's High-Temperature Superconductivity Space Experiment (HTSSE) as part of a high-performance maser clock. AT&T Bell Labs will participate with ICI on the NRL effort.

The HTSSE will be a milestone in the development of practical high Tc superconductivity as it will be the first time that electronic devices and circuits fabricated from high Tc materials will have been operated in space. The goal of the NRL program is to integrate a variety of high Tc devices into a specially designed package to be flown on a Navy satellite and to evaluate the performance of these devices in the harsh environment of space. The Naval Center for Space Technology at NRL will design, build and operate the satellite, which is scheduled for launch early in 1992.

The ICI viscous processing method is used to fabricate complex shapes from bulk superconductor. Helical, coaxial and standard cavity resonators have been made with performance much greater than all-copper counterparts. ICI and AT&T Bell Laboratories have recently reported high Q cavities with performance 10 times greater than all copper cavities.

The advantages of the ICI superconducting resonator are much smaller size, greater efficiency and lower noise than have been achieved with conventional materials and designs. Small size, low weight and high performance are crucial properties for space and airborne applications,

thus the ICI resonator promises to improve critical system performance in these applications.

Cavities and resonators are also very important components in active and passive microwave devices other than maser clocks. Oscillators, mixers, filters, diplexers, wave meters and echo boxes can all benefit from the use of high Tc superconductors in applications which demand the highest levels of performance.

ICI Advanced Materials is a business unit of ICI Americas Inc. The company specializes in superconductive ceramics processing, properties research and applications. For more information, contact Vic Burriss, ICI Advanced Materials, New Murphy Road & Concord Pike, Wilmington, Del., 19897. Phone: 302-886-3290.

#90026p0134 01/26/1990 ~PR Newswire

SUNRISE, FL (JAN. 26) PR NEWSWIRE - Jan Bell Marketing, Inc. (AMEX: JBM) today reported sharp increases in earnings and sales for 1989, the sixth straight year since the company's inception that it has reported strong growth.

Net sales for 1989 reached $181.3 million, up 51 percent from the $120 million recorded in 1988. Net income from operations amounted to $16 million, equal to $.80 per share, up 73 percent from $9.3 million, or $.57 a share, earned last year. In the 1988 first quarter, a one- time accounting gain of $1 million, equivalent to $.06 per share, brought 1988 net income to $10.3 million, or $.63 a share.

For the fourth quarter of 1989, sales were $95.3 million, a 62 percent increase over the $58.8 million registered in the year-before period. Net income was $8.8 million, equal to $.40 a share, 86.5 percent above the $4.7 million, or $.27 per share, earned in the 1988 closing quarter.

All per-share results have been adjusted for a 50 percent stock dividend issued in July 1989. Earnings per share for the year and fourth quarter ended Dec. 31, 1989, reflect 22 percent and 27 percent increases, respectively, in shares outstanding resulting from the company's public offering of 2.2 million shares in March 1989 and 2.6 million shares in October 1989.

Lee A. Mills, vice chairman and president of Jan Bell, said, "Our sustaining strong growth is due to a number of factors, including further increases in same-store sales, enhancements to our sourcing and distribution expertise, and the initial results of our fully integrated,

turnkey jewelry programs with Sears Outlets, Staples and Toys "R" Us, which closed 1989 out on a high note and hold exciting prospects for the future.

"We are not implementing what we call our 'Phase II' plan for aggressive structured growth, and for further increasing Jan Bell's share of the $20 billion U.S. jewelry market," said Mills.

Jan Bell is a leading provider of fine jewelry to the value- conscious consumer through turnkey programs to distribution channels that emphasize quality, credibility and consistent value.

#90026p0135 01/26/1990 ~PR Newswire

ALLISON PARK, PA. (JAN. 26) PR NEWSWIRE - Laurel Savings Association (NASDAQ: LARL) today reported results for the second fiscal quarter ended Dec. 31, 1989.

Net income for the period was $142,000 or $0.29 per share. These results compare to net income of $245,000 or $0.50 per share for the same quarter a year ago. Net interest income in the quarter was $1,045,000 vs. $1,131,000 in the second quarter of fiscal 1989.

Results for the current quarter were primarily lower due to the absence of a $126,000 pretax gain on the sale of investments, which was reflected in the same quarter last year. In addition, Laurel Savings recorded slightly lower net interest income due to the rise in interest rates on savings deposits compared to the same period last year.

For the six months ended Dec. 31, 1989, Laurel Savings reported net income of $321,000 or $0.66 per share vs. net income of $568,000 or $1.16 per share for the same period last year. Net interest income for the period was $2,074,000 compared to $2,178,000 a year ago. Results for the first half of fiscal 1990 were primarily affected by the absence of a $244,000 pretax gain on the sale of investment securities which was recorded last year, as well as lower net interest income.

In discussing the results of the period, Edwin R. Maus, president and chief executive officer, stated, "The association's core earnings continue to remain stable and our asset quality is good. At a time when many savings institutions are struggling to meet the new FIRREA regulations, Laurel Savings exceeds the regulatory capital requirements." Maus continued, "We remain pleased with the association's performance to date,

and we are on track relative to our expectations for fiscal 1990."

Laurel Savings Association is a 102-year-old, Pennsylvania-chartered, SAIF-insured savings association with assets totaling $154,220,000 and six offices in Allegheny and Butler counties.

SEATTLE (JAN. 26) PR NEWSWIRE - From now until March 15, Seafirst will waive all closing costs and fees associated with its home equity loans and lines of credit, for a total savings of as much as $1,000, Seafirst announced today.

"Since homes in King and Snohomish county have appreciated by about 22 percent in the past year, more homeowners than ever before have enough equity in their home to qualify," said Seafirst Marketing Manager Penny Zega. "In addition to the initial cost savings, customers may also save at tax time, as the interest on the loan is usually tax deductible." (A)

Seafirst guarantees that each customer who applies for a Seafirst home equity loan or line of credit of $5,000 will not incur any closing costs, which includes appraisal, title insurance, and all documentation fees. In addition, the bank will waive the 2 percent loan origination fee on loans for qualifying customers. If the customer qualifies for a line of credit, Seafirst will also waive the annual fee for the first year. This offer ends in Western Washington on March 15.

According to Zega, home equity loans are not limited to house

improvements. "They can be used for any need, including debt restructuring, college financing, boats, cars, or vacations," said Zega.

To apply for a home equity loan or line of credit, contact any Seafirst branch in Western Washington, or call 800-345-7400.

(A) According to the Revenue Act of 1987, interest on home equity loans with an aggregate principal balance of $100,000 is tax deductible in most cases. However, homeowners should consult their tax advisor on the deductibility of the interest.

CUPERTINO, CA (JAN. 26) PR NEWSWIRE - Sixteen educators from primary and secondary schools in the Northwest will share $60,000 of Macintosh(R) computer equipment as winners in the Apple Computer Inc. Northwest Operations' Macintosh Education Solutions competition.

More than 500 contestants from ten states, representing 1,900 school districts and 39 teaching centers in the Northwest were recently challenged by Apple to create and submit Macintosh-based applications that advance teacher productivity, administration, elementary, middle and high school curriculums.

"Apple is committed to making tools to improve learning and teaching," said Godfrey R. Sullivan, vice president, Apple Northwest Operations. "The Macintosh Solutions contest is a great example of how we, as business partners with education, can work to encourage, challenge and reward educators who make the classroom a more exciting place," he added.

Grand prize winner, Mark Morton, who teaches a writing lab for fourth and fifth grade students at Mendocino Grammar School, Mendocino, Calif., will receive a Macintosh IIcx and AppleColor(TM) High-Resolution RGB Monitor for creating a program that combines creative student writing with wall-size poster art and other art mediums.

Each school day, 100 of Morton's students compose imaginative stories illustrated with graphics generated by 25 Macintosh Plus computers that are networked within the writing lab.

"I can't think of a better way for students to comfortably gain writing practice," said Morton, who has employed the use of Macintosh computers within his lab for five years.

Later this year, winning entries from the contest will be published and

will be made available to educators in the Northwest.

Other contest winners and categories include the following: First Prize Winners (Macintosh SE/30)

James M. Jordan, Del Campo High School, Fair Oaks, Calif. Gerry Adler, Cole Middle School, Denver, Colo. Edith A. Murray, Prescott School, Portland, Ore. Thomas Layton, South Eugene High School, Eugene, Ore. Ariel Paisley, Whitford Intermediate, Beaverton, Ore. Second Prize Winners (Macintosh SE/20)

Terri Nighswonger, East Ave. Middle School, Livermore, Calif. Nancy Roebuck, Sunrise Elementary, Aurora, Colo. James R. Fulton, Tacoma School District 10, Tacoma, Wash. Jeff Seely, Ferndale High School, Ferndale, Wash. David Piazza, Bering Straight School District, Unalakleet, Alaska Third Prize Winners (Macintosh Plus and Hard Disk)

Bud Kuenzli, Howard Luke Alternative School, Fairbanks, Alaska Robin Dompeling, Thomas Jefferson Jr. High School, Madera, Calif. Tim Wilkins, Fresno Christian Schools, Fresno, Calif. Catherine Dilts, Walter Hays Elementary School, Palo Alto, Calif. Robert Risch, Jefferson Company Planetarium, Lakewood, Colo. In addition, ten teachers received honorable mention for their entries. They are: William Maxfield, Blackford High School, San Jose, Calif.; J. Phillip Saryan, Solano Jr. High, Vallejo High School, Vallejo, Calif.; James P. Hodgson, Quilcene School, Quilcene, Wash.; Mary Hayes and Judy Jeffrey, Wendler Jr. High, Anchorage, Alaska; Jim Crotts, Sweet Home School District, Sweet Home, Ore.; Chris Heumann, Kennedy Jr. High School, Cupertino, Calif.; Don Evans and Leona Grishkowsky, Office of Instruction/Associate Superintendent, Unalakleet, Alaska; Jacalyn Thomason, Lake Hazel Elementary, Meridian, Idaho; Susan Larson, Hemingway Elementary, Hailey, Idaho; and Robert Gilbert, Miramonte High School, Orinda, Calif.

The Macintosh Education Solutions Competition for K-12 Educators was judged by an independent panel of computer and education experts.

Apple Computer Inc. is a leading producer of personal computers, related peripherals, system software and computer networks. Apple has established itself as a leader in education with at least 60 percent market share for computers in K-12 schools.

Apple, the Apple logo, Macintosh, and the AppleColor High-Resolution RGB Monitor are registered trademarks of Apple Computer Inc.

NEW YORK (JAN. 26) PR NEWSWIRE - Donald L. Price, M.D. director of the neuropathology laboratory at the Johns Hopkins University School of Medicine, was recognized today by the Metropolitan Life Foundation with an award of $250,000: $200,000 to further his research program and a personal prize of $50,000.

Dr. Louis Sullivan, U.S. Secretary of Health and Human Services, was the keynote speaker at the luncheon ceremony honoring Dr. Price, who became the seventh recipient of the foundation's Award for Medical Research.

Dr. Price received the award for his diverse approaches to research on Alzheimer's disease. His work ranges from investigations of the disease in people to parallel studies of animal models.

He and his colleagues were the first to identify certain brain abnormalities, that occur in all patients suffering from this disease. His group has also shed light on some of the processes leading to the formation of senile plagues in the brains of aged humans.

In addition, he has advanced the study of potential treatments for Alzheimer's victims by demonstrating that the administration of nerve growth factor (NGF) prevents the induced degeneration of neurons.

Dr. Price is the recipient of the National Institute on Aging's (NIA) 1989 Leadership and Excellence in Alzheimer's Disease (LEAD) Award, and serves as president of the American Association of Neuropathologists.

According to a recent study funded by the NIA, Alzheimer's , a degenerative disease of the central nervous system characterized by premature mental deterioration, may affect one in 10 Americans over age 65.

Accepting his Metropolitan Life Foundation award, Dr. Price said, "The award will allow me and my colleagues to continue our work on the cellular and molecular biology of age-associated disorders, particularly Alzheimer's disease, and to begin to formulate new strategies for treating the many patients suffering with these diseases."

To date, the Metropolitan Life Foundation has awarded $1,750,000 to researchers seeking breakthroughs in the fight against Alzheimer's disease.

"With these awards," said foundation President Sibyl Jacobson, "we seek to encourage research on this tragic disease, which robs millions of victims of the faculties of mind and reason, and brings heartbreak to families and friends who care for them."

Previous foundation award recipients for Alzheimer's disease research are:

Carl W. Cotman, Ph.D., professor of psychobiology, neurology and psychiatry, University of California, Irvine; Peter Davies, Ph.D., the Judith and Burton P. Resnick professor of Alzheimer's disease research, Albert Einstein College of Medicine; George G. Glenner, M.D., professor of pathology, University of California, San Diego, School of Medicine; James F. Gusella, Ph.D., associate professor of genetics, Harvard Medical School and director of the neurogenetics laboratory, Massachusetts General Hospital;

Dennis J. Selkoe, M.D., associate professor of neurology and neuroscience, Harvard Medical School, and co-director of the Center for Neurologic Diseases, Brigham and Women's Hospital, and; Peter H. St. George-Hyslop, M.D., instructor in neurology, Harvard Medical School, and assistant in neurology, Massachusetts General Hospital.

Dr. Price was selected by a committee composed of Chairman Theodore Cooper M.D., chairman of the board, president and chief executive officer, The Upjohn Company, and a member of MetLife's board of directors; Suzanne Bourgeois, Ph.D., director, Regulatory Biology Laboratory, The Salk Institute; Robert N. Butler, M.D., chairman, Gerald and May Ellen Ritter Department of Geriatrics and Adult Development, Mount Sinai Medical Center New York; Donald S. Fredrickson, M.D., former director, National Institutes of Health.

Also, Joseph B. Martin, M.D., dean, University of California, San Francisco, School of Medicine; Lewis Thomas, M.D., president emeritus, Memorial Sloan-Kettering Cancer Center, and T. Franklin Williams, M.D., director, National Institute on Aging.

The foundation also announced a new program to support investigators whose work shows promise for the future of Alzheimer's disease research, awarding grants totaling $300,000 to three institutions. Grants of $100,000 were made to Brigham and Women's Hospital is support of Kenneth S. Kosik, M.D., associate physician, and associate professor of neurology, Harvard Medical School; to the McLean Hospital in support of Charles A. Marotta, M.D., Ph.D., director of the neurobiology laboratories at the McLean Hospital and the Massachusetts General Hospital, and associate professor of neuroscience and psychiatry, Harvard Medical School; and to the University of California, Irvine, in support of Rachel Neve, Ph.D., assistant professor of psychobiology.

Established in 1976 by the Metropolitan Life Insurance Company, the Metropolitan Life Foundation has contributed more than $65 million to support health and education activities, as well as civic and cultural affairs throughout the United States.

TULSA, OK (JAN. 26) PR NEWSWIRE - MAPCO Coal Inc. (NYSE: MDA) today announced the appointment of W. Douglas Blackburn, Jr. as senior vice president - operations. In this new position, Blackburn will be responsible for the direction of MAPCO Coal's operations which consist of eight mining complexes in Maryland, Virginia, Kentucky and Illinois. He will report to Joseph W. Craft III, president of MAPCO Coal Inc.

A native of Welch, W.Va., Blackburn received both his Bachelor of Science degree and his M.B.A. from West Virginia University and received his Juris Doctor from Harvard University. Blackburn has extensive experience in the coal industry most recently serving as an executive for A.T. Massey Coal Company. In 1979, Blackburn founded Elk Run Coal Company, a wholly owned subsidiary of A.T. Massey Coal Company. In 1983, he formed The Elk Run Group where he served as president and chairman of the board until 1989. Prior to forming the Elk Run Coal Company, Blackburn served as vice president of Peerless Eagle Coal Company, was assistant manager of mines for Valley Camp Coal Company and was chief industrial engineer for Allied Chemical Corporation.

Blackburn is a member of the American Institute of Mining Engineers, the World Future Society and is a past president of the West Virginia Coal Mining Institute. He and his wife, Sharon, and their daughter, Kelly, will be relocating from Richmond, Va., to Lexington, Ky.

MAPCO Coal Inc. produces and markets bituminous steam and metallurgical coal.

MAPCO Inc. also conducts business through three other operating subsidiaries: MAPCO Gas Products produces and markets natural gas liquids and fertilizers; MAPCO Petroleum operates refineries and retail marketing networks through the Mid-South and Alaska Systems; and MAPCO Transportation operates natural gas liquids and ammonia pipelines and fractionation and storage facilities.

NEW YORK (JAN. 26) PR NEWSWIRE - McGraw-Hill, Inc. (NYSE: MHP) today acquired the remaining 60 percent of the stock of Computer Aided Planning, Inc. (CAP) of Grand Rapids, Mich., for an undisclosed cash sum. In January 1989 McGraw-Hill had purchased 40 percent ownership of CAP.

Founded in 1978, CAP manufactures and distributes software and information databases that assist architects, designers, furniture dealers and corporate facility managers in the contract interiors market to plan and draw office environments, review and select specific office furnishings, and to order these products via microcomputer workstations. The contract interiors business involves assembling office environments from thousands of components featured in hundreds of manufacturers' catalogs.

The acquisition of CAP represents a logical extension of McGraw- Hill's long-established Sweet's construction information business, which aids architects, engineers and other construction professionals to select and specify building products using Sweet's Catalog Files and related databases on compact disk.

"CAP has demonstrated a strong record of growth in the contract interiors market, and excels in computer information development," according to Russell C. White, executive vice president of McGraw-Hill's Construction Information Group. "Replicating its computer-aided drawing, order entry

and related services for broad segments of the building and construction market offers important new growth opportunities for us."

Headquarters of CAP will remain in Grand Rapids. CAP's founder John Neering will remain with the company as president.

McGraw-Hill's Construction Information Group is widely known for its Dodge Reports on construction activity, Sweet's Catalog Files of building products, and key publications including Architectural Record, International Construction Week and ENR, and 12 other publications that comprise the Construction News Publishing Network.

McGraw-Hill, Inc., headquartered in New York City, is one of the world's leading publishing and information services companies. The company, which celebrated its 100th anniversary in 1988, provides information in print, on line, and over the air.

#90026p0148 01/26/1990 ~PR Newswire

SEATTLE (JAN. 25) PR NEWSWIRE - Long before an airline takes delivery of its first 747-400, Boeing Commercial Airplanes has a small army of men and women helping the customer get its new planes into commercial service as smoothly as possible, the company said today.

During the three decades that Boeing has been making jetliners, the company has learned that easing a new aircraft into service and then sustaining efficient and profitable commercial operations sometimes calls for extra assistance.

With the new 747-400, the effort begins several months before delivery of a customer's first plane. Boeing Customer Services offers 747-400 operators a service called "introductory assistance." The program features the services of hand-picked Boeing personnel experienced in virtually all aspects of the -400 airplane. These Boeing experts literally move in with airlines requesting temporary support until they are confident of their own ability to deal with all eventualities.

Three months before delivery, Boeing working groups visit customer airlines to explain the -400's unique service and handling characteristics and to offer whatever other assistance the customer might require.

Then, approximately 30-60 days before the airline takes delivery of the new airplane, an introduction team of 747-400 engineers lead airline personnel through potential problem areas that could crop up in

maintenance, ground handling, flight operations and even publications manuals.

But it doesn't end there. When the airline actually takes delivery and begins commercial service of the new 747-400, the airplane is monitored on its departure and met on its return by a Boeing representative stationed at its main base as well as scheduled line stations.

Additionally, anywhere the airplane flies, it may be met by representatives of the 29-member, Boeing "meet-and-greet" team who offer advice, assist operator line personnel in turning the airplane around, troubleshoot and provide technical support during the "breaking-in" period.

If necessary, after meeting the airplane, an advisor will even ride to the next stop or line station.

The customer decides when assistance is no longer necessary -- usually after three months.

When that happens, the Boeing delivery assistance team heads back to Seattle to assist another new customer of the latest version of the famed 747.

WORCESTER, MA (JAN. 26) PR NEWSWIRE - BankWorcester Corporation (NASDAQ: BNKW) today reported net income of $1,797,000 or 27 cents per weighted average common share for the fourth quarter ended Dec. 31, 1989, a decrease of 55 percent from $4,020,000 or 55 cents per share for the same period in 1988. Net interest and dividend income of $10,537,000 was 11 percent higher than $9,525,000 reported for last year's fourth quarter. Net charge-offs during the quarter amounted to approximately $4.5 million.

For the year, net income was $5,196,000 or 74 cents per share, a 53 percent decrease from $11,036,000 or $1.45 per weighted average common share in 1988. Weighted average common shares at Dec. 31, 1989, were 6,987,000 compared to 7,604,000 on the same date last year. Non-performing assets were approximately $31.4 million at the end of December, a slight decrease from $33.8 million reported at the end of the third quarter. Because of net charge-offs and continued uncertainty about the New England economy and real estate market, $5,994,000 was provided for possible loan losses in the fourth quarter. As a result, the allowance for loan losses at year end was $11,611,000 or approximately 1.1 percent of total loans.

Deposits on Dec. 31 were $885,675,000, an 8 percent increase over $819,194,000 last year. Total loans were $1,011,711,000, an increase of 3 percent from $978,039,000 in 1988. Assets rose to $1,157,907,000 from $1,067,550,000 on Dec. 31, 1988, an 8 percent increase.

NEW YORK (JAN. 26) PR NEWSWIRE - Huntsman Holdings Corporation made public today the following letter sent to R.S. Evans, chairman of the special committee of the board of directors of Aristech Chemical Corporation (NYSE: ARS):

Dear Mr. Evans:

I appreciated the opportunity of meeting with you this morning in your capacity as Chairman of the Special Committee of the Board of Directors of Aristech Chemical Corporation. This letter will confirm that Huntsman Holdings Corporation is currently working with GE Plastics for the formation of a joint venture pertaining to certain of the assets of Aristech. This joint venture would facilitate Huntsman Holdings Corporation in increasing its offer.

As you are aware, Huntsman Holdings Corporation has been permitted to commence its due diligence only as of yesterday.

Unfortunately, the 5:00 p.m. January 29th deadline for the submission of bids, as set forth in your January 24th letter to me, will not afford us an adequate opportunity to conduct the necessary review. In view of Mitsibishi Corporation's and Aristech management's lengthy period to

conduct a complete review of Aristech, fairness dictates that we be afforded a reasonable due diligence review period.

In order to complete our joint venture with GE Plastics and enable Huntsman Holdings Corporation to increase its bid, both Huntsman and GE Plastics need the opportunity to conduct a reasonable due diligence review of Aristech. We believe that the parties would need until February 20, 1990 to conduct an appropriate review.

We also believe that if afforded such a review, Huntsman Holdings Corporation will be able to increase its offer above $26.00 per share.

I look forward to hearing from the Special Committee as soon as possible so that we may commence in earnest our due diligence review of Aristech.

Sincerely, /s/ Jon M. Huntsman, chairman of the board"

Huntsman companies, headquartered in Salt Lake City, manufacture and market petrochemicals and thermoplastics including polypropylene, styrene monomer, expandable polystyrene, polystyrene, specialty compounded polymers and plastic packaging products. Huntsman companies revenues for 1988 were $1.4 billion.

LANSING, MI (JAN. 26) PR NEWSWIRE - Capitol Bancorp, Ltd., a Lansing-based bank holding company, reported a 23-percent increase in

unaudited net income for the year ended 1989 over the same time period in 1988. Income of $635,000 for 1989 increased $115,000 over 1988 earnings of $520,000.

Total assets increased 20 percent from $57,805,000 in 1988 to $69,598,000 in 1989. Equity capital increased 60 percent from $7,227,300 to $11,596,187 as a result of increased earnings and a public common stock offering, which was concluded on Dec. 1, 1989.

Capitol Bancorp Ltd. is the parent bank holding company for Capitol National Bank, which has offices in downtown Lansing and Okemos, Mich.

The corporation also announced that its contemplated acquisition of Portage Commerce Bank, Portage, Mich., has been delayed pending further examination of asset quality at the Portage Commerce Bank by the board of directors of Capitol Bancorp.

CALGARY, ALBERTA (JAN. 26) PR NEWSWIRE - Canadian Occidental Petroleum Ltd. (Toronto: CXY) announces that it is filing with the Toronto Stock Exchange a Notice of Intention to Issue A Normal Course Issuer Bid for the purchase of its common shares.

Up to an aggregate of a maximum of 3,342,467 common shares, being 5 percent of the issued and outstanding common shares of the company, will be purchased to offset the potential dilution that would otherwise result from the exercise of employee stock options, to invest monthly contributions by the company and its employees under the company Employee Savings Plan in common shares of the company, and to take advantage of the relatively low market value of the shares to be purchased for cancellation in an effort to increase the value of the remaining outstanding shares. Presently, there are 66,849,345 issued and outstanding common shares of the company.

These purchases will be made from time to time continuing from on or about Feb. 1, 1990 to Jan. 31, 1991, through the facilities of the Toronto Stock Exchange in accordance with its policy relating to normal course issuer bids.

196,627 common shares were purchased during the period from Dec. 1, 1988, to Jan. 24, 1990, under the company's previous Normal Course Issuer Bid.

STERLING HEIGHTS, MI (JAN. 26) PR NEWSWIRE - The U.S. Army Tank-Automotive Command today certified General Dynamics Land Systems Division's assembly operations at the Detroit Arsenal Tank Plant under the government's Contractor Performance Certification Program (CP)2. Land Systems builds the Army's M1A1 Abrams main battle tank.

"This is the Army's way of recognizing contractors who consistently produce high-quality material that equals or exceeds contract requirements " said Maj. Gen. Leo J. Pigaty, commanding general, U.S. Army Tank-Automotive Command. "It means that when a weapon system is needed, it will work; when we pull the trigger, it will fire," he said.

In ceremonies at the Detroit Arsenal Tank Plant, Maj. Gen. Pigaty presented a certificate to Robert W. Truxell, vice president of General Dynamics Corporation (NYSE: GD) and general manager of Land Systems Division. The certificate signifies completion of a three-phase program over a 12-month period in which the company met rigid quality performance standards covering the full spectrum of the manufacturing and production process. (CP)2 certification makes possible reduced government in-plant quality assurance involvement in the contractor's day-to-day activities, thus lowering costs to the taxpayer while maintaining high quality.

The Abrams tank is the first combat vehicle to be included in the Army's (CP)2 program. It is also the largest and most complex major acquisition "end user" item to be included in the program. An "end user" item is a piece of equipment that goes directly to the field to be used by soldiers rather than being used as a component of another system.

The (CP)2 program emphasizes the defense contractor's responsibility to assure product quality prior to delivery to the government. "This validates what we have known all along," said Truxell. "The Abrams tank is the best tank in the world because our dedicated employees put quality ahead of all other considerations."

Land Systems' Sterling Manufacturing facility in Sterling Heights, where the division has its electro/optical operations, recently began the same 12-month effort to achieve (CP)2 certification.

Land Systems is in the third year of a four-year multi-year contract to build 3,000 Abrams tanks valued at $3.5 billion. The Abrams tank, which Land Systems has been building since 1979, has had operational readiness rates above 95 percent, considerably higher than any previous tank system.

NEW YORK (JAN. 26) PR NEWSWIRE - AT&T (NYSE: T) today, in response to questions about its 1990 earnings expectations, issued the following statement:

While we don't predict earnings, we are committed to earnings growth in 1990. Although it may be difficult to match the 19 percent earnings growth we saw in 1989, we are committed to improved 1990 earnings. We said yesterday that we will continue to face stiff competition in what may be a softening economy, but we are increasingly well positioned to meet those challenges.

SEATTLE (JAN. 26) PR NEWSWIRE - The Boeing Co. (NYSE: BA) has established the Edward C. Wells Professorship in the School of Engineering at Stanford University.

The new endowed professorship, announced by Boeing Chairman Frank Shrontz, will be made possible through a $1.6 million gift from Boeing.

In making the announcement, Shrontz said, "Ed Wells set a standard for engineering that became the trademark of The Boeing Company. Throughout his distinguished career, Ed always embodied the highest ideals of his chosen profession -- not only by his technical achievements -- but by his character and vision."

A 1931 graduate of Stanford, Wells worked for The Boeing Co. for 41 years, and was a member of the board of directors from 1950 until 1978. During the 1969-1970 academic year, he took a partial leave from Boeing to serve as a visiting professor in the Department of Aeronautics and Astronautics at Stanford. He also served as a member of the university's advisory board. Wells died in 1986 at the age of 75.

He was recognized for his contributions to the management concepts needed to develop complex aerospace systems, and for his accomplishments in designing some of the world's most famous military and commercial aircraft. Military aircraft bearing Wells' imprint include the Boeing B-17, B-29, B-47 and B-52. His engineering legacy remains in all of the Boeing commercial models: the 707, 727, 737, 747, 757 and 767.

#90026p0175 01/26/1990 ~PR Newswire

DALLAS (JAN. 26) PR NEWSWIRE - Joseph F. McKinney, chief executive officer of Tyler Corp. (NYSE: TYL), announced today that because of restructuring charges and higher operating costs, the company lost 11 cents per share from continuing operations compared to 7 cents in the year-earlier period. As a result of the agreement to merge Atlas Powder Co. with a unit of Imperial Chemical Industries PLC, continuing operations reflect only Tyler Pipe's operating results. Operating profit of that unit was not sufficient to cover all corporate expense and substantial corporate restructuring provisions. While sales rose 6 percent to $189 million, income from continuing operations showed a loss of $2.3 million.

The results of Atlas Powder and Reliance Universal are included in discontinued operations for 1989 as are the transaction costs associated with both mergers. Substantially all of the company's interest expense has also been included in discontinued operations.

"Despite the loss from continuing operations, we expect the ongoing Company to be profitable," stated McKinney. "For profitability to increase Tyler Pipe's operations must improve and corporate overhead must be cut. We expect both of these efforts to be successful."

While Tyler Pipe's 1989 operating performance was better than in 1988, operating profit rose only 5 percent due to higher raw material costs for all product lines. Sales rose 6 percent primarily as a result of better volumes and slightly higher prices.

Atlas Powder's sales gain of 12 percent was attributable to price increases in most product lines and better volumes at the distribution operations. Despite a rise in operating profit to $16.8 million, higher production costs and lower volumes in certain manufactured product lines caused a decline in operating margin.

Tyler reached an agreement with ICI in December for the merger with Atlas Powder. Provided there are no approval delays, the transaction should be completed in late spring 1990 if Tyler shareholder approval is obtained.

Tyler Corp., with national headquarters in Dallas, provides goods and services to industrial customers. Its operations include industrial explosives and pipe and fittings.

NEW ORLEANS (JAN. 26) PR NEWSWIRE - Ocean Drilling & Exploration Co. (NYSE: ODR) reported preliminary unaudited income from continuing operations for the year 1989 of $43,825,000, or $0.85 per share.

Such income included a first quarter benefit of $2 million, or $0.04 per share, resulting from the reversal of a prior year's provision for a natural gas pricing dispute and a second quarter charge of $1,628,000, or $0.03 per share, for restructuring costs incurred in connection with the April 11, 1989, merger proposal by Murphy Oil Corp. Income from continuing operations for the year 1988 amounted to $15,110,000, or $0.29 per share, and also included gains from certain unusual items. Such unusual items in 1988 consisted of a third quarter gain of $4,297,000, or $0.08 per share, resulting from amendments and adjustments to certain gas sales contracts, and fourth quarter gains of $986,000, or $0.02 per share, on the sale of a dive support vessel and $2,098,000, or $0.04 per share, on the settlement of a dispute involving a land lease for a crude oil terminal in the United Kingdom. For the fourth quarter of 1989, preliminary unaudited income from continuing operations totaled $17,655,000, or $0.34 per share. In the fourth quarter of 1988, income from continuing operations totaled $9,017,000, or $0.17 per share, including the fourth quarter gains from unusual items which totaled $3,084,000, or $0.06 per share.

For the year ended Dec. 31 the preliminary unaudited net loss totaled $29,591,000, or $0.57 per share, compared to a net loss of $30,440,000, or $0.59 per share, a year ago. The net loss amounts included losses from the company's discontinued contract drilling operations of $73,416,000, or $1.42 per share, in 1989 and $45,550,000, or $0.88 per share, in 1988. The 1989 loss from discontinued contract drilling operations reflected an estimated loss on disposal of the contract drilling operations of $30,462,000, or $0.59 per share. Such amount included certain costs associated with the company's restructuring efforts pertaining to its contract drilling business and a $25,547,000 provision for estimated losses of the contract drilling business from Oct. 1, 1989, through the expected completion date of the restructuring. The 1988 loss from discontinued contract drilling operations included a fourth quarter insurance gain on the loss of the Ocean Odyssey of $8,137,000, or $0.16 per share.

The preliminary unaudited net income for the fourth quarter of 1989 totaled $24,434,000, or $0.48 per share, which included a reduction in the previously reported estimated losses of the contract drilling business of $6,779,000, or $0.14 per share. Such reduction included $6,331,000 of recoveries from third parties related to damages to the Ocean Champion in a prior year. Net income for the fourth quarter of 1988 totaled $4,542,000, or $0.09 per share, which included a loss from discontinued contract drilling operations of $4,475,000, or $0. 08 per share. The loss from discontinued contract drilling operations included the insurance

gain on the loss of the Ocean Odyssey of $8,137,000, or $0.16 per share.

#90026p0187 01/26/1990 ~PR Newswire

RICHMOND, VA (JAN. 26) PR NEWSWIRE - Dominion Resources, Inc. (NYSE: D) today announced preliminary earnings for the 12 months ended Dec. 31, 1989 of $4.14 per share of common stock.

Net income for the 12 months ended Dec. 31, 1989, was $410.7 million on operating revenues and other income of $3.7 billion. The average number of shares outstanding increased from 97 million in 1988 to 99.2 million in 1989.

Despite a 20 percent increase in earnings by its non-regulated businesses last year, Dominion Resources' overall earnings in 1989 fell by 38 cents per share from 1988. Chairman William W. Berry attributed the decline in earnings primarily to the carry-over effects of regulatory rate decisions received in 1988 by Virginia Power, Dominion Resources' principal subsidiary.

Virginia Power contributed $3.78 per share to consolidated earnings in 1989, a 43-cent decrease from 1988. The effects of two regulatory

decisions -- to decrease Virginia Power's base rates early in 1988 and to reject totally a rate increase later that same year -- were compounded in 1989 by the need to make major improvements at the Surry nuclear power station.

These factors were offset partially by abnormal weather and by actions taken by Virginia Power and its regulators. High electricity sales resulting from extremely cold weather in December provided a significant boost to earnings. In addition, Virginia Power acted earlier in 1989 to reduce its costs by elimination of more than 600 positions and by major cuts in expenses and capital expenditures. The effects of those actions will be felt more strongly in 1990 and in later years. Earlier this month the Virginia State Corporation Commission approved an increase in base rates of $64.4 million, or 2.5 percent, effective May 1, 1989. This represented Virginia Power's first increase in base rates since 1985.

Virginia Natural Gas, Inc., Dominion Resources' natural gas distribution subisidary, contributed 6 cents per share to consolidated earnings, the same amount as in 1988.

Dominion Resources' non-regulated subisidiaries accounted for 30 cents, or 7.2 percent of consolidated earnings. Dominion Resources' non-regulated activities contributed 25 cents per share in 1988.

For the fourth quarter of 1989, consolidated net income was $120.5 million compared to $90.6 million for the same period in 1988. Earnings per share of common stock for the fourth quarter of 1989 were $1.20, compared to 92 cents for the same period in 1988. The average number of shares outstanding increased form 97.9 million in 1988 to 100.3 million for the fourth quarter in 1989.

Fourth-quarter earnings for 1989 increased over the period for 1988 primarily because of the exceptionally cold weather in December.

CHICAGO (JAN. 26) PR NEWSWIRE - Warehouse Club, Inc. (NASDAQ: WCLB) reported a first quarter fiscal 1990 profit of $463,000 or $0.07 per share as compared to the prior year first quarter profit of $770,000 or $0.11 per share. Total sales for the quarter of $72.8 million represented a decrease of $1.9 million or 2.5 percent versus the first quarter of fiscal 1989.

The first quarter fiscal 1990 profit was reduced by $195,000 for costs associated with the company's lease obligations for a previously closed facility in Arlington Heights, Ill. The company incurred no such costs during the prior year's first quarter, but did record during that period a $129,000 profit on the sale of excess real estate. After adjusting for these two items, the results for the two quarters were approximately identical, with lower expenses and better margins during the fiscal 1990 quarter compensating for the decline in sales.

Warehouse Club, Inc. operates a chain of 12 wholesale cash-and- carry, members only warehouse stores, selling high quality merchandise at wholesale or near wholesale prices. The company's customers are comprised of businesses that purchase items for commercial use or resale, and selected groups of individual retail customers. The company's objective is to achieve operating efficiencies that permit the sale of products at prices significantly below those members would have to pay to traditional wholesale distributors, discount retailers, and supermarkets.

NEW ORLEANS (JAN. 26) PR NEWSWIRE - NBC sportscaster Dick Enberg has signed a new three-year contract with GTE Corp., extending his role as

company spokesperson for its NFL and Academic All-America programs until June 1993.

"We're delighted to renew our relationship with Dick for another three years," said Kent B. Foster, president, GTE Telephone Operations. "We think he is America's premier sportscaster. Having him as part of our team raises the profile of our advertising and promotional activities, and demonstrates how important our sports marketing programs are to GTE."

"I have thoroughly enjoyed my relationship with GTE, and am pleased to be continuing it," said Enberg. "The GTE Academic All-America program and the company's comprehensive association with the National Football League and Super Bowl games represents one of the most powerful and positive corporate-sports programs in America. The NFL and Academic All-America programs have been a long-standing part of my life. GTE continues as a positive conduit to these associations," he said.

Enberg became GTE's spokesperson in October 1985. Since then he has appeared in numerous television, radio and print advertisements that showcase the company's telecommunications products, services and sports sponsorships. He also makes personal appearances on behalf of GTE in support of its NFL and Academic All-America projects, including an ongoing commitment as honorary chairman and master of ceremonies at the yearly GTE Academic All-America Hall-of-Fame induction ceremony.

Enberg's broadcasting credits include Super Bowls, World Series and Wimbledon. Enberg has been involved with virtually every major sports event during his broadcast career. His assignments have included the 1988 Summer Olympic Games, four Super Bowls, the World Series, six NCAA basketball championship games, Wimbledon, the Rose Bowl and the Breeder's Cup.

Enberg has earned numerous broadcast honors. He was inducted into the National Sports Hall of Fame in 1987; was named National Sportscaster of the Year by the American Sportscasters Association three times; and has won two Emmy awards in 1981 and 1985 as Outstanding Personality, Play-by-Play.

GTE is the "Telecommunications Consultant to the NFL" and the sole sponsor of the GTE Academic All-America Teams and Hall of Fame. The company is a supporter of the PGA and Senior PGA Tours, with titled sponsorship events in Los Angeles, Dallas, Tampa, Florida, Indianapolis and Honolulu.

GTE's subsidiaries operate in 46 states and 41 countries with combined revenues and sales of $16.5 billion and net income of $1.2 billion in 1988. It is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing quality products and services worldwide.

NEW MILFORD, NJ (JAN. 26) PR NEWSWIRE - Polifly Financial Corporation (NASDAQ: PFLY), the holding company for Polifly Savings and Loan Association, reported today that it expects to record a significant loss for the quarter ended Dec. 31, 1989.

This loss is due to a reduction in the book value of certain real estate assets to reflect current market conditions as well as an increase in the level of reserves for possible loan losses.

These actions are being taken primarily as a result of the continuing lower demand for and an overall general decline in the market value of New Jersey real estate. If the local real estate market continues to decline, Polifly may experience additional losses in its portfolio.

Polifly anticipates that its equity capital will remain in excess of all current regulatory requirements after recording the loss for the Dec. 31, 1989 quarter. "Polifly has the resources to deal with the loss," said Gregg B. Van Dam, president and chief executive officer of Polifly.

"The writedowns and increase in loan loss reserves will provide management with greater flexibility to resolve its asset problems." Van Dam also announced today that Polifly declared its regular quarterly dividend of $.10 per share to be paid Feb. 15, 1990, to stockholders of record as of Jan. 31.

Polifly said it anticipates releasing its earnings for the Dec. 31, 1989, quarter in early February.

JACKSONVILLE, FL (JAN. 26) PR NEWSWIRE - In a special pilot program, Barnett Bank (NYSE: BBI) offices in Hillsborough and Polk counties are offering electronic tax filing services in connection with a major effort by the Internal Revenue Service to encourage taxpayers to file their federal tax returns electronically.

The 46 offices in these two areas represent one of the largest office

networks participating in electronic tax filing in the country.

Tax returns can be brought to participating Barnett banks for transmission directly to the IRS. Tax refunds will automatically be deposited into the taxpayer's bank account within two weeks of filing, faster than traditional filing methods. Taxpayers may also request that their refund be mailed. There is a $25 fee for the service.

This service is not restricted to Barnett customers. Anyone with a refund due on his federal tax return is eligible.

To encourage participation, the IRS has designated Monday, Jan. 29 as National Electronic Filing Day. Filing electronically is more convenient for taxpayers and more economical for the IRS.

Barnett is a $29-billion-asset, two-state banking organization. It is the leading financial institution in Florida and the eighth-largest in Georgia. The company's stock (BBI) is listed on the New York Stock Exchange.

SEATTLE (JAN. 26) PR NEWSWIRE - Japan Airlines, world's largest operator of the Boeing 747, yesterday received its first two new technology 747-400s. Value of the two passenger aircraft, which were ordered in 1987, is more than $250 million, Boeing Commercial Airplanes announced today.

The signing ceremony, at Boeing's production facility near Everett, Wash., was hosted by Dean Thornton, Boeing Commercial Airplanes president. Accepting the new airliners, for JAL was Toshio Nagaoka, senior managing director.

The 747-400s, displaying the airline's new corporate logo and paint scheme are the first airplanes delivered to JAL to be powered by General Electric CF6-80C2 engines. These advanced jetliners will give JAL the ability to carry 375 to 404 passengers in a three-class layout on long-range flights linking Tokyo with European, U.S. and other destinations.

The -400s, with the same fuselage length as other 747s, feature new structural materials, aerodynamics, electronic systems and passenger interiors. With the ability to fly more than 8,000 statute miles (12,875 km) nonstop, the -400 will use about 15 percent less fuel per seat than

the 747-200 model.

Interior improvements allowing for quick re-positioning of seats will allow JAL to react to fluctuating market requirements which demand varying combinations of first-class, business and economy seating.

Since June 1966, JAL has ordered a wide variety of 747 superjets including the -100, -100SR (short range), -200B, -200F (freighter), the -300, -300SR and now the -400 for a total of 84 airplanes. Altogether, JAL has committed to 112 Boeing jetliners since the first 727 was ordered in l964. Currently, JAL operates 14 Boeing 767s in addition to its 747s.

Forty-six 747-400s have now been delivered since the first of the new model was delivered from the Everett assembly facility on Jan. 26, 1989. Firm orders for the 747 family now total 966, of which 244 are for the 747-400 airplane. Boeing has announced orders for 17 jetliners so far in 1990. Last year, the company announced 887 jetliners valued at about $46.74 billion, the record year.

STAMFORD, CT (JAN. 26) PR NEWSWIRE - Crompton & Knowles Corporation (NYSE: CNK), a producer and marketer of specialty chemicals and equipment, announced today that 1989 fourth quarter earnings, ended Dec. 30, 1989, rose 117 percent to a record $6.0 million, or 49 cents a share, from $2.8 million, or 24 cents per share, in 1988. The 1988 quarter included a loss from a discontinued operation, divested in that quarter, of $1.4 million or 11 cents a share. Sales of $85.1 million for the fourth quarter of 1989 were virtually equal to the prior year's quarter. However, the fourth quarter of 1988 included an extra week because of the company's fiscal calendar.

For the year, net income increased 60 percent to $24.5 million, or $2.00 a share, from $15.3 million, or $1.30 a share. The 1988 results included a loss from a discontinued operation of $1.5 million, or 13 cents a share. Sales in 1989 increased 23 percent to $355.8 million from $289.8 million in the prior year.

"All of our businesses have started 1990 with strong order rates," said Vincent A. Calarco, the company's chairman, president and chief executive officer. "This gives us confidence that Crompton & Knowles can build on its record of 19 consecutive quarters of year-to-year improved results from continuing operations." Commenting on current conditions in the company's major markets, Calarco said that "the strong trend in usage of cotton and nylon continues and demand for our dyes is holding at excellent

levels. In our specialty ingredients business for foods and pharmaceuticals," he continued, "sales have accelerated in January. The plastics extrusion systems operations continue to report good order activity and are maintaining a high order backlog," Calarco said.

EL MONTE, CA (JAN. 26) PR NEWSWIRE - Reflecting a major acquisition late in the period, The Birtcher Corporation (NASDAQ: BIRT) today reported a substantial gain in sales in its second quarter, but incurred a loss for the period due to the one-time costs associated with the consolidation of the businesses.

On Nov. 29, 1989, Birtcher completed the purchase of Bard/Electromedical Systems Inc. from C.R. Bard Inc. for almost $10 million in cash. The Denver-based company, with 1988 annual sales approximating $14 million, is now operating as Birtcher/Electro Medical Systems (EMS).

For the second quarter ended Dec. 31, 1989, which included only one month of EMS' operations, sales climbed to $3,099,000 from $1,491,000 in the like period a year ago. A loss of $945,000, or 18 cents per share, was sustained for the quarter, compared to net income of $236,000, or 5 cents per share, in the prior year's second quarter.

For the six months, sales increased to $5,301,000 from $2,960,000 in the corresponding period last year. A loss was recorded in the most recent six months of $668,000, or 13 cents per share, compared to net income of $457,000, or 10 cents per share, last year.

The loss in the second quarter reflects the various non-recurring expenses associated with the consolidation of EMS and reserves established for the cost of discontinuing certain products.

The Birtcher Corporation designs, manufactures, distributes and sells a variety of electronic medical instruments and their related disposable supplies for all segments of the health care industry worldwide.

MIAMI (JAN. 26) PR NEWSWIRE - Knight-Ridder, Inc., (NYSE: KRI) announced today that its Financial Information Group has launched the MoneyCenter

service in Scandavia in cooperation with Dextel Teledata AB in Sweden, Startel Inc. in Finland and Montel AS in Norway.

MoneyCenter is the most sophisticated real-time quotes, news and graphics system available to the financial professional. It covers all major cash and exchange markets in financial and commodity futures and options. The service is also especially strong in energy and shipping information. MoneyCenter is Knight-Ridder's fastest-growing information service.

MoneyCenter is marketed in Europe, Asia and Australia by Knight-Ridder Unicom, which is based in London and is a wholly owned subsidiary of Knight-Ridder.

The service includes Knight-Ridder Financial News, which has a worldwide staff of 150 reporters and major reporting bureaus in Washington, New York Chicago, Kansas City, Tokyo and London.

The three Nordic companies will not only be responsible for marketing the service but will also provide MoneyCenter with a specially developed Nordic information package consisting of money market rates, forex information, options market rates, main stock quotes and local financial news services.

MoneyCenter operates on real-time basis, 24 hours per day. In addition to futures and options prices, forex rates and financial news, the system offers dynamic graphics, keyword news search, synthetic instruments, custom-made pages, single-keystroke commands and spreadsheet downloading. MoneyCenter is also available as a real-time digital data feed.

Dextel is a subsidiary of the Swedish publishing group Marieberg. Dextel is an information and data service company that runs the Swedish money market dealing system PMI. Dextel's MoneyLine service supplies real-time money market rates to various user groups. Dextel is a co-owner in Montel AS, which markets MoneyLine and MoneyCenter in Norway.

Startel is a subsidiary of the Finnish publishing company Sonoma Corporation. Startel is one of the leading companies in Finland in business information services and provides domestic and foreign financial information to a large user base.

Knight-Ridder is an international information and communications company engaged in newspaper publishing, business news and information services, electronic retrieval services, news graphics and photo services, cable television and newsprint manufacturing. Around the world, news, advertising and information from Knight-Ridder reach more than 100 million people in 129 countries. Total company revenue is over $2 billion a year.

#90026p0222 01/26/1990 ~PR Newswire

BOULDER, COL (JAN. 26) PR NEWSWIRE - Hauser Chemical Research Inc. (OTC), a six-year-old Boulder-based technology company, announces that it has filed its form 8K report with the Securities and Exchange Commission (SEC) reporting combined financials after its merger with Hauser Laboratories Inc.

Hauser is one of only a few companies nation-wide applying chemical process technologies to the broader field of biotechnology with a special emphasis on natural products.

As a result of the merger, Hauser Chemical Research acquired 100 percent of the stock of Hauser Laboratories in exchange for 4,000,000 shares of common stock. According to audited statements for Hauser Laboratories filed with the merger documents, Hauser Laboratories had revenues of $1,500,781 and proprietor's income of $212,842 in calendar year 1988, and revenues of $1,370,927 and proprietor's income of $104,179 in the calendar year 1987, the last two full years of operation of Hauser Laboratories. The combined companies showed revenues of $3,615,457 for the last full fiscal year ended April 30, 1989. Combined total assets were $2,927,254, and combined stockholders' equity was $1,067,957 as of Oct. 31, 1989.

Founded in 1983, Hauser Chemical Research specializes in chemical research chemical analysis, engineering services, petroleum testing and the isloation and purification of high-value products and chemicals from natural sources. In 1984, the company developed proprietary chemical technologies that enable it to isolate and purify extracts and natural compounds at a higher quality level and lower cost than competing technologies. Hauser's proprietary technology has resulted in major contracts with Vipont Pharmaceutical Inc. and with the National Cancer Institute for the extraction of natural compounds studied for their effectiveness against cancer and AIDS. The company has recently signed a Letter of Intent with Fries & Fries to develop vanilla and other extracts for the food industry.

#90026p0225 01/26/1990 ~PR Newswire

WASHINGTON (JAN. 26) PR NEWSWIRE - The National Aeronautics and Space Administration (NASA) today took a significant step forward in the development of U.S. commercial space operations by signing an enabling agreement with Global Outpost, Inc., for the orbital use of space shuttle

external tanks.

"NASA is pleased to be moving ahead with the president's commercial space policy initiative," said Dr. William Lenoir, NASA's associate administrator for the Office of Space Flight.

With today's signing, Global Outpost of Alexandria, Va., becomes the first U.S. commercial venture to complete an agreement with NASA to proceed with research and development efforts aimed at putting an external tank (ET) in low earth orbit (LEO). These 33-ton bullet-shaped aluminum tanks, as tall as a 15-story building, carry the liquid fuel burned by the shuttle's main engines. Normally the tanks are destroyed during reentry.

Once in LEO, global Outpost's ET configuration would provide a low- cost platform for military, civil and commercial experiments in manufacturing and processing which require the zero-gravity properties of space.

Specific applications include pharmaceutical research, crystal growing and other microgravity processes. Subsystems to perform these operations would be attached to the external surface of the ET after it is in orbit.

Global Outpost was formed in 1988 in response to the president's commercial space initiative. "Global Outpost aims to be the leading low-cost commercial space operations service provider," said company president Thomas C. Taylor.

"We see the external tank, literally, as an outpost in a new environment," Taylor said. "This concept offers tremendous potential to open commercial markets both in the near term and in the next century.

"The ET of the space shuttle provides American entrepreneurial companies such as ours with a distinct competitive edge in the emerging international orbital services market," Taylor concluded.

CONTACT: Tom Taylor, president, Global Outpost, 703-765-6235; or Fern Krauss, senior account executive, KSK Communications, Ltd., 703-734-1880 or, after hours, 301-424-2749

ENGLEWOOD CLIFFS, NJ (JAN. 26) PR NEWSWIRE - NutraMax Products, Inc. (OTC) and MEDIQ Incorporated (AMEX: MED) announced today that they have entered into a definitive agreement and plan of merger to combine the business of Aid-Pack, Inc., a wholly-owned subsidiary of MEDIQ, and NutraMax.

As previously announced, MEDIQ will own a majority interest in the

combined companies, and the NutraMax shareholders will own the remaining interest. Consummation of the transaction is subject to certain contingencies described in the agreement and plan of merger.

Aid-Pack, based in Gloucester, Mass., manufactures and distributes feminine hygiene and personal care products. For the fiscal year ended Sept. 30, 1989, Aid-Pack sales were $13,100,000, compared to $11,400,000 for the fiscal year ended Sept. 30, 1988. NutraMax is a development stage company, engaged in the distribution and marketing of health and beauty-aid products which are distributed to drug, food and mass retail outlets throughout the United States and Japan.

MEDIQ Incorporated provides products and services to hospitals, nursing homes, healthcare professionals and consumers through its subsidiaries.

MEDIQ's businesses include diagnostic imaging and testing; maintenance of diagnostic equipment, pharmaceutical packaging; manufacture and distribution of personal care products; hospital and healthcare management and consulting; equipment rental; healthcare facility planning, design and project management; management and ownership of psychiatric units; the manufacture and distribution of eyeglass frames; and financial services.

#90026p0227 01/26/1990 ~PR Newswire

YPSILANTI TOWNSHIP, MI (JAN. 26) PR NEWSWIRE - Ford Motor Company's (NYSE: F) Rawsonville Plant today was awarded the company's prestigious Preferred Quality Q1 Award for achieving outstanding quality levels in its products.

The plant halted its production so that some 3,000 employees could participate in the event and hear congratulatory remarks by O.B. (Bud) Marx III, executive director of the Automotive Components Group; Bob Bertsch, plant manager; Dave Schaar, chairman of UAW Local 898; Bob King, regional director of region 1A, and Joe Reilly, UAW assistant national director.

In presenting the Q1 plaque and flag, Marx said, "The high level of quality in the products you produce shows you have put in place the systems, discipline and positive attitude that assure that quality levels will be maintained and improved." Marx added, "Your accomplishments and team spirit epitomize what Ford means by its slogan, 'Quality is Job 1'."

A key element in quality improvement is the application of human resource programs, including those in participative management, statistical process control, the Taguchi design of experiment method, quality assurance and

employee involvement (EI) and training.

The Rawsonville Plant, one of three plants in Electrical and Fuel Handling Division, is dedicated to the success of EI, in which employees work together as equals, regardless of job classification or rank.

The EI program at Rawsonville was launched in 1981 and consisted of five pilot teams that focused on departmental problem solving. Today there are more than 65 problem solving teams that work together to improve four-way communication and recognize expertise at all levels.

The Rawsonville Plant was the first Ford facility to form an "Operating Committee" that is jointly represented by UAW officials and management representatives. The "Operating Committee" involves all levels of the Rawsonville Plant and is responsible for implementing employee involvement on a day-to-day basis.

The Q1 ceremony and the prestigious reputation of the award are designed to reflect the importance Ford places on producing quality products through teamwork. The award was implemented initially in 1982 to recognize outside supplier plants, and extended in 1985 to include Ford's own worldwide plant locations. To be eligible for the award, the plant or supplier must meet strict quality requirements evaluated by the corporate quality office, product engineers and customers.

"The award you have earned is aggressively sought by all inside and outside suppliers to Ford North American and European Automotive Operations," said Marx. "Only 48 other Ford plants around the world share this honor with you."

Throughout the ceremony the emphasis was on continuous quality improvement through quality products, employee training, and state-of- the-art methods of quality product assurance.

The Rawsonville Plant is the only Ford facility to manufacture the third generation (3-G) alternator which is smaller, more powerful, and withstands higher underhood temperatures than conventional alternators. The new design incorporates worldwide quality, cost and performance features.

The 3-G alternator was first introduced on the 1990 Ford Taurus and Mercury Sable, and will be available on the 1990+ Lincoln Continental, 1990 Ford Explorer and the 1991 Ford Escort.

A worldwide supplier of electro-mechanical devices, the Rawsonville Plant also manufactures E-wiper motors, fuel injectors, and fuel- metering assemblies. The plant employs about 3,000 and has 1.6 million square feet of floor space.

#90026p0230 01/26/1990 ~PR Newswire

MILWAUKEE (JAN. 26) PR NEWSWIRE - Record utility earnings and continuing efforts to contain costs at both subsidiaries helped WICOR, Inc. (NYSE: WIC), post the second-best year in its history. WICOR is the parent of Wisconsin Gas Company and Sta-Rite Industries, Inc.

Stuart W. Tisdale, president and chief executive officer of WICOR, reported 1989 earnings of $32.7 million and $2.40 per share, compared with record 1988 earnings of $33.0 million and $2.46 per share. (Earnings are adjusted to reflect a 2-for-1 stock split in March 1989.)

Wisconsin Gas posted net income of $25.2 million vs. $23.9 million in 1988. The utility's record 1989 results reflect a 3-percent increase in natural gas volumes sold and transported (temperatures were 3.6 percent colder than the previous year), and a continued tight rein on expenses. Tisdale said a 7-percent decline in operating revenues was principally due to accounting for a pipeline supplier's refund payable to Wisconsin Gas customers.

At Sta-Rite Industries, WICOR's Milwaukee-based manufacturing subsidiary, a strong first half was followed by six months of softness in several key domestic markets, Tisdale said. As a result, Sta-Rite posted net income of $7.5 million, compared with $10.0 million in 1988. Operating revenues for 1989 were $268.2 million vs. $276.6 million a year ago.

A combination of weather and economic factors contributed to slowdowns in these markets, Tisdale said. He noted that Sta-Rite's international sales remain strong.

CONTACT: (Media) Kathleen S. Sieja, 414-291-6950, or (Analysts) John Hoy, 414-291-6568, both of WICOR, Inc.

#90026p0231 01/26/1990 ~PR Newswire

ATLANTA (JAN. 26) PR NEWSWIRE - Paul R. Dean, president and chief executive officer of Courier Dispatch Group, Inc., (NASDAQ: CDGI) today announced results for the second fiscal quarter ended December 31, 1989.

Operating revenues increased 10% to $12,400,000 compared to $11,257,000 the same period a year ago. Net income was $97,000, or $.04 per share, versus $172,000, or $.07 per share, the same quarter last year.

For the six month period ended December 31, 1989, operating revenues increased 10% to $24,868,000 compared to $22,512,000, while net income was $198,000, or $.08 per share versus $283,000, or $.11 per share during the six month period a year ago.

In commenting on the results, Paul R. Dean, President and Chief Executive Officer, said, "The increases in operating revenues reflect the combined productive efforts of Courier's management,sales, and marke ting teams.

"Comparative net income results were affected by insurance costs related to increased claim reserve requirements, increased SG & A expenses, and selected upgrading of the Company's vehicle fleet." Dean went on to say,

"Management is in the process of reviewing alternative insurance programs which have the potential of benefitting the Company economically. In addition, we are in the process of implemented a plan to reduce SG & A expenses while simultaneously increasing our marketing efforts and our efforts to improve sales productivity in each of Courier's regional locations. These strategic moves should serve to strengthen results throughout the remainder of fiscal 1990."

In discussing the various operations of the Company, Dean commented that the Florida scheduled ground division perform well but that the Minnesota and New England ground operations remain areas of concern.

Courier Dispatch Group, Inc. is a full service courier organization providing both scheduled and on call-ground and air courier services to its customers for transporting time-sensitive documents.

The Company conducts air courier operations to approximately 65 cities, while operating ground courier facilities in Florida, Georgia, Massachusetts, Minnesota, North Carolina and North and South Dakota.

#90026p0238 01/26/1990 ~PR Newswire

PHILADELPHIA (JAN. 26) PR NEWSWIRE - Maritrans Partners L.P. (NYSE: TUG) announced net income for the quarter ended Dec. 31, 1989, of $3 million compared to 1988 fourth quarter net income of $3.9 million on revenues of $34.9 million and $33.7 million, respectively.

Maritrans has also announced net income for the year ended Dec. 31, 1989, of $12.6 million compared to 1988 net income of $17.2 million on revenues of $135.6 million and $128.2 million, respectively.

As a measure of cash generating capability, a critical factor for master

limited partnerships such as Maritrans, net income before interest, depreciation, and amortization for the year ended Dec. 31, 1989, was $34.9 million compared to $39.7 million for 1988.

Stephen A. Van Dyck, chairman and chief executive officer of Maritrans GP Inc., commented, "In 1989 we set new records for annual revenues and for the number of barrels moved by Maritrans or its predecessor companies. While I am pleased with our overall financial results, our net income was not as high as in 1988 because competitive pressures would not allow us to maintain 1988's higher margins."

The board of directors of Maritrans GP Inc., the managing general partner of Maritrans Partners L.P., declared a cash distribution of $.2875 per outstanding limited partnership unit with respect to the quarter ended Dec. 31, 1989. The distribution will be payable on Feb. 23, 1990, to unitholders of record at the close of business on Feb. 6. Since going public in April 1987,

Maritrans is making its 11th consecutive quarterly distribution without distribution support from Sonat Inc., the former owning company. For the five-year period ending March 31, 1992, Sonat is obligated (subject to specified terms and conditions) to make contributions to Maritrans, if necessary, in order to support its ability to make cash distributions.

Maritrans Partners L.P. is a master limited partnership formed in 1987 to purchase and operate, through Maritrans Operating Partners L.P., a fleet of tugboats and oceangoing tank barges along the Gulf and Atlantic coasts.

Maritrans is the largest independent U.S. flag marine transporter of petroleum products in the coastal trade. The Maritrans Partners L.P. limited partnership units are listed on the New York Stock Exchange.

NEW YORK (JAN. 26) PR NEWSWIRE - Huntsman Holdings Corporation made public today the following letter sent to R.S. Evans, chairman of the special committee of the board of directors of Aristech Chemical Corporation (NYSE: ARS):

Dear Mr. Evans: I appreciated the opportunity of meeting with you this morning in your capacity as Chairman of the Special Committee of the Board of Directors of Aristech Chemical Corporation. This letter will confirm that Huntsman Holdings Corporation is currently working with GE Plastics for the formation of a joint venture pertaining to certain of the assets of Aristech. This joint venture would facilitate Huntsman Holdings Corporation in increasing its offer.

As you are aware, Huntsman Holdings Corporation has been permitted to commence its due diligence only as of yesterday.

Unfortunately, the 5:00 p.m. January 29th deadline for the submission of bids, as set forth in your January 24th letter to me, will not afford us an adequate opportunity to conduct the necessary review. In view of Mitsibishi Corporation's and Aristech management's lengthy period to conduct a complete review of Aristech, fairness dictates that we be afforded a reasonable due diligence review period.

In order to complete our joint venture with GE Plastics and enable Huntsman Holdings Corporation to increase its bid, both Huntsman and GE Plastics need the opportunity to conduct a reasonable due diligence review of Aristech. We believe that the parties would need until February 20, 1990 to conduct an appropriate review.

We also believe that if afforded such a review, Huntsman Holdings Corporation will be able to increase its offer above $26.00 per share.

I look forward to hearing from the Special Committee as soon as possible so that we may commence in earnest our due diligence review of Aristech.

Sincerely, /s/ Jon M. Huntsman, chairman of the board" Huntsman companies, headquartered in Salt Lake City, manufacture and market petrochemicals and thermoplastics including polypropylene, styrene monomer, expandable polystyrene, polystyrene, specialty compounded polymers and plastic packaging products. Huntsman companies revenues for 1988 were $1.4 billion.

SOUTHFIELD, MI (JAN. 26) PR NEWSWIRE - McDonald's Restaurants in Michigan contributed to the record 1989 yearend corporate results reported today by McDonald's Corporation (NYSE: MCD), according to Tom Peters, McDonald's regional marketing manager.

"During the past 12 months, sales continued strong at our McDonald's restaurants and we added several new restaurants," said Peters. "During the next year in Michigan, We will continue to support McDonald's growth strategy by adding new restaurants and increasing sales at existing restaurants. McDonald's is a proud member of the Michigan community and we look forward to further contributing as a member of the Michigan economy."

Peters stated that the growth of the Michigan McDonald's region can also be attributed to the fine management of the owners and corporate employees and to the agencies who supply McDonald's with products and services.

In addition to creating new jobs in the state, the Michigan McDonald's restaurants have contributed greatly to the local communities in which they do business.

Some of McDonald's statewide community programs include: the Michigan McDonald's "When I Grow Up" statewide speech competition; the McDonald's All-American H.S. Band and H.S. Basketball programs; Muscular Dystrophy and United Negro College Fund donations; STAR sponsorship of the "Magic Ride" for child abuse; support of the Michigan Education Trust Fund; and support of McDonald's joint tourism venture with the Michigan Travel Bureau.

In addition to community programs, Michigan McDonald's have also made landmarks with the support and building of the new West Michigan Ronald McDonald House, the continued support of both the Ann Arbor and Detroit Ronald McDonald Houses and the development of the new Southeastern Michigan Chapter of Ronald McDonald Children's Charities, (RMCC) an agency dedicated to supporting nonprofit organizations that directly benefit children.

RMCC grants will benefit health care and medical research, education and the arts, and civic and social service programs.

McDonald's is the world's leading quick service restaurant organization, serving 22 million people each day in more than 11,000 restaurants located in 51 countries. Seventy-five percent of McDonald's restaurant business is locally owned and operated by independent entrepreneurs.

ST. LOUIS (JAN. 26) PR NEWSWIRE - Monsanto Company (NYSE: MTC) announced today that two new members have been elected to its board of directors: Dr. Philip Leder, the John Emory Andrus Professor of Genetics and chairman of the Department of Genetics at the Harvard Medical School; and Frank Andrew Metz, Jr., senior vice president, finance and planning, and chief financial officer at IBM. Both appointments are effective immediately.

Dr. Leder received his bachelor's degree from Harvard College in 1956 and his doctor of medicine degree from Harvard Medical School in 1960.

He serves as a trustee of The General Hospital Association, Massachusetts

General Hospital, Boston; is a trustee, The Rockefeller University, New York; and a member of the University Council Committee on Medical Affairs at Yale University. He is a non-resident fellow at the Salk Institute and a member of the Advisory Committee to the Director, National Institutes of Health.

Metz has spent 34 years with IBM, having graduated from Bowdoin College in 1955. In 1986, he was named to his present post. He also serves as a member of IBM's Management Committee and its Corporate Management Board.

He is also a member of the board of directors of Allegheny Power System, Inc. and is a member of the finance committee. He serves as a trustee and vice chairman of St. Luke's Roosevelt Hospital, New York, and is a trustee of the American Museum of Natural History.

#90026p0259 01/26/1990 ~PR Newswire

MILWAUKEE (JAN. 26) PR NEWSWIRE - Record utility earnings and continuing efforts to contain costs at both subsidiaries helped WICOR, Inc. (NYSE: WIC), post the second-best year in its history. WICOR is the parent of Wisconsin Gas Company and Sta-Rite Industries, Inc.

Stuart W. Tisdale, president and chief executive officer of WICOR, reported 1989 earnings of $32.7 million and $2.40 per share, compared with record 1988 earnings of $33.0 million and $2.46 per share. (Earnings are adjusted to reflect a 2-for-1 stock split in March 1989.)

Wisconsin Gas posted net income of $25.2 million vs. $23.9 million in 1988. The utility's record 1989 results reflect a 3-percent increase in natural gas volumes sold and transported (temperatures were 3.6 percent colder than the previous year), and a continued tight rein on expenses. Tisdale said a 7-percent decline in operating revenues was principally due to accounting for a pipeline supplier's refund payable to Wisconsin Gas customers.

At Sta-Rite Industries, WICOR's Milwaukee-based manufacturing subsidiary, a strong first half was followed by six months of softness in several key domestic markets, Tisdale said. As a result, Sta-Rite posted net income of $7.5 million, compared with $10.0 million in 1988. Operating revenues for 1989 were $268.2 million vs. $276.6 million a year ago.

A combination of weather and economic factors contributed to slowdowns in these markets, Tisdale said. He noted that Sta-Rite's international sales remain strong.

The WICOR Board of Directors today declared a regular quarterly dividend of 35 cents per share of common stock. The annual rate is $1.40. The dividend is payable Feb. 26 to shareholders of record Feb. 9.

WICOR is a Milwaukee-based holding company. Its primary subsidiaries are Wisconsin Gas Company, the state's largest natural gas distributor, and Sta-Rite Industries, a manufacturer of pumps and other fluids-handling equipment and controls.

#90026p0261 01/26/1990 ~PR Newswire

WORCESTER, MA. (JAN. 26) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX), co-developer of Leucogen(R), a recombinant feline leukemia virus (FeLV) vaccine, has learned that the product's initial acceptance, in only six months on the market in France, has resulted in the capture of over 40 percent of the French market share. The worldwide market for the vaccine is estimated to be in excess of $50 million annually.

Cambridge BioScience Corporation receives royalties on worldwide sales of the vaccine. In addition, it has a supply agreement with Virbac to manufacture both the recombinant antigen and the novel vaccine adjuvant (immune response stimulator) used in the vaccine.

When approval by the United States Department of Agriculture (USDA) is received, Leucogen will be marketed in the U.S. and in Canada by Pitman Moore, an Illinois-based unit of International Minerals & Chemical Corporation. Pitman Moore, which has a significant share of both the $200 million U.S. animal vaccine market and the $800 million worldwide market, has signed an exclusive leasing and supply agreement with Virbac SA to market and distribute the vaccine. This product will be manufactured by Cambridge BioScience Corporation.

Feline Leukemia is caused by a retrovirus. It infects between 10 and 14 percent of the 55 million domestic cats in the United States, and causes one-third of feline cancer deaths. Its mortality rate is high: in one study conducted on 1,034 cats over 3-1/2 years, 83 percent of the FeLV-infected cats died within three years. FeLV affects the animals' immune systems in a way similar to that of Acquired Immune Deficiency Syndrome (AIDS); the virus can lie dormant for years, or it can become active, suppressing the immune system and causing degenerative and opportunistic diseases which are often fatal.

Traditional FeLV vaccines have had varied results. Some of those made from killed virus have been show to cause severe side effects or very poor

protection against viral infection. Leucogen has had none of these problems, and has been very effective in successfully immunizing cats against FeLV.

Leucogen fills a critically important need. But of more significant impact is that Leucogen is a recombinant product, the first recombinantly produced vaccine to be effective against a cancer-causing organism in mammals. It contains a genetically engineered protein which replicates the immunoreactive fragments of the feline leukemia virus without the accompanying disease-causing viral components. Stimulon(TM) (patent pending), a proprietary adjuvant, (immune system stimulator), is a critical element in the success of the vaccine. Stimulon was developed by Cambridge BioScience and has applications in many other new as well as existing vaccines for both animals and humans.

Leucogen was developed jointly by Cambridge BioScience Corporation and by Virbac Laboratories SA, based in Nice, France. Approvals in other European countries are pending; approval by the United States Department of Agriculture is expected later this year.

Cambridge BioScience Corporation is a biotechnology company utilizing the latest advance in genetic engineering and monoclonal antibody technology to develop products for the detection and prevention of human and animal infectious diseases.

#90026p0268 01/26/1990 ~PR Newswire

PITTSBURGH (JAN. 26) PR NEWSWIRE - Increasing costs of doing business have forced The Peoples Natural Gas Co. to file a request with the Pennsylvania Public Utility Commission (PUC) for a general rate increase effective October of this year.

If approved by the PUC, the new rates would increase Peoples' annual revenues by $58.8 million, or approximately 17 percent, according to Diane S. Meyer, director of rates for Peoples.

Meyer indicated that the requested revenue increase will enable Peoples to continue to operate and maintain its facilities safely and efficiently, allows the company to earn a fair return on its investment in plant and facilities, and includes a request for "take-or-pay" costs.

The requested rate change would increase the typical residential customer's average monthly gas bill from $70.38 to $84.07 - a $13.69 increase per month. The average residential customer is defined as one using 140 mcf (thousand cubic feet) of natural gas a year. Assuming the PUC follows its normal schedule for public hearings, the rate change would not go into effect until Oct. 27, 1990, she noted.

Meyer said of the requested $58.8 million, about $17.9 million represents take-or-pay gas cost expenses. The company has been incurring expenses related to take-or-pay from its pipeline suppliers since 1988. There is no profit for Peoples Gas figured into the take-or-pay portion of this rate filing, she noted.

Peoples Gas, Meyer said, is aware that any rate increase can have an impact on the budget of all customers, especially those on low or fixed incomes. Meyer encourages customers to take advantage of Peoples' Optional Payment Plan, which allows them to spread their energy cost over a 12-month period. Customers who qualify can also apply for energy grants in the Low-Income Home Energy Assistance Program.

Customers with serious financial difficulties, she added, are urged to contact their respective Peoples Gas office to work out a special payment agreement based on each customer's circumstances. Peoples Gas serves more than 328,000 residential, commercial and industrial customers in 16 southwestern Pennsylvania counties.

CHICAGO (JAN. 26) PR NEWSWIRE - United Airlines today announced its "Fly

Three, Fly Free" promotion, offering free flights to members of its Mileage Plus frequent flier program. Any member qualifies by taking at least three round-trip flights each valued at at least $98 by April 6, 1990 on United or United Express.

In return, United will award the customer a free round-trip flight which can be taken between Sept. 4 and Dec. 14, 1990 in the continental United States (including Alaska), Canada or Mexico.

"This is an exceptional offer to the millions of frequent fliers to earn a free flight on United Airlines," said Patricia A. Engels, vice president-market development.

In further explaining this promotion, Engels said, "For those customers who fly United extensively during this qualifying period the benefits that can be reaped are even more substantial. Those who fly five round-trips with us earn two free flights; those who fly seven round-trips earn three free flights."

The free tickets may be given to a friend or relative. The offer is valid for flights taken by Mileage Plus members from Jan. 14, 1990 through April 6, 1990.

The free flights may be taken at any time with the exception of peak-demand days around the Thanksgiving Day holiday period, those days being Nov. 20, 21, 25 and 26.

United's Mileage Plus frequent flier program has more than 8 million members in the United States and overseas. Customers can enroll in the program and qualify to earn free flights by calling 1-800-421-4655.

United operates more than 1,800 flights daily to 154 cities in the United States, Canada, Mexico, Asia and the South Pacific.

#90026p0279 01/26/1990 ~PR Newswire

HARRISBURG, PA. (JAN. 26) PR NEWSWIRE - The board of directors of Keystone Financial, Inc. (NASDAQ: KSTN) today declared a distribution of one preferred share purchase right for each outstanding share of Keystone common stock, payable to shareholders of record on Feb. 9, 1990.

Carl L. Campbell, president and chief executive officer, stated, "The rights are intended to enable Keystone shareholders to realize the long-term value of their investment and are designed to assure that all Keystone shareholders receive fair and equal treatment in the event of a takeover. This action should help to guard against abusive tactics that could be employed to gain control of Keystone and encourage anyone seeking to acquire the corporation to negotiate with the board prior to attempting a takeover."

The rights will be exercisable only if a person or group acquires or announces a tender or exchange offer for 20 percent or more of Keystone's common stock. In such an event, each right will entitle shareholders to buy one-hundredth of a share of a new series of preferred stock, which has terms designed to make it the economic and voting equivalent of one share of common stock.

Each right not owned by the acquiring person or group will entitle its holder to purchase at the right's exercise price a number of shares of stock having a market value of twice the exercise price of $70. The board of directors is entitled to redeem the rights for one cent per right at any time before a 20 percent position has been acquired. The rights will expire on Feb. 9, 2000.

Campbell further stated, "The rights are not being distributed in response to any specific effort to acquire control of Keystone, nor is the corporation aware of any such effort. The distribution of the rights will not affect Keystone's reported earnings and is not taxable to shareholders or to the corporation."

Keystone Financial, Inc. is a Pennsylvania bank holding company. Its principal subsidiaries are Mid-State Bank and Trust Company, Altoona, Northern Central Bank, Williamsport, and Pennsylvania National Bank and Trust Company, Pottsville. These member banks operate 93 community offices in 20 Pennsylvania counties.

#90026p0280 01/26/1990 ~PR Newswire

ST. LOUIS (JAN. 26) PR NEWSWIRE - McDonnell Douglas Corp. (NYSE: MD) earned $60 million or $ 1.56 per share on revenues of $4.297 billion in the fourth quarter of 1989, compared with earnings of $145 million or $3.79 per share on revenues of $4.146 billion in the fourth quarter of 1988. Results for the fourth quarter of 1989 include $2.01 per share in earnings from discontinued operations in the information systems area.

Results for the quarter were negatively affected by three main factors: write-offs in all three aerospace segments; higher interest expense; and, apart from the effect of write-offs, poor financial performance in the transport aircraft segment.

During the fourth quarter of 1989 the corporation recognized a substantial after-tax gain on the completion of the previously announced sale of its Network Systems business to British Telecom. This gain was partially offset by losses recognized in the planned closure of another unit in the information systems area. The net gain from these transactions was $1.96 per share. There was an additional 5 cents a share in earnings from discontinued operations.

Net earnings for all of 1989 were $219 million or $5.72 per share on revenues from continuing operations of $14.589 billion, compared with net earnings of $350 million or $9.13 per share on revenues of $14.438 billion from continuing operations in 1988.

LOS ANGELES (JAN. 26) PR NEWSWIRE - First Executive Corporation (NASDAQ: FEXC) announced today that it had received from Rosewood Financial Inc. a proposal to merge the company with a corporation to be organized by Rosewood Financial and unidentified third parties. In the proposed transactions, so long as holders of at least 50 percent of FEXC outstanding Common Stock elected to receive common stock of the new corporation, the holders of the remaining common stock, other than Rosewood Financial, would have the option to receive $6 in cash or one share in common stock of the surviving corporation for each share of First Executive Common Stock. The proposal is further conditioned upon holders of First Executive's Series G and Series H preferred stocks converting their shares into common stock prior to the merger, and the holders of the Series E and Series F preferred agreeing to receive 1.25 and 2 shares of common stock, respectively, in the merger. The proposal is subject to the negotiation and execution of a definitive merger agreement, the receipt of financing and other necessary regulatory and stockholder approvals and other consents.

Rosewood Financial's proposal also states that it would seek to arrange for suitable financing after the consummation of a merger in order to permit First Executive to provide a capital infusion of approximately $500,000,000 into Executive Life Insurance Company. The proposal states that unless it is previously revoked by Rosewood Financial, it will remain open until Feb. 7, 1990, at which time it will be automatically withdrawn. Pending the proposed merger, Rosewood Financial requested that Fred Carr resign and remove himself from the board of directors of the company and that an interim chief executive be appointed.

The company said that its board of directors would consider the proposal in due course.

ARLINGTON, VA. (JAN. 26) PR NEWSWIRE - USAir today said that it has sought permission to withdraw its application for non-stop Pittsburgh-Tokyo and Los Angeles-Tokyo route authority.

The airline told the Department of Transportation that when it was required to file its application on Jan. 18, it had not yet completed evaluating aircraft types capable of providing the service.

"Having completed its evaluation, USAir is now forced to conclude that there are no aircraft available in the 1991 time frame that would be economically viable to serve this route," USAir said in its motion to withdraw.

USAir will continue to seek international marketing opportunities to augment existing services to Great Britain, Puerto Rico, Canada, Bermuda and the Bahamas. Non-stop flights between Pittsburgh and Frankfurt, West Germany, will begin June 15, 1990.

HOUSTON (JAN. 26) PR NEWSWIRE - Philip J. Carroll, executive vice president of administration, and Charles W. Wilson, executive vice president of products, Shell Oil Co., have been elected members of the Shell Oil Co. board of directors.

With the addition of Carroll and Wilson, the Shell Oil board now has 12 directors.

Carroll holds a bachelor of science degree and a master of science degree in physics from Loyola University and Tulane University, respectively. He joined Shell in 1961 as a petroleum engineer and worked in New Orleans, Midland, New York and Los Angeles. He served as director of the energy conservation division of the U.S. Department of Commerce in Washington, D.C., in 1973 and 1974. Following his return to Shell in 1974, he worked in several exploration and production positions in New Orleans and Houston and became vice president of public affairs in 1979. He became senior vice president of administration in 1986 and assumed his present position in 1988.

Wilson joined Shell in 1963 after receiving a bachelor of science degree in civil engineering and a master of science degree in engineering from the University of New Mexico. He served in various exploration and production positions in Denver, New Orleans and Houston, and became vice president of corporate planning in 1985. Wilson became vice president of production in 1986 and a year later became president of Shell Western E&P Inc. In 1987 he became vice president of refining and marketing, and assumed his present responsibilities in 1988.

CHARLOTTE, NC (JAN. 26) PR NEWSWIRE - First Union Corporation (NYSE:FTU) announced today that the Eleventh Circuit Court of Appeals has denied motions seeking a stay of the Order of the Board of Governors of the Federal Reserve System, dated December 22, 1989, approving the acquisition of Florida National Banks of Florida, Inc. (NASDAQ-NMS: FNBF) by First Union Corporation.

First Union expects the acquisition to be consummated at 12:01 a.m. on January 29, 1990, as scheduled.

As of December 31, 1989, First Union Corporation had assets of $32.1 billion and operated 663 banking offices in the Carolinas, Georgia, Florida and Tennessee and 282 nonbanking offices in 36 states. As of September 30, 1989, Florida National had assets of $7.7 billion and operated 185 banking offices in Florida.

#90026p0298 01/26/1990 ~PR Newswire
ATLANTA (JAN. 26) PR NEWSWIRE - The Nuclear Regulatory Commission (NRC) staff has released the results of its latest performance evaluations of operations at Duke Power Co.'s McGuire and Catawba nuclear power plants, both located near Charlotte, N.C.

In two reports called Systematic Assessment of Licensee Performance (SALP) reports, the NRC staff classified operations at the plants in specified areas into three categories. Under NRC guidelines, Category 1 is the maximum rating achieveable, and Category 3 is the minimum acceptable rating.

The McGuire plant was evaluated for the period from Aug. 1, 1988 through Oct. 31, 1989. The plant received Category 1 ratings in Radiological Controls and Emergency Preparedness. Category 2 ratings were received in Plant Operations, Maintenance/Surveillance, Security, Engineering/Technical Support and Safety Assessment/Quality Verification. No Category 3 ratings were assessed at McGuire.

At Catawba, the facility was evaluated for the period from Aug. 1, 1988, through Oct. 31, 1989. Catawba received one rating in Category 1 in the area of Emergency Preparedness. The plant was assessed as Category 2 in

Plant Operations, Radiological Controls, Maintenance/Surveillance, Security, Engineering/Technical Support and Safety Assessment/Quality Verification. Catawba received no Category 3 ratings.

NRC officials will meet with Duke Power Co. management for each site to discuss the results of the SALP evaluations. The meeting for McGuire will be held at the plant site at 1 p.m. (EST) on Jan. 30. The meeting for Catawba will be held at the plant site at 9 a.m. (EST) on Jan. 31. Both meetings will be open to the public for purposes of observation. NRC officials will be available following each meeting to answer questions from persons who may attend to observe.

Copies of the SALP reports for each plant have been sent to news organizations in the immediate area of each plant and to major media outlets in both North and South Carolina.

CONTACT: Ken Clark of the NRC, 404-331-5503.

#90026p0306 01/26/1990 ~PR Newswire

CADILLAC, MI (JAN. 26) PR NEWSWIRE - George R. Kempton, chairman of the board and chief executive officer of Kysor Industrial Corporation (NYSE: KZ), announced the following action taken at the regular meeting of the board of directors held today.

-- Dividend Announcement -- The board of directors approved the payment of a regular quarterly dividend of $.15 per share payable April 26, 1990, on stock of record April 11, 1990.

-- Annual Meeting -- The board of directors established April 27, 1990, as the date of the corporation's annual shareholders meeting with a record date of March 12, 1990.

-- Year-End Restructuring Completed -- Kempton reported to the board that although audited results for year-end are not yet available, Kysor expects sales below last year's record levels due to general economic softening in the markets that Kysor serves. During 1989, both Kysor's business segments (commercial products and transportation products) reported sales below last year's levels and profitability was affected by development costs, facility expansion and start-up costs associated with the record number of new products introduced in 1989. Kempton also reported that these costs are behind us, representing an investment in new sales opportunities and increased market share for the future.

It was also reported that both Kysor/Warren GmbH and Kysor/AFP operations continued to have disappointing results in 1989. Kysor/Warren GmbH sales were expanded as their growing reputation for product quality resulted in increased market penetration. Although significant improvements were realized during the course of the year, the German subsidiary is still not profitable. Alternative operating strategies have been formulated, their financial impact has been provided for at year-end 1989 and these plans will be acted upon in early 1990 to further assist in the turnaround of these operations.

As previously announced, the company has implemented restructuring moves at Kysor/AFP, the company's marine fuel tank operation, which have resulted in the close down of the Greeneville, Tenn., facility, the anticipated sale of certain product lines and the reorganization and consolidation of the administrative function into its Michigan Fleet division (truck fuel tanks).

In addition to consolidating and streamlining operations, the company has taken other restructuring actions to further reduce costs including a 12-percent reduction in the company's work force, voluntary early retirements, selective hiring and salary freezes and pay reductions at the corporate officer and board of director levels.

The company has also taken prudent fiscal actions in 1989 to write off certain intangible assets associated with earlier acquisitions as well as provided for special charges for environmental contingencies associated with a 30-year-old groundwater contamination problem at the Kysor/Cadillac division. The one-time charges associated with the above actions have contributed to a loss of $1.20 to $1.30 per share for the fourth quarter;

however, these actions are intended to accelerate the company's return to more historical levels of profitability.

Kysor fully expects 1990 to be an important growth year for the corporation and the company's shareholders as the company's core business segments continue to perform well.

ATLANTA (JAN. 26) PR NEWSWIRE - Directors of the John H. Harland Co. (NYSE: JH) today increased the company's regular quarterly cash dividend to 19.5 cents per share, from 17 cents per share, payable March 1 to shareholders of record February 16.

The increase represents a 14.7 percent rise over the rate paid in 1989 and marks the company's 37th consecutive year of dividend increases.

"We recognize the value in rewarding shareholders with annual dividend

increases," said J. William Robinson, Harland chairman and chief executive officer.

Harland's combined growth rate, which also includes 40 consecutive years of increased sales and 36 straight years of higher earnings, is one of the best on the New York and American stock exchanges.

Harland is a major national participant in the financial and educational fields with production facilities across the country and in Puerto Rico.

CHARLOTTE, NC (JAN. 26) PR NEWSWIRE - Interstate/Johnson Lane, Inc. (NYSE: IS) has named Franklin C. Golden to its board of directors. He has also been named executive vice president of the broker-dealer subsidiary.

During the past year, Golden successfully combined the sales operations of Interstate Securities and Johnson Lane following the merger of the two companies in late 1988. He and his staff have recruited more than 70 account executives to the company, acheiving a net gain of over 40 experienced professionals.

Since May of 1988 Golden has been director of branch administration, with responsibility for retail sales and product areas, asset management and over-the-counter trading.

Golden, who previously served as director of branch administration for Interstate/Johnson Lane, joined the company in 1978 as an account executive. He successfully managed the company's Charlotte sales operations before being appointed director of sales for the company.

A native of Sanford, he is a 1972 graduate of the University of North Carolina at Chapel Hill.

Interstate/Johnson Lane, Inc., a New York Stock Exchange listed firm, is the parent company of Interstate/Johnson Lane Corporation, the largest broker-dealer and investment banking firm headquartered in the Southeast. The company has approximately 1,300 employees, including more than 500 account executives serving individual and institutional investors through 73 sales offices in six southeastern states and New York City.

GRAND RAPIDS, MI. (JAN. 26) PR NEWSWIRE - Charles G. Conville, president and chief executive officer of PrimeBank (NASDAQ-NMS: PMBK), will resign his positions effective upon consummation of the purchase of the savings bank by First of America Bank Corporation (NASDAQ: FABK), based in Kalamazoo, Mich.

Kenneth J. Hoexum will be named president and chief executive officer at that time, and the Grand Rapids-based PrimeBank becomes a wholly owned subsidiary of First of America.

Conville, who has held his current positions since 1983, will leave PrimeBank to pursue other interests.

First of America has offered $32.3 million in cash for PrimeBank, and PrimeBank's board of directors approved the acquisition on Nov. 16, 1989. The offer now goes before federal regulatory agencies and PrimeBank shareholders at their annual meeting in April. Consummation of the transaction is expected this summer.

Hoexum has been executive vice president/chief operating officer of PrimeBank since 1986, and was senior vice president of its predecessor, Mutual Home Federal Savings Bank, from 1983 to 1986. Mutual Home changed its name to PrimeBank in 1986, a year after it became a publicly traded savings bank.

PrimeBank, which has assets of about $413 million, is traded on the NASDAQ National Market System under the symbol PMBK.

HAMMOND, IN (JAN. 26) PR NEWSWIRE - Edmund A. Schroer, chairman and chief executive officer of NIPSCO Industries, Inc. (NYSE: NI), the holding company that owns the common stock of Northern Indiana Public Service Co., made the following statement regarding a Jan. 24, 1990 order of the Supreme Court of Indiana. The court denied the petition for transfer by the Office of the Indiana Utility Consumer Counselor of a decision by the Court of Indiana. The Court of Appeals had affirmed a decision by the Indiana Utility Regulatory Commission regarding exchange of the common stock of Northern Indiana Public Service Co. to NIPSCO Industries.

Schroer said, "This is a good decision for all concerned. The unanimous decision of the Indiana Utility Regulatory Commission has been sustained by the highest court of the state as was the favorable action of the Federal Energy Regulatory Commission on this subject by the United States

Court of Appeals for the District of Columbia. The activities of Northern Indiana Public Service Co. continue to be closely regulated by numerous regulatory authorities, both state and federal; the right of a shareholder to exchange privately owned stock is maintained and there is no adverse effect on the customers of Northern Indiana Public Service Co."

The Office of the Utility Consumer Counselor (UCC) had contended that the Indiana Utility Regulatory Commission (IURC) had jurisdiction over the exchange of shares of the utility for shares of the holding company. Under that 1-for-1 share exchange, effective March 3, 1988, the utility became a subsidiary of the holding company.

The IURC dismissed the UCC petition. The Court of Appeals of Indiana, in May 1989, upheld the IURC decision.

NIPSCO Industries, Inc., an energy-based holding company, is the parent company of Northern Indiana Public Service Co., its primary subsidiary.

PEORIA, IL (JAN. 26) PR NEWSWIRE - Donald V. Fites has been elected chairman and chief executive officer of Caterpillar Inc. (NYSE: CAT) effective July 1 when George A. Schaefer retires. James W. Wogsland has

been elected to the newly created office of vice chairman.

Fites is currently president and Wogsland an executive vice president of the company.

As part of a major reorganization of Caterpillar, the offices of president and executive vice president will be eliminated. Three executive vice presidents, Glen A. Barton, Gerald S. Flaherty, and Pierre C. Guerindon, will become group presidents. The executive office will be reduced from six officers to five.

The new Caterpillar organization clearly distinguishes between profit centers and central services. Of the company's 18 vice presidents, 14 will head profit centers and four will head central services divisions.

In other action by the Caterpillar board of directors, James S. Beard, Ronald P. Bonati, James W. Owens, and Robert R. Thornton were elected vice presidents. Vice President Frank N. Grimsley will retire May 1. Vice President John D. Winters will retire Aug. 1. John N. Hanson, a Caterpillar vice president since 1981, has chosen to leave the company.

Succeeding Winters as head of the company's engine division will be Richard L. Thompson, currently president of Solar Turbines Incorporated, a wholly owned subsidiary headquartered in San Diego. Succeeding Thompson in San Diego will be newly elected Vice President Jim Owens, who is currently managing director of P.T. Natra Raya, an 80 percent- owned subsidiary in Indonesia.

#90026p0330 01/26/1990 ~PR Newswire

NEW YORK (JAN. 25) PR NEWSWIRE - Thomson McKinnon Asset Management L.P. (TMAMLP) (NYSE: TMA) today announced earnings for the three months ended Dec. 31, 1989, of $4.975 million, or $.498 per unit. Revenues for this period were $9.211 million. The comparable information for the 1988 period was $3.263 million, $.326 per unit and $7.984 million.

For the year ended Dec. 31, 1989, net income was $15.872 million, or $1.587 per unit, on revenues of $34.638 million as compared with $12.947 million, or $1.295 per unit, on revenues of $30.557 million for 1988.

Reflected in the fourth quarter earnings is a non-recurring item of $894,000, or $.09 per unit, representing a reversal of an accrual for bonuses as a result of certain members of senior management offering to forego certain bonuses in order to increase partnership distributable income. The partnership also announced that it was retaining $1 million

of distributable funds to be used in connection with an anticipated move of New York headquarters to New Jersey. Such move is expect to provide the partnership with significant rent and tax savings.

The partnership has declared a regular fourth quarter distribution of $.32 per unit plus a special year-end distribution of $.18 per unit. The record date for these distributions will be Feb. 1, 1990, with the ex-dividend date being Jan. 26, 1990. Payment date will be Feb. 10, 1990.

The fourth quarter was the first quarter in which the partnership's mutual fund products were sold exclusively through Prudential-Bache Securities rather than through the Thomson McKinnon Securities system. During the fourth quarter of 1989, the assets in cash accumulation trust basically remained constant at the level of $2.7 billion and the assets in Thomson McKinnon Investment Trust (TMIT) declined from $1.8 billion to $1.76 billion reflecting redemptions exceeding sales by approximately $105 million, offset to some extent by market appreciation.

The partnership also indicated that no resolution had been reached to date with representatives of the New York regional office of the Securities and Exchange Commission concerning the proposed administrative proceeding previously disclosed.

As previously announced, Thomson McKinnon Inc. (TMI), the parent of Thomson McKinnon Asset Management Inc. (TMAMI), the general partner of TMAMLP, has been seeking since August to sell its 63 percent interest in the partnership. While TMI has not received any firm proposals to purchase its partnership interest, values indicated by those with whom TMI has had discussions generally have continued to be significantly below trading prices of the partnership's publicly held units. TMI reportedly continues to seek to sell its interest in the partnership and is currently engaged in discussions with several prospective purchasers.

ST. PETERSBURG, FL (JAN. 26) PR NEWSWIRE - Trust America Service Corp. (AMEX: TRS) today announced that TARI Inc., a wholly owned subsidiary of Trust America Service Corp., and First Union Mortgage Corporation had entered into a Mortgage Servicing Purchase and Sale Agreement (the "sale agreement"). Pursuant to the terms of the sale agreement, First Union Mortgage Corporation acquired from TARI Inc., effective as of Jan. 23, 1990, the servicing rights with respect to mortgage loans having an aggregate principal balance of approximately $419,782,000, which are serviced for the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, state housing authorities or private investors. The purchase price paid for the servicing rights was approximately $6,227,000, which was paid through the cancellation of certain indebtedness in a like amount of TARI Inc. and its affiliates to First Union National Bank of Florida, an affiliate of First Union Mortgage Corporation. With the sale of these servicing rights, TARI Inc. intends to no longer engage in the servicing of mortgage loans.

Headquartered in St. Petersburg, Fla., Trust America Service Corp. is a mortgage banking company which is currently principally engaged in the business of purchasing, packaging, and reselling one-to-four-family residential mortgge loans which are FHA-insured, VA-guaranteed or FNMA and FHLMC eligible through two of its other wholly owned subsidiaries, Resource America Mortgage, Inc. and SW Mortgage, Inc.

#90026p0337 01/26/1990 ~PR Newswire

PEORIA, IL (JAN. 26) PR NEWSWIRE - Donald V. Fites has been elected chairman and chief executive officer of Caterpillar Inc. (NYSE: CAT) effective July 1 when George A. Schaefer retires. James W. Wogsland has been elected to the newly created office of vice chairman.

Fites is currently president and Wogsland an executive vice president of the company.

As part of a major reorganization of Caterpillar, the offices of president

and executive vice president will be eliminated. Three executive vice presidents, Glen A. Barton, Gerald S. Flaherty, and Pierre C. Guerindon, will become group presidents. The executive office will be reduced from six officers to five.

The new Caterpilar organization clearly distinguishes between profit centers and central services. Of the company's 18 vice presidents, 14 will head profit centers and four will head central services divisions.

''Our intent,'' said Schaefer, ''is to move accountability downward in the organization. Profit centers will be expected to do exactly what the name says: produce a profit; and they'll have the authority to make it happen. The flatter organization will push decision-making downward. The central services divisions are cost centers that will be expected to provide services of value to the organization on a market competitive basis, and they'll be judged accordingly.''

''Our corporate vision statement'', said Fites, ''emphasizes that Caterpillar will become more focused and responsive to customers' needs. We'll be flexible organizationally and do what works best.

''Currently, we're organized mostly on a functional basis. The new organization is a profit-driven product/geographic matrix,'' he added. ''We believe the title "group president" will help underline the basic autonomy of profit centers.''

In other action by the Caterpillar board of directors, James S. Beard, Ronald P. Bonati, James W. Owens, and Robert R. Thornton were elected vice presidents. Vice President Frank N. Grimsley will retire May 1. Vice President John D. Winters will retire Aug. 1. John N. Hanson, a Caterpillar vice president since 1981, has chosen to leave the company.

Succeeding Winters as head of the company's engine division will be Richard L. Thompson, currently president of Solar Turbines Incorporated, a wholly owned subsidiary headquartered in San Diego. Succeeding Thompson in San Diego will be newly elected Vice President Jim Owens, who is currently managing director of P.T. Natra Raya, an 80 percent- owned subsidiary in Indonesia.

Bonati will become vice president of the North American commercial division, succeeding Vice President David A. Lewis. Lewis will move into the newly created office of vice president of diversified products division.

Vice President Beard will have administrative responsibility for the newly created financial products division, a profit center which includes Caterpillar Financial Services Corporation, Caterpillar Insurance Co. Ltd. Caterpillar World Trading Corporation, Caterpillar Professional Systems,

and Caterpillar Venture Capital, Inc. Vice President Charles E. Rager will assume most of the responsibilities of retiring Vice President Grimsley, plus additional functions in a new corporate services division.

Thornton has been secretary and general counsel of Caterpillar, and will continue to perform these functions. He will have administrative responsibility for the legal services division which will include legal and patent activities.

In the new organization, Vice Chairman Wogsland and Group President Barton will report to Chairman Fites. Barton will head the new construction and mining products division. Three vice presidents will also report directly to Fites: Donald F. Coonan, who has administrative responsibility for much of the company's commercial activities in South America, Asia, and Australia; Keith G. Johnson, who is chairman of Shin Caterpillar Mitsubishi Ltd., a 50 percent-joint venture in Japan, and newly elected Vice President Bonati.

Group Presidents Flaherty and Guerindon will report directly to Vice Chairman Wogsland, as will Vice Presidents Beard, Rager, and Thornton.

Four vice presidents will report to each group president. Reporting to Group President Glen Barton will be Vice Presidents James E. Despain, with responsibility for construction and mining products division operations; Charles N. Fangman, responsible for construction and mining products division products; Roger E. Fischbach, who heads the small machines division, and David A. Lewis, responsible for the diversified products division. Included in the diversified products division will be agricultural products, forest products, custom machine products, Caterpillar Paving Products Inc., defense products, and Carter Machinery Company Incorporated.

Reporting to Group President Gerald S. Flaherty will be Vice Presidents Robert C. Dryden, head of a newly formed component products division; Bernard P. Sorel, with administrative responsibility for another new a Rrea, the technical services division Richard L. Thompson, head of the engine division, and Wayne M. Zimmerman, responsible for the human services division.

Reporting to Group President Pierre C. Guerindon will be Vice Presidents Michael D. Meadows, president of Caterpillar Brasil S.A. Richard A. Benson president of Caterpillar Industrial Inc., the company's lift truck subsidiary; Vito H. Baumgartner, chairman of Caterpillar Overseas S.A., and James W. Owens, president of Solar Turbines Incorporated.

Schaefer joined the company in 1951 with a degree from St. Louis University. In 1976, he was elected a vice president with administrative responsibilities for the financial and data processing functions. He

became an executive vice president in 1981 and was named a director in 1983. In 1984 he was elected vice chairman, and on Feb. 1, 1985, was named chairman and chief executive officer.

#90026p0343 01/26/1990 ~PR Newswire

ST. LOUIS (JAN. 26) PR NEWSWIRE - Monsanto Company's (NYSE: MTC) board of directors today declared a dividend of one preferred stock purchase right on each outstanding share of Monsanto common stock. In connection with this distribution, the board also authorized the redemption of the company's existing common stock purchase rights, which were issued in Feb. 1986.

Each new right will entitle shareholders to buy one one-hundredth of a share of a new series of preferred stock at an exercise price of $450. Each one one-hundredth of a share of the new preferred stock has terms designed to make it substantially the economic equivalent of one share of common stock. The rights will be exercisable only if a person or group acquires 20 percent or more of Monsanto common stock or announces a tender offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the common stock. Monsanto will be entitled to redeem the new rights at one cent per right at any time before a 20 percent position has been acquired.

If Monsanto is acquired in a merger of other business combination transaction while the rights are outstanding, each new right will entitle its holder to purchase, at the right's then-current exercise price, the number of the acquiring company's common shares having a market value at that time of twice the right's exercise price.

In addition, if a person or group acquires 20 percent or more of Monsanto's outstanding common stock, each new right will entitle its holder (other than such acquiring person or members of such group) to purchase, at the right's then current exercise price, the number of shares of Monsanto common stock having a market value at that time of twice the right's exercise price. Furthermore, at any time after a person or group acquires 20 percent or more (but less than 50 percent) of Monsanto's outstanding common stock, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring person or group) for shares of Monsanto common stock on a one-for-one basis.

The board of directors is also authorized to reduce the 20 percent thresholds referred to above to not less than 10 percent.

WALTHAM, MA (JAN. 26) PR NEWSWIRE - The Waltham Corporation (NASDAQ: WLBK), the holding company of Waltham Savings Bank, today reported its results for 1989. For the three months ended Dec. 31, 1989, the corporation reported a net loss of $4,478,000 or $1.46 per share. Net income for the comparable period last year was $733,000 or 22 cents per share. The net loss for the year ended Dec. 31, 1989, was $3,424,000 or $1.08 per share, as compared with net income of $1,237,000 or 36 cents per share, for the same period in 1988.

Assets on Dec. 31, 1989, totaled $528,050,000 as compared to $432,395,000 at the same date last year. The increase in assets was primarily the result of growth in the investment portfolio, a program that was begun in the third quarter of 1988. Total investments increased $112,125,000 from year-to-year, primarily with additions of adjustable-rate mortgage-backed securities. The investment portfolio at Dec. 31, 1989 was $255,396,000 compared to $143,271,000 at Dec. 31, 1988.

Deposits reached at record level of $324,472,000 at Dec. 31, 1989, compared to $259,948,000 for the same period last year. Net loans were $256,361,000 at Dec. 31, 1989, as compared to $276,706,000 at the same date last year. The decrease was primarily attributable to the securitization of residential mortgages and the reclassification into the investment portfolio.

On Jan. 10, 1990, The board of directors declared a cash dividend of 12 cents per share, payable on Feb. 2, 1990, to shareholders of record on Jan. 24, 1990. Total shares outstanding at Dec. 31, 1989, were 2,995,900. The corporation's equity to asset ratio at Dec. 31, 1989, was 9.75 percent.

Waltham Savings Bank, a wholly owned subsidiary of The Waltham Corporation offers a comprehensive line of business and personal banking services at four retail offices located in the Boston suburbs of Waltham, Weston and Sudbury.

#90026p0348 01/26/1990 ~PR Newswire

WASHINGTON (JAN. 26) PR NEWSWIRE - In cooperation with the U.S. Consumer Product Safety Commission (CPSC), E. Davis, Inc. of Piscataway, N.J.,

announced today that it is voluntarily recalling its Extra Thick Super String presently in the hands of consumers.

The product, an aerosol string streamer used similar to confetti at birthday parties and other gatherings, produced prior to October 1989, is hazardous if sprayed near an open flame, due to the flammability of the propellant used with the product. The reformulated Super String manufactured since October 1989 is not flammable.

Tests by the CPSC show the pre-October 1989 product is flammable and therefore is banned by definition because it is intended for use by children. Use of this product around flame sources such as birthday candles could result in serious burn injuries if the product spray contacts a flame. The CPSC learned of this problem through consumer complaints to its hotline. A follow-up investigation to one of these complaints found that a six-year-old child was burned when another child sprayed Super String which contacted the candles of his birthday cake. The commission is investigating other reported injuries.

The product is packaged in aerosol cans having various colored plastic overcaps, including orange, blue, pink and green. The cap indicates the color of the Super String inside the can. The cans have a blue background and are labeled in part "Extra Thick Super String -- Manufactured by E. Davis, Inc."

Approximately 3 million cans of the early formula flammable Super String were sold nationwide from December 1988 until October 1989 for less than $5 per can at retail.

While only the pre-October 1989 Super String is flammable, consumers should not use any Super String currently in their possession. Consumers should discard the can containing the product and mail the plastic over cap from the can to E. Davis, Inc., P.O. Box 8060, Piscataway, N.J. 08854-8060, for a free replacement with two cans of the current reformulated Super String. Consumers with questions may contact the firm toll-free at 1-800-356-7179.

To report an unsafe product or a product-related injury, consumers may call the U.S. Consumer Product Safety Commission's toll-free hotline at 1-800-638-2772. A teletypewriter for the hearing impaired is available at 1-800-638-8270; the Maryland TTY number is 1-800-492-8104/

#90026p0349 01/26/1990 ~PR Newswire

DALLAS/FORT WORTH, TX (JAN. 26) PR NEWSWIR - Delta Air Lines (NYSE: DAL) today announced that it will begin a $62 million expansion of its facilities at Dallas/Fort Worth International Airport.

The new facilities will include two additional gates and passenger amenities in Delta's Terminal 4E and additional parking areas, as well as expanded operational support areas. Construction is scheduled to begin later this year with completion of the first phase by early 1992.

A new support area will be constructed to the south of Terminal 4E. The site will house Delta's cargo facility, a cabin service area, a ground support equipment shop and a mail sortation facility. Adjacent to the site, Delta will construct an aircraft de-icing station which will provide very efficient de-icing of aircraft at a central point, supplementing the de-icing operation at the passenger terminal.

Two wide-body aircraft gates will be added in Terminal 4E in an area vacated as the cargo facility is relocated to the new terminal support building. Other new passenger areas will include a new 8,000-square-foot Crown Room, an expanded ticketing and baggage claim area, new concession areas and additional restrooms.

A DASH facility will be added at the lower level of Terminal 4E, offering "drive-up" convenience for Delta customers using its expedited small package service. Additional structured parking at 4E will add about 1,000 parking spaces, bringing Delta's total parking to almost 4,500 spaces.

Delta's construction also will include expansion of its operational facilities, including in-flight, flight operations and stations offices and support areas.

Delta's last expansion at DFW was completed in late 1988 when the airline opened a $30 million nine-gate expansion, increasing the size of its facilities by 30 percent. With a total of 31 gates today, Delta offers 240 flights to 62 nonstop destinations. The airline's enplanements at DFW in 1989 totalled 6,437,351 passengers, a 20 percent increase over 1988.

#90026p0351 01/26/1990 ~PR Newswire

PITTSBURGH (JAN. 26) PR NEWSWIRE - The board of directors of Allegheny International, Inc. (AI) (NYSE: AG), announced today that it has approved an agreement with Baroid Corporation (NYSE: BRC), Houston, to sell AI's interest in Titanium Metals Corporation of America (TMCA) to Baroid.

As previously announced, Baroid has agreed to pay a total of $50 million

to purchase AI's holdings of TMCA common stock and a related $3.25 million note payable by TMCA. AI said that additional cash consideration could become payable in the future if TMCA or Baroid enter into certain transactions relating to TMCA, such as a sale, liquidation or certain stock issuances, prior to Jan. 1, 1992.

AI's comon stock holdings currently represent approximatley 30 percent of TMCA's outstanding common stock assuming Baroid's exercise of its warrant to purchase additional TMCA stock. Baroid previously stated that, as part of the agreement, it will exercise its warrent prior to the closing of the transaction. As a result of the transaction, Bariod will own 100 percent of TMCA.

The transaction, which also has the approval of Baroid's board of directors, is subject to the approval of the U.S. Bankruptcy Court, Western District of Pennsylvania, where AI's Chapter 11 proceedings are under way. A hearing on the matter will be held by the court on Feb. 22, 1990. If the Bankruptcy Court approves the transaction, the closing will occur shortly after such approval is granted.

AI is a major manufacturer and marketer of consumer products, many of which are sold under the "Sunbeam" and "Oster" brand names. Baroid Corporation is a worldwide supplier of services and equipment for oil and gas well drilling, and titanium metals which are widely used in aerospace and industrial applications.

#90026p0353 01/26/1990 ~PR Newswire

SAGINAW, MI. (JAN. 26) PR NEWSWIRE - Wolohan Lumber Co. (NASDAQ: WLHN) announced today that its board of directors has adopted a Shareholder Rights Plan in which common stock purchase rights will be distributed as a dividend at the rate of one Right for each common share held as of the close of business on Feb. 15, 1990.

The Rights Plan is designed to deter coercive or unfair takeover tactics and to prevent an acquiror from gaining control of the company without offering a fair price to all of the company's stockholders. The Rights will expire on Feb. 15, 2000.

The Plan was not adopted in response to any effort to acquire control of the company and the board of directors has no knowledge of any such effort now being contemplated.

In a letter being sent to stockholders, James L. Wolohan, president and chief executive officer, said the Plan is intended to protect the

interests of Wolohan stockholders in the event the company is confronted with coercive or unfair takeover tactics. He noted that such tactics include "offers that do not treat all stockholders equally, the acquisition in the open market of shares constituting control without offering fair value to all stockholders, and other coercive or unfair takeover tactics that could impair the board's ability to represent your interests fully."

Mr. Wolohan stressed, however, that the Plan "is not intended to prevent an acquisition of the company on terms that are favorable and fair to all stockholders. The Plan is designed to deal with the very serious problem of unilateral actions by hostile acquirors which are calculated to deprive a company's board and its stockholders of their ability to determine the destiny of the company."

The initial exercise price of each Right has been set at $90. The Rights will be exercisable only if the person or group acquires beneficial ownership of 25 percent or more of the Wolohan common shares, commences a tender or exchange offer upon consummation of which such person or group would beneficially own 25 percent or more of the common shares, or if any person, alone or together with its affiliates and associates, has become the beneficial owner of at least 10 percent of the shares of common stock outstanding and the board of directors has determined that such person is an "Adverse Person" as defined under the Rights Plan.

If any person becomes the beneficial owner of 25 percent or more of the Wolohan common shares other than pursuant to an offer for all shares which is fair to and otherwise in the best interests of the company and its stockholders or if the board declares a person to be an Adverse Person, each Right not owned by such person or related parties will enable its holder to purchase, at the Right's current exercise price, common shares of Wolohan having a value of twice the Right's exercise price. In addition, if Wolohan is involved in a merger or other business combination transaction with another person in which its shares are changed or converted, or sells more than 50 percent of its assets to another person or persons, each Right that has not previously been exercised will entitle its holder to purchase, at the Right's then- current exercise price, common shares of such other person having a value of twice the Right's exercise price.

The company will generally be entitled to redeem the Rights at 1 cent per right at any time until the 10th business day following public announcement that a 25-percent position has been acquired. The company may not redeem the Rights if the board of directors has previously declared a person to be an Adverse Person.

Details of the Shareholder Rights Plan are outlined in a letter which will be mailed to all stockholders.

Wolohan Lumber Co. is a publicly held company operating 48 lumber and building material retail stores in Illinois, Indiana, Kentucky, Michigan, Ohio and Wisconsin.

#90026p0354 01/26/1990 ~PR Newswire

TULSA, OK (JAN. 26) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TCM) today announced that, while final year-end adjustments are not yet fully determined, it anticipates that its fourth quarter earnings will be lower than for the same quarter of 1988. 1988 fourth quarter earnings were $450,000 or 13 cents per share of common stock. Subject to final adjustment, the company stated that fourth quarter 1989 earnings were expected to be less than 3 cents per share. For the first three quarters of 1989, T/SF had reported earnings of $366,000 or 8 cents per share, as compared to $2,127,000 or 59 cents per share for the first three quarters of 1988.

The company noted that "cash flow" (meaning, for this purpose, earnings before interest, depreciation and taxes) is estimated to be approximately $9 million for 1989, compared to $8,500,000 for 1988.

The comany attributed the reduced fourth quarter earnings primarily to continued problems in its Shopper's Guide unit. Detailed information is not yet available, but both its commercial printing and shopper-newspaper divisions experienced problems. In commercial printing, preliminary information indicates that results were hurt by a variety of problems, including unexpected pricing changes from a large customer, scheduling problems and the necessity for substantially more subcontracting than anticipated, thus reducing margins. In the unit's shopper-newspapers, revenue expectations were largely met, but profits were reduced by unexpected changes in the mix of business, resulting in mailing and production costs being substantially higher, as a percentage of revenue, than anticipated.

In the company's other units, its daily newspaper and information services improved significantly in the fourth quarter and the full year 1989 as compared to the same periods for 1988, while its trade magazine operation was down slightly for the fourth quarter of 1989 as compared to 1988, resulting in lower earnings from that unit for all of 1989 as compared to 1988. The net effect of the changes in these other units was a modest increase in earnings. Thus, the reduction for the quarter and the year were attributable to the above described problems at Shopper's Guide, plus an approximately $200,000 increase in the fourth quarter for employee

medical expenses.

Partially in response to the problems at Shopper's Guide, T/SF announced that, effective Jan. 1, 1990, it has hired Edward C. Slingland as the new president of this unit. Slingland brings 21 years of experience in newspapers -- dailies, weeklies and shoppers -- and related businesses to the company, his last 12 years having been spent with Ingersoll Publications and its affiliated Community Newspapers. Prior to joining Shopper's Guide, Slingland had been president and CEO of Suburban Newspaper of Northern New Jersey, a group of weekly papers, both paid and free, with a combined weekly circulation of approximatley 880,000.

#90026p0355 01/26/1990 ~PR Newswire

WAYNE, PA. (JAN. 26) PR NEWSWIRE - 202 Data Systems (NASDAQ: TOOT) announced today that the board of directors has scheduled the annual meeting of shareholders for Wednesday, May 16, and the record date for those shareholders entitled to vote at such meeting will be Feb. 26.

Net income for the fiscal year ended Oct. 31, 1989, was $283,371 or $.08 per share, as compared to a loss of $1,182,213 or $.35 per share, for the previous year.

The loss in fiscal 1988 was primarily due to the implementation of a plan of liquidation. At the company's annual meeting of shareholders held on March 10, 1989, the shareholders approved a plan to take no further action to dissolve the company. Subsequent to that vote, the company proceeded to reinstate itself in business and to continue operations.

The following is a comparative audited summary of operations;

202 DATA SYSTEMS

Year ended Oct. 31	1989	1988 (liquidation basis)
Total revenues	$457,650	$1,546,211
Net income (loss)	283,371	(1,182,213)
Primary and fully diluted earnings (loss) per share	$.08	($.35)
Weighted average number of shares outstanding	3,368,443	3,368,443

WASHINGTON (JAN. 26) PR NEWSWIRE - Epstein Becker & Green (EB&G) described last year by the Washington Business Journal as "the leading health law firm in the country," is expanding its health care practice in a number of its regional offices to respond to the rapidly changing needs of its health care clients throughout the country.

The firm recently attracted national attention for its U.S. Court of Appeals for the Fourth Circuit victory in a landmark decision upholding the right of hospitals to merge their operations to reduce their costs and become more efficient.

Starting with two lawyers in 1973, Epstein Becker & Green, today has approximately 200 attorneys, with offices in New York; Washington; San Francisco; Los Angeles; Dallas; Stamford, Conn.; Detroit; Princeton, N.J.; Tallahassee, Fla.; and Alexandria, Va.; and with firm affiliates or correspondent offices in Hawaii, the Caribbean, Japan, Great Britain, France, Spain, West Germany, and Canada.

Daly D.E. Temchine, formerly senior trial attorney and deputy associate solicitor for special litigation in the Office of the Solicitor of Labor will head the Washington Litigation Department which will include general and commercial litigation with emphasis on fiduciary litigation under ERISA as well as health and labor litigation.

Rick J. Carlson has joined the firm's Washington office as a leading specialist in managed health care.

For over 20 years Carlson has been active in health policy and program development activities with an emphasis on disease prevention and health enhancement. He was one of the originators of the HMO concept while at Inter-Study in Minneapolis in the late 1960s and early 1970s and shortly thereafter authored The End of Medicine, a widely discussed and debated book published in 1975.

Most recently, before joining Epstein Becker & Green, he served as chief executive officer and president of PPP, Inc., the developer of Primary Prevention Program Centers in the United States, based on a model originally developed at the Pasteur Institute in Lille, France.

Also in the Washington office, Joel C. Mandelman has joined as a health specialist. Mandelman's practice will focus on the related areas of health law, antitrust, regulatory, EEO and legislative law.

CONTACT: George Sape, 212-351-4500; or Bill Helvestine, 415-398-3500, both of Epstein Becker & Green; or Timothy Bell of Timothy Bell & Company, 703-476-8060, or, after hours, 703-709-9449, for Epstein Becker & Green.

#90026p0358 01/26/1990 ~PR Newswire

WASHINGTON, N.C. (JAN. 26) PR NEWSWIRE - Reginald M. Fountain, Jr., president and chief executive officer of Fountain Powerboat Industries, Inc. (AMEX: FPI) announced that for the fourth quarter ended Oct. 1, 1989, sales were $4,846,000 compared with $5,334,000 for the comparable quarter in 1988. For the three months ended Oct. 1, 1989, the company sustained a loss of $245,000 as compared with $69,000 for the comparable period last year.

Fourth quarter 1989 includes year end adjustments for a provision for boat returns of $200,000 and reclassification of expenses associated with the accounting for fire damage expenses and the resale of returned boats from other income (expense) to cost of sales.

For the year ended Oct. 1, 1989, sales were $19,102,000, compared with $20,137,000 for the comparable period in 1988. For fiscal 1989, the company had net income of $130,000, or $.03 per share compared with net income of $426,000, or $.10 per share for the prior fiscal year.

In the opinion of the auditors, KPMG Peat Marwick, 100 percent financed floorplanned boats should not be recognized as sales, but should be deferred and recorded as consignment sales. If sales were reflected as such, sales and cost of sales would be decreased by approximately $3,610,000 and $2,580,000, respectively, and net income would be reduced by $832,000, or $.19 per share for the twelve month period ended Oct. 1, 1989.

Fountain said the company now has 36 dealers, up from 29 at this time last year. "We just completed one of our most successful boat show exhibitions. In New York alone 14 boats were ordered compared to just one boat order in New York last year. The exhibition on the west coast was also quite successful. To date, orders have been placed for approximately $1,500,000 worth of boats."

He further commented that significant production efficiencies have been instituted at the company's facilities in North Carolina. "We are now building at a rate of 7-1/2 boats per week with a production staff of 240 people. This compares most favorably with the prior 6-1/2 boats per week with 350 people," he said.

Fountain Powerboat Industries, Inc., through its wholly owned subsidiary Fountain Powerboats, Inc., designs, manufactures and markets high-performance deepwater sport boats and sport fishing boats noted for style, performance and quality construction.

WILLOW GROVE, PA. (JAN. 26) PR NEWSWIRE - C. Scott Kulicke, chairman of Kulicke and Soffa Industries Inc. (NASDAQ-NMS: KLIC), reported today that sales for the three months ended Dec. 31, 1989, were $23,053,000 with a net income of $1,472,000 or 19 cents per share, compared with sales of $26,661,000 and a profit of 35 cents per share one year ago.

The early retirement of outstanding debentures, at prices below face value contributed $665,000 to the current quarter profits.

Kulicke noted, "Unsettled conditions in the U.S. semiconductor market over the past six months were reflected in K&S's sales figures as compared with the same quarter last year. While such conditions are expected to prevail through the next several months, industry analysts are currently

forecasting improved conditions later in 1990."

Donald R. VanLuvanee, K&S president and chief operating officer, added, "During the quarter we further improved the company's financial position by reducing long-term debt approximately $3 million. In general, we continue to be pleased with our progress in Japan where our state-of-the-art wire bonders continue to win head-to-head customer evaluations over our competition."

Kulicke and Soffa Industries Inc. is a leading worldwide supplier of advanced assembly systems for the semiconductor and microelectronics industries. Traded on the Over-the-Counter National Market, the company's headquarters are located in Willow Grove.

#90026p0367 01/26/1990 ~PR Newswire

NEW YORK (JAN. 26) PR NEWSWIRE - CrossLand Savings, FSB (NYSE: CRL) and Coast-To-Coast Financial Corporation, a savings and loan holding company which is affiliated with the Pritzker family of Chicago and the Dworman interests of New York, announced that they had entered into a letter of intent, subject to the negotiation of a definitive written agreement, providing for a cash capital infusion into CrossLand of $150 million by Coast-To-Coast and a plan of recapitalization by CrossLand.

Coast-To-Coast, in exchange for its $150 million capital infusion, would own 85 percent of CrossLand common stock following consummation of the transaction. Under the recapitalization plan, CrossLand's common and preferred stockholders, in exchange for their shares, would own, following consummation of the transaction, in the aggregate, 15 percent of CrossLand common stock and 100 percent of a new series of non- cumulative perpetual preferred stock of CrossLand with an aggregate liquidation preference of

$225 million. The exchange ratios in the recapitalization have not yet been determined.

The proposed terms of the new non-cumulative perpetual preferred stock include an initial annual dividend rate (calculated on the basis of $225 million liquidation preference value) of 8.89 percent, increasing annually to 14.44 percent over a six-year period, and contain optional and mandatory call features. The call price would be equal to $200 million for the first 36 months, increasing to $225 million after 60 months, plus an amount equal to the aggregate earned and unpaid dividends from and after the date of issue. The optional call may occur at any time; the mandatory call would be triggered in the event that Coast-To-Coast ceases to own at least 50 percent of the outstanding common stock of CrossLand. Dividends on the non-cumulative perpetual preferred stock are only payable if earned after the date of the issuance of such stock. If CrossLand fails to pay the full amount of earned dividends when it is lawfully permissible to do so, then the holders of the non-cumulative perpetual preferred stock, as a penalty for such failure, shall be entitled to receive, for every $10 million of such earned but unpaid dividends, an aggregate number of shares of CrossLand's common stock equal to 1 percent of CrossLand's then- outstanding common stock on a fully diluted basis.

CrossLand and Coast-To-Coast have agreed, subject to Cost-To-Coast's due diligence, to negotiate and enter into a definitive agreement with respect to the proposed transaction on or before March 31, 1990. CrossLand has further agreed that under certain circumstances it will make a termination payment to Coast-To-Coast if the proposed transaction is not consummated.

The transaction will be conditioned upon, among other things, obtaining the approval of CrossLand's shareholders, obtaining all regulatory approvals, there being no material adverse change in CrossLand, there not being enacted or proposed any new materially burdensome laws or regulations applicable to CrossLand or Coast-To-Coast.

If the transaction contemplated by the letter of intent had been consummated as of Dec. 31, 1989, CrossLand said it believes that it would have met all of the regulatory capital ratios applicable to it.

NEW YORK (JAN. 26) PR NEWSWIRE - Infotechnology, Inc. (NASDAQ-NMS: ITCH) today announced that BTZ, Inc. has withdrawn and dismissed its legal action in Delaware Chancery Court against Infotech and several of its directors.

The BTZ action alleged that certain mergers and other business transactions completed by Infotech may have been unfair to the shareholders of the company. The voluntary withdrawal of the BTZ action followed the filing of a motion by Infotech requesting dismissal for lack of cause.

Infotechnology, Inc. is an integrated communications and information company that develops, distributes and markets economically useful information products and services to businesses and consumers. Infotech's lines of business include United Press International and Financial News Network. It also has substantial investments in the medical/scientific areas, which are operated independently of the information businesses.

WASHINGTON (JAN. 26) PR NEWSWIRE - The following was issued by the Air Line Pilots Association:

The USAir Master Executive Council (MEC) of the Air Line Pilots Association announced last night that it had ratified a new 36-month contract covering all USAir pilots, including those formerly employed by Piedmont Aviation, Inc.

The new agreement resolves significant issues in the areas of compensation work scheduling, and benefits, and establishes contract terms unifying both pilot groups.

"The merger process is never an easy one for employees, managements, or the travelling public," said Bob Hammarley, chairman of the MEC. "For USAir pilots, this contract signals the end of that process; now, we look forward to focusing our energies on building this nation's premier airline."

USAir pilots will receive pay raises totalling approximately 7 percent over the life of the contract. Full retroactivity will be paid to all pilots. In addition, the contract brings former Piedmont pilots to pay parity with their fellow USAir pilots effective October 1, 1989. The new agreement improves the two-tier wage structure by increasing the B-Scale rates in employment years two through five.

In the benefits area, the contract provides for all USAir pilots to secure a lump sum payment upon retirement, and establishes a company-subsidized 50 percent joint and survivor benefit. Further, all pilots will receive

the ALPA Loss of License Insurance Program with premiums paid for by USAir.

The agreement, which is amendable September 1, l991, also gives pilots greater flexibility in their work schedules while increasing scheduling efficiency for the company.

CHEVERLY, MD. (JAN. 26) PR NEWSWIRE - Three Roses Co., Inc. (OTC) announced today that it has entered into a contract to acquire all of the common stock of Transcolor, Inc. in a transaction valued at approximately $5.6 million.

Transcolor, Inc. is a textile printer located in Albany, Ga., with annual sales of approximately $3.3 million. Closing is scheduled for Feb. 1, 1990. Three Roses is a publicly held company which, immediately prior to this transaction, was inactive, had no operating assets or revenues and was 89 percent owned by Four D Acquisition Corp.

Three Roses will acquire Transcolor, Inc., a Four D Acquisition Corp. subsidiary, for a price equal to the carrying value of Four D Acquisition Corp.'s investment in Transcolor, Inc. The purchase price will be paid by issuing secured notes totaling approximately $4.5 million and issuing additional common stock valued at $1.1 million. As a result of the issuance of additional shares, Four D Acquisition Corp. will own 97 percent of Three Roses' outstanding common stock.

Three Roses intends to purchase other companies in the textile printing industry, and such acquisitions may include another operating subsidiary of Four D Acquisition Corp.

Three Roses also announced today that it has changed its name to Transcolor Corp. Transcolor, Inc. will operate as a wholly owned subsidiary of Transcolor Corp.

OIL CITY, PA (JAN. 26) PR NEWSWIRE - The board of directors of Quaker State Corporation (NYSE: KSF) has announced senior management changes and approved a corporate restructuring to create a separate subsidiary to manage the manufacturing and sale of its branded motor oil and other automotive care products.

The new unit will assume the historic name of the corporation, Quaker State Oil Refining Corporation.

Management changes approved by the board, effective Feb. 1, are: Jack W. Corn is named vice chairman and chief executive officer of Quaker State Corporation.

Conrad A. Conrad is named president and chief operating officer of Quaker State Corporation. He was formerly vice president, finance and chief financial officer.

Homer M. Ellenburg is named president and chief operating officer of the new subsidiary, Quaker State Oil Refining Corporation. He was formerly vice president, sales, marketing and distribution of Quaker State Corporation.

Other new assignments were made by the board of directors: R. Scott Keefer

was named vice president, finance and treasurer and chief financial officer of Quaker State Corporation. He was formerly vice president, treasurer.

Walter B. Cook was named executive vice president, Quaker State Oil Refining Corporation. He is responsible for marketing, including international sales and marketing. Quaker State's Canadian subsidiary will continue to report to Cook. He remains a director and executive vice president of Quaker State Corporation.

William C. Helsley was named executive vice president, operations for Quaker State Oil Refining Corporation. He remains a vice president of Quaker State Corporation.

Corn said, "With the new organization, Quaker State Corporation will consist of a close-knit corporate staff, which can concentrate on maximizing the profitability of all subsidiaries. For our motor oil and other branded products, it establishes a clearly defined organization with responsibility and authority to manage the business as a separate enterprise."

Conrad A. Conrad, 43, joined Quaker State in 1974 as assistant manager for internal audit. He was named assistant controller, accounting in 1977, controller in 1982, vice president, finance and chief financial officer in 1985, and director in December 1987. Prior to joining Quaker State he was employed in Washington, D.C., by Price Waterhouse & Co. Conrad is a native of Oil City. He is a graduate of the College of William and Mary and served in the U.S. Army Finance Corps.

Homer M. Ellenburg, 46, joined Quaker State in Atlanta in 1974 as vice president of Corn Brothers when that motor oil distributor was acquired by Quaker State as a wholly owned subsidiary. He was named president of that unit in 1981. In 1987 Corn Brothers was reorganized as Quaker State's Southeast Sales Region and Ellenburg became regional sales manager. In 1988, he transferred to Oil City as director of sales; was named vice president, distribution in April 1988; and vice president, sales, marketing, and distribution in May 1989.

R. Scott Keefer, 42, joined Quaker State in 1975 as assistant tax manager. He was named assistant controller, tax and energy controls in 1977; assistant controller, director of government affairs in 1980; treasurer in 1982, and vice president, treasurer in 1985. Prior to joining Quaker State, Keefer worked in Pittsburgh for Price Waterhouse & Co. Keefer is a graduate of Clarion University of Pennsylvania and served in the U.S. Air Force.

William C. Helsley, 53, joined Quaker State in 1968 as maintenance superintendent of the McKean Refinery, Farmers Valley, Pa. He was named

assistant refinery manager in 1972 and assistant to the senior vice president, refining in 1974. The next year, he transferred to Oil City as vice president, refining and was named vice president, manufacturing in 1986. Prior to joining Quaker State, Helsley was employed by Gulf Research and Development Corp. and at the Gulf Oil Co. Refinery in Philadelphia. Helsley is a graduate of the University of Pittsburgh.

Walter B. Cook, 59, joined Quaker State in 1956 as a sales representative in South Carolina. He held a variety of sales, marketing, and management positions in the Southeast and Midwest before being named vice president, sales in 1973.

In 1975 he was named vice president, marketing, and appointed a director of Quaker State, and in 1977 he became executive vice president for marketing, manufacturing, and research. Most recently, Cook has overseen the company's research and development, employee relations, and international sales. Cook is a graduate of Furman University.

NEW YORK (JAN. 26) PR NEWSWIRE - Freda S. Johnson (formerly Freda S. Ackerman) resigned today as executive vice president and director of the public finance department of Moody's Investors Service, the nationally recognized credit rating agency and subsidiary of the Dun & Bradstreet Corporation. Johnson has been head of Moody's public finance department for the past 11 years, a period of vast change in the public finance industry and the tax-exempt market.

Johnson has been active in industry matters, having most recently served on the Anthony Commission for Public Finance, established to recommend changes to the 1986 Tax Reform Act. In 1985-1986, she was president of the Municipal Forum of New York. In addition, she has frequently testified before Congress and other legislative and administrative bodies on issues affecting the industry and has been the author of articles on subjects related to public finance.

Johnson plans to be an independent consultant. She intends to work both in the public finance arena as well as do general management consulting. She will, in addition to other projects, consult for Moody's on a part-time basis.

#90026p0381 01/26/1990 ~PR Newswire

ST. LOUIS (JAN. 26) PR NEWSWIRE - Monsanto Company's (NYSE: MTC) board of directors today declared a dividend of one preferred stock purchase right on each outstanding share of Monsanto common stock. In connection with this distribution, the board also authorized the redemption of the company's existing common stock purchase rights, which were issued in Feb. 1986.

Each new right will entitle shareholders to buy one one-hundredth of a share of a new series of preferred stock at an exercise price of $450. Each one one-hundredth of a share of the new preferred stock has terms designed to make it substantially the economic equivalent of one share of common stock. The rights will be exercisable only if a person or group acquires 20 percent or more of Monsanto common stock or announces a tender offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the common stock. Monsanto will be entitled to redeem the new rights at one cent per right at any time before a 20 percent position has been acquired.

If Monsanto is acquired in a merger of other business combination transaction while the rights are outstanding, each new right will entitle its holder to purchase, at the right's then-current exercise price, the number of the acquiring company's common shares having a market value at that time of twice the right's exercise price.

In addition, if a person or group acquires 20 percent or more of Monsanto's outstanding common stock, each new right will entitle its holder (other than such acquiring person or members of such group) to purchase, at the right's then current exercise price, the number of shares of Monsanto common stock having a market value at that time of twice the right's exercise price.

Furthermore, at any time after a person or group acquires 20 percent or more (but less than 50 percent) of Monsanto's outstanding common stock, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring person or group) for shares of Monsanto common stock on a one-for-one basis.

The board of directors is also authorized to reduce the 20 percent thresholds referred to above to not less than 10 percent.

Monsanto Chairman and Chief Executive Officer Richard J. Mahoney said: "There have been many developments since the adoption of Monsanto's original rights plan, including a substantial increase in the price of Monsanto common stock. Accordingly, the board has adopted a new rights plan. The new rights meet the board's desire to provide additional protection against abusive takeover tactics such as partial tender offers

and open market accumulations. The new rights are intended to assure that share-holders receive fair and equal treatment when efforts are made to gain control of the company without paying all shareholders a control premium."

Rights holders of record as of the close of business on Feb. 5, 1990, will receive a five-cent redemption payment for each right which is attached to each outstanding share of Monsanto common stock. The new rights will be distributed to shareholders of record at the close of business on the same date. The new rights will expire ten years later on Feb. 5, 2000.

Monsanto Company makes and markets high-value chemical and agricultural products, pharmaceuticals, low-calorie sweeteners, industrial process equipment, man-made fibers, plastics and other performance materials.

WASHINGTON (JAN. 26) PR NEWSWIRE - Robert C. Carlson is joining the corporate advertising staff in the newspaper division of Gannett Co., Inc. (NYSE: GCI), it was announced today.

Carlson, who previously was advertising director of Florida Today in Brevard County, will become a director of advertising sales development.

"Bob brought great creativity, innovation and problem-solving to Florida Today," said Gary F. Sherlock, executive vice president of newspaper advertising. "It seems only appropriate that we ask Bob to share his expertise and background with other newspapers across the group."

Two weeks ago, Carlson was named the newspaper division's outstanding advertising executive for the second consecutive year.

Carlson, 51, joined Gannett in 1981 as advertising director of the Idaho Statesman in Boise. In 1984, he assumed a similar position at the Olympian in Washington state. He joined Florida Today in 1986. He is a native of Everett, Wash.

Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA Today, 35 non-daily newspapers and USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 40 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

SPARROWS POINT, MD (JAN. 26) PR NEWSWIRE - The Sparrows Point plant of Bethlehem Steel Corp. (NYSE: BS) and District 8 of the United Steelworkers of America (USWA) jointly announced that the company and union signed an agreement today that resolves liability issues relating to longstanding contracting-out disputes on the basis of an estimated $7.5 million payment to affected bargaining unit employees, mainly in maintenance and service positions.

Both parties expressed a belief that the successful resolution of remaining contracting-out issues will allow the plant and its employees to perform at a high level of competitiveness within the steel industry.

The agreement was reached in accordance with resolution of several hundred contracting-out issues and numerous other disputed items that arose under the 1986 labor contract between the USWA and Bethlehem Steel. Discussions on the retrieval of contracted-out work are under way and are expected to be completed by mid-March 1990.

The payment is to be made to the affected employees in the second quarter of 1990.

TOMS RIVER, NJ (JAN. 26) PR NEWSWIRE - Statewide Bancorp (NASDAQ-NMS: STWB) today reported earnings of $9.296 million for the year ended Dec. 31 1989, as compared with $20.806 million for 1988, a decrease of 55.3 percent.

Earnings per share for the year are $.86 both primary and fully diluted. For the fourth quarter, earnings decreased from 1988's $5.320 million to a loss of $3.900 million, a decrease of 173.3 percent. The decline in earnings from 1988 levels reflects the additions to the allowance for loan losses and interest income reversals previously announced by the corporation. Management has taken what it said it believes are prudent steps regarding the adequacy of the loan loss allowance. Such reserves are monitored very closely to determine their adequacy on a continuing basis in light of any potential loan losses and the current economic climate of the market area served by the bank.

Statewide Bancorp's capital-to-asset ratio continued its strong position with 8.91 percent reported for 1989 compared to 8.17 percent at Dec. 31, 1988. This far exceeds the minimum capital requirements set by the federal banking agencies and serves as a strong base for fulfilling present demands and offers Statewide the ability to maintain the expansion pattern that remains an enduring part of Statewide's strategy and success.

WICHITA, KS (JAN. 26) PR NEWSWIRE - The new Boeing 747-200 to be delivered later this year as "Air Force One" today marked its first flight here, piloted by Boeing test pilot Paul Bennett and Air Force Major Ray Johns. The Wichita Branch of Boeing Military Airplanes is working under a $262 million Air Force contract to provide two new presidential carriers, known in the Air Force fleet as VC-25A aircraft.

Full scale flight tests will now begin in preparation for a Sept. 30 delivery. The flight test program will be accomplished in two phases. For the initial phase, the aircraft will be equipped with instrumentation to measure performance during flight. The second phase will be conducted after the instrumentation has been removed and will involve testing aerial refueling and similar systems. These tests will be conducted with tanker aircraft making fuel transfers to prove the systems. In addition, just prior to delivery the aircraft will be flown to Everett, Wash., where it will be painted in the scheme of Air Force One.

The new Air Force One presidential carrier rolled out of the hangar here in September 1989, and ground tests were conducted for several months prior to today's first flight.

Among those checks was the cabin proof pressure test, where the aircraft was pressurized to establish a differential pressure of about 1.4 times the normal operating pressure at cruising altitude. More than 300 strain guages were used to measure the stress on the structure of the airframe.

System functional testing of the airplane's mission communications system (MCS) was also completed on the ground. Integration tests that assure the MCS interfaces properly with other aircraft systems preceded the functional tests. The MCS manages communcations that include the 85 on-board telephones, as well as computers and radios. It is operated by an Air Force staff of three communications specialists.

Aerial refueling ground tests, electromagnetic compatibility (EMC) tests, environmental control systems (ECS), and many other functional and qualification/certification ground tests supported the clearance for first flight. During EMC testing, the electrical components on the airplane were turned on and off and checked to assure there is no interference between components.

Testing is carried out under the direction of a combined Boeing-Air Force-Federal Aviation Administration (FAA) test team. The Air Force is

represented by members of the 4950th Test Wing, based at Aeronautical Systems Division, Wright-Patterson Air Force Base in Dayton, Ohio; and by the 89th Military Airlift Wing at Andrews Air Force Base, which is responsible for flying and maintaining Air Force One.

While tests on the first Air Force One Boeing 747 continue, work on the second airplane is progressing well. Large cutouts on the forward and aft lower lobe--and associated structural modifications needed for the air stairs--have been completed. Electrical wiring installation is continuing and structural support modifications for the many interior features--such as galleys, lavatories and partitions--are continuing. Furniture deliveries have also begun. Delivery of the second airplane is set for June 30, 1991.

The basic airframe for the new Air Force One was built by Boeing Commercial Airplanes in Everett, and delivered here for extensive modification. Boeing's Wichita facilities have a long history of military and commercial modification work. Current programs include re-engining the KC-135R tanker and passenger-to-cargo conversions. Wichita is also building a new composite replacement wing for the Navy's A-6 carrier-based attack airplane.

The term "Air Force One" is actually the radio call sign used when an airplane is carrying the president, although the airplane itself is commonly referrred to as Air Force One.

#90026p0414 01/26/1990 ~PR Newswire

SAN MATEO, CA (JAN. 26) PR NEWSWIRE - Airlease Ltd., A California Limited Partnership (NYSE: FLY), said today that its net income for 1989 declined 10 percent from 1988, reflecting a decrease in gains on sales of aircraft. However, the NYSE-listed commercial aircraft lessor's fourth-quarter net income rose 31 percent, aided by the sale of one aircraft in December.

Full-year net income totaled $9.3 million, or $1.99 per limited partnership unit, compared with $10.4 million, or $2.22 per limited partnership unit in 1988. Fourth quarter net income amounted to $2.7 million, or 59 cents per limited partnership unit, compared to $2.1 million or 45 cents per limited partnership unit in 1988.

Total revenues declined approximately 4 percent for the year, to $18.0 million from 1988's $18.7 million, while operating revenues from leased aircraft increased 4 percent to $17.5 million from 1988's $16.8 million. Fourth-quarter revenues were up 10 percent, to $4.9 million from $4.4 million in 1988, reflecting the December 1989 aircraft sale which produced

a gain of $563,000.

In 1988, there was a sale in each of the first and third quarters resulting in a total gain of $1.8 million. The partnership said that distributions paid to unitholders in 1989 increased 5 percent to $2.40 from $2.29. Distributions are based on cash flow from operations.

The first 1990 distribution, unchanged at 60 cents per unit, will be paid Feb. 15 to unitholders of record on Dec. 29, 1989.

Proceeds from the 1989 aircraft sale were used to reduce long-term debt. Such borrowings totaled $33.7 million at year-end, compared with $44.5 million at Dec. 31, 1988.

The partnership's current portfolio includes investments in 16 aircraft operated by five U.S. airlines.

NEW YORK (JAN. 26) PR NEWSWIRE - Clemente Global Growth Fund, Inc. (NYSE: CLM) announced that Federal District Judge John F. Keenan has denied the motion of Grace Global Acquisition Partners to vacate the preliminary injunction blocking their tender offer for the fund's shares.

Lilia Clemente, chairman of the fund, declared "the judge's latest decision again confirms our position that the tender offer is illegal under the federal securities laws. We are pleased with this outcome and the fact that fewer and fewer of our shareholders see any reason whatsoever to support the tender offer." The fund intends to pursue the litigation and remains confident that a permanent injunction against the tender offer will ultimately be granted.

For the year ended Dec. 31, 1989, the fund's net asset value increased by 36.2 percent against an increase of 19.2 percent in the fund's benchmark index. As of Jan. 25, 1990, the fund's net asset value was $11.47. The fund's board of directors at its regular quarterly meeting on Jan. 24, 1990, expressed its firm support for fund management and noted the outstanding performance of the fund during 1989.

Clemente Global Growth Fund, Inc., a closed-end fund, seeks long- term

capital appreciation through investment in equity securities of small and medium-sized companies located throughout the world. The fund's orientation is global and its investment targets are emerging companies and emerging markets.

BUFFALO, N.Y. (JAN. 26) PR NEWSWIRE - Manufacturers and Traders Trust Company (M&T Bank) today announced that it has entered into an agreement with the Federal Deposit Insurance Corporation to assume the deposit liabilities of Monroe Savings Bank, FSB. M&T Bank also acquired selected assets of Monroe, principally those located in New York. The FDIC was appointed receiver of Monroe after the financial institution was declared insolvent at 4 p.m. today by the Office of Thrift Supervision.

Robert G. Wilmers, chairman and chief executive officer of M&T Bank stated "We are very pleased to become a member of the Rochester community through the addition of Monroe Savings to our banking network. M&T Bank is well known as an involved and committed member of the communities we serve a reputation we've worked hard to achieve and of which we are proud. Now, as M&T Bank, Monroe Division, we bring our financial strength, our commitment and our full array of banking services and expertise to serve Rochester."

Wilmers continued, "We would like to assure those who have been customers of Monroe Savings that our offices with regularly scheduled Saturday hours will be open for business as usual, and on Monday, all 11 branches will be open and ready to help provide them with our financial services.

"We hope the Rochester community will welcome us as a neighbor and as a local financial institution they can count on for years to come," Wilmers concluded.

The addition of the 11 banking offices acquired from Monroe increases M&T's total banking offices to 71. M&T is the principal commercial bank subsidiary of First Empire State Corporation (AMEX: FES), a $6.6 billion bank holding company based in Buffalo, N.Y.

NEW HAVEN, CT. (JAN. 26) PR NEWSWIRE - Cognitive Systems, Inc. (NASDAQ: CSAI) disclosed today that the net income for its third fiscal quarter ended Aug. 31, 1989, was overstated by approximately $140,000 due to additional costs incurred during the third fiscal quarter relating to certain subcontractors.

After recognition of such costs, the company had an operating loss of approximately $120,000 in the third quarter of fiscal year 1989, instead of an operating profit of $20,000 as previously reported, and the company's operating loss for the first nine months of fiscal 1989 was approximately $338,000 instead of $198,000 as previously reported. The company's net income for the third quarter and first nine months of fiscal 1989, was approximately $310,000 instead of $450,000, and approximately $87,000 instead of $227,000, respectively. The company intends to restate its third quarter results.

CHICAGO (JAN. 26) PR NEWSWIRE - Telephone and Data Systems (AMEX: TDS) Chairman LeRoy T. Carlson and Clarence Prestwood, division president of Contel of Virginia (Va.), Inc., jointly announced the sale of the Contel New Castle and Paint Bank exchanges to TDS.

New Castle and Paint Bank exchanges are two exchanges totaling approximately 1,700 access lines located in southwest Virginia near Roanoke. TDS plans to incorporate these two exchanges into one company and call the new firm New Castle Telephone Company. The company will be an operating telco with a local business office and field personnel.

Regarding the purchase of the New Castle property, Carlson said, "Virginia has always been, and continues to be a leader in the development of new communications technologies. We are proud to be able to strengthen our customer base in that great state." The acquisition is subject to various state and federal regulatory approvals.

TDS currently owns and operates the Amelia Telephone Company, located in Amelia, Va., which serves more than 3,200 customers.

TDS is a diversified communications company that serves approximately 264,000 access lines with 82 telephone companies located in 27 states. It also has substantial cellular telephone and radio paging operations.

#90026p0431 01/26/1990 ~PR Newswire
TALLAHASSE, FL (JAN. 26) PR NEWSWIRE - State Comptroller Gerald Lewis today closed Creditbank, of Coral Gables, Fla., due to insolvency.

The Federal Deposit Insurance Corp. was appointed receiver by Lewis to operate the institution until a buyer is found.

No interruption of service is expected to occur as a result of today's action, and all deposits remain fully insured.

"No depositor will lose anything as a result of this action," Lewis said. "In fact, depositors won't experience any impact. It will be business as usual at the bank."

Creditbank, which opened for business in 1964 as Caribbean State Bank, is headquartered on LeJeune Road in Coral Gables and operates three branches in Cutler Ridge, Miami and Hialeah.

Its failure was caused by poor management and unsound lending practices, banking regulators said. Officials ordered the institution to take steps to improve its condition in both March 1987 and August 1989, but the bank was unable to turn its operation around.

As of Jan. 23, the bank had assets of $54.2 million -- roughly $1.1 million less than its liabilities.

LITTLETON, CO. (JAN. 26) PR NEWSWIRE - Bingo King Co. Inc. (NASDAQ: BNGO) reported today that Edward G. Bradley tendered his resignation to the board of directors as president and chief operating officer of Bingo King, effective Feb. 15, 1990.

Bradley will remain a member of Bingo King's board of directors, a position he has held since February 1987. No interruptions in Bingo King's operations are expected while a search for his replacement is undertaken.

Bingo King manufactures and distributes a complete line of Bingo cards, equipment, supplies and accessories. Its products are sold primarily to distributors, who resell them to fraternal, charitable, religious and

social organizations, lodges, hospitals, nursing homes, PTA groups, military clubs and other similar organizations, primarily non-profit, which use such products to raise money and provide entertainment. Bingo King's products are also sold directly to user organizations by means of mail order catalogs and its own retail operations.

PENNSAUKEN, N.J. (JAN. 26) PR NEWSWIRE - MEDIQ Inc. (AMEX: MED) and NutraMax Products Inc. (OTC) announced today that they have entered into a definitive Agreement and Plan of Merger to combine the business of Aid-Pack Inc., a wholly owned subsidiary of MEDIQ, and NutraMax.

As previously announced, MEDIQ will own a majority interest in the combined companies, and the NutraMax shareholders will own the remaining interest. Consummation of the transaction is subject to certain contingencies described in the Agreement and Plan of Merger.

Aid-Pack, based in Gloucester, Mass., manufactures and distributes feminine hygiene and personal care products. For the fiscal year ended Sept. 30, 1989, Aid-Pack sales were $13,100,000 compared to $11,400,000 for the fiscal year ended Sept. 30, 1988. NutraMax is a development stage company, engaged in the distribution and marketing of health and beauty-aid products which are distributed to drug, food and mass retail outlets throughout the United States and Japan.

MEDIQ Inc., whose shares (MED and MED.Pr) and debentures (MED.C) are traded on the American Stock Exchange, provides products and services to hospitals, nursing homes, healthcare professionals and consumers through its subsidiaries. MEDIQ's businesses include diagnostic imaging and testing; maintenance of diagnostic equipment, pharmaceutical packaging; manufacture and distribution of personal care products; hospital and healthcare management and consulting; equipment rental; healthcare facility planning, design and project management; management and ownership of psychiattric units; the manufacture and distribution of eyeglass frames and financial services.

PITTSBURGH (JAN. 26) PR NEWSWIRE - Cimflex Teknowledge Corp. (NASDAQ-NMS: CMTK) announced today that it expects a cost over-run on a major project

being completed by its Automated Factories Division.

This division provides flexible assembly systems for electronics and light assembly.

Company officials now expect this project to over-run its original budgeted amount by up to $2 million. The over-run is the result of a number of factors, including a one to two month delay in project completion, and higher than anticipated development and vendor material costs. Portions of the system have already been shipped to the customer, and all remaining sections are expected to ship during 1990. This over-run will adversely affect operating results from continuing operations for the fourth quarter of 1989 that ended Dec. 31, 1989.

A company spokesman said, "While this cost over-run at the Automated Factories Division is both unexpected and unpleasant, we remain optimistic that we will continue to show progress in 1990."

Cimflex Teknowledge also decided to increase its reserve for discontinued operations in the fourth quarter of 1989. This increase of approximately $1 million is due to excess facility expenses and remaining inventory related to the pedestal robots and vision systems businesses that the company discontinued in the third quarter of 1988.

Cimflex Teknowledge Corp. is a leading provider of software products and systems for factory management and control.

SEATTLE (JAN. 25) PR NEWSWIRE - Long before an airline takes delivery of its first 747-400, Boeing Commercial Airplanes has a small army of men and women helping the customer get its new planes into commercial service as smoothly as possible, the company said today.

During the three decades that Boeing has been making jetliners, the company has learned that easing a new aircraft into service and then sustaining efficient and profitable commercial operations sometimes calls for extra assistance.

With the new 747-400, the effort begins several months before delivery of a customer's first plane. Boeing Customer Services offers 747-400 operators a service called "introductory assistance." The program features the services of hand-picked Boeing personnel experienced in virtually all aspects of the -400 airplane. These Boeing experts

literally move in with airlines requesting temporary support until they are confident of their own ability to deal with all eventualities.

Three months before delivery, Boeing working groups visit customer airlines to explain the -400's unique service and handling characteristics and to offer whatever other assistance the customer might require.

Then, approximately 30-60 days before the airline takes delivery of the new airplane, an introduction team of 747-400 engineers lead airline personnel through potential problem areas that could crop up in maintenance, ground handling, flight operations and even publications manuals.

But it doesn't end there. When the airline actually takes delivery and begins commercial service of the new 747-400, the airplane is monitored on its departure and met on its return by a Boeing representative stationed at its main base as well as scheduled line stations.

Additionally, anywhere the airplane flies, it may be met by representatives of the 29-member, Boeing "meet-and-greet" team who offer advice, assist operator line personnel in turning the airplane around, troubleshoot and provide technical support during the "breaking-in" period.

If necessary, after meeting the airplane, an advisor will even ride to the next stop or line station.

The customer decides when assistance is no longer necessary -- usually after three months.

When that happens, the Boeing delivery assistance team heads back to Seattle to assist another new customer of the latest version of the famed 747.

PITTSBURGH, JA. 26 (PR NEWSWIRE - The following letter was transmitted to Jon M. Huntsman today in response to his letter of Jan. 25, 1990, to the Special Committee of the Aristech (NYSE: ARS) Board Committee:

Mr. Jon M. Huntsman Chairman of the Board Huntsman Holdings Corp. 1975 Eagle Gate Tower Salt Lake City, Utah 84111 Dear Mr. Huntsman: Thank you for your letter dated January 25, which we received this morning. The Special Committee (the "Committee") of the Board of Directors of Aristech Chemical Corporation ("Aristech") met this afternoon to review the current situation. The Committee was pleased to learn that Huntsman Holdings

Corporation ("HHC") and GE Plastics may be able to make an offer for Aristech at a price above $26 per share.

The Committee was somewhat surprised, however, by your request for an exhaustion of the deadline of 5:00 p.m., since the January 29 deadline was selected precisely to accommodate your schedule by affording you the "week to ten days" suggested by your January 19 letter to us.

After consideration, the Committee has determined not to extend the January 29 deadline at this time, because of the fact that, as your know, the proposal being made by management and Mitsubishi expires by its terms on January 30, 1990. Following our review of proposals received by that deadline, depending on the terms and conditions of such proposals, the Committee may either accept a proposal or continue to solicit additional proposals.

In its review, the Committee will take into account any proposal from you and GE Plastics. The Committee urges each bidder to submit its best price by the deadline and to make the most detailed and specific proposal that it can practicably make. Each proposal should describe the contemplated offer price, the terms and conditions of the offer, and the expected financing of the offer. The Committee believes that you would be well advised to make a proposal more specific than the one contained in your January 25 letter. If you do not, your most recent proposal will receive the Committee's full consideration.

The Committee believes that HHC should promptly commence, and fully utilize its available resources to pursue, its due diligence review. Aristech's officers and employees have been instructed to cooperate in your due diligence effort, and we are overseeing their compliance with these instructions. If at any time you believe that our instructions are not being complied with, you should inform the Committee's counsel, and the Committee will see to it that you receive such cooperation.

Very truly yours, /s/ R.S. Evans cc: Mr. Glen H. Hiner
Mr. Thomas Marshall
Mr. Hajime Koga

#90026p0465 01/26/1990 ~PR Newswire
TOKYO, (JAN. 26) PR NEWSWIRE - The following was released today from JAS in Tokyo:

Japan Air System, Japan's third largest airline, said it has decided to order eight Boeing 747-400 jumbo jets, as well as 10 MD90-30 aircraft designed by McDonnell Douglas Corp. (NYSE: MD).

In line with JAS's plans to begin international operations, the company will purchase the eight jumbo jets from Boeing Co. for a total of 200 billion yen ($1.38 billion), a JAS company spokesman said.

Delivery of two planes a year is scheduled from Boeing between 1996 and 1999. The formal contract will be signed on Jan 31.

In addition, the company will lease another Boeing 747-400 jumbo jet beginning in 1995.

Currently, JAS is undertaking a formal study of which engine it should use for its new jumbo jets, he said.

Last year, All Nippon Airways Co., Japan's second largest airline, announced orders for 20 new Boeing 747-400 jumbo jets at a cost of $3.15 billion.

JAS will also place a 57-billion-yen ($391 million) order to purchase 10 MD90-30 airplanes from McDonnell Douglas, the spokesman said.

In order to reduce noise pollution around airports, the aircraft will be equipped with the V-2500 engine, which is said to be quieter than any engine in its class.

The V-2500 was developed by International Aero Engines, an international consortium in which Japanese heavy machinery makers, including Ishikawajima Harima Heavy Industries Co, Kawasaki Heavy Industries Ltd., and Mitsubishi Heavy Industries Ltd., hold a combined state of 23 percent.

The remainder of the equity is owned 30 percent by United Technologies Corp.'s Pratt and Whitney unit, 30 percent by the U.K.'s Rolls-Royce Ltd., 11 percent by MTU Moteren-Und Turbinen-Union Munchen GMBH of West Germany and 6 percent by Fiat Aviazione, a unit of Fiat Spa of Italy.

JAS now has a fleet of 73 aircraft, including two DC-10s, 14 A-300s, nine MD-81s, eight DC9-81s, two MD-87s, 13 DC9-41s, and 25 YS115.

#90026p0467 01/26/1990 ~PR Newswire

DALLAS,(JAN. 26) PR NEWSWIRE - BancTEXAS Group Inc. ("BTX") (NYSE: BTX) issued the following statement regarding the actions taken by the Federal Deposit Insurance Corporation ("FDIC") today:

BTX also announced that the Board of Governors of the Federal Reserve System on Jan. 25 instituted an administrative proceeding in which it

seeks an order requiring BTX to use "all available resources" to make immediate capital injections into BancTEXAS Houston and BancTEXAS McKinney. On the same date, the Federal Reserve issued a temporary order requiring BTX to infuse capital into such banks. BTX has not yet had the opportunity to review and respond to these actions.

In addition, BTX released its 1989 results which do not reflect the effects of the aforementioned action. BTX reported a net loss of $19 million, or $1.13 per share, for the fourth quarter of 1989. This compares with a net loss of $7 million, or 41 cents per share for the fourth quarter of 1988. For the year ended Dec. 31, 1989, the net loss was $44 million, or $2.59 per share, compared to $30 million, or $1.76 per share, for 1988. Effective in the fourth quarter of 1989, BancTEXAS Dallas wrote down its condominium interest in the Thanksgiving Tower building to its current appraised value. This action resulted from the ongoing efforts to reduce overhead and administrative costs and the fact that a determination had been made to market the property for sale, rather than to continue its status as banking premises. This resulted in a $9.2 million one-time expense that is included in the fourth quarter and year-to-date net loss for 1989.

At Dec. 31, 1989, nonperforming assets were $51 million, or 12 percent of loans and foreclosed property, down from $78 million, or 15 percent, at Dec. 31, 1988. The allowance for loan losses at Dec. 31, 1989 was $23 million, or 6 percent of loans, compared to $36 million, or 7 percent, at Dec. 31, 1988. Net loan charge-offs for 1989 were $15 million, compared to $38 million for 1988. Provision for loan losses was $2.2 million for 1989 compared to $6.8 million for 1988.

BTX's consolidated primary capital ratio was 1.76 percent at Dec. 31, 1989 compared to 8 percent at Dec. 31, 1988. At Dec. 31, 1989, the primary capital ratios of the subsidiary banks were 5.06 percent for BancTEXAS Houston, 4.20 percent for BancTEXAS McKinney, and a negative 5.46 percent for BancTEXAS Dallas. The equity capital ratios of these banks at Dec. 31, 1989, were 3.82 percent for BancTEXAS Houston, 2.41 percent for BancTEXAS McKinney, and a negative 10.60 percent for BancTEXAS Dallas.

CONTACT: Daniel S. Pigott, senior vice president and chief financial officer, 214-969-6502, or Jim Miller, 214-969-6441, both of BancTEXAS Group Inc.

BOSTON, MA (JAN. 26) PR NEWSWIRE - Bank of New England Corp. (NYSE: NEB) today reported that at the request of the board of directors, Walter J. Connolly, Jr., has retired as chairman and chief executive officer, effective immediately.

The board announced that it is conducting an active search for a new chairman and CEO.

The board has appointed H. Ridgely Bullock, a member of the board of directors, as chairman and chief executive officer until a new chairman and CEO is selected, and has established a management committee composed of Gordon I. Ulmer, president, David B. Payne, executive vice president and chief financial officer, and Arthur H. Meehan, executive vice president and corporate treasury division head, to coordinate Bank of New England's strategic efforts to improve capital ratios, increase equity capital and strengthen the financial resources of its subsidiary banks. Bullock and the management committee will work closely with the executive committee of the board of directors.

Bullock is president and CEO of Montchanin Management Corp., an investment and management company headquartered in New York. He is former chairman and CEO of UniDynamics Corp. of Stamford, Conn.

Bank of New England's $6 billion asset disposition program is proceeding on schedule. The company has received regulatory approval for the sale of $450 million of assets in McCullagh Leasing to GE Capital. It expects to complete the U.S. portion of the transaction within the next few days. A smaller Canadian portion of the transaction is expected to close shortly thereafter. Bids in the $800 million range (including premium) for the BNEC credit card portfolio are expected at close of business today. The company expects to sign a contract for the sale of the portfolio within the next few days.

(JAN. 26) UPI - Senate Budget Committee Chairman James Sasser presented a proposal Thursday for cutting the federal budget deficit that's tied to a cut in Social Security payroll taxes. His counterpart in the House, Leon Panetta, presented a different deficit-cutting proposal that's NOT tied to a Social Security tax cut. The two Democrats both say the Gramm-Rudman balanced budget law has failed.

New York State Senator John Dunne says he plans to travel to Washington, D-C, next week to meet with members of the Senate Judiciary Committee and the Justice Department. President Bush announced the nomination of Dunne Thursday for the sensitive top civil rights job at the Justice Department. Civil rights leaders reacted with initial caution to the nomination, with one saying he knows ''very little'' about Dunne's record.

Winter weather returned to the Midwest with a vengeance Thursday as a fierce storm dumped 10 inches of snow in northern Illinois and southern Wisconsin and also hit Iowa and Indiana with high winds and snow. 12 people were hurt near Chicago, and travelers were left stranded at Chicago's O'Hare Airport, the world's busiest. A spokeswoman says visibility at O'Hare was near zero at one point.

#90026u0334 01/26/1990 ~United Press International
(JAN. 26) UPI - Karl Malone couldn't deliver enough votes to earn a starting berth in the NBA All-Star Game, but he had more than enough Thursday night to keep the Utah Jazz on a roll.

With the Mailman scoring 26 points and rookie Blue Edwards contributing 11 of his season-high 22 in the decisive second quarter, the Jazz coasted to their eighth straight victory, a 115-89 rout of the slumping New York Knicks.

The All-Star Game's Most Valuable Player last year, Malone was edged out of the Western Conference's second starting forward slot by A.C. Green of the LA Lakers in final balloting by the fans. He then told Utah owner Larry Miller he might skip the Feb. 11 game in Miami.

''The only thing I said to him was, 'Just wait and let it settle in and see how you feel. You're too good not to be there. Don't decide on emotion ''' Miller said.

Utah center Mark Eaton added: ''(A snub) is going to happen. We're not in the media capital of the world (in Salt Lake City).''

Utah, though, could become world famous if it continues playing as well as it has recently. The Jazz, with the longest winning streak since they moved from New Orleans in 1979-80, stand 28-11 and lead the Midwest Division by a half-game over San Antonio.

''They forgot to play a little at the end and our defense took over,'' Jazz Coach Jerry Sloan said after his team held its opponent under 100 points for the seventh straight time. ''When that happens, we're going to win a lot of ballgames. We have to keep it going.''

The Knicks, 26-14, are going in the opposite direction. The loss was their fifth straight.

''Basically it's just not there right now,'' said Patrick Ewing, who scored 25 points for New York. ''I really don't know the reason why.''

New York Coach Stu Jackson said the Knicks ''have lost a little bit of our defensive toughness. I'm not talking about toughness where you fight people. I'm talking about that inner fortitude where you go out and stop people. We've got to get that back.''

Utah led 28-24 after one period, but blew the game open with a 20-2 burst. The Knicks scored just 13 points in second quarter, making only 6 of 21 shots from the floor and 1 of 6 from the free-throw line to trail 54-37 at halftime.

New York used a 13-4 run - with Ewing scoring 9 points - to get as close as 69-59 in the third quarter. But Utah's 13-4 burst made the score 102-79 with 4:42 left.

--- AROUND THE NBA ---

Elsewhere Thursday night in the NBA, Phoenix hammered Charlotte 124-97, Washington nipped Boston 99-98, Houston edged the LA Clippers 102-101 and Orlando topped New Jersey 117-112.

SUNS 124, HORNETS 97

At Charlotte, N.C., Kevin Johnson scored 25 points and Jeff Hornacek added 24 as Phoenix set a team record with its 10th consecutive triumph. Former Sun Armon Gilliam had 17 points and 13 rebounds for the Hornets, who lost their fourth straight game.

BULLETS 99, CELTICS 98

At Landover, Md., Mark Alarie hit a 12-foot jumper with three seconds left to halt Washington's seven-game losing streak. Charles Jones set up the winning basket by stealing Robert Parish's pass. Kevin McHale led Boston with 25 points.

ROCKETS 102, CLIPPERS 101

At Houston, Mitchell Wiggins scored 28 points, including two free throws with nine seconds remaining, to help lift the Rockets to their 10th straight home triumph. Benoit Benjamin had 29 points and 14 rebounds for Los Angeles, which has dropped three in a row.

MAGIC 116, NETS 112

At East Rutherford, N.J., Reggie Theus scored 12 of his 36 points in the fourth quarter to pace Orlando. Chris Shackleford led New Jersey with 22 points, while Sam Bowie came off the bench for 20.

WASHINGTON (JAN. 26) UPI - President Bush, averting a major foreign policy rebuke on China, turned back a spirited veto override effort in the Senate with the help of Richard Nixon and a slashing Republican counter-attack.

The Senate voted 62-37 Thursday to defeat an attempt to overturn the president's veto of a bill that would put into law guarantees against sending Chinese students in the United States home to face political persecution.

Yet despite the triumph, Bush refused to brag about the vote, and offered the hand of cooperation he extended to Democrats on his inauguration little more than a year ago.

''I don't come in here with some sense of gloating or anything of that nature at all,'' a restrained but confident president told reporters at the White House.

"It was too tough a vote for a lot of my friends on both sides of the aisle."

In a dispute charged with political partisanship, Senate Republicans rallied to derail Democrat charges that the president's high-stakes gamble of diplomacy with the Beijing communists is ''kowtowing'' to the same people who crushed the Tiananmen Square pro-democracy movement last June.

Bush, whose veto was supported Wednesday by only 25 Republicans in the House on a 390-25 vote, said he had settled the question by placing the guarantees into effect by executive order. He survived the Senate challenge by four votes.

In fending off the veto override, Bush enjoyed a foreign policy victory and political triumph over such opponents as Senate Democratic leader George Mitchell of Maine and Sen. Edward Kennedy, D-Mass.

''The thing I like about, given the mournful predictions of some a couple of weeks ago, is that it gives me the confidence that I am going to go forward the way I think is correct here,'' Bush said.

Kennedy called the loss a victory for ''a Chinese leadership that was responsible for the massacre in Tiananmen Square, a defeat for human rights and a defeat for the real heirs of a democracy movement in China, the students here in the United States of America.''

Bush, Kennedy, Mitchell and Senate Republican leaders Robert Dole of Kansas and Alan Simpson of Wyoming engaged in an often brutal political brawl over the president's role in directing foreign policy.

Bush welcomed his loyal Senate Republicans - he held 37 of 45 GOP members of the Senate - to the White House for beer after he told reporters that his disputed policy had been reaffirmed.

''I think there were politics in it,'' he said. ''Clearly there was plenty on the other side, when you don't see one single vote come across the aisle. Not one, not one.''

Simpson charged the Democrats were trying to sacrifice America's foreign policy interests for their political gain, and quoted a warning from their old nemesis - Nixon - who had called to lend a hand.

''Our foreign policy should not be a salve for our own offended sensibilities, a mechanism for making us feel noble and true,'' Simpson quoted Nixon, who reopened relations with China in 1972 after a generation of Cold War rhetoric and hostilities.

Simpson said Nixon lobbied for Bush because ''it's an important issue to him.'' Nixon made calls and sent Simpson materials.

''Whoever says this president is returning Chinese students to a situation of insecurity and fear for their safety is misleading you, either intentionally, or unwittingly, or lying just a tad,'' Simpson said.

Kennedy mocked Simpson's charge that the issue is riddled with ''narrow, mean politics, grubbing to fund-raisers. That's hogwash. This is a referendum on fundamental issue of human rights.''

''You're wrong at the top of your lungs,'' the usually mild-spoken Sen. John Chafee, R-R.I., told Kennedy. ''The Democrats wish to cut him (Bush) down.

''Here we have the largest nation in the world, a billion people, and the senator from Massachusetts says, 'Put them over in a corner by themselves. Lock them out.'''

Dole accused Democrats of playing Washington's favorite game -politics.

''It's a good chance to bash George Bush. It's not freedom or morality or human rights - it's bash Bush.''

Mitchell conceded nothing.

#90026u0414 01/26/1990 ~United Press International

(JAN. 26) UPI - Wisconsin, which beat Minnesota on a layup at the buzzer three nights earlier, came up 82 seconds short Thursday night.

Marcus Liberty scored 21 points and Steve Bardo hit a 10-foot bank shot with 1:22 remaining, lifting No. 12 Illinois to a 66-63 victory over the Badgers.

Illinois, 14-3 and 4-3 in the Big Ten, withstood a furious second-half rally by the Badgers, 11-9 and 2-5 in the conference.

''We made a great comeback to take the lead. It was very similar to what Minnesota did, but this time we let it get away from us,'' Wisconsin Coach Steve Yoder said.

Bardo's shot put Illinois on top for good 62-61 and Kendall Gill and Ervin Small hit free throws in the final 10 seconds to help Illinois to the triumph.

''I don't think either team played great defensive ball in the first half '' Illinois Coach Lou Henson said. ''We didn't do a great job stopping the three-point shot. Other than that, though, it's always good to hold a team to 63 points on the road.''

Illinois appeared to be in control after extending a 37-29 halftime lead to 56-42 when Rodney Jones hit two free throws with 9:53 remaining. But the Badgers stormed back behind Brian Good, who scored 7 of his 14 points during a 17-2 burst.

Danny Jones, who led the Badgers with 19 points, capped the surge with two free throws at the 2:26 mark, putting Wisconsin up 59-58 for its first lead since early in the first half.

After Small and Jones traded baskets, Bardo hit his shot with 1:22 left for a 62-61 lead. Illinois made the score 64-61 on a pair of free throws by Bardo with 18 seconds left.

Two free throws by Tim Locum pulled Wisconsin within 64-63 with 10 seconds

left, but single free throws by Gill with 9 seconds left and Small with 7 seconds remaining gave Illinois its final margin of victory.

The Badgers had one final chance to send the game into overtime when Small missed the front end of a one-and-one situation with two seconds left, but Locum's 55-foot shot caromed off the backboard at the buzzer.

''They're (Illinois) a very quick team, much quicker than you think,'' Yoder said. ''We can play with them, but the first half was rough. It wasn't our style.''

--- AROUND THE NCAA ---

Elsewhere among the Top 20 Thursday night, No. 5 Nevada-Las Vegas held off Cal-Santa Barbara 69-67, No. 8 Michigan topped Northwestern 86-79, No. 9 Arkansas outran Texas 109-100, No. 11 Georgia Tech fell to Clemson 91-90, No. 13 Purdue beat Ohio State 78-66, No. 16 Oregon State pounded Southern Cal 92-82 and No. 18 La Salle hammered Niagara 87-69.

At Las Vegas, Nev., Larry Johnson scored 28 points and Anderson Hunt added 22 to held Nevada-Las Vegas avoid an upset.Hunt scored 15 of UNLV's final 23 points, including a game-clinching free throw with three seconds left. The Rebels played starters Greg Anthony and David Butler, who were ruled ineligible by the NCAA for non-payment of long-distance telephone bills.

At Evanston, Ill., Terry Mills scored 26 points and ignited a second-half comeback to lead Michigan over Northwestern. Sean Higgins added 24 points and Loy Vaught 23 for the Wolverines. Michigan has beaten Northwestern 11 straight times dating to 1984. Rex Walters led Northwestern with 24 points.

At Fayetteville, Ark., Todd Day scored 34 points and Lee Mayberry added 20 to power Arkansas, the lone unbeaten team in the Southwest Conference. Day's point total was the highest by a Razorback in five years. Joey Wright and Benford Williams scored 25 points apiece to pace Texas.

At Clemson, S.C., Marion Cash scored Clemson's last eight points to help the Tigers upset Georgia Tech. Dale Davis led the Tigers with 25 points. Eldon Campbell added 22 points and Cash finished with 20. Dennis Scott finished with 32 points to lead Georgia Tech.

At Columbus, Ohio, Woody Austin scored 18 points and helped lead a late Purdue rally that carried the Boilermakers over Ohio State. Austin scored 15 of his points in the second half, including six in the final 6:48 of the game. Perry Carter led Ohio State with 21 points.

At Los Angeles, Gary Payton collected 28 points, 12 assists and 6 rebounds to lead Oregon State to its 10th straight victory. The Beavers own their longest winning streak since 1984-85. Harold Miner scored 37 points to

lead Southern Cal, while Ronnie Coleman added 24 points and 9 rebounds.

At Niagara Falls, N.Y., Lionel Simmons scored 25 points to lead No. 18 La Salle past Niagara. Doug Overton chipped in 21 points and Randy Woods added 15 as the Explorers notched their sixth straight victory. Patrick Jones topped Niagara with 23 points and 16 rebounds.

In other games, Arizona clipped Stanford 68-61, Minnesota humbled Iowa 84-72, UCLA pounded Oregon 79-62, Florida State defeated Memphis State 78-72, Brigham Young thrashed Utah 65-49, Cincinnati stuffed Tulane 73-64 and Texas-El Paso crushed Air Force 67-49.

#90026u0430 01/26/1990 ~United Press International

(JAN. 26) UPI - The Boston Bruins proved themselves the NHL team of the moment Thursday night when they knocked off the the red-hot New York Islanders.

Bobby Carpenter and Cam Neely scored 1:35 apart late in the third period Thursday night to lift the Bruins to a 5-2 victory over the visiting Islanders.

''We wanted to get back to the way we were playing before the All-Star game and I think we did that,'' said Boston winger Dave Christian, who assisted on the game-winner. ''I think in the back of everyone's minds we were worrying about (a letdown).''

The Bruins, who pounded Quebec 9-2 on Tuesday night, posted their second consecutive victory and are unbeaten in their last five games, 3-0-2. The loss was only the Islanders' third in its last 17 games.

''It's too early to be concerned,'' Islanders goaltender Glenn Healy said. ''They came out strong in that third period. They didn't sit back and wait for us to dictate.''

With the score tied 2-2 and 7:31 to play, Carpenter took a pass from newly-acquired Dave Poulin and slipped a wrist shot past Healy.

Neely struck on the ensuing shift for his 200th goal and a 4-2 Bruins lead. Carpenter added an empty-net goal with 10 seconds left to complete the scoring.

''I think as far as streak-wise or win-wise, the two best teams are us and them,'' Boston defenseman Ray Bourque said. ''We expected this type of game and we really had to step it up in the third period.''

With New York trailing 2-1, Pat Flatley tied the score midway through the

second period. Flatley stole the puck from defenseman Garry Galley and slipped a 15-foot shot past goaltender Reggie Lemelin.

Boston took a 1-0 lead 3:48 into the game on a goal by Bob Sweeney, and Doug Crossman knotted the score 1:55 into the second period. The Bruins went ahead 2-1 on Christian's power-play goal 2:17 later.

--- AROUND THE NHL ---

Elsewhere Thursday nightin the NHL, Calgary outscored NY Rangers 8-5, St. Louis nipped Hartford 3-2, Philadelphia topped Winnipeg 8-6, Pittsburgh popped Detroit 5-3 and Edmonton edged Los Angeles 7-6.

FLAMES 8, RANGERS 5

At Calgary, Alberta, rookie Paul Ranheim scored twice and added two assists and Theoren Fleury scored twice and added an assist to help Calgary extend its unbeaten streak to five games. Newly-acquired Bernie Nicholls scored a pair of goals for the Rangers.

BLUES 3, WHALERS 2

At St. Louis, NHL goal-scoring leader Brett Hull scored to snap a tie 1:35 into the third period. Hull, who added an assist, notched his 23rd multiple-point game of the season.

FLYERS 8, JETS 6

At Philadelphia, Rick Tocchet scored four goals and Ron Sutter broke a third-period tie to help the Flyers snap a 10-game winless streak. Philadelphia had entered the game with a five-game losing streak at the Spectrum and a four-game losing skein overall.

PENGUINS 5, RED WINGS 3

At Detroit, Mario Lemieux scored a goal and added three assists to extend his point-scoring streak to 37 games and Paul Coffey scored twice. Lemieux has 79 points during his streak, the third-longest in NHL history behind 51 and 39-game streaks by Wayne Gretzky.

OILERS 7, KINGS 6

At Edmonton, Alberta, Glenn Anderson's goal at 15:06 of the third period lifted Edmonton in a wild shootout. Leading 6-3 after two periods, the Kings got into trouble when Marty McSorley took a five-minute penalty for high-sticking at 4:04 of the third period. The Oilers responded with three power-play goals before the penalty was over.

#90026u0443 01/26/1990 ~United Press International
(JAN. 26) UPI - President Bush concedes that his administration's war on drugs has had limited success, but he says- quote- ''we're only getting started.'' Bush Thursday proposed an additional one-BILLION dollars to help provide more federal agents and get the military involved in drug interdiction. Despite the additional funds, Bush says the real issue is NOT how much is put into the battle, but how well the battle's fought.

A Colombian drug cartel hit squad has released the fifth and what it says is its ''last hostage'' in an apparent attempt to convince Colombia's government to negotiate. The man was freed Thursday and sent to authorities with a letter offering the hit squad's help in capturing those responsible for a month-long rash of kidnappings. The help would be given in exchange for unspecified ''guarantees.''

Hollywood legend Ava Gardner died Thursday of pneumonia at her home in London. She was 67. She was born December 24th, 1922, in Smithfield, North Carolina, but left North Carolina at age 19 and headed for California, where she became one of Hollywood's greatest sex symbols. Her leading men included Burt Lancaster, Clark Gable, Humphrey Bogart, Gregory Peck and others. She was married to Mickey Rooney, Artie Shaw, and Frank Sinatra, and starred in such films as ''The Barefoot Contessa'' and ''The Sun Also Rises.''

-30- 1517
#90026u0455 01/26/1990 ~United Press International
(JAN. 26) UPI - Authorities in Salem, Oregon, say a seven-year-old boy who was taken from his natural parents because of child abuse is in fair condition suffering from burns officials say were inflicted by his adoptive parents. Marion County sheriff's deputies arrested Andrew Kerp and his wife, Diane, on charges of criminal mistreatment and assault. Authorities say the couple disciplined the boy for failing to complete some arithmetic problems.

Filmmaker Francis Ford Coppola apparently has fallen on hard times. Coppola and his Zoetrope Productions filed for bankruptcy protection Thursday in federal court in California. The Chapter 11 filing allows Coppola and Zoetrope to put creditors on hold while the firm reorganizes and tries to find new financing. Coppola is the direcftor of such films as ''American Graffiti,'' ''The Godfather'' and ''Apocalypse Now.''

BEIJING (JAN. 26) UPI - A strong undersea earthquake struck southeast of a remote island in the South China Sea early Friday, but there were no reports of casualties or damage, the official Xinhua News Agency reported.

The Chinese seismological network reported the quake, measuring 6.6 on the Richter scale, struck at 3:33 a.m. southeast of Huangyan Island, Xinhua said. The island lies between the Vietnamese coast and the Philippines, immediately west of Manila.

An earthquake official reached by telephone in Beijing said there have not been any reports of casualties or damage.

#90026u0535 01/26/1990 ~United Press International

(JAN. 26) UPI - A storm system that dumped heavy snow across the Midwest blew into Canada early Friday, leaving milder weather and clear skies in its wake, while fog covered portions of New England and temperatures dipped in the South.

Temperatures hovered between the teens and 30s throughout much of the Midwest early Friday, a little less than a day after the winter's worst snowstorm barreled through the area, the National Weather Service said.

The fierce storms, which closed hundreds of miles of highway across the Midwest Thursday and stranded scores of travelers, showed no signs of returning as a low-pressure system moved northeast.

''The low-pressure center that brought the snow is north of Lake Superior in Canada,'' said NWS forecaster Don Morrison. ''The front of it hangs down across Lake Ontario and south through the Carolinas and into Florida.''

Skies were clear in northern Illinois, as well as much of Iowa and Indiana. Wisconsin had clear skies and temperatures in the teens. Michigan which received up to 11 inches of snow in some areas Thursday, had cloudy skies with a few flurries early Friday near Detroit and Grand Rapids, Mich.

Some 61,600 customers of Detroit Edison Co. and Consumers Power Co. in southeastern Michigan were without electricity early Friday after power lines were downed Thursday by 65 mph winds.

Both utilities say continuing high winds hampered repair crews.

''It's slowing down the restoration quite a bit,'' said Lew Layton of Detroit Edison. ''We hope to have everyone restored sometime Friday.''

Property damage was widely scattered in Michigan's Lower Peninsula, where authorities said barns were blown apart, houses under construction were damaged and a tree fell on a mobile home, slightly injuring one person.

A warm front moved into New England early Friday, bringing with it patches of dense fog and sending temperatures soaring to unseasonably warm levels.

Heavy rain, melting snow, and the possibility of ice jams prompted the weather service to issue a flood watch for Vermont, where more than 1 1/2 inches of rain fell in some areas and temperatures were in the 40s, forecasters said.

In Boston, skies were overcast and the mercury rose to the high 50s. Other parts of the Bay State reported dense fog, mist and temperatures as high as 59 degrees. Rain also fell on Rhode Island, where temperatures were in the mid 50s, and temperatures further north were cooler but well above freezing.

Maine reported mist, rain and temperatures in the mid to upper 30s.

Generally fair weather spread across the South as a strong cold front pushed toward the Atlantic Coast, bringing rain, thunderstorms and lower temperatures. Temperatures in Atlanta fell to 37, Charleston, S.C., dipped to 48, Jacksonville, Fla., fell to 51 and Miami was at 71.

Two tornadoes ripped through rural Alabama on Thursday, flattening nine mobile homes and injuring 28 people, including three young brothers who suffered critical head injuries, officials said.

A large high-pressure system centered over the Southwest and mid-South kept kept skies clear over most of the region early Friday.

High-level clouds were reported moving eastward over South and West Texas, the Texas Panhandle and northern New Mexico.

Colorado had partly to mostly cloudy skies, with with a few light snow showers lingering over the higher mountain passes. Gusty northwest winds raked the northern Rocky Mountains and Colorado's southern and northeast foothills.

In the West, up to 2 feet of new snow was forecast for parts of the Washington Cascades and a snow advisory was posted for the state's northeast mountains. Stevens Pass east of Seattle had about 17 inches of new snow Thursday, including 8 inches in four hours.

A slow-moving Pacific weather front spread rain to the northwest corner of Oregon, spreading nearly 1 1/2 inches of rain at Seaside. Portland had nearly a half-inch of rain, but temperatures remained moderate to the

mid-50s.

Rain was expected to spread over northern and northcentral California, with the snow level dropping as low as 2,000 feet along the Oregon border and to about 6,000 feet in the Lake Tahoe area.

#90026u0559 01/26/1990 ~United Press International

CANBERRA, AUSTRALIA (JAN. 26) UPI - A 73-year-old Australian was charged Friday under the nation's new War Crimes Act with knowing involvement in the murder of an estimated 874 people in Europe during World War II, officials said.

Timofeyevich Polyukhovich, also known as Ivanechko, or John Poluchowicz, appeared in an Adelaide court and was remanded until March on bail, according to a statement issued in Canberra by Mark Weinberg, the commonwealth director of public prosecutions.

The victims are alleged to have died between August 1941 and May 1943 in the Rovno District of the Ukraine.

The charges said 850 of the victims' names were not known but ''are described as Jews from the Serniki Ghetto'' who died in September 1942.

The charges allege the willful murder of men, women and children, in some cases three generations of families, in or near the Ukraine villages of Alexandrove, Serniki and Brodnitsa.

Polyukhovich is the first person charged under amendments to the War Crimes Act of 1945, passed in the Australian Parliament in December 1988.

Its passage followed investigations by a special committee probing allegations that war criminals had taken refuge in Australia in the post-war migration boom.

Under the act, those charged or convicted cannot be extradited to face charges overseas and are allowed to raise the ''doctrine of military necessity'' as a defense. Its maximum penalty is 25 years in prison.

Prosecutions will take place in the Australian State Supreme Courts.

#90026u0562 01/26/1990 ~United Press International

JAKARTA, INDONESIA (JAN. 26) UPI - At least 37 people were killed, three others were missing and thousands were evacuated from their homes Friday when a flood swept through central Java island, an official said.

The flooding, triggered by prolonged rains, began shortly after midnight Friday and caused the river of Banjir Kanal to overflow into parts of the city of Semarang, about 250 miles east of Jakarta.

The flooding seriously damaged hundreds of houses in Semarang and surrounding areas and apparently caused widespread panic among residents, most of whom were asleep, the official said.

Thousands of people were evacuated to higher ground, the official said.

The torrential rains also flooded other cities in northcentral Java and inundated hundreds of acres of rice fields.

The flood paralyzed Semarang's traffic and submerged railway tracks in some places, disrupting rail traffic for hours, the official said. Area schools were closed for the day, the official said.

#90026u0612 01/26/1990 ~United Press International

CHICAGO (JAN. 26) UPI - Illinois Attorney General Neil Hartigan has sued a former Ku Klux Klansman and others on charges they collected money for AIDS victims and kept most of it for themselves.

The suit filed Thursday in Cook County Circuit Court named directors of the National AIDS Prevention Institute of Virginia, Apple Marketing of Houston and three Cook County businessmen.

''These people preyed on the sympathy of the public for the plight of children with AIDS,'' Hartigan said. ''What they failed to tell contributors was that only nine cents a day would go to the charity.''

He said Sidney Chambless, Phil Gracz and Robert Nardini each bought 200 ''Wishing Well'' canisters for $6,000 from the National AIDS Prevention Institute in September 1989 and placed them near cash registers at local businesses. The containers were identified as collection boxes for the Children With AIDS Foundation, operated by NAPI in Culpeper, Va., the lawsuit said.

Under contract with NAPI, the three Cook County men were required to return only $2.50 of each month's proceeds to the institute and could keep the rest for themselves, Hartigan said.

Apple Marketing distributed the canisters for NAPI by mail and claimed in letters to buyers that net profits could be as high as $67,000 in the first year.

Richard Shoff, Kannapolis, N.C., vice chairman of NAPI and a former executive of the Indiana KKK, was named in the suit along with NAPI President Harley E. Rowe, Culpeper, Va. and chairman D. James Kennedy, Fort Lauderdale, Fla.

Court records said David Harris and William Sterling, owners of Apple Marketing, were also named as defendants.

The suit does not specify how much money was collected but seeks $50,000 in penalties against each of 10 directors and board members of NAPI and Apple Marketing, as well as the three businessmen.

The suit also seeks a court-appointed receiver to collect all revenues to date from canisters in Illinois and an injunction blocking the revenues from being used in any manner.

The defendants are charged with violating the state's Solicitation for Charitable Purposes Act and the Consumer Fraud and Deceptive Practices Act by making false claims to contributors about the destination of their donations.

#90026u0623 01/26/1990 ~United Press International

(JAN. 26) UPI - Around the world... around the clock... the latest news from U-P-I.

15 bodies are on stretchers on the grass of a lawn on Long Island. Low moans can be heard from inside the wreckage of an airliner as emergency crews rescue survivors. They were aboard a Colombian Avianca jetliner that apparently lost an engine and crashed on an approach to Kennedy International Airport last night. The Boeing 707 carried more than 150 people. A priest says he administered the last rites to 20 living and eight or nine dead. At least 70 survivors have been taken to hospitals.

The front lawn of the mansion owned by tennis star John McEnroe's parents is a makeshift morgue for victims of the Avianca crash. The plane clipped another house in Cove Neck, an exclusive community on Long Island's North Shore that was once home to President Theodore Roosevelt.

An official at Alabama's Crenshaw County Hospital says most of the people hurt in two tornadoes yesterday will be released by today. The twisters sent 28 people to the hospital. Nine mobile homes were destroyed in the rural area of southern Alabama. About 100-thousand chickens died when the tornadoes hit eight poultry houses.

British officials say the death toll from a hurricane-force storm probably will increase today. At least 47 people died in the blinding storm

yesterday. 33 deaths are reported in Britain, and 10 others in the Netherlands. Winds of more than 100 miles an hour tore roofs off buildings and splintered utility poles... knocking out power to nearly one-Million people.

The Soviet news agency Tass says Azerbaijan's capital, Baku, was quiet last night after six days of fighting. A Tehran newspaper says Iran has offered to mediate between Soviet officials and the Azerbaijani nationalists. There's NO word whether Iran has received a response.

-30- 2017

#90026u0627 01/26/1990 ~United Press International

(JAN. 26) UPI - Diplomatic sources in Haiti say General Prosper Avril may lift the state of siege today. The military government is believed to have arrested and deported dozens of members of the political opposition this week. Avril announced a 30-day state of siege last weekend to prevent what he said was terrorism.

Three Democrats in Congress have sponsored legislation that would provide some relief to jobless people. The legislators want to increase federal UNemployment taxes by 43 percent and allow the UNemployment tax rate to drop by 25 percent. They say the present system is out-dated and insufficient.

An F-B-I agent says the agency put phantom employees in the Teamsters union. The agent told a Cleveland judge his former partner was trying to make the Mafia think Teamster President Jackie Presser was on their side... rather than informing on them. The agent was fired and is trying to get his job back.

Actress Ava Gardner will be buried next to her parents and brother in Smithfield, North Carolina. NO date has been set. Gardner died in her home in London yesterday. She was 67. Pneumonia caused the death of the beauty from the Carolina tobacco fields.

Kenya burned rhinocerous horns worth as much as five and one-half Million dollars yesterday. It's an attempt to discourage poaching of the endangered animal. Africa's rhino population is down to 75-hundred. Last July, Kenya burned 18 tons of elephant ivory in an attempt to discourage poachers.

#90026u0639 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - The White House has completed a proposal, aimed at bolstering the nation's lagging savings rate, that includes giving tax-free status to some bank deposits over seven years old, a Bush

administration official confirmed Friday.

The official did not give details, but The New York Times reported Friday that the centerpiece of the president's plan is a new account which he hopes will help entice middle-class Americans to save more money.

The newspaper, citing White House officials, said, initially, desposits in these accounts would not be tax-deductible, in order to not create an immediate strain on Treasury coffers. However, if after seven years despositors have accumulated sufficient sums, the government would lose the right to tax the new accounts.

The president is confident that the benefits of a higher national savings rate would in time offset the loss caused by making the accounts tax-deductible, the officials said.

The officials also said that Bush is expected to propose to Congress that it expand the scope of Individual Retirement Accounts, in order to allow people to use these accounts as downpayments toward first homes.

''The president will propose a series of steps all of which come under the rubric of long-term savings initiatives,'' said one official.

The savings and investment proposals would all be subject to Congressional approval, the newspaper said, predicting that it would be politically difficult for legislators to oppose the savings plan because of its benefits to the middle-class.

Despite its likely popularity, some economists questioned the financial sense of the savings plan.

''It's a little bit like shifting ballast around in the Titanic,'' Charles Schultze, a senior fellow at the Brookings Institute, told the Times. ''I do not think it is going to change savings. All we are doing is dumping the revenue loss off onto people in the future.''

The need of many Americans to save more, and the possibility of a new type of savings account, were themes touched upon by Bush often during his presidential campaign.

-30- 2334

#90026u0807 01/26/1990 ~United Press International

(JAN. 26) UPI - A Colombian jetliner crashes in a Long Island neighborhood... President Bush wins a battle in the Senate... Congressional leaders announce deficit reduction proposals... and the administration unveils its latest drug plan. Those stories and more, next from U-P-I.

Medevac helicopters and ambulances were still taking victims from the wreckage of an airliner on Long Island to hospitals hours after the plane crashed.

At least 15 people were killed in the crash of the Colombian jetliner last night. At least 70 others have been taken to hospitals. Many more have been treated at the scene.

Nassau County Executive Thomas Gulotta said early this morning it appears there are about 50 dead, but he said there's NO accurate count yet.

Avianca Flight 52 was flying from Bogota, Colombia, to New York with a stop in Medellin, Colombia, when it went down in Cove Neck. The small, exclusive village is about 15 miles northeast of Kennedy International Airport.

The Boeing 707 was carrying more than 150 people when it apparently lost an engine and crashed on an approach to Kennedy.

New York Port Authority police officer Andrew Anderson says the pilot made a missed approach at J-F-K, and while heading north from the airport... he lost an engine. Almost immediately afterward, the airport tower lost radar and radio contact with the aircraft.

A firefighter says the descending airplane appeared to have grazed a house but NO casualties are reported on the ground.

The plane broke into three pieces when it crashed in an area covered with trees and dense shrubbery about a mile from Long Island Sound, which separates Long Island and Connecticut.

The National Weather Service reported dense fog and a steady rain at the time of the crash. But there is NO indication the weather contributed to the accident.

A team of investigators from the National Transportation Safety Board is expected to start inspecting the wreckagge site by dawn.

-30- 2157

#90026u0821 01/26/1990 ~United Press International

(JAN. 26) UPI - The Senate saved President Bush a major foreign policy defeat yesterday.

The Senate was five votes short of over-riding a presidential veto of a bill which guaranteed Chinese students sanctuary in the United States and spared them possible political reprisals in China.

The House had voted overwhelmingly on Wednesday to over-ride the Bush veto.

At the White House, Bush was humble in victory, saying... ''I don't come in here with some sense of gloating or anything of that nature at all.

Democrats charged that the president's high-stakes diplomacy with Chinese leaders was submitting to the same people who brutally crushed the pro-reform movement by ordering troops to fire on students last June in Beijing.

Democratic Senator Edward Kennedy of Massachusetts called the failure to override ''a defeat for human rights and a defeat for the real heirs of a democracy movement in China.''

Bush welcomed his loyal Republicans... 37 of 45 G-O-P members of the Senate... to the White House for beer after the vote.

President Bush says his war on drugs is only getting started as he proposed a one-BILLION, 100-Million-dollar budget hike for his anti-drug program.

Bush announced the updated national strategy yesterday. The plan calls for increased military participation... more federal agents... and the death penalty for drug lords for a full price tag of 10-point-six BILLION dollars.

Federal anti-drug director William Bennett later told reporters that the funding was short of what he'd asked for... but says he's more optimistic about prospects for success than when he first took the job.

The Bush-Bennett plan... which will be included in the budget going to Congress next week... faces an uncertain future in this election year as lawmakers weigh its details and financing.

Bennett also jabbed at Senator Joseph Biden, who revealed details of his own more expensive anti-drug strategy on Wednesday. Biden says his proposal is NOT intended as ''wholesale rejection'' of the Bush administration program.

#90026u0831 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - Durable goods orders rose by 2.5 percent, or $3.2 billion, in December to $133.5 billion after gaining a revised 4.9 percent the month before, the Commerce Department said Friday.

Most of December's increase in durables, those goods expected to last more

than three years, was concentrated in strong gains for new orders for transportation equipment, which rose 8.7 percent, or $3.2 billion, or $39.9 billion.

For the year, orders for durables gained 5.9 percent to $1.52 trillion, the lowest increase since a 0.4 percent gain in 1986, the department said. Orders for 1988 gained 10.9 percent.

In December, large increases in orders for aircraft and parts and shilpbuilding equipment offset declines for motor vehicles and parts, the department said.

Electrical machinery orders increased 1.6 percent, or $300 million, to $22.1 billion after rising 7.9 percent in November.

December orders for nonelectrical machinery decreased 4.3 percent, or $1 billion, to $21.7 billion, after rising 5.8 percent the month before.

Shipments of durable goods decreased by 0.2 percent, or $200 million, in December to $122.9 billion. For the year, shipments totaled $1.5 trillion, up 6 percnet from the year before.

Shipments of goods to most industries declined in December, the department said.

Nonelectrical machinery shipments dropped 1.6 percent, or $400 million, to $22 billion. Primary metals shipments slipped 3.9 percent, or $500 million to $11.1 billion and transportation equipment shipments fell 1 percent, or $300 million, to $30.7 billion.

Shipments for electrical machinery gained 3.2 percent, or $600 million, during the month to total $20.6 billion.

Unfilled orders for durables increased 2.2 percent, or $10.6 billion, to $495.2 billion, in December. For the year, the backlog in durable goods orders was 10.6 percent above year-ago levels.

Unfilled orders for transportation equipment increased by 3.6 percent, or $9.2 billion, from November to $263.9 billion. The backlog for electrical machinery was up 1.5 percent, or $1.4 billion, to $93.9 billion.

For nonelectrical machinery, the backlog declined 0.4 percent, or $300 million, to $61.6 billion. Unfilled orders for primary metals declined 0.5 percent, or $100 million, to $22.4 billion.

New orders for defense-related goods declined 29.2 percent, or $3.3 billion, in December, to $8.1 billion after gaining 18.9 percent in November.

#90026u0848 01/26/1990 ~United Press International
(JAN. 26) UPI - Stock prices closed lower in slow trading on the Tokyo Stock Exchange Friday as most investors stayed on the sidelines ahead of the weekend.

The Nikkei Average of 225 selected issues, which gained 190.13 points Thursday, eased 95.04 points to close at 36,874.07. For the week, the key index gained 37.53 points. The broader-based Tokyo Stock Exchange Index of all listed major shares slipped 1.75 points to 2,711.15.

An estimated 500 million shares changed hands, compared with 536 million Thursday. Declines outnumbered advances 527 to 347, with 243 issues unchanged.

Brokers said the Japanese yen's rebound on foreign currency markets was an encouraging factor but worries about the New York Stock Exchange's direction led to cautious trading. Brokers said trading would remain dull until after the Feb. 18 general election in Japan.

Large-capital steels like Nippon Steel and Kawasaki Steel weakened along with paper-pulps, foods, machinery issues, and precision instruments. Chemicals and textiles also were generally lower.

Gainers included banks, some distributions, heavy-duty electricals like Hitachi and Toshiba, and oils.

On the trading floor, Hitachi paced the actives followed by NEC, NKK, Fujitsu, and Mitsubishi Heavy Industries.

Elsewhere in Asia, stocks closed lower in light trading on the Singapore Stock Exchange as investors took leave to celebrate the Lunar New Year.

The Straits Times Industrial Index, which added 1.3 points Thursday, dipped 7.02 points to 1489.53. The narrower All Singapore Index eased 0.50 points to 414.25.

Volume amounted to 56.5 million shares, down from the 79.4 million shares changing hands Thursday.

Analysts said the volume was thin due to lack of buyers as most investors had disappeared except for some intermittent bargain hunting.

On the trading floor, United Overseas Bank (warrants) paced the advancing issues, followed by Tat Lee, Hong Leong Credit, DBS Land, and Yeo Hiap Seng Treasury.

Singapore Airlines paced the declining issues, followed by Fraser and Neave ordinary, Development Bank of Singapore, Keppel Corp., Hong Leong Industries, and Sang Yong Cement.

The stock exchange, banks and most businesses were closed Friday in Hong Kong for the Lunar New Year holiday. Trading will resume Tuesday, Jan. 30.

In Australia, stocks closed higher in moderate trading on the Sydney Sharemarket.

The All Ordinaries Index, which gained 14.1 points Thursday, added 9.5 points to 1684.8. The All Resources Index rose 11.3 points to 954.8 and the All Industrials Index gained 6.1 points to 2643.4.

Volume amounted to 166.4 million shares, above the 103.3 million shares Thursday.

Gold mines outperformed the market as the Australian dollar slipped and global prices of bullion stabilized on spot markets.

Among some of the day's highlight, WMC Mining gained 14 cents to $6.28, BHP Gold added four cents to 63 cents a share and Newmont Mining gained five cents to $1.15, and GMK was up .03 to $1.31.

Elsewhere, Westpac Bank added four cents to $6.10 News Corp gained five to $12.85 and Elders-IXL added five cents to $2.32.

The Sharemarket will be closed Monday, Jan. 29, for the Australia Day holiday. Trading will resume Tuesday.

#90026u0851 01/26/1990 ~United Press International

(JAN. 26) UPI - President Bush is trying again to fill the top civil rights job at the Justice Department.

Bush yesterday announced the nomination of John Dunne, a white lawyer who served in the New York Senate from 1966 until last year. Dunne resigned from the state Senate after losing a fight for a leadership post. He is presently a partner in a law firm in Uniondale, New York.

In Albany, Dunne was largely known for his role in drafting environmental and prison legislation- NOT for involvement in civil rights issues. He says his particular interests are education and employment, which he regards as the root to true participatory equality.

If confirmed by the Senate, Dunne will succeed William Bradford Reynolds,

who played a controversial role in civil rights cases during the Reagan administration.

Reynolds resigned in December of 1988. The job has been vacant ever since, prompting continued criticism from civil rights leaders.

President Bush's previous nominee... black Detroit lawyer William Lucas... was rejected by the Senate Judiciary Committee last July for a lack of civil rights law experience.

Two competing Democratic proposals are on the table to replace the Gramm-Rudman balanced budget law.

The chairmen of the Senate and House Budget Committees agree the Gramm-Rudman law is a failure. But they have different ideas about how to replace it.

Senate Budget Committee Chairman James Sasser, a Tennessee Democrat, wants to cut Social Security payroll taxes 17-BILLION dollars a year. But he says that cut should only be made if Congress removes the growing Social Security surplus from deficit calculations and cuts the deficit 30-BILLION dollars a year for seven years.

Sasser says doing so would produce an 18-BILLION-dollar budget surplus by fiscal 1997. And he says it would reduce Social Security taxes about 600-dollars a year for the average worker and employer.

House Budget Committee Chairman Leon Panetta, a California Democrat, outlined a ''pay-as-you-go'' deficit reduction plan. It would replace Gramm-Rudman with what Panetta calls a slower, but more honest balanced budget schedule.

Panetta's goal is to balance the budget by 1998. His plan cuts the deficit 30-BILLION dollars a year through fiscal 1993 and then 20-BILLION a year until it disappears.

He says that once Social Security is removed from deficit calculations, the payroll tax issue should NOT be tied to the budget process.

#90026u0855 01/26/1990 ~United Press International

(JAN. 26) UPI - The Soviet news agency Tass reports some progress in attempts to end the fighting between Moslem Azerbaijanis and Christian Armenians in the two southern Soviet republics.

Tass says Red Army commanders brokered a ceasefire between warring Armenian and Azerbaijani fighters in the breakaway province of

Nakhichevan. The province is an autonomous, overwhelmingly Moslem enclave within Christian Armenia.

There are growing signs of a slow return to order in Azerbaijan's capital of Baku under the firm hand of the military, by virtue of a state of emergency.

But Tass reports that some fighting continues. Two Soviet soldiers were killed as Azerbaijani guerrillas battled Red Army troops at a key barracks in the city.

The two deaths yesterday raise to 95 the number of people killed in the so-called Battle for Baku. Of the dead, 75 are civilians and at least 715 people have been wounded, including 639 civilians.

The six days of fighting began when Soviet troops stormed the city in an attempt to stop the violence between Azerbaijanis and Armenians.

#90026u0862 01/26/1990 ~United Press International

LONDON (JAN. 26) UPI - Stock prices were sharply higher in fairly active trading at midday Friday the London International stock exchange following a better-than-expected report on Britain's trade.

The Financial Times 100-stock index, which gained 11.3 points Thursday, was ahead 27.5 points to 2,317.4. The narrower top 30 industrial average was up 14.0 points to 1,849.5.

Volume amounted to around 315 million shares, compared with 274 million traded during the same period Thursday.

Shortly after the market opened, the Central Statistical Office reported Britain's trade deficit narrowed to $1.99 billion in December from $2.4 billion in November. Forecasters are expecting the government to report a deficit of $2.6 billion to $2.8 billion.

The current account deficit, which measures trade in goods as well as invisibles, or services, narrowed to $1.8 billion in December from $2.2 billion in November.

Invisibles, such as income from tourism, financial services, and certain unilateral transfers, showed an estimated surplus of around $160 million, unchanged from November. Traders said they were impressed by the report.

Worries that insurance stocks would fall after Thursday's severe weather caused millions of dollars of damage across the Europe proved unfounded. Most insurance stocks rose sharply as most companies were well reinsured

after the massive storm damage of 1987, market watchers said.

General Accident Fire and Life Assurance surged 37 cents to $18.05, Sun Alliance added six cents to $5.02, Commercial Union climbed 16 cents to $8.16 and Prudential Corp. gained 12 cents to $3.52.

Among the day's other highlights, Enterprise Oil gained 17 cents to $10.40 Carlton Communications added 29 cents to $12.22 and Wellcome PLC was up 29 cents to $11.25.

#90026u0895 01/26/1990 ~United Press International

NEW YORK (JAN. 26) UPI - The pilot of doomed Avianca Flight 052 made a final plea for clearance before his crippled Boeing 707 fell from the sky, an amateur radio operator said Friday.

''Basically, it was, 'Avianca 052, we've just lost two engines. We're low on fuel, requesting priority clearance,''' said Bronx resident Anthony Rosati.

A short time later, the plane hit the ground.

''I thought he could make it,'' said Rosati, a novice pilot. ''Obviously, he didn't.''

The Boeing 707 plowed into a small hilltop in posh Cove Neck on Long Island shortly after 9:30 p.m. Thursday, breaking into at least three sections and turning parts of the exclusive suburb into a temporary morgue.

Moments before the disaster, Rosati was doing what he usually does at night - tuning into his small VHF radio and sneaking a listen to radio traffic from jets at LaGuardia Airport.

As sometimes happens, he said, he heard snippets of conversation from Kennedy International Airport, farther away from his home in the Bronx.

Rosati said he was only slightly alarmed when he heard the Avianca pilot's distress call.

''These guys are trained to be real calm under any circumstances,'' Rosati said. ''I didn't think he was in any kind of danger. I didn't get any kind of indication he was nervous or scared at all.''

But Rosati was.

''It was very frightening,'' he said. ''It wasn't until I heard it on the news a few minutes later, I knew what I had heard was obviously a treagedy.''

He called several television stations, and heard the news he had suspected: Flight 052 was down.

Investigators were unsure of the cause of the crash, but preliminary speculation was that the plane simply ran out of gas - a theory Rosati said was plausible.

''The fact that there was no fire meant that there was no fuel,'' he said. ''I think the main factor here in all this is that he just ran out of fuel.''

Flight 052 was due to land at Kennedy at 8 p.m., after a long flight from Medellin, Colombia. Traffic congestion forced it to circle in an overhead holding pattern for 90 minutes.

Moments before the crash, the Avianca pilot peered through the thick fog coating the Kennedy airport runway and attempted to land.

For reasons that were still unclear, the pilot decided to abort his landing attempt, and was ''waved off'' to try again.

But that aborted attempt apparently used up too much of the plane's already limited fuel reserves. The second try proved fatal.

''I would have to say it was just bad cockpit management,'' Rosati said. ''If they (airline pilots) can't fly into their scheduled airport, they're supposed to go to their alternate.

''I don't understand why he didn't just divert.''

#90026u0904 01/26/1990 ~United Press International

TOKYO (JAN. 26) UPI - Former Foreign Minister Shintaro Abe, the favorite to become Japan's next prime minister, said Friday the ruling Liberal Democrats are in a do-or-die fight for survival with ''a 60-40 chance'' of beating the Socialists in next month's elections.

''If the Liberal Democratic Party loses the election, the Socialists will take over power. It's quite possible,'' Abe said in an interview with United Press International at the headquarters of his powerful party faction.

''I think there is a 60-40 chance that the LDP will win,'' he said.

Prime Minister Toshiki Kaifu, 59, Wednesday dissolved the powerful lower

house of the Diet, or parliament, and set the election for Feb. 18.

It will be the first major political test for Kaifu since taking office Aug. 9 after his two predecessors resigned in less than three months to take the blame for bribery and sex scandals. The LDP lost control of the largely rubber-stamp upper house of parliament in July 1989 for the first time in 34 years.

Abe, 65, said even if the ruling party retains control in next month's elections, it may seek an unprecedented coalition with opposition parties to solidify its rule.

''It is sure that we will be the single largest party after the election '' he said. ''And then it is our responsibility to stabilize the political situation in Japan.

''If we lose our majority, we will try to forge a coalition with opposition parties, such as the Komeito and the Democratic Socialist Party,'' a left-of-center group drawing heavy support from trade unions, he said.

''Even if we win the election, we have to think about a coalition because we do not have a majority in the upper house,'' Abe said.

Abe, foreign minister under Prime Minister Yasuhiro Nakasone and LDP secretary general under Prime Minister Noboru Takeshita, spoke of his ambitions to succeed Kaifu.

As early as 1986, Abe had been a favorite to succeed Nakasone. But Abe bowed out to Takeshita in 1987 in exchange for a pledge that Abe would succeed him.

The agreement was stalled last year when Takeshita was forced to resign in disgrace over the stocks-for-favors scandal in which top party leaders and others were offered prelisted shares at cut-rate prices in the Recruit Corp. information services conglomerate.

Abe stepped down from the powerful post of LDP secretary general after he was accused of accepting 17,000 shares of Recruit worth at estimated $360,000.

Takeshita emerged from the ashes of Japan's worst financial scandal to retain the leadership of the LDP's most powerful faction, and is regarded as the party's kingmaker.

''Both Mr. Takeshita and myself were elected for the first time 30 years ago and we have been best friends since then,'' Abe said. ''We competed in the 1987 (LDP) presidential election and as a result, Mr. Takeshita became prime minister.

''I did my best to accomplish the tax reform as secretary general and I think he thanks me for that. The Recruit scandal wounded the two of us.

''I hear many people, including Mr. Takeshita, raised my name here or there as Kaifu's successor. I thank him for his friendship and I hope Mr. Takeshita would think of it fairly in consideration of Japan's future,'' Abe said.

Abe's political fortunes soared this month when he led a high-powered delegation to Moscow to meet with Soviet President Mikhail Gorbachev. The trip overshadowed Kaifu's European tour, grabbing headlines in Japanese newspapers.

''If we lose the majority, Kaifu will leave,'' Abe said. But he hedged on a prediction of whether Kaifu will stay on to serve out his two-year term as LDP president, which has carried with it the prime ministership, if the party wins the election.

''If the party wins, myself and Takeshita will continue to back Kaifu to serve out his term. But I cannot give you an ironclad answer because you never know what will happen in politics.''

Dispelling rumors that he has cancer, Abe said, ''I am in good shape. I am in good health. At least that's what my doctor tells me.''

A poll published in the daily Mainichi Shimbun, meanwhile, showed that popularity ratings for Kaifu and the Liberal Democrats rose to 33 percent and 43 percent respectively from 30 percent and 38 percent in December.

#90026u0909 01/26/1990 ~United Press International

SRINAGAR, INDIA (JAN. 26) UPI - Authorities fearing unrest on an Indian national holiday sealed Srinagar Friday with troops and police and kept reporters in a hotel under armed guard to impose a news blackout on an uprising against Indian rule of Kashmir.

The censorship failed to stifle reports of violence on Thursday in the northwest town of Handwara, where officials confirmed at least 20 people were killed and more than 200 wounded when security forces fired to quell a riotous demonstration.

Officials said a huge crowd marched through the town, 110 miles northwest of the Jammu and Kashmir state capital of Srinagar, shouting slogans in support of popular demands for independence for the predominantly Moslem Kashmir from overwhelmingly Hindu India.

The demonstration continued into the evening, when a vehicle belonging to the Border Security Force was set ablaze, prompting security personnel to open fire to disperse the crowds.

Local newspaper reports put fatalities at 25.

The protest was the latest mass outpouring of support for secession of Kashmir from India, a movement engineered by well-armed militant groups inspired by nationalist drives in Eastern Europe and the insurrection by Islamic guerrillas in Afghanistan.

The movement has blossomed into a popular uprising by virtually all 3 million Moslems in Kashmir following allegations that large numbers of peaceful protesters were gunned down last weekend by security forces.

The number of casualties is in dispute, with the government putting deaths during the week at only 28. Official sources peg them at more than 70, while residents contend hundreds have been killed.

Authorities Friday blanketed Srinagar, 400 miles north of New Delhi, with tens of thousands of troops and police, sealing the city shut with a shoot-on-sight curfew.

''I have never seen so many soldiers on the street. It is unprecedented,'' said a resident who did not want to be identified.

The streets were ghostly silent save for the occasional convoy of trucks, from whose cargo beds troops or police pointed rifles and machine guns.

The move was prompted by fears of anti-India violence as the nation celebrated the Republic Day national holiday, marking the 1950 adoption of India's constitution.

Witnesses reported massive deployments around Bakshi Stadium, where in an apparent display of resolve to resist the insurrection, the government went ahead with a Republic Day parade.

Attendance at the ceremony, however, was reported at virtually nil, as people stayed away in compliance with a militant call for a boycott.

The call was issued by the Jammu and Kashmir Liberation Front, the most popular and powerful of the pro-secession groups. It also urged residents to remain indoors in observance of a ''black day,'' fly black banners from homes, burn copies of the constitution and national flags and refrain from using electricity.

Ghulam Abbas, who as district magistrate was in effective control of the city, speaking to journalists at the Broadway Hotel, said journalists'

curfew passes had been withdrawn and that if they left the building they would be arrested and face a possible six months in jail.

Asked if the reporters, who were under armed guard, were effectively under house arrest and if a news blackout had been imposed, he replied: ''Maybe. You can draw your own conclusions.''

The Press Trust of India news agency said the state's governor, Jagmohan, had appealed to militants to end the current wave of violence.

Kashmir is a predominantly Moslem state of India claimed by both Hindu-dominated India and neighboring Moslem Pakistan. The disputed region is divided, with two-thirds of it ruled by India. But virtually all of Kashmir's 3 million Moslems want to secede from Indian control.

Thousands of soldiers poured into the city Thursday hours after a militant gunman sprayed bullets into a group of Indian Air Force personnel, killing four officials and injuring 10 others.

Residents contend the region has been ignored by the Hindu-dominated central government, but their main grievance is that Kashmir was never been given an opportunity before or after the 1947 partition of the subcontinent to decide whether to join India or Pakistan or become independent.

-30- 4558

#90026u0912 01/26/1990 ~United Press International

VIENNA (JAN. 26) UPI - Romania's ruling National Salvation Front, in the wake of protests of its decision to run candidates in elections scheduled for May 20, imposed numerous restrictions on public gatherings.

The curbs were announced Thursday amid calls by three leading opposition parties for the Front to resign and the creation of a new, multi-party provisional government to lead the nation through the polls.

''Through this decision (to participate in elections) the NSF has lost its neutrality ... and its credibility before public opinion,'' said the National Peasant, National Liberal and Social Democrat parties in a joint statement carried by the official Rompres news agency.

''There can be no free elections and equitable conditions for all political formations when the NSF has the monopoly, in a clearly totalitarian way, on all state levers,'' the statement said.

The three parties organized a demonstration late Wednesday by about 2,000 people who chanted, ''The Front is the same as the Romanian Communist Party'' and ''Iliescu is the same as Ceausescu.'' Ion Iliescu is the

leader of the Front and president of the interim government that took power following the ouster Dec. 22 of dictator Nicolae Ceausescu.

Less than 24 hours after the protest, the Front announced new restrictions on public assembly, saying demonstrations and other gatherings could be held only on ''non-working days,'' which in Romania means Sundays or holidays, or after normal business hours.

Such meetings and demonstrations also can be staged only in officially designated areas, such as parks or the headquarters of political parties, said the decree, carried by Rompres. The sale of alcohol in the vicinity of the rallies is forbidden, it said.

Anyone who violates the decree could face fines or possible jail terms, it said.

The Front announced this month that political organizations must give police at least 48 hours notice before holding a meeting or rally.

The Front has initiated sweeping political changes in Romania since taking power, abolishing some of the most unpopular laws of Ceausescu's hard-line communist government and lifting many restrictions on travel and free speech.

Although the Front initially portrayed itself as apolitical and temporary, the announcement Tuesday that it would participate in elections scheduled for May 20 fueled fears of a return to single-party rule in Romania.

Opposition groups have complained that the Front's control of the government and access to the mass media would give it an unfair advantage in free elections.

In their statement, the National Peasant, National Liberal and Social Democrat parties called on the Front and the interim government to ''immediately withdraw from state and administration leadership.''

The parties called instead for the creation of a new provisional government made up of ''representatives of the active political parties'' and ''prestigious personalities who asserted themselves in the 45-year struggle against communist dictatorship.''

The statement accused the Front's leaders of being ''last-minute dissidents'' who cooperated with the repressive Ceausescu regime up to its final weeks.

ATLANTA (JAN. 26) UPI - The nation's worst flu epidemic in seven years was responsible for at least 1,143 deaths last week alone, federal health officials say.

The national Centers for Disease Control reported Thursday that several states are especially hard-hit by the flu this winter and the disease accounted for 7.6 percent of all 15,090 deaths reported across the country last week.

CDC viral disease expert Walter Gunn said the percentage of flu-related deaths was significantly higher than normal for the second straight week.

''That's higher than anything since the flu season of 1982-1983,'' Gunn said. ''This qualifies as an epidemic and confirms our earlier concerns that this would be a worse-than-average year.''

The CDC said 18 states have reported widespread flu outbreaks in counties that account for more than half their state's population. They are Massachusetts, Connecticut, New York, Virginia, North Carolina, Georgia, Mississippi, Missouri, Texas, Oklahoma, Nebraska, Michigan, Wisconsin,

Minnesota, South Dakota, Montana, Idaho and Arizona.

Seventeen states reported less-serious ''regional'' flu outbreaks. They are New Hampshire, Pennsylvania, Delaware, West Virginia, Kentucky, Tennessee, Alabama, Arkansas, Louisiana, Ohio, Iowa, Wyoming, New Mexico, Utah, Nevada, Washington and Alaska.

Indiana and New Jersey reported no flu activity, the CDC said.

Gunn said people who might be at risk of flu could still protect themselves by getting vaccinations immediately, and he urged older people and those with heart and lung disorders to get shots.

He also warned of danger to doctors, nurses and other health care workers who might be exposed to a large number of influenza patients.

''There's still time. It only takes two weeks to build up your immunity,'' he said.

Epidemiologists began predicting a severe flu season last year after ''dramatic early reports'' of the virus's arrival in early December, much earlier than usual.

The flu season typically peaks in mid-February, but researchers would not predict whether this year's death toll would keep rising in the coming weeks.

Doctors said this year's most common flu strain appears to be A-Shanghai, which seems to cause more deaths than other types of the virus. Researchers also have confirmed some cases of A-Taiwan flu and an unidentified B strain of the virus.

People allergic to eggs should not be vaccinated because the vaccine is made of a virus grown in an egg culture medium. People running a fever also should avoid shots, doctors said.

#90026u0981 01/26/1990 ~United Press International

DAYTON, OH (JAN. 26) UPI - Mead Corp. reported a 28 percent decline in fourth-quarter earnings to $31.2 million, or 50 cents a share, compared with $43.4 million, or 68 cents a share, in the fourth quarter of 1988.

For the year as a whole, Mead's report Thursday showed a 39 percent decline in earnings to $215.8 million, or $3.33 a share, compared with $352.7 million, or $5.37 a share, in 1988.

Sales of $1.08 billion in the fourth quarter were up slightly from the

prior year's fourth quarter sales of $1.05 billion. Earnings in 1989 included a non-recurring gain of 23 cents a share and 1988 included net non-recurring gains of $1.67 a share.

Sales for 1989 rose three percent to $4.6 billion, compared with $4.5 billion in 1988. Adjusted for sales of divested businesses, year-to-year sales were up six percent. The company said comparison of its year-to-year results is made difficult by acquisition and divestiture activities.

Mead sold its Paperboard Products business in January 1988 and its 50 percent share of the Brunswick Pulp & Paper Co. in August 1988. In December 1988 Mead acquired the Michie Co., a legal publishing firm. And last September, the Release Products business was sold.

Burnell Roberts, chairman and chief executive officer, said, "Although a number of factors resulted in somewhat lower than expected fourth quarter earnings, 1989 was a good year for Mead.

"We are on schedule with the start-up of our new $560 million coated-board mill in Alabama and we are on plan in development of our new color imaging business. These businesses represent important long-term strategic investments for which we will continue to sacrifice short-term earnings in 1990."

Roberts said fourth quarter earnings were hurt by lower prices for uncoated paper, resulting from softening demand and incremental industry expansion, and a slow start-up following a planned October shutdown at Northwood Forest Industries, a 50 percent-owned affiliate.

In its electronic publishing business, Mead posted another record year, with Mead Data Central revenues passing the $400 million mark. Excluding the dilution associated with the Michie acquisition, earnings were ahead of 1988 levels. Michie, acquired in late 1988, publishes state codes and other legal information.

#90026u1001 01/26/1990 ~United Press International
ANALYSIS BY ARNOLD SAWISLAK

WASHINGTON (JAN. 26) UPI - Whatever the merits of the current argument over the Social Security tax may be, it seems clear that there are some low down politics being played with it.

Sen. Daniel Patrick Moynihan, D-N.Y., kicked off the dispute by announcing that he would introduce legislation to cancel scheduled increases in the Social Security tax because the government is using the money now being collected, in his words, ''as if it were general revenue'' and not being

put aside for pensions.

There is plenty of dispute about the accuracy of Moynihan's statements, but there is little argument that the Social Security tax is taking in more than is needed for current pensions and that the surplus is being used - at the very least as a bookkeeping item - to make the federal deficit look smaller.

Moynihan and his supporters stress that the Social Security tax is ''regressive,'' that is, everyone, rich or poor, pays the same rate, and that it is going up while the income tax, which is supposed to be ''progressive'' was reduced to benefit the well- to-do during the Reagan years.

President Bush and his backers see the Moynihan move as a demagogic effort by the Democrats to force the Republicans to raise income taxes, which the president has said he will not do, and to give up trying to reduce the capital gains tax.

Reducing the Social Security tax and the surplus it produces would make the federal deficit look larger and require either more spending cuts or more revenues. But it would not, as some administration supporters have claimed, reduce current Social Security benefits.

A few years back, the tax was purposely increased to produce surplus revenues to be used in the 21st century to pay the pensions of 20th century baby boomers. The surplus now is being invested in Treasury bonds, which provide funds to run the government and which apparently gives rise to the charge that Social Security money is being used to buy airplanes and paperclips.

In all of this who-struck-John it is likely that the ordinary taxpayer would like to know only (1) is somebody stealing Social Security funds and (2) can Social Security taxes be reduced without cutting current benefits.

The apparent answer to the first question is ''no'' and the second ''yes '' even though those taxes surely will have to go up eventually to pay benefits later.

Meanwhile, both sides are trying to use the argument for political purposes.

The Democrats hope to steal the politically attractive mantle of tax cutters from the Republicans and to highlight the difference between Bush's proposed capital gain tax cut for stock market and real estate investors and their own Social Security tax cut for low- and middle-income workers.

The GOP, in turn, is looking for a way to avoid giving up the tax cutting image it established after 1980 and to convince politically active older Americans that the Democrats are playing fast and loose with their pensions by proposing a Social Security tax cut.

There sre some inflated claims on both sides in this affair and if there is a conclusion to be drawn, it most likely is that both are playing rather cheap, transparent politics.

#90026u1004 01/26/1990 ~United Press International

CLEVELAND (JAN. 26) UPI - A woman allegedly raped last year by a Cleveland man said she bit off his testicles because he forced her to perform oral sex upon him.

The testimony from the 27-year-old woman came Thursday in the second day of the trial of Alphonso Calhoun in Cuyahoga County Common Pleas Court.

Calhoun is charged with raping and robbing the woman during a crack cocaine-smoking party on the city's East Side last July 22. Jury deliberations were expected to start Friday morning.

Under questioning Thursday by Assistant County Prosecutor Carmen Marino, the woman said Calhoun forced her to perform oral sex upon him four times.

''When he asked me to do it a fifth time, I was afraid he was going to kill me and that's when I did it (bit them off),'' she said.

Calhoun claimed the woman consented to sex and said she robbed him of cocaine and $150 he carried in a pouch in his crotch.

Under questioning by defense lawyer Thomas Shaughnessy, Calhoun said he awoke that night from either sleeping or passing out to find himself covered with blood, his testicles on the floor beside him and the woman running out the door.

Despite being in great pain, he drove himself to Meridia Huron Hospital, with his testicles wrapped in a towel, but doctors told him they could not be reattached.

Earlier, police detective Jonathan McTier testified that Calhoun had at least two different stories for his injuries while he was at the hospital.

''He first said his roommate had thrown an ax at him and then that a girlfriend had stabbed him,'' McTier said.

Shaughnessy said, ''Cocaine is a mind-altering drug. This woman went wacko

and injured this unfortunate man during consensual sex. He is the victim of this horrendous act.''

One prospective juror was excused during selection Wednesday because she felt she would become ill on hearing the testimony. Marino had warned the prospective jurors of the nature of the woman's testimony.

#90026u1005 01/26/1990 ~United Press International

WEST BERLIN (JAN. 26) UPI - The Christian Democratic Union, a party traditionally allied to the communists, withdrew from East Germany's troubled government, clearing the way for the formation of a broad coalition to include opposition movements, the union said.

The union also joined other parties Thursday in urging Prime Minister Hans Modrow to suspend his membership in the Communist Party until spring elections.

Earlier in the day, CDU Secretary General Martin Kirchner said Modrow had indicated he was prepared to take such a step.

Opposition movements Thursday continued debating Modrow's earlier appeal that they join the government to save it from collapse until elections set for May 6. They were expected to formally announce their decision Friday, and opposition sources said they were likely to accept the premier's offer.

Also Thursday, East Germany adopted legislation allowing foreigners to set up joint ventures and in some cases become majority shareholders in East German businesses.

Economic Affairs Minister Christa Luft announced the newly adopted regulations at a news conference, saying the process of approving joint ventures would be kept as simple as possible. She said majority control of business would be subject to review by a commission of experts to determine if it was in the interest of the nation's economy.

The move is aimed at repairing the country's ailing economy, which has been hurt by the exodus of hundreds of thousands of young workers to the West.

The CDU said in a statement that it had withdrawn its ministers from Modrow's communist-dominated government to facilitate negotiations on the formation of a broad government coalition.

The CDU is one of the four ''bloc parties'' traditionally allied to the communists that have distanced themselves from the Communist Party in recent months but were included in a government coalition.

Modrow's 9-week-old administration has come under increasing pressure amid calls for a faster pace of change and widespread mistrust of the Communist Party, which has lost much of its authority since last fall.

Pro-democracy protests in October forced the resignation of the country's hard-line communist leadership and triggered what has become known as ''the German revolution,'' including the opening of the Berlin Wall Nov. 9.

The Communist Party agreed to relinquish its power monopoly but has been accused of abusing its dominant position in government.

A series of strikes and demonstrations have been held recently to protest the policies of the Communist Party, which also has been hurt by defections of its members, including the popular reformist mayor of Dresden, Wolfgang Berghofer.

West German Chancellor Helmut Kohl's aide, Rudolf Seiters, met Thursday with Modrow and opposition groups in East Berlin to prepare for a meeting between the two German leaders next month.

The official East German news agency ADN said opposition officials would accompany Modrow to Bonn for the talks due to be held Feb. 13-14.

In Moscow, Soviet government spokeman Gennady Gerasimov said Modrow will pay his first working visit to the Soviet Union this month since taking office. ADN said Modrow was scheduled to travel to Moscow Tuesday.

#90026u1032 01/26/1990 ~United Press International

ATHENS, GREECE (JAN. 26) UPI - Iranian Revolutionary Guards killed four gunmen who tried to hijack an Iran Air Boeing 727 during a domestic flight Iranian news reports said Friday.

Iran said the gunmen were agents for the United States.

''Mercenaries of the world-devouring United States made a fresh attempt to hijack an Iran Air passenger plane but the attempt was foiled by the heroic alertness of the Pasdaran,'' a reference to Revolutionary Guards on the plane, Tehran radio said.

The radio, in a dispatch monitored in Athens, said about 8 p.m. Thursday, the gunmen tried to seize Flight 133 after it took off from the Iranian city of Shiraz en route to Bandar Abbas in the Strait of Hormuz.

''Agents of the U.S. oppressors, misusing responsibilities that were created for searching passengers, entered armed into the plane and took a flight attendant hostage near Bandar Abbas in an attempt to hijack the aircraft,'' the radio report said.

''By the alertness and swift action of flight security guards of the Islamic Revolutionary Guards Corps, the four hijackers were killed and the plane landed safely with all the passengers unhurt,'' the radio said.

The gunmen were not further identified. However, the reference to the gunmen misusing ''responsibilities to search passengers'' implied they may have been dissident members of the Revolutionary Guards employed in flight security.

Iran has blamed dissidents and ''counterrevolutionaries'' for past attempts.

Iran's official Islamic Republic News Agency quoted a statement from the Guards Corps as saying investigators were trying to identify the hijackers.

IRNA said the attempt occurred some 90 miles from Shiraz in southern Iran, but the radio said it occurred as the plane neared Bandar Abbas Airport.

The Islamic Revolutionary Guards Corps, an elite paramilitary force, set up a special unit of sky marshals in 1984 after several Iranian passenger planes were hijacked and flown out of the country by dissident groups.

The guards have since foiled 16 hijack attempts on Iran Air domestic flights, including the latest.

Thursday's hijack bid was the first in Iran since January 1988, when Iran said members of the outlawed Mojahedin Khalq organization tried unsuccessfully to hijack a flight from Tehran to Mashad. The Mojahedin denied involvement.

#90026u1042 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - President Bush ''opposes segregation in any form'' but planned to attend social functions hosted by two all-male clubs in Washington on Saturday, a spokesman announced Friday.

As he did last year, the president will attend a luncheon sponsored by the Alibi Club, which meets on regular occasions, and the annual dinner of the

Alfalfa Club, which meets once a year to roast political personalities.

White House press secretary Marlin Fitzwater said Bush is attending the two functions ''for the same reason he did last year because he belongs to both clubs and enjoys them.''

When asked whether the president should attend a segregated gathering, Fitzwater said, ''I don't think it's relevant'' and added, ''The president is opposed to segregation in any form.''

#90026u1065 01/26/1990 ~United Press International

BOSTON (JAN. 26) UPI - The struggling Bank of New England borrowed more than $400 million from the Federal Reserve in the last week to pay depositors who are withdrawing their money from the bank, published reports said Friday.

Arthur Meehan, a BNE executive vice president, told The Boston Globe and Boston Herald that his bank had borrowed from the Federal Reserve's "discount window" but did not specify the amount. The Globe estimated the total at $475 million.

One of the region's largest banks, BNE has been hurt by bad loans in a weak real estate market and last week posted a $1.2 billion loss for the fourth quarter of 1989.

Following the announcement, hundreds of depositors, including several cities and towns across the region, withdrew million of dollars from their BNE accounts. The city of Boston withdrew $34 million earlier this week.

BNE officials sought to downplay the loans from the Federal Reserve. "Availing ourselves of the discount window is part of our management plan " Meehan said. "We still haven't borrowed anywhere near the amount that's available to us. We still have very significant depositor support and people are standing by the bank."

BEIRUT, LEBANON (JAN. 26) UPI - The Democratic Front for the Liberation of Palestine said its fighters attacked an Israeli patrol near the Israeli-Lebanese border Friday, killing and wounding Israeli soldiers.

A spokesman for the U.N. peace-keeping force in Nakoura confirmed the incident near the village of Taibeh on the Lebanese-Israeli border and reported hearing firing and activity in the area.

But Israeli military sources said only that fire from a light weapon was directed at an Israeli army patrol moving in the eastern sector of Israel's so-called ''security zone'' in southern Lebanon. The sources said soldiers returned fire but there were no casualties.

An Israeli army spokesman said that in an unrelated incident, an officer was wounded in western part of the security zone when an armored car went over a mine near Beit Yahoun village.

In Beirut, a military spokesman for the Palestinan group said in a statement that DFLP fighters ambushed an Israeli patrol near Taibeh at dawn Friday, using machine guns and rocket-propelled grenades.

The spokesman said the fighters inflicted heavy casualties among the

members of the patrol.

The attack, it said, was ''in retaliation to the savage Israeli air raids on Palestinian and Lebanese national and Islamic positions (in south Lebanon) and in support of the Palestinian uprising'' in the occupied territories.

In a statement issued later in the day, the DFLP said the ''Israeli enemy brought reinforcements to the Valley of Hujeir (near Taibeh) where our fighters are still clashing with the Israeli troops.''

It said the area came under heavy shelling as ''the Israelis were trying to advance in an attempt to capture our fighters.''

On Thursday, Israeli jets blasted a base of the Abu Nidal group in the Majdelyoun area east of the port city of Sidon, 24 miles south of Beirut. Five people were wounded during the raid.

Last week, Israeli jets bombed a radio station run by the Palestine Liberation Organization and positions for the pro-Iranian Hezbollah, or Party of God, in southern Lebanon, leaving there people dead.

(JAN. 26) UPI - The quiet of the exclusive community of Cove Neck on Long Island was shattered last night when a Boeing 707 from Colombia crashed and broke into three pieces. A U-P-I reporter on the scene counted 55 bodies at the crash site, and says four other bodies were taken to local hospitals... making the UNofficial death count 59 in the crash of the Avianca jetliner. At least 86 others were hurt. Most of the injured have been taken to hospitals. But some received treatment on the lawn of John McEnroe Senior, father of the tennis star. The New York Port Authority says the pilot missed an approach at Kennedy International Airport, and then lost an engine.

There's NO indication that dense fog and steady rain in New York last night caused the crash. National Transportation Safety Board investigators will begin their probe today.

The Soviet Union said today warring fighters in Armenia and Azerbaijan are honoring a cease-fire. Red Army commanders brokered the cease-fire between the Armenian National Movement and the Nakhichevan People's Front of Azerbaijan. A Ministry of Interior spokesman says the death toll has risen to 98 in the Azerbaijani capital of Baku in the fighting between Azerbaijani militants and Soviet soldiers who took over the city Saturday.

A report says President Bush wants to give tax-free status to some bank

deposits made more than seven years ago. The report says the tax-free deposits are the centerpiece of a new plan which Bush hopes will help entice middle-class Americans to save more money. Officials say Bush also probably will ask Congress to expand the scope of Individual Retirement Accounts, so people can use I-R-A's as down-payments on first homes.

#90026u1098 01/26/1990 ~United Press International

LOS ANGELES (JAN. 26) UPI - Americans appear unconcerned at the prospect of a reunified Germany dominating Europe but the notion scares the Polish and concerns the British and French, a survey published Friday said.

In a joint survey conducted last week, the Los Angeles Times polled U.S. citizens and The Economist polled Polish, French and British citizens. The survey showed citizens of the four nations have different opinions about a reunified Germany.

The rejoining of the two Germanys has been the subject of renewed academic and political debate since the Berlin Wall opened last year.

About 61 percent of American and French citizens favor a reunited Germany, but only 45 percent of the British favor the idea. Poles were largely undecided, with 44 percent opposed and 41 percent favoring it.

Germany's invasion of Poland in September 1940 helped launch World War II and France fell soon thereafter.

Among the Poles, 69 percent said they would ''worry'' about a reunified Germany becoming ''the dominant power in Europe.'' In Britain and France, 50 percent also said the notion of a dominant reunified Germany was worrisome.

In the United States, however, only 29 percent said they would worry over a stronger Germany.

Poles said a united Germany might ''try to expand its territory again'' or attempt ''a revival of Nazism.'' French citizens, however, are concerned that ''the German economy may become too strong.''

If Germany reunified, its military role might be recast. Currently, West Germany is the NATO front line and East Germany is the western border of the Warsaw Pact.

By a margin of 5 to 3, Poles said a reunified Germany should be militarily neutral. French citizens believed by a 4-to-3 margin that a reunified Germany should be a member of NATO. Americans supported that notion by 2 to 1, Britons by 3 to 1.

French and Polish citizens who said relatives were harmed in the war were slightly less supportive of German reunification than those whose family were unscathed. But family war histories did not seem to make a difference in the attitudes of Americans and the British.

The Times Poll, directed by I.A. Lewis, interviewed 1,160 American adults by telephone. The Economist interviewed 504 adults in Britain, 511 in France and 502 in Poland, all by telephone.

The margin of error for the U.S. portion of the survey is four percentage points in either direction, the Times said. For the European countries it is five points.

(JAN. 26) UPI - The Food and Drug Administration once again is warning people against taking a dietary supplement that's suspected of causing nine deaths and many serious illnesses in recent months. The supplement is L-tryptophan. The F-D-A says 334 makers, packers and distributors have complied with a request for a recall... but one has refused to show proof that it has recalled the capsules it distributed nationally. F-D-A inspectors have found it on store shelves.

Director Francis Ford Coppola and his Zoetrope Productions have filed for bankruptcy protection. The filings allow Coppola and Zoetrope to put creditors on hold while the firm re-organizes and tries to find new financing. Zoetrop lists about 29-Million dollars in debts and 22-Million in assets. A related Coppola company, Hollywood General Studios, filed for voluntary bankruptcy in 1983.

A Cleveland woman told a jury she bit off a man's testicles because he forced her to perform oral sex. Alphonso Calhoun is charged with raping and robbing the woman at a crack cocaine-smoking party on Cleveland's East Side July 22nd. Calhoun claims the woman consented to sex and robbed him of cocaine and 150-dollars he carried in a pouch in his crotch. Jury deliberations are expected to begin today.

This is New Year's Eve on China's five-thousand-year-old lunar calendar. The Year of the Snake is ending, and the Year of the Horse will start tomorrow. In China, celebrations bidding farewell to the Snake are subdued because of the troubled economic situation and political repression. Extra food is on sale in Beijing and prices are lower than last year because of slow sales.

#90026u1113 01/26/1990 ~United Press International

COVE NECK, NY (JAN. 26) UPI - A Colombian jetliner carrying more than 150 people crashed in heavy fog while approaching Kennedy International Airport, killing at least 67 people and injuring scores of others, authorities said Friday.

The aircraft, flying on an instrument landing because of the bad weather, missed its first approach and crashed as it attempted to make a second landing, said Diane Spitaliere, a spokeswoman for the Federal Aviation Administration.

It was not known if the navigational instruments played any role in the crash, Spitaliere said.

There was no major fire in the crash of Avianca Flight 052 Thursday night, leading to speculation that the plane was low on fuel as it attempted a second landing after missing its first approach.

There were conflicting reports on whether the plane had run out of fuel or whether it dumped the fuel to make an emergency landing, Spitalere said.

The plane, which broke into pieces after crashing in woods, also lost power in at least one of its four engines, Spitaliere said.

Officials said the plane's flight recorder boxes had been recovered and were sent to Washington for examination. The boxes are expected to contain important information about the jetliner that could help determine the cause of the accident.

The plane, a Boeing 707 flying from Bogota, Colombia, to New York with a stop in Medellin, Colombia, went down about 9:30 p.m. in the small, exclusive village of Cove Neck on the northern shore of Long Island about 17 miles northeast of the airport, police and airport authorities said.

At least 67 people were killed in the crash, said Diane Markunas, a spokeswoman at the Nassau County Medical Examiner's office. Another 86 people were being treated for injuries at hospitals, Nassau County police said.

A 13-member team of investigators from the National Transportation Safety Board was sent to Cove Neck to inspect the wreckage.

Amateur radio buff Anthony Rosati said he tuned into what may have been the plane's last transmission.

''Basically it was just, 'Avianca 052, we've just lost two engines. We're low on fuel, requesting priority clearance,''' Rosati said. Moments later, he said, the plane hit the ground.

A firefighter at the scene said the descending airplane ''appeared to have grazed a house'' but no casualties were reported on the ground.

The plane broke into three pieces when it crashed in an area covered with trees and dense shrubbery about a mile from Long Island Sound, which separates Long Island and Connecticut.

The National Weather Service reported dense fog and a steady rain at the time of the crash but there was no indication weather conditions contributed to the accident.

The flight was due to arrive at Kennedy Airport at 8 p.m., said Andrew Anderson, a police officer of the Port Authority of New York and New Jersey, which operates the facility. He said the JFK tower lost radio and radar contact with the jetliner at 9:34 p.m.

"(The pilot) made a missed approach at JFK and while heading north from JFK he lost an engine," Port Authority Police Officer Andrew Anderson said. "Almost immediately afterwards, (the airport tower) lost radar and radio contact with the aircraft when he was approximately 15 miles east northeast of JFK."

The plane's cockpit lay on top of a hill, with the fuselage lying broken in two below the crest. Low moans could be heard from within the fuselage as emergency crews were removing survivors from the wreckage of the bright-red jetliner as late as 5 1/2 hours after the crash.

David Johnson, said he was driving in the area when he saw the crippled plane just before the crash. He said the accident appeared to be the result of mechanical problems. ''I really couldn't hear any engines so I'm assuming that the engines had conked out,'' he said. ''There was no fire. It was obviously a mechanical problem with the engine.''

Cove Neck resident Peter Whitelaw said the roads leading to the crash site are so narrow and there were so many emergency vehicles in the area that emergency crews had to run on foot up to the wreckage.

Whitelaw said residents of the area are accustomed to hearing planes waiting to land at Kennedy Airport circle the area in bad weather. ''I thought that's what it was,'' he said, ''but it was louder than normal, and then we heard the crash.''

#90026u1118 01/26/1990 ~United Press International

JAKARTA, INDONESIA (JAN. 26) UPI - Bad weather forced rescue teams to suspend a search Friday for a domestic airliner, carrying about 21 people,

missing near Bali in eastern Indonesia, authorities said.

''Bad weather has hampered our operation,'' a rescue official in Bali told United Press International. ''(The) searching will be continued tomorrow (Saturday).''

The plane, a British-manufactured twin-propeller belonging to Indonesia's Airfast charter, was en route from Ujungpandang in South Sulawesi to Selaparang airport in Lombok island on a scheduled two-hour flight Thursday.

The aircraft failed to land in Selaparang airport due to bad weather and was rerouted to Ngurah Rai airport on Bali island. Contact was cut off several minutes before it was scheduled to land.

Between 19 and 21 people were believed to on board the plane, including a crew of two.

A Communication Ministry official in Bali said only that the plane was missing due to bad weather caused by a tropical cyclone, and airline officials in Jakarta refused to provide any details.

#90026u1157 01/26/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (JAN. 26) UPI - For the first time in his best-selling life, author-film producer Sidney Sheldon has written a sequel to one of his novels.

Titled ''Memories of Midnight,'' the new romantic thriller follows up the misadventures of most of the characters in ''The Other Side of Midnight,'' Sheldon's first best-seller, which was published 17 years ago.

''The Other Side of Midnight,'' which has sold some 8 million copies in hardcover and paperback, was made into a movie in 1977 and there's every reason to think the sequel will also be translated for the screen.

Sheldon, who has sold 150 million of his novels in the past two decades, said he enjoyed revisiting the characters he established in ''The Other Side of Midnight.''

''It was like meeting old friends again,'' he said. ''Some of the characters were killed in the first book and I've put the remaining individuals into peril once again. It's a suspense story set in Greece.

''I've picked up the characters immediately after the end of the first book, so the setting and time period are very much the same. But the plot

is altogether different and many new characters have been added.''

Sheldon wrote his sequel with the original novel open beside him to check on descriptions of his characters, ages, names and places.

''I never read my books after I write them,'' he said, grinning. ''But this time it was necessary. Writing a sequel is something I'd never thought about doing before. This seemed like an exciting project, so I read 'The Other Side of Midnight' again to make sure that it would all fall into place.

''I suffered some trepidation about doing it, but I have trepidation about every book I write.''

Sheldon has very little to fret about. His publishers will print a million copies in hardcover of ''Memories of Midnight,'' which is due in book stores this fall.

By contrast, the first run of ''The Other Side of Midnight'' was only 15,000.

Big numbers, however, don't impress Sheldon. As the producer of the TV series ''I Dream of Jeannie,'' he was accustomed to having 20 million viewers watch his stuff every week.

He was disappointed with the movie version of ''The Other Side of Midnight'' and thereafter took a hand in the films and TV mini-series that were made from his novels.

''20th Century Fox has an option on the sequel because they made the screen version of the first one,'' Sheldon said. ''This will be either a film or a mini-series. There will be an entirely new cast. I didn't care for the first cast at all.

''I will either co-produce or be executive producer. I'm also working on a movie version of 'The Sands of Time,' of which I'm executive producer.''

In addition to preparing his most recent books for the screen, Sheldon is researching yet another novel. He won't talk about it, though. He frets over the possibility of seeing his idea appear as a TV movie before it can be written.

Despite the perception that Sheldon is an amazingly prolific author, he has written only 10 novels. The fact that all of them have been best-sellers heightens the illusion.

He writes a new book about every two and a half years. Inevitably they head straight to the top of the best-seller lists.

''That can be a bit frightening,'' he said. ''It makes me strive to surpass myself with each novel. I do my best to make each one better than the last.

''I'm very excited about the book I'm researching. It is international in scope and deals with a subject I've never tackled before.''

Sheldon is credited by critics with being among the best novelists at creating female characters. He acknowledges that he enjoys the company of women and attempts to portray them as sensitively and credibly as possible.

''I get a lot of letters from women commenting on that,'' he said. ''And they mean a great deal to me. In fact, some people who know nothing about me except my books are convinced Sidney Sheldon is the pen name for a woman writer.

''I have great empathy for women. I feel and react to many things the way they do. Sometimes I even think like they do. I can't explain it except to say I love women.''

TOKYO (JAN. 26) UPI - Fueled by strong domestic demand, Japan's crude oil imports increased 8.2 percent in 1989 over the preceding year to a record 1.31 billion barrels, the Ministry of International Trade and Industry said Friday.

The ministry said imports from the 13-nation Organization of Petroleum Exporting Countries, which pumps about one-third of the world's crude oil, accounted for 76.5 percent of Japan's total crude imports.

Imports of fuel oil climbed 5.1 percent to a record 317 million barrels, sustained by heavy imports of naphtha, kerosene oil, and diesel engine oil, the ministry said.

It said domestic refining of fuel oil in Japan gained 5.4 percent to 1.04 billion barrels and domestic sales increased 3.7 percent to 1.3 billion

barrels. In December, the ministry said crude imports rose 7.2 percent to 126.66 million barrels, reflecting strong demand from the petrochemical industry.

Imports of fuel oil hit a monthly record of 32.7 million barrels, up 17.7 percent over a year ago, the ministry said. Japanese crude oil imports rose at an accelerated rate toward the end of the year. Japan has no significant crude oil production of its own.

Crude oil imports jumped 14.8 percent in November over a year ago, 27 percent in October and 82.2 percent in August in response to record domestic sales of gasoline.

Japan has been reported planning to increase its imports from the Soviet Union and Mexico where terms of a $500 million loan call for repayment in oil.

Earlier this year, Japan's Chubu Electric Power Co. was reported starting imports from Australia's Broken Hill Petroleum Co. and studying the possibility of imports from Australia on a long-term basis.

Japanese electric power companies were reported importing 95 percent of their oil form China and Indonesia. Japan also has taken steps to safeguard the independence of its domestic refineries from foreign control.

Last month, the trade and industry ministry's director general of petroleum Naoki Koroda in a visit to the United Arab Emirates set three conditions for foreign acquisition of Japanese refineries.

They were: allowing Japanese participation in the ownership of the producing oilfield, assurances of a long-term supply of crude, and enough new foreign capital to improve the refiner's relative financial position.

GENEVA (JAN. 26) UPI - U.N. human rights investigator Joseph Voyame said Friday he will go to Romania in February to assess massive rights violations, including widespread torture and killing, under former dictator Nicolae Ceausescu.

The U.N. Commission on Human Rights asked Voyame in April last year to go to Romania but Ceausescu refused to allow such a visit.

Voyame, a former ranking Swiss Justice Ministry official, told reporters Friday the new authorities in Bucharest approved an on-the-spot investigation to collect evidence of reported atrocities and lesser abuses.

Voyame said he will go to Romania near the end of February and remain for at least one week, interviewing government officials and surviving victims of rights violations.

#90026u1244 01/26/1990 ~United Press International

NEW YORK (JAN. 26) UPI - The Prudential Insurance Co. said Friday it will make so-called "living payouts" to life insurance policy holders who are terminally ill or permanently confined to a nursing home to help ease their last months.

Prudential, based in Newark, N.J., said the benefit option will be available on current policies having death benefits of at least $25,000 and on new policies of at least $50,000. The option will be offered at no additional cost, the insurer said.

Prudential said it will pay in advance almost all of the life insurance benefits entitled to a policy holder diagnosed as having less than six months to live.

Those confined to a nursing home for at least six months and who are expected to remain there can elect to receive either a lump sum payment or smaller monthly payments.

The program "responds to people's concern that they may not have the money needed when they become terminally ill or are permanently confined to a nursing home," said Prudential President Joseph J. Melone.

Ten states have approved the program and Prudential said it is seeking regulatory nods in all remaining states. In states where living payouts now are barred, Prudential will seek to change the laws, a company spokesman said.

The payouts, in effect, are loans given against the value of policies, observed analysts, who said the program could prove to be a marketing bonanza for Prudential while costing the insurer little.

"The assumption is you're going to be paying out the death benefit in the foreseeable future anyway," said Erik B. Granade, a securities analyst with Provident National Bank in Philadelphia. "All it means is that Prudential is giving up what it can earn on the money before it is credited to the policy holder."

While several insurers recently have extended living payout options to terminally ill policy holders, Prudential said it is the first to offer the benefit option to those confined to nursing homes.

The program now is available to policy holders in New Jersey, Florida, Alabama, Arizona, Alaska, Montana, Colorado, West Virginia, Idaho, and Kentucky, the company said. When offered nationally, up to three million policy holders could be eligible for the benefit option, Prudential said.

Those who do not use the entire benefit can continue paying premiums with the balance of the policy going to their heirs, Prudential said.

BOSTON (JAN. 26) UPI - A USAir jetliner made an emergency landing at Logan International Airport Friday after the pilot reported a problem with one of its engines, but the craft touched down safely and no one was injured, officials said.

USAir Flight 710, traveling to Boston from Washington's National Airport, reported a problem with one of its two engines, said Phil Orlandella, a spokesman for the Massachusetts Port Authority, which operates Logan.

''They had a problem with the No. 1 engine and had to shut it down,'' Orlandella said.

The jet, a German-made Fokker 100, landed without incident on a runway at 10:21 a.m., Orlandella said. There were no reports of injuries.

A spokesman for the airline said the problem occurred about 50 miles from the airport.

''The flight crew did not declare an emergency, the air traffic controllers did. In the captain's mind it was not an emergency,'' said spokesman David Shipley. ''The passengers were even unaware the engine had been shut down.''

The plane was carrying 65 passengers and five crew, Shipley said.

He said maintenance crews from the airline were trying to determine what caused the engine problem.

(JAN. 26) UPI - Was it a liberation, an invasion or some of both?

An ecumenical church team from the United States says Panamanian church leaders are asking that and other questions in the wake of the U.S. military action aimed at capturing Panamanian dictator Manuel Noreiga and installing the democratic government of President Guillermo Endara.

But underlining all of the questions was a single theme: The Panamanian economy, in shambles even before the U.S. action, is even worse now and it will take billions of dollars to rebuild.

''Liberty could be lost if we don't solve the economic problems,'' Endara told the visiting U.S. delegation which traveled to Panama under the auspices of the National Council of Churches at the invitation of the 2-year-old Ecumenical Committee of Panama.

''We must move the conscience of people in the United States that they have a moral responsibility to help,'' he said. ''Don't let our sacrifices

go down the drain.''

''Americans are very generous - but they are also forgetful,'' Endara said.

The U.S. church delegation included the Rev. Syngman Rhee, a Presbyterian Church (USA) mission official and president-elect of the council, Episcopal Bishop Duncan Gray of Mississippi, United Methodist Bishop J. Lloyd Knox of Birmingham, Ala., and the Rev. Ray Flachmeier of Dallas, of the Evangelical Lutheran Church in America.

James Solheim, the Episcopal Church's news director, who accompanied the delegation, said the delegation was told that only now are people beginning to voice their doubts about the invasion because to do so before would, in the words on an Episcopal priest, ''have sounded unpatriotic, as though we were sorry Noreiga is gone.''

One of those now speaking out is the Rev. Fernando Guardia, a Jesuit in charge of pastoral development for the Archdioces of Panama. ''The people of Panama thought they could talk Noreiga into leaving,'' he said. ''We resent being subjected to a military solution.''

He said ''pressure was building and we were facing the possibility of a civil war in a year or two - but that would have been our own solution.''

Panamanian Episcopal Bishop James Ottley told the group that while there is general rejoicing among the people at the ouster of Noreiga, ''there is something basically wrong with U.S. foreign policy in Latin America.''

''Some people,'' added the Rev. Diana Suarez, associate rector of a Panama City Episcopal church, ''are beginning to express shock at how much we really depend on the United States. It is a festering sore that is finally out in the open and we must deal with it.''

The delegation also met with Luis Moreno, general manager of the national Bank of Panama, who told the church leaders the nation is in a precarious situation.

He said while originally opposed to the invasion he came to support it as ''the only way out of our mess.'' Although the ''honeymoon won't last forever, Panama appreciates what America did.''

Noting that U.S. sanctions cut government income in half and its assets in foreign banks were frozen, Moreno said the nation faced enormous difficulties in getting the economy rolling again.

''Liberty doesn't fill people's stomaches so there will be a reaction if help doesn't come soon and the high tide of sympathy could shift, leading to violence,'' he said.

#90026u1284 01/26/1990 ~United Press International

BEIJING (JAN. 26) UPI - Beijing's chilly streets reverberated with the sound of exploding fireworks at midnight Friday in celebration of the newly arrived Year of the Horse.

Despite sub-freezing weather, residents ushered in the lunar New Year with the traditional noisy fanfare, originally sounded to scare off any ghosts from sabotaging the auspicious moment.

Following China's 5,000-year-old lunar calendar, the New Year begins Saturday in the biggest annual festival for Chinese across the nation and around the world.

After a turbulent Year of the Snake, the Horse will bring another 12 months of unpredictable events for China, according to lore.

Beijing's main shopping districts were dark and most stores were closed. Only a few lone dancers swirled around the floor of a dance hall on Dongdan street, east of Tiananmen Square. The Chinese New Year is traditionally spent feasting at home with family.

Strings of lights outlined buildings along the central Avenue of Eternal Peace, where tanks rolled against unarmed demonstrators nearly eight months ago in a show of force that left hundreds and perhaps thousands dead.

Over a meal of dumplings and smoked duck, a young Beijing couple drank a New Year's toast of sweet red wine, the traditional Chinese color of good fortune.

After their meal, they tuned into an annual 4-hour New Year's Eve television program featuring China's most popular entertainers.

At midnight, Communist Party chief Jiang Zemin and Premier Li Peng made surprise appearances on the program, apparently to put into practice recent propaganda calling for ''close ties'' between party cadres and the masses.

It was the first time top Chinese leaders had appeared on the annual extravaganza. Jiang and Li's tandem greeting appeared to convey a symbolic gesture of unified authority, despite the prevailing wisdom that ostensibly retired leader Deng Xiaoping remains China's true power holder.

Lest anyone neglect politics for revelry, the party has dispatched thousands of cadres to grass-roots units around the country to ''work on

ideology and do good deeds for the masses,'' according to a report in the state-run People's Daily.

For some Beijing residents, this year's festivites were marred by last June's bloody crackdown and continuing political repression.

''This New Year doesn't feel as joyful as last year,'' said a young researcher at Beijing University. ''We're all still feeling oppressed.''

Low morale has been further fueled by worsening economic conditions. From 3 million to 4 million people are unemployed because of production stoppages, according to the All-China Trade Union.

In order to ensure a harmonious New Year's festival, the Chinese government handed out millions of yuan in cash to workers around the country, the official news media reported.

SANTIAGO, CHILE (JAN. 26) UPI - A comet brighter than Halley's has been discovered and photographed by European and Chilean astronomers.

Astronomers at La Silla Observatory in northern Chile said the comet has been dubbed ''Austin 1989 C1.''

La Silla is the southern hemisphere observatory for European scientists. It is located near La Serena, 290 miles north of Chile.

Scientist Roland Vega Tello, a member of an infrared photography team at the mountaintop observatory, said the comet is not now visible to the naked eye.

The comet will begin arriving at its closest point to Earth in April, Vega Tello told Santiago newspapers in stories published Friday.

Comets, which usually have a long luminous tail, follow an elliptical or parabolic orbit around the sun.

#90026u1322 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - Americans appear willing to pay up to $600 a year for government insurance covering long-term care in a nursing home but a vocal minority could be expected to oppose such a program, a survey showed Friday.

Congressional attention has been focused on long-term care since catastrophic illness insurance was repealed last year in response to protests from the elderly who objected to the program's surtax of up to $800 a year and said they were more interested in coverage for chronic ailments.

The study conducted by the Daniel Yankelovich Group for the American Association of Retired Persons used traditional polling techniques to gauge public support for a long-term care program and market research methods to find out what kind of program people prefer.

Sixty-six percent of those surveyed said they were very concerned about the cost of a long-term illness or disability, and more than two in three strongly supported a federal program similar to Social Security to pay such expenses.

Using the market research techniques, the survey found the most important element of any long-term care program is that it cover nursing home care.

The survey found Americans would be willing to pay up to $50 a month for the ''right'' long-term care coverage ''even though they were presented with the choice of paying nothing for long-term care.''

Madelyn Hochstein, Yankelovich excutive vice president, said the finding does not mean most Americans want to pay $50 a month but that they see a program financed with a contribution of that size as being the most valuable.

''People do want something, and they recognize they will have to pay for it,'' she told a news conference.

The study found ''a clearly defined group'' of mainly wealth Americans making up 8 percent of the population ''who reject a government program on philosophic grounds and who can be expected to be vocal in its opposition to a program.''

Such a finding is significant since catastrophic insurance was repealed in response to protests from a well-organized segment - but not necessarily a majority - of wealthier senior citizens, who were subject to the surtax.

''As we all know, even the smallest of groups can have an impact on public policy,'' Hochstein said. ''We have to take them into serious consideration.''

The survey found people wanted a long-term care program that helped all Americans, not just the elderly or the poor, and that would be run by the government, not private insurers.

Americans preferred coverage for home care, but believed ''once a long-term care situation exists, the nursing home is inevitable,'' the survey said.

Two-thirds of Americans had experience with long-term care through their families or friends, but nonetheless most wanted more information about the subject and many were misinformed about it. Thirty-three percent of the elderly, for example, incorrectly thought Medicare covered long-term care.

The survey of 1,490 people ages 18 and over was conducted from Oct. 21 to Nov. 29 for AARP, the nation's largest organization of people 50 and older.

#90026u1326 01/26/1990 ~United Press International

HOUSTON (JAN. 26) UPI - The energy industry will drill 33,498 wells nationwide this year, marking the first time since 1985 that drilling activity in the United States has increased, World Oil magazine forecast Friday.

''After five consecutive years in which U.S. drilling declined, it now appears conditions are right for a reversal of that trend,'' said Bob Scott, editorial director for World Oil.

The 33,498 wells would be a 9 percent increase over the 30,697 drilled in 1989. The forecast includes the drilling of 1,080 Gulf of Mexico wells, up 12.3 percent compared with last year's total.

Based upon a annual survey of 24 major and 200 independent operators, the magazine's editors expect an average U.S. rig count of 985, up from an average of 870 rigs for 1989.

More wildcat wells also are planned with majors anticipating 894 in 1990, compared with 705 in 1989 and independents planning 803, up from 579 last year.

Operator confidence in stable oil prices and increased natural gas prices prompted the positive forecast.

''Many operators held the perception that there was the possibility that prices could erode. This year, we think that perception has changed for two primary reasons,'' said Russell Wright, World Oil editor.

The magazine forecast nearly an 8 percent increase in drilling outside the United States and the Soviet Union in 1990, totaling 22,263 wells, compared with 20,626 wells completed in the same regions last year.

''World oil demand has continued to expand in spite of all the experts' predictions, and OPEC finally hammered out a production agreement last November that looks like its going to hold,'' Wright said.

The Organization of Petroleum Exporting Countries agreed to raise the production ceiling from 20 million barrels per day to 22 million barrels per day for the first half of 1990.

''In the worst-case scenario in which (OPEC) swing producers do not cut back, prices could fall by up to $3 per barrel during the second quarter, resulting in a U.S. price of about $18-$19, which is still sufficient to drive our forecast,'' Wright said of oil prices.

''If, however, OPEC is able to maintain discipline, we can see West Texas Intermediate prices holding at around $22 for the year,'' he said of the

benchmark U.S. price.

U.S. producers are expected to have extra money in the bank for increased drilling activity this year because 1989 prices were stronger than expected and because of a record low plow-back ratio, which is the amount of earnings that were reinvested in exploration and production, he said.

World Oil is published by the Houston-based Gulf Publishing Co., which also publishes four other magazines covering the petroleum industry.

#90026u1339 01/26/1990 ~United Press International

ENTERPRISE, AL (JAN. 26) UPI - Junk dealer Robert Wayne O'Ferrell reopened his salvage shop Friday, four days after the FBI began searching it for evidence in two deadly mail-bombings, while agents moved their quest for clues to the archives of a local newspaper.

Federal investigators invited the national news media Monday to the small town of Enterprise in southeast Alabama, touting a break in their probe of bombings that killed a federal judge in Alabama and a civil rights lawyer in Georgia.

But searches of O'Ferrell's home and business, septic tanks, a backyard shed and a pond revealed nothing to warrant an arrest by Friday.

O'Ferrell reopened his chilly junk shop Friday morning and fired up several old kerosene heaters as customers and bored journalists strolled among old books, tape recordings, army surplus gear, appliances, cameras, dishes and other second-hand merchandise.

''A man's got to make a living,'' the white-haired O'Ferrell told friends gathered at the store, which the FBI shut down for three days.

An FBI agent said investigators were examining ''letters to the editor'' of the Eagle newspaper in nearby Dothan and looking at microfilm copies of the paper dating back to 1986. No documents had been taken as evidence by late Friday morning, officials said.

O'Ferrell, 46, said he did not know the whereabouts of the key target of the search: a typewriter with a unique typing pattern reportedly linked to the bombings.

''We don't have any idea who it was sold to, when it was sold,'' he said. ''We don't keep a record of that stuff.''

Federal investigators believe the typewriter used to prepare a lawsuit for O'Ferrell is the same one used to write letters claiming responsibility

for the December bombings that killed U.S. District Judge Robert Vance at his home in suburban Birmingham and lawyer Robert Robinson at his office in Savannah.

The FBI found similarities between the type in the letters and in documents O'Ferrell submitted in a lawsuit he filed against Gulf Life Insurance Co., which fired him several years ago.

O'Ferrell's lawyer, hired Thursday, has advised him to stop cooperating with FBI agents in their search.

''If they want anything, if my lawyer says do it, I'll do it,'' O'Ferrell said of Evergreen, Ala., attorney and family friend Paul Harden. ''He says I've cooperated too much. I didn't know any better.''

About 100 federal agents Monday began searching O'Ferrell's former and present salvage business locations in Enterprise, his two-story home in New Brockton, the septic tanks at his home and current business, the shed behind his house and a nearby pond.

''The involvement and the length of time that the federal authorities have been here caused him some concerns,'' Harden said. ''My feeling right now is that he is not guilty of any wrongdoing.''

Some news reports have said federal agents were looking for a link between O'Ferrell and an Enterprise man indicted this month on gun-exportation conspiracy charges in Montgomery.

The reports said an indictment charged Enterprise print shop owner Brian Joseph Fleming and San Francisco resident Charles Farrell Malone with conspiring to export firearms without proper federal authorization.

The bombs that killed Vance Dec. 16 and Robinson two days later, and bombs that were disarmed at an Atlanta courthouse and a Jacksonville, Fla., NAACP office, triggered a massive federal probe that resulted in the swarm of agents around O'Ferrell.

Investigators say all the bombs appear to have been made by the same person.

Vance ruled against O'Ferrell in his suit against Gulf Life, but officials have not revealed any connection between O'Ferrell and Robinson or the Jacksonville NAACP office.

#90026u1367 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - Negotiators at world trade reform talks, rather

than ''destroying'' government aid to farmers, should be looking for ways to control farm production, the president of a French farm group said Friday.

The talks, which almost collapsed once due to disagreements over agricultural reforms, were scheduled to conclude this fall. The goal is substantial, progressive reductions in trade-distorting subsidies but there is strong disagreement how to achieve it.

Raymond Lecombe, president of the National Federation of Farmers Unions, France's most influential farm organization, told reporters there should be a global agreement on efforts to align demand and farm output.

''It seems to us ... that the goals of the negotiations are ones we should not be looking at. (Negotiators) should put more emphasis on this issue (inventory management) than destroying all support,'' Lecombe said in remarks translated by the French Embassy's agricultural attache.

When asked if French farmers were willing to give up government support, he said there should be a government ''safety net'' that would come into play ''when there is imbalance in the marketplace.''

A worldwide agreement, Lecombe said, would mean higher prices, like those created, accidentally, in 1988 and 1989 when drought slashed grain production.

Lecombe said Europe has done its share in recent years to curb overproduction, a view not shared by U.S. officials. He criticized U.S. crop support payments as being both an export subsidy and an import barrier and questioned if Congress was willing to dismantle them.

''We believe the most distorting measure in the U.S. system is the deficiency payment,'' he said.

The United States wants to eliminate export subsidies and trade-distorting subsidies and trade barriers. Europe has agreed there should be reductions but says it is impractical to think they can be eliminated.

''It is realistic to say that the positions are still fairly (far) apart '' Lecombe said, but he delined to speculate if there would be an agreement.

''It's certainly a great risk'' of an unsatisfactory conclusion, he said, partly because his organization also would like to see reforms that would stabilize exchange rates.

Fluctuations in rates can have a powerful effect on competitiveness of a nation's goods, he added.

#90026u1388 01/26/1990 ~United Press International
LANSING, MI (JAN. 26) UPI - Humane society members are picketing a bar for promoting bear wrestling between bar patrons and a trained bear named Ceaser.

Capital Area Humane Society members picketed Bootleggers tavern, handing out leaflets to patrons and protesting the bar's sponsorship of the wrestling bear.

''It's not a good idea for the bear,'' said Sharon Ellis, vice president of the group. ''We're afraid that if the bear attacks somebody, it might be destroyed.

''There is just no reason for this.''

But Jim Marquardt, the bear's trainer, said the bear has never attacked anyone and the wrestling is closely monitored.

''We pick our wrestlers out,'' Marquardt said. ''If they drink, they don't wrestle.''

Patrons who want to wrestle Ceaser must sign a waiver and undergo a 20-minute instruction session. Marquardt said the rules for the match include no tripping, biting, kicking or pulling of fur. Contestants who want to wrestle the bear cannot weigh more than 265 pounds.

''There's not one bar we've even been at that people didn't like it,'' said Eric Kemmer, the bear's assistant trainer.

Mark Camp, Bootleggers' assistant manager, said he is puzzled by the protest.

''I don't understand why these people would be upset,'' Camp said. ''It's a tame bear that has been raised by humans since it was a cub.''

Ceaser is owned by World Animal Studios Inc. of Cleveland. He has appeared in movies and portrays Santa Bear in malls at Christmas, wearing a Santa hat and kissing people who want to have their picture taken with him.

#90026u1391 01/26/1990 ~United Press International
SCHENECTADY, NY (JAN. 26) UPI - For proud Schenectady, being banished to the backshelves of history may lead to an identity crisis of worldly proportions.

The decision by World Book Encyclopedia to delete Schenectady from its 1990 edition, along with other important ''S'' subjects such as sneezewort sacroiliac and the Seven Sleepers of Epheusus, is not being taken lightly either.

''It's utterly ridiculous,'' exclaimed Bill Rollins, who manages a city bookstore. ''At least they could have left in a couple of paragraphs.''

''Are you kidding? Holy Mackerel!,'' added City Councilman Frank Duci. ''That is a disaster.''

In the newest edition of the reference work, Schenectady - the birthplace of television and early high-tech engineering and research - is replaced by information on Canadian architect Moshe Safdie, 17th century Dutch painter Jan Steen and 19th century Viennese operatic composer Oscar Straus.

''A shame and a disgrace,'' Duci said.

Pat Higgins-Crane, a World Book spokeswoman, could not say why Schenectady was shed, but speculated Schenectady sadly suffered for another sundry ''S'' word - space.

''We have 22 volumes, and each year we add new articles that have become important in the last year or over a period of time,'' she said. ''If we only added and never deleted, it would soon be quite a large size.

''It's strictly a space consideration,'' she said.

Duci said he planned to gather written support and told the Daily Gazette he would let the World Book know Schenectady's feelings.

Happily for Schenectady, the city appears in the 1990 edition of Encyclopedia Brittanica. A spokesman for Encyclopedia Americana could not be reached for comment.

#90026u1396 01/26/1990 ~United Press International

PONCHATOULA, LA (JAN. 26) UPI - When they buried Hardhide Jr., the town mascot, none of his alligator relatives showed up.

''We tried to contact his nearest relatives but apparently they were all in hibernation,'' said Mayor Julian Dufreche.

Hardhide Jr., who had occupied a cage in the center of this sleepy town about 50 miles northwest of New Orleans, died Wednesday of natural causes. The 10-foot gator's funeral was a quiet affair on Thursday.

He lasted about 5 years on the job after his predecessor, Old Hardhide, went on to that great swamp in the sky after serving for 13 years.

When Jr. died, 2,000 people showed up to watch the jazz funeral procession wind its way through town with a mule-drawn hearse pulling the specially built casket.

The town is trying to find another alligator, but in the meantime they have been loaned a 14-footer by a campground.

''We really need a 'gator in the pen,'' Dufreche said. ''The alligator is Ponchatoula's official mascot as well as a major tourist attraction.

Dufreche said he still intends to notify Hardhide Jr.'s relatives of his demise.

''When the alligators come out of hibernation, we'll notify Hardhide Jr.'s son that he's next in line for the succession.''

#90026u1397 01/26/1990 ~United Press International

BRUSSELS, BELGIUM (JAN. 26) UPI - Prime Minister Wilfried Martens assured NATO allies Friday that Belgium is only studying an eventual withdrawal of its forces from West Germany in view of a possible accord at East-West conventional forces talks.

Martens said he made the statement at the request of Defense Minister Guy Coeme, who earlier discussed the possibility of a withdrawal of the 25,000 Belgian troops in West Germany.

Coeme was quoted Thursday in the daily De Standaard as saying the withdrawal of Belgian troops is likely because of the changes in Eastern Europe and that he had instructed the general staff to ''work out different scenarios.'' He said the withdrawal would save Belgium $74.1 million.

A NATO spokesman reacted by recalling the alliance view that troop reductions should be carried out only under binding arms control agreements between East and West and that such adjustments ''are the subject of consultations and cooperation within the alliance.''

West German and British government spokesmen also said such matters should be discussed in the framework of NATO.

Martens reassured Belgium's allies by saying, ''It's only a question of being ready in case the problem would be raised in the alliance or during

the disarmament negotiations in Vienna.

''It's a request to the general staff to study the scenarios for restructuring the armed forces, including the one which envisages a possible withdrawal of the Belgian troops from the German Federal Republic and taking into account all the hypotheses of modification in the threat '' Martens told reporters Friday after a weekly Cabinet meeting.

''It would be a mistake of management not to prepare for such a possibility, given the importance of the investments, the buildings, the number of families concerned,'' he said.

The Belgian troops in West Germany are responsible for defending a 37-mile wide sector from the East German border to the Belgian border near Aachen. There are about 50,000 Belgians in what has been called the country's 10th province, including dependents.

#90026u1398 01/26/1990 ~United Press International

TORONTO (JAN. 26) UPI - Pennington's Stores Ltd., a large size women's retail chain, decided to close its United States operations to cut its losses after 10 years of business, a company executive said Friday.

William Farewell, vice-president, treasurer and chief financial officer at Pennington's, said the closing of the chains' 20 remaining stores will be completed by June.

Farewell said Pennington's outlets, located in Chicago, Texas, Florida and the U.S. northwest corridor, were not profitable. He said losses reported in the company's second-quarter results last October had more than doubled from the previous year.

Pennington's said it estimated it would incur a one-time loss of about $3.4 million from the discontinued businesses for the year ending Feb. 3.

Pennington's entered the U.S. market 10 years ago, opening two or three stores a year, Farewell said.

Last year the company decided to reorganize its U.S. operations and opted to close the stores after failing to find a suitable buyer. Pennington's said it wanted to close its U.S. operations in an orderly fashion by June 30.

Two other stores were shut down at the end of December after their leases expired.

Farewell said the current retailing environment in the United States led

the company to conclude its operations were not likely to change in the forseeable future.

Pennington's had operated in Canada for 50 years and has 164 stores across the country.

#90026u1406 01/26/1990 ~United Press International

MAYS LANDING, NJ (JAN. 26) UPI - Atlantic City Mayor James Usry, who is running for re-election despite a bribery indictment, pleaded innocent Friday to charges that he received $6,500 in payoffs in return for promising to aid a business venture in the gambling resort.

The mayor, 67, is accused of accepting a $6,000 bribe and a $500 campaign contribution from a local businessman seeking city approval for running electric carts for tourists on Atlantic City's Boardwalk. The businessman was working undercover for state police.

Usry, president of the National Conference of Black Mayors, is one of 14 Atlantic City public officials or businessmen charged in a series of racketeering and influence-peddling schemes that authorities said showed the ocean gambling resort's local government was ''up for sale.''

All but three defendants have now been arraigned. The remaining three defendants were scheduled to be arraigned next week.

The mayor, wearing a blue pin-striped suit and red tie, remained silent during his brief arraignment before Atlantic County Superior Court Judge Manuel Greenberg.

Usry's attorney, Raymond Brown of Newark, entered a plea of innocent on the mayor's behalf.

Later, after meeting for an hour in a closed conference room with Brown, Usry, the resort's first black mayor and one of the nation's few big-city black Republican mayors, hustled from the courthouse with a small entourage that included his wife, Laverne.

''I feel excellent,'' Usry said as he strode down the corridor followed by a swarm of television cameras, photographers and reporters.

In answer to a shouted question as to whether he believed he would be acquitted, Usry said, ''I feel very confident.''

Because Greenberg entered a gag order prohibiting attorneys from discussing the case with the news media, Brown also had little to say, except to echo Usry's sentiment that he believed the mayor would be

exonerated.

Usry, a former school district administrator, faces a maximum sentence of 36 1/2 years in prison and $315,000 in fines if convicted.

The mayor announced on Monday he would seek re-election in May's non-partisan city election, saying he was the ''most qualified to ... act in the best interests of Atlantic City.''

Usry swept into office as a reform candidate in a 1984 recall election in which his predecessor, Michael Matthews, was ousted. Matthews later pleaded guilty to corruption charges.

Usry won election to his first full term in June 1986.

(JAN. 26) UPI - Indonesia has severe flooding because of heavy rain. One official says at least 37 people were killed and three others are missing today after a river overflowed its banks on central Java island. Thousands fled their homes for higher ground.

Researchers are calling for more studies of the possibility that low-level electromagnetic radiation from computers and even electric blankets can hurt people's health. The Massachusetts Institute of Technology and the National Institute of Standards and Technology issued the call.

A study group set up by the American Petroleum Institute says U-S oil companies should go ahead with their plan to set up a nation-wide cleanup strike force to respond to major oil spills. But the A-P-I says Congress must protect oil companies in the strike force from liability.

Atlantic Richfield says it WON'T give up trying to develop a major off-shore oil development in California's Santa Barbara Channel. A judge in Los Angeles ruled that a state commission has the right to block the development. But ARCO says it will appeal.

A drug cartel hit squad in Colombia says it has freed its ''last hostage.'' The hit squad allegedly run by the Medellin cartel apparently freed the captive in order to persuade the government to negotiate. The cartel wants an UNspecified list of ''guarantees'' that might end Colombia's war against the cartels.

China reports a strong undersea earthquake in the South China Sea today. But China's news agency says there are NO reports of casualties or damage. China says the quake hit southwest of a remote island that lies between Vietnam and the Philippines.

Cuba says it has stopped withdrawing its troops from Angola. Cuba's ambassador to the United Nations says the pull-out was halted to protest attacks by U-S-backed rebels in Angola. The foreign minister of Angola is planning to meet with his South African counterpart to discuss the withdrawal.

Postmaster General Anthony Frank says the Postal Service will hire a private consultant to evaluate its operation. Frank says the consultant will cost three-Million dollars over three years. He says a study the post office itself did last year found that people want less speed and more dependability.

BY VERNON SCOTT

HOLLYWOOD (JAN. 26) UPI - Pauline Collins, the title star of ''Shirley Valentine,'' flew from London to Beverly Hills to attend the Hollywood Foreign Press Association's Golden Globe Awards.

She lost.

The middle-aged, slightly plump Collins had been nominated for best performance by an actress in a comedy or musical for her performance as a discontented English housewife who discovers a new life on a trip to Greece.

It was a superlative performance that won uniform praise from critics.

But at the Golden Globes she lost out to Jessica Tandy's remarkable performance in ''Driving Miss Daisy.''

In another category, the Golden Globe for best actress in a drama went to Michelle Pfeiffer for her role as the sultry vocalist in ''The Fabulous Baker Boys.''

Doubtless Tandy and Pfeiffer will be nominated next month for the Academy Award for best actress of the year.

And there is a strong possibility Collins also will be nominated.

The question is, how will the 4,700 voting academy members weigh one performance against the other if they all are nominated in the same category?

All three were outstanding. How do you choose?

Frequently box-office success is a factor in the nominations, but not this year. ''Shirley Valentine'' has grossed only $5.9 million on a handful of American screens. ''Driving Miss Daisy'' isn't doing much better with $9.1 million. ''The Fabulous Baker Boys'' isn't that fabulous with $17.4 million in the till.

But there are other factors involved.

Pfeiffer has contractual agreements for future films with several studios, which might be enough to sway votes in her favor. She's also young and gorgeous, which rarely hurts.

Tandy, 80, is a veteran campaigner who might win the sentimental vote because this could be her last chance at an Oscar.

Collins apparently has only her performance going for her. That is considerable, though, because without her there would be no ''Shirley Valentine,'' whereas Pfeiffer and Tandy were not called on to carry their films almost single-handedly.

If there is a slight advantage for Collins it is that many millions of middle-aged, overweight women can and do relate to her portrait of Shirley - the loneliness, the rebellion, the insecurities.

Collins is a refreshingly candid Englishwoman who, naturally, would enjoy a nomination. But it won't crush her if she does not.

''Oscars are wonderful when you get them,'' she said. ''But they're also wonderful if you don't.

''I think pitting actresses against each other is a sad thing. Above all, this profession is about cooperation. Not competition.

''We do our best when we're working well together. That was demonstrated in a wonderful picture, 'Steel Magnolias.' I wish there were a prize for the total performances, because I don't see how you could single out any one of those actresses. They were beautiful together, a result of magical cooperation.''

On the other hand, Collins' portrayal of Shirley Valentine was a bravura solo. She was not a member of a chorus. Shirley was an aria, not a duet (Driving Miss Daisy) or a trio (The Fabulous Baker Boys).

Whenever possible, Collins dodges conversations about the awards and the accolades that have been hers since playing Shirley - first on stage in London and New York and finally in the movie.

''I wish I were able to accept praise more graciously,'' she said, ''but I find it most difficult. It's a gift and one should accept it well. It would be nice simply to say, 'Thank you.'''

Since ''Shirley Valentine's'' release, Collins has become a hot property. She even has been asked to star in three different American television series.

''I'm seeing a good many scripts that never would have come my way before '' she said, smiling, ''but I have found only one that I feel may be right.

''What I've agreed to do is a very intimate love story of a middle-aged woman with a young man in his teens. It's set in Italy and will be produced for very little money.

''I found it to be the most appealing story and challenging role of them all. It will be an English production and I will earn almost nothing compared to what Hollywood pays.

''But the important thing is the quality of the film, isn't it?''

WASHINGTON (JAN. 26) UPI - Rates for 30-year fixed mortgages rose 0.15 percentage points this week while adjustable-rate mortgages rose by 0.02 percentage points, the Federal Home Loan Mortgage Corp. said Friday.

The agency, which buys mortgages from lenders and packages them as securities for sale to investors, said interest on fixed-rate loans rose to 10.05 percent this week, from 9.90 percent the week before. Adjustable-rate mortgages averaged 8.41 percent, up from 8.39 percent last week.

The fixed-rate average is for a 30-year loan covering 80 percent of a home's cost. The average adjustable-rate mortgage also is for 30 years but for 75 percent of the home price.

WASHINGTON (JAN. 26) UPI - Non-oil commodity prices dropped 2.4 percent on international markets in December, and lost 1.5 percent during 1989, the World Bank said Friday.

With a 2.4 percent drop in December, the bank's non-oil commodity price index fell to is lowest level in 1989. At 85.5 - with a base of 100 for 1979-81 - the index was 17.3 percent lower than in December 1988.

For all of 1989, the index stood at 95.1, 1.5 percent below its level of 96.6 for 1988, reflecting a slower economic growth in some of the major industrial economies, in particular the United States.

The bank said that all of its sub-indexes fell in December: food to 72 from 73, fats and oils to 68.1 from 72.4, agricultural raw materials to 83.5 from 86, metals and minerals excluding steel to 106 from 110.1, and steel to 133.6 from 135.1.

In an analysis of some commodity groups, the bank said that aluminum prices slipped six percent in December due to the continuing decline in demand and increasing inventories.

A seven percent decline in copper prices reflected a growing surplus and uneasiness about the world's economic outlook. Nickel prices fell ten percent as supplies accumulated and demand weakened.

The World Bank said that sugar prices tumbled 10.7 percent despite a five-year decline in supplies, after news of unexpectedly high sugar-beet yields in the Soviet Union and reports that Brazil might reduce the amount of cane it had planned to devote to ethanol production.

Cotton prices declined 5.5 percent in December after estimates that production in the Northern Hemisphere would be revised upward.

OSHAWA, ONTARIO (JAN. 26) UPI - General Motors of Canada Ltd. said Friday it would close its assembly plants in Ste. Therese, Quebec, and Scarborough, Ont., the week of April 2, idling 5,700 workers.

At the Ste. Therese plant, 3,200 employees assemble Oldsmobile Cutlass Ciera mid-sized cars and Chevrolet Celebrity station wagons will be affected, the company announced. Another 2,500 workers at the Scarborough plant, where full-size Chevrolet and GMC vans are assembled, will be idled GM Canada said.

Last week GM announced an additional two-week layoff for the Scarborough assembly workers who have been off the job since Jan. 2. GM also said Friday the plants will indefinitely lay off 240 people at Ste. Therese and about 225 employees at Scarborough. The auto maker said "the action was necessary to balance inventories of vehicles with current North American vehicle demand."

On Monday, GM Canada said production at its Oshawa No. 2 car assembly plant would be halted for one week beginning Feb. 5, idling about 3,500 workers.

Workers at the Oshawa car plant assemble Buick Regal and Chevrolet Lumina models. On Monday, the company also indefinitely laid off about 800 workers from its Oshawa assembly plants and its Oshawa fabrication plant.

#90026u1493 01/26/1990 ~United Press International

MUZAFFARABAD, Pakistan (JAN. 26) UPI - Thousands of Moslems, some chanting ''Down with Indian aggression,'' demonstrated Friday in Pakistan's Kashmir region in support of secessionists in the neighboring Indian state of Jammu and Kashmir.

''We must be vigilant. India could start a war on the slightest pretext,'' Sardar Sikander Hayat Khan, prime minister of the semi-autonomous region of northern Pakistan, which the government calls Azad Kashmir, or Free Kashmir, told a rally of about 5,000 people in the capital of Muzaffarabad.

He charged the 14-month-old government of Pakistani Prime Minister Benazir Bhutto had adopted an ''apologetic attitude'' toward New Delhi on the issue. ''If the (Pakistan) government shows any weakness, then I cannot be responsible for what happens next,'' he said.

The crowd of mostly impoverished farmers responded with chants of ''Down with Indian imperialism'' and ''Down with Indian aggression.''

Brightly colored banners reading, ''We are ready to fight for the liberation of Kashmir'' and ''Kashmir wants a plebiscite'' adorned the tiny main square of the picturesque town nestled in a valley of the Himalayan foothills about 80 miles north of Islamabad.

News reports said demonstrations were held in other towns in Azad Kashmir Friday in observance of a ''black day'' called by the government of the northern region to mark India's Republic Day and in support of a violent campaign by secessionists and separatists in the neighboring Indian state of Jammu and Kashmir.

Authorities in the Jammu and Kashmir state capital of Srinagar, fearing heightened unrest on India's Republic Day, Friday sealed off the city with troops and police and locked reporters in a hotel under armed guard in a bid to impose a news blackout on the uprising.

Virtually all Jammu and Kashmir's 3 million Moslems support the movement, charging New Delhi reneged on promises made after the 1947 partition of the subcontinent to allow them to decide whether to remain part of India, accede to Islamic Pakistan or become independent.

Khan said in an interview with United Press International that between 50 and 60 refugee families had crossed the U.N.-monitored ''line of control''

into Azad Kashmir to escape the unrest in the past few weeks. ''If the situation continues, we will have a huge influx,'' he said.

He repeated official denials that Pakistan is backing the uprising, but said support for the secessionists was intensifying daily in Azad Kashmir.

''People here are becoming very emotional about this,'' he said. ''The pressure is growing on my administration.''

''The way the rhetoric is coming from India and Pakistan, many people here are afraid that war will break out,'' said a local journalist in Muzaffarabad. Many residents of Azad Kashmir hear official accounts from New Delhi of the unrest from Indian television news broadcasts.

India and Pakistan have fought three wars involving Kashmir since independence.

''Only a war can decide the fate of Kashmir,'' said Abdul Hammeed, a 50-year-old shopkeeper who said he had fought in 1965 and 1971 conflicts. ''The last wars were short. But this time our people will fight.''

#90026u1527 01/26/1990 ~United Press International

PORT-AU-PRINCE, Haiti (JAN. 26) UPI - The French government Friday condemned the state of siege and media censorship imposed by military ruler Prosper Avril and suspended economic aid to Haiti until the crackdown is lifted.

Avril was expected to lift the state of siege Friday but did not appear on national television for a scheduled 10 a.m. speech and there was no explanation for the delay.

Responding Thursday to a reporter who asked when the siege would be lifted Avril said, ''I think tomorrow,'' diplomatic sources said.

The French Embassy in the Haitian capital, announcing a decision made in Paris by the Foreign Ministry, said France will suspend aid to the impoverished Carribean nation until the general's military government withdraws the restrictive measures. France's annual aid is about $35 million.

A visit by France's minister of cooperation and development scheduled for this week has already been canceled.

Friday morning, Avril attended the funeral of a powerful army colonel whose assassination last week prompted him to announce a state of siege to prevent what he said was the spread of ''terrorism.'' The government also

imposed strict censorship on Haiti's independent press.

Avril, who took power in a 1988 coup, had promised a series of elections, starting with contests for local officials April 29 and culminating in presidential elections next fall. But political experts believe the crackdown on dissent will disrupt the election schedule.

The United States has threated to cut off assistance and Friday condemned the state of siege.

State Department spokeswoman Margaret Tutwiler said Avril's statements ''should be accompanied by action, including the permission for opposition leaders to return and to take part in the election process and restrictions on freedom of the press should be lifted immediately.''

''Those responsible for the beatings of opposition leaders, journalists and human rights activists should be punished. Also the government of Haiti and the army should publicly commit themselves to free and secure elections and a transfer of power to whomever is elected.''

A communique by the U.S. Embassy in Haiti said the crackdown ''constitutes a violation of freedom of speech, which is the key to the establishment of democratic systems.''

''We demand the Haitian military government to annul all extraordinary measures taken last week, which put in danger the democratic transition the government has engaged.

''The Haitian government must take measures to give faith to the Haitian peopleand the international community of its engatgment towards the electoral process,'' it said.

Dozens are believed to have been arrested and at least seven opposition figures deported during the crackdown.

A diplomatic source said four or five opposition leaders are still believed being held without charge in Haitian jails, where there are reports some of them were beaten.

The rest have been released or deported to the neighboring Dominican Republic, which shares the island of Hispanola with Haiti, or to the United States.

The interior minister has said Haiti will allow exiled opposition politicians back into the country before October's presidential election, but not until the government has had a chance to organize the local April elections.

In the government's first detailed explanation of the mass arrests and deportations, Interior Minister Fritz Romulus said the measures were taken to prevent the disruption of the elections.

''These measures will be withdrawn as soon as the situation is clear,'' Romulus said on state-run television. ''This is a temporary deportation and this will allow the military government and the permanent electoral council to organize elections for communal sections and city mayors before the upcoming presidential election.''

The state of siege also has included a clampdown on all but the government-run media. Most commercial radio stations have been closed and only one daily newspaper, Le Matin, published local news. Other papers gave only international news.

Romulus said the government was requiring Haitians living abroad to obtain an entry visa before returning to the country, including many opposition political leaders already overseas when the state of siege was announced.

Opposition leaders Sylvio Claude, a leader of the Christian Democrat Party and Gerald Philippe August, leader of the Peasants Workers Movement, were believed hiding in Haiti.

The April elections are to be only the second since Haitian dictator Jean-Claude ''Baby Doc'' Duvalier was toppled in February 1986 in a public uprising and replaced by a military junta.

Leslie Manigat was elected president early in 1988 but was overthrown in a military coup less than five months later by Gen. Henri Namphy, who in turn was ousted by Avril in September 1988.

#90026u1543 01/26/1990 ~United Press International

(JAN. 26) UPI - TODAY'S PEOPLE:

SULTAN OF THE SUBWAY: Adnan Khashoggi, the Saudi wheeler-dealer once considered the richest man in the world, is more accustomed to stretch limos than crowded subway cars but nonetheless was just another straphanger in New York Thursday. Khashoggi took the subway home after making one of his twice-a-week visits to federal authorities, fulfilling a requirement of his bail while awaiting trial with Imelda Marcos. Khashoggi didn't have a subway token so a reporter for the New York Daily News gave him one but Khashoggi still had to stand in line to buy a token for his lawyer. His fellow commuters were stunned to see him riding the IRT line but one woman boldly suggested he donate some of his wealth to the homeless. ''It's always a good idea to share,'' said Khashoggi, who pointed out that he gives a great deal of money to educational causes. A

reporter asked him if he was interested in buying New York and Khashoggi responded in true entrepreneurial style by saying, ''Is it for sale?''

TOWER OF POPCORN: The people at Paul Newman's food company celebrated his 65th birthday Friday in Westport, Conn., by baking him a 75-pound cake made from his popcorn. A spokeswoman said the cake was 5 feet, 11 inches tall to match Newman's height - although reference books list him shorter - and was made from 10 jars of Newman's Own popcorn, 10 pounds of butter, 12 boxes of brown sugar, 20 pounds of candy, 15 pounds of peanuts and 66 bags of marshmallows.

KENNEDY FOR THE PROSECUTION: John F. Kennedy Jr. is getting his first taste of crime-busting. Kennedy, 29, an assistant district attorney in New York City, helped with the investigation that led to the arrersts of five travel agency workers accused of laudering money for drug dealers. ''It's my first major case,'' Kennedy beamed. The son of President John F. Kennedy helped develop evidence and worked with undercover agents but won't be able to prosecute the suspects in court because he failed the bar exam in his first try last year. He's scheduled to take the test again next month.

ROASTED HUNGARIAN MEATBALL ON FRIARS' MENU: As if there haven't been enough jokes about her, Zsa Zsa Gabor has agreed to be roasted by the Friars Club in at the Beverly Hilton Hotel in May. Actually, Milton Berle, who will be master of ceremonies, says the occasion will be more like ''the modern version of Joan of Ark burning at the stake'' than a roast. ''Zsa Zsa isn't used to too much publicity,'' Berle said. ''We plan to send a limousine for her so she doesn't have to drive in Beverly Hills.'' Gabor, who was convicted last year of slapping a Beverly Hills cop, says she hopes her Friars friends won't be ''too rough'' on her. ''Milton wouldn't hurt me for anything,'' Gabor said. ''It is an honor to be roasted by some of the greatest men in the city.''

MUSICAL NEWS FROM NEW ORLEANS: Harry Smith, the co-anchor of CBS's ''This Morning,'' may have found a new calling. Smith is in New Orleans for this weekend's Super Bowl and on Friday morning's broadcast he left his anchor spot to play the Sousaphone, a member of the tuba family, with a jazz band. Afterward, Smith rejoined his partner, Kathleen Sullivan, and reminded her that she had encouraged him to make music when they were covering the 1988 Republican National Convention in New Orleans. ''I rediscovered what may be my true calling in life,'' Smiths said Asked Sullivan, ''Well, would you think of that as an altyernative career ?'' Smith laughed, ''I may have to.''

#90026u1557 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - Vice President Dan Quayle, hoping his reception

''is a good one,'' headed to Latin America Friday with messages from President Bush for leaders still perturbed about the U.S. invasion of Panama.

''My message will be one of friendly consultation, (of) moving democracy forward,'' Quayle told reporters as he met with Bush for lunch before leaving for the three-day mission to Honduras, Panama and Jamaica.

Bush, who said on Thursday he was certain ''things are better'' in the region since he ordered U.S. troops into Panama Dec. 20, dispatched Quayle on the mission of diplomatic damage control.

But what was originally billed by the president as ''very, very important'' diplomacy has been pared in scope by resistance from some Latin American leaders unwilling to play host to Quayle at the present time. Bush conceded Thursday he still has ''diplomacy ahead.''

Quayle heads first to Tegucigalpa, Honduras, where he will attend the inauguration of President-elect Rafael Leonardo Callejas Saturday. There, besides meeting privately with Callejas, aides said he will sit down with Guatemala's Vinicio Cerezo, Venezuela's Carlos Andres Perez, Costa Rican President Oscar Arias, El Salvador President Alfredo Cristiani, Spanish Prime Minister Felipe Gonzlez and Belize Prime Minister Manuel Esquivel.

But Mexican President Carlos Salinas de Gortari, one of Bush's biggest invasion critics, is on a previously scheduled eight-day, five-nation European tour and will not be attending.

''No one said no who is going to be there,'' Quayle's spokesman said of the efforts to set up meetings with hemispheric leaders attending the inaugural.

Quayle will then travel to Panama as Bush's highest-level envoy sent since the U.S. invasion that ousted Gen. Manuel Noriega, who is now being held in Miami facing drug charges.

The vice president carries with him details of a new $1 billion aid package of loans, credits and grants proffered by Bush Thursday to help Panama rebuild its stricken economy.

''I hope the reception is a good one,'' Quayle told reporters at a photo opportunity before he was scheduled to leave for Miami, the first overnight stop on his journey.

The promise of U.S. aid guaranteed him a warm welcome at least in Panama, where withdrawal of U.S. troops continues but where reports of violence against Americans have been on the rise. Newly installed President Guillermo Endara, who Quayle will confer with, called the aid ''generous.''

Asked, however, if other leaders in the region had come to terms with the invasion, Quayle said: ''I'll find out when I get there. But they're ready to sit down and discuss it.''

He made his remarks after lunch with the president, who on Thursday said he felt the initial condemnation of U.S. gunboat diplomacy had eased. ''Because of what's happened since the fighting began, things are better '' Bush told reporters. ''Some of it may be just that time heals ... (but) they have been informed ... as to what our intention was, what the cause was.''

Quayle said Friday his marching orders from the president were, ''Do a good job,'' and added that he will carrying ''some personal messages from Bush, some written, some oral.''

''I anticipate they'll (the meetings) will go well,'' Quayle said.

(JAN. 26) UPI - The Commerce Department cited lower personal consumption expenditures for slowing the nation's economic growth to a modest five-tenths of one percent in the fourth quarter. That's the lowest quarterly rate in nearly four years. In the third quarter, the G-N-P... which is the value of all U-S goods and services... increased three percent, or slightly more than 30-BILLION dollars.

The Commerce Department says orders for durable goods rose by two-point-five percent last month... or three-BILLION 200-Million dollars... to 133-point-five BILLION dollars. The government cited strong gains for new orders for transportation equipment, which rose nearly nine percent. Durable goods are those that are expected to last more than three years.

Amateur radio buff Anthony Roscati says he tuned into what may have been the last transmission of a Colombian jetliner carrying more than 150 people. TheAvianca Boeing 727 crashed last night on Long Island after its second approach to Kennedy International Airport. Roscati says the pilot radioed that the plane had lost power in two engines and was low on fuel. The plane crashed moments later. At least 59 people were killed.

The strife between the Soviet republics of Moslem Azerbaijan and Christian Armenia has turned up in Moscow. The Soviet news agency Tass says an armed group stormed the Azerbaijani mission in Moscow last night and took a prisoner. Tass says 12 to 15 men armed with submachine guns burst into the Azerbaijani Mission and left after searching the building. The gunmen were NOT identified.

(JAN. 26) UPI - Iranian news reports say Revolutionary guards killed four gunmen who tried to hijack an Iran Air Boeing 727 during a domestic flight in Iran. Tehran Radio says the attempt occurred last night when would-be hijackers took a flight attendant hostage and tried to force the pilot to fly the jetliner to an unspecified destination. Reports say NO passengers were hurt.

Federal Reserve Chairman Alan Greenspan told a House panel that the United States needs foreign investment to keep the standard of living at a level to which Americans are accustomed. Greenspan attributed the rise in direct foreign investments to a substantial decline in the U-S savings rate. Officials say foreign investments grew by more than 700 percent between 1975 and 1988.

Three Philippine senators filed a resolution calling for early elections. The resolution proposed moving elections for president, vice president and members of the Senate and the House of Representatives up six months from May 11th, 1992, to November 11th, 1991. Bill sponsors cited the popular outcry following the bloody coup attempt last month against President Aquino.

Illinois Attorney General Neil Hartigan is filing suit against a former Ku Klux Klan member and others who collected money for AIDS victims. Hartigan's suit maintains that the accused fraudulently solicited donations for private profit. Hartigan says the defendants failed to tell contributors that only nine cents a day from collection cannisters would go to the charity.

#90026u1576 01/26/1990 ~United Press International

(JAN. 26) UPI - Residents of Britain and Northern Europe recovered Friday from a devastating storm which hammered the region with hurricane-force winds, killing at least 92 people and inflicting hundreds of millions of dollars worth of damage.

The Thursday tempest wreaked destruction in Britain, where gusts exceeding 100 mph blasted down rows of trees, ripped roofs off buildings and swept vehicles from roads.

Meteorologists reported the storm was grinding eastward toward the Baltic states and would probably dissipate when it entered the Soviet Union later Friday. Aiports and ferry services were closed in Sweden as the storm struck.

Police and news reports in Britain said at least 45 people had been killed mostly by falling trees and in motor accidents along slippery roads.

The storm rolled across the English Channel and pounded the Netherlands, leaving 20 people dead. A Danish sailor was confirmed drowned when a trawler sank in the North Sea, and at least seven other seamen were reported missing and feared dead.

Weather-related accidents claimed 10 lives in Belgium, eight in France and eight in West Germany. The storm - the worst to hit Britain since an October 1987 hurricane - also injured hundreds of people across Europe.

The British Broadcasting Corp. reported remote regions could be cut off for at least one month because local councils were so overstretched. Preliminary damage estimates had reached $1.33 billion, and some 3 million people remained without electricity, it said.

Most of the deaths were caused by falling trees or collapsing roofs. A giant stone sphere fell through a roof at a school in western Bristol city killing a 16-year-old schoolgirl, and two students died at other schools in the area.

''I think everything is being done that possibly could be done, and people are responding well,'' Prime Minister Margaret Thatcher told reporters. ''Our deepest sorrows to those who just suddenly their lives changed for them because of this terrible tragedy.''

Tens of thousands of office workers in London were forced to remain overnight in the capital because of canceled trains, but authorities reported most transport services had been reinstated, many at reduced schedules.

The government announced it would compensate local councils for 75 percent of any storm damage payments. Insurance companies were swamped with calls

from clients making claims, and experts predicted the final cost could be higher than the 1987 hurricane because the storm swept over a wider area and occurred during the day, when more people were outside.

Dutch meteorologists said the storm was the worst to hit the Netherlands in 10 years, and the low-lying region was hammered by winds that crushed cars, destroyed buildings and brought life to a standstill. A spokeswoman for the National Insurance Information Office said the damage would take weeks to appraise, but would probably run into the hundreds of millions of dollars.

The storm sparked a fire at a luxury hotel in the coastal town of Noordwijk, 10 miles north of The Hague, and three firemen died battling the blaze.

Much damage was inflicted on Holland's extensive horticulture industry, and many greenhouses were reduced to metal skeletons and surrounded by shattered glass.

Belgian and West German military helicopters worked through the night to pluck 56 sailors from a Soviet ship that sank in the North Sea. At least two other vessels were sunk in the turbulent seas, and East German officials reported they had dispatched rescue teams to assist foreign boats endangered in their national waters.

West German authorities evacuated one coastal village threatened by floods from a broken dike, and thousands of police and firefighters worked through the night fighting storm-related problems in northern and western areas.

French officials said winds reaching 108 mph pounded the northern areas of Brittany, Pas-de-Calais and Ile-de-France, sending firemen out on more than 6,000 emergency calls.

Belgian authorities moved to repair damage from the storm, which claimed at least three church steeples among the numerous structures blasted down by the winds. They reported the storm abated during the night, but 55-mph gales Friday morning still lashed the North Sea coast.

Danish authorities fought to block several breaches in the nation's dike network, but reported they controlled the threat after losing many sheep trapped in flooded pastures.

#90026u1580 01/26/1990 ~United Press International

CHICAGO (JAN. 26) UPI - The grain market fell to session lows late Friday on widespread selling ahead of the weekend.

Grain and soybean futures were mostly lower at the close on the Chicago Board of Trade in relatively thin volume.

Soybeans were higher much of the day on short-covering and ideas the market was oversold, then gave up the gains during the closing minutes. The weakness in the grains and the lack of trading on European markets also kept soybeans on the defensive.

Soybean oil and meal prices were virtually unchanged, although oil rallied to session highs just before the final bell.

Commercials and professionals were on both sides of the grain market but primarily were sellers. Closing grain prices were at or near session lows.

There were rumors that Egypt was in the market for 200,000 tons of wheat.

Country movement was light and basis levels were mixed.

At the close, corn was off 1 to up 1/2, soybeans up 1/4 to down 2 1/2, wheat off 1 to 4 1/4 and oats up 1/4 to off 1/2.

#90026u1607 01/26/1990 ~United Press International

WINDHOEK, Namibia (JAN. 26) UPI - The foreign ministers of Angola and South Africa held urgent talks in Namibia Friday following Cuba's announcement that it has suspended its troop withdrawal from Angola because of attacks by U.S.-backed guerrillas.

The hastily arranged meeting in the Namibian capital coincided with an Angolan government report saying 212 people have been killed in fighting in the southwest African nation in the past 10 days, including more than 100 civilians.

Emerging from nearly three hours of talks, South African Foreign Minister Roelof ''Pik'' Botha described the announcement by Cuba, which has backed the Marxist government in Angola since 1975, as ''serious.''

But he also expressed confidence the situation would be settled.

''In the past, we have lived through similar crises and we have succeeded in resolving them,'' Botha said.

Botha said he and Angolan Foreign Minister Pedro de Castro van Dunem agreed to hold a meeting as soon as possible in Luanda, the Angolan capital of the Joint Monitoring Commission. The commission is comprised of Cuban, Angolan and South African officials monitoring compliance with interlocking regional peace settlements. The United States and the Soviet

Union have observer status on the JMC.

''As you can imagine, the events in Angola affect Namibia, affect South Africa, affect the whole region - and that is why it was very important for Mr. Van Dunem and myself to meet today,'' Botha told reporters.

Cuba informed the United States and South Africa Thursday that it has supended the withdrawal of its troops to protest an attack by U.S.-backed Unita rebels in the eastern Angolan town of Lubito in which four Cubans and at least 13 other people died on Sunday.

The suspension jeopardized a U.S.-brokered regional peace package sealed in December 1988 that included a withdrawal of some 50,000 Cuban troops from Angola in exchange for South Africa accepting a U.N. independence plan for neighboring Namibia.

Pretoria also was required to cease military aid and withdraw troops from Angola that had been supporting the Unita movement of Jonas Savimbi in his 15-year battle against the Marxist Angolan government.

Some 31,000 Cuban troops already have been withdrawn and the remainder are to be pulled out by July 30, 1991.

The state-run Angolan news agency Angop said Friday troops killed 94 Unita guerrillas in scattered operations between Jan. 17 and 23, reporting clashes in six provinces across the country. In a dispatch monitored in Lisbon, Angop said the army sufferred 15 dead and 42 wounded. Some 103 civilians also died in the fighting and 73 others injured during the period.

Conspicuously absent from the dispatch was any mention of fighting in Unita strongholds in the southern province of Kuando Kubango that Savimbi Thursday charaterized as the heaviest since the civil war began.

Despite U.S. intelligence and Unita reports, the Angolan government has denied it launched an offensive in the area last month while blaming Savimbi for the failure of cease-fire negotiations.

#90026u1619 01/26/1990 ~United Press International

VIENNA (JAN. 26) UPI - Romanian leader Ion Iliescu rejected calls for the resignation of his government, saying attempts to undermine its authority ''spell great danger for the country's fate,'' the official Rompres news agency said Friday.

Iliescu, in a nationally broadcast speech, also issued his strongest warning yet against what he termed a ''tendency to separatism,'' a

reference to resurgent nationalism among some of Romania's ethnic minoritites.

The speech Thursday followed a barrage of attacks against the ruling National Salvation Front from fledgling opposition groups hoping to take its place at the head of the government following democratic elections scheduled for May 20.

Three leading opposition parties have been clamoring for the ruling National Salvation Front to resign its leadership posts since the Front's announcement Tuesday that it intends to participate in the polls.

''For all its weaknesses and shortcomings, the National Salvation Front is the only structure, very frail still, that bears the brunt,'' Iliescu said in the speech, carried by Rompres Friday. ''The collapse of this structure means pushing the country to chaos.''

He urged opposition parties to ''forget about political passions and electoral ambitions,'' at least for the moment, in the interests of national stability.

Iliescu defended the Front's decision to put up candidates in the May 20 elections, saying no other group currently on the political horizon had the know-how and experience needed to run the government.

''The historical parties' call as well as some similar opinions in press articles for overthrowing or destabilizing the Front spell great danger for the country's fate,'' he said.

Another threat to the country's stability is a resurgence of nationalism, said Iliescu, citing increased tensions between ethnic Hungarians and the majority Romanian population in western Romania. He gave no specific examples.

''These last few days we have been alerted by many worrying phenomena in some counties in Transylvania regarding the tendency of separatism that causes tension and conflict between Romanian citizens and those of Magyar (Hungarian) nationality,'' he said.

''It is a shame such tensions are fueled, after the revolution had brought to the fore the common interest of the Romanians and the national minorities in overthrowing the dictatorship,'' he said.

Former dictator Nicolae Ceausescu, who was driven from power last month in a violent pro-democracy revolution, aggravated ethnic tension in the region through his policy of forced assimilation, in which entire villages were leveled to erase their ethnic character.

#90026u1627 01/26/1990 ~United Press International
NEW YORK (JAN. 26) UPI - The role of the plane's fuel level and whether malfunctioning or misinterpreted gauges caused the crash of Avianca Flight 052 must be determined by investigators, aviation experts said Friday.

There were conflicting reports the Boeing 707 might have run out of fuel or had to dump fuel before it crashed Thursday night in Cove Neck, N.Y., but investigators refused to speculate publicly on why the plane crashed.

One of the key bits of evidence concerning the fuel came from a ham radio operator who said he monitored what may have been Flight 052's last transmission, which said, ''Avianca 52, we've just lost engines. We're low on fuel, requesting priority clearance.''

Officials said that even though the plane was making its second try at landing at John F. Kennedy International Airport after circling the airport for an hour and then aborting its first landing attempt, it would be extremely unusual for it to run out of fuel.

Rescue workers said there was no evidence the plane caught fire after the crash, leading to additional speculation there was little fuel on board.

Federal Aviation Administration regulations require planes to carry enough fuel to complete the flight to their scheduled destination, plus extra fuel to travel to a nearby airport if necessary and enough fuel to fly an additional 45 minutes after that, said Joanne Sloan, an FAA spokeswoman.

These regulations also apply to foreign carriers, such as the Colombian airline, flying to U.S. destinations.

The plane that crashed was more than 20 years old. Because it may have undergone modifications since it was built, it was unclear what kind of instruments were installed in its cockpit to monitor its fuel level, said Tom Cole, a Boeing spokesman.

As the 707 was originally designed in the 1960s, fuel was monitored by needle movement, Cole said. No American airlines currently fly the 707 because it is too loud.

Most pilots are trained by the motto, ''fly by the time, not by the fuel '' because a pilot should never rely on a gauge and instead should estimate the fuel level by calculating distance traveled and fuel comsumption rates, said Kenneth Plunkett, the director of research at the Aviation Safety Institute, a non-profit organization in Worthington, Ohio.

''Rule No. 1 is 'The person who flies by the fuel gauge is going to get himself killed.' The simple rule is 'Fly time and not fuel,''' Plunkett said.

When a pilot declares a fuel emergency, the airport's control tower gives the plane priority to land, and other planes circling the airport must wait, Plunkett said.

A plane could dump its fuel before landing if one or more of its engines was crippled and the crew wanted to lighten the load for the remaining functioning engines.

Though FAA regulations are strict, airlines often try to keep fuel capacity to the legal minimum to save money. The heavier the plane, the more it costs to fly.

''There have been rumors about certain airliners actually giving bonuses to crews for keeping to fuel minimums, and there even have been cases where planes have run out of fuel on the runway (after landing),'' Plunkett said.

The most famous case of a plane crashing after running out of fuel

occurred on Dec. 28, 1979, when a United Airlines DC-8 crashed during an approach to the airport in Portland, Ore., killing 10 of the 189 people aboard.

The plane had run low on fuel after being delayed southeast of the airport at low altitude while the crew attempted to fix a malfunctioning landing gear.

After investigating the accident, the National Transportation Safety Board recommended to the FAA that it ask airlines to instruct crews about the possibility of misinterpreting gauge readings, said Ted Lopatkiewicz, an NTSB spokesman.

#90026u1636 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - The Office of Thrift Supervision said Friday it will seek a cease and desist order against Neil Bush, the son of the president, stemming from an investigation of his involvement in the failure of Silverado Banking, Savings and Loan Association.

The announcement came after Bush broke off negotiations with the agency's Enforcement Review Committee. Bush issued a statement late Thursday saying he would rather fight federal thrift regulators in court than negotiate any kind of settlement.

"In my view, a settlement agreement would leave an implication that I misbehaved as a director of Silverado," Bush said. "As I have said in the past, I have nothing to hide and I have done nothing wrong," Bush said. "Therefore, I have refused to consent to any agreement with the Office of Thrift Supervision and if they choose to bring action against me, I will fight the matter in court."

The agency will seek a hearing before an administrative law judge into charges that will allege conflicts of interest while Bush was on the board of directors at Silverado. The White House had no comment.

In a statement, the OTS said the order, if granted, "would direct Bush not to engage in actions that would constitute a conflict of interest should he ever again serve with a federally insured financial institution." The hearing process could take up to a year to complete, the agency said. The OTS is the new regulatory agency set up to police savings and loan institutions as part of the multibillion-dollar thrift industry bailout.

Bush, 34, has met with OTS investigators during the past two weeks. On Wednesday, the agency announced it had postponed a decision on Bush's fate for at least ten days.

The conflict of interest questions concern Bush's dealings with Denver real estate developers Bill Walters and Kenneth Good, who invested in Bush's independent oil business, JNB Exploration, in 1983 and 1984.

A bank owned by Walters, Cherry Creek National Bank, made a $1.25 million line of credit available to JNB. Good, who now lives in Florida, had guaranteed a loan from Cherry Creek National to JNB. After Bush joined the Silverado board of directors, the thrift made large loans to both Walters and Good.

In the statement, Bush said his relationships with Good and Walters did not affect his actions as a Silverado director. He said he voted to approve a loan to Walters, but abstained from voting on all matters concerning Good.

Bush said Walters had a "passive" limited partnership interest in JNB, but Good had a more "active interest" in the financing and management of the company.

"Both Walters and Good's relationships with Silverado, as borrowers and preferred shareholders, were established before I became a director in mid-1985," Bush said. "Their relationships with my company, which began in 1983, also preceded my Silverado board appointment."

The agency said it would not seek to bar Bush from the banking business, but will instead try to restrict him from ever again engaging in the kinds of practices they allege damaged Silverado. "This decision was based on the evidence gathered to date from the OTS investigation following Silverado's failure," the agency said.

So far, five former directors or officers of the collapsed Denver thrift have signed consent orders banning them from the savings industry for life unless they get regulatory approval.

Bush served on Silverado's board from 1985 to August 1988, when he resigned after citing possible conflict of interest with his father's presidential campaign.

Four months later, Silverado collapsed and was taken over by federal regulators. The cost of protecting the thrift's depositors from losses is estimated to cost taxpayers as much as $1 billion.

WASHINGTON (JAN. 26) UPI - President Bush Friday told Congress Friday Panama is ''fully cooperating'' in the war on drugs, paving the way for assistance in the aftermath of the U.S. invasion.

In a letter to Congress, Bush said, ''In addressing the urgent issues connwected with rebuilding virtually every aspect of Panamanian society since coming into office, the government of President Guillermo Endara has made the war against drugs a centterpiece of its program.''

He said the Panamanian leaders demonstrated their commitment by cooperating in returning deposed dictator Manuel Noriega to face trial in the United States, by freezing hundreds of bank accounts at U.S. request, and by concluding a comprehensive narcotics control agreement with the United States.

''I am convinced that the Panamanian people and their government recognize that it is in their direct national interest to end their association with the scourge of drugs,'' he said.

''Bush said he has concluded that the vital interests of the United States ''require that assistance and benefits be provided to Panama, and that the United States support multilateral development bank assistance to the country.''

#90026u1699 01/26/1990 ~United Press International
MOSCOW (JAN. 26) UPI - Azerbaijani nationalists have 40,000 men under arms and intend to take power but their militant political leadership is being crushed by Soviet troops, Soviet Defense Minister Dmitry Yazov said in an interview published Friday.

A crackdown on the top members of the Azerbajani nationalist movement stepped up Friday with one of its leaders arrested in Moscow. The military has outlawed the Azerbaijani Popular Front's national defense committee. Members of that military arm have said they were going underground to carry on an illegal struggle.

Yazov said the front had 50 taxi cabs with radios cruising the Azerbaijani capital of Baku and reporting Soviet troop movements to a nationalist-controlled mother ship in Baku Bay as part of a makeshift intelligence network.

''According to our estimates, about 40,000 militants armed with submachine guns, rifles of all sorts, machine guns and shotguns are loose in Azerbaijan," Yazov told the evening newspaper Izvestia in an interview in Baku.

He said 80 leaders of the nationalist Azerbaijani Popular Front have been arrested and their offices searched. Many army uniforms were found, but many of the nationalists went underground, the defense chief said.

Television footage of captured weapons around the Nagorno-Karabakh region showed that the Azerbaijanis possessed long-range artillery that they used for bombardments. Soviet news reports said both sides used armored personnel carriers and in one case a helicopter, its army markings effaced.

Yazov said the nationalist Popular Front had been preparing to seize power and had been confident of its success before Soviet troops intervened.

''The army's actions are directed to breathing new life into Baku's fading economy, confiscating weapons from the population and destroying the organizational structure of the Popular Front leaders, who are rushing to seize power,'' Yazov said.

The official news agency Tass said at 11:30 p.m. Thursday, 12 to 15 men, some wearing armored vests and helmets and carrying submachine guns, burst into the Azerbaijani diplomatic mission in Moscow. Each Soviet republic maintains a diplomatic mission in the capital.

Tass said the group, which was not identified, locked the Azerbaijani representatives into a room, searched the building and then left.

But at 2:30 a.m. Friday, Azerbaijani representatives told Tass the attack was repeated after the KGB agents investigating the initial incident left. This time, the attackers stuffed the Azerbaijanis into cars, drove them away, then freed all but Etibar Mamedov, a leader of the republic's nationalist Popular Front.

Vulgar Halilov, a medical student who was at the mission, told Radio Moscow's Interfax service a different story. He said the assault group wore the uniform of ''Spetznaz,'' or crack special forces troops.

He said they methodially sealed off the premises in a professional manner and exited with prisoners in tow.

Tass and Foreign Ministry spokesman Gennady Gerasimov later said Mamedov, 33, was arrested in Moscow after he had arrived from Baku. He was seized on suspicion of trying to organize Azerbaijani activist groups and preparing anti-state acts.

There were at least two more armed clashes elsewhere Friday in Azerbaijan, where majority Moslem Azebaijanis are battling minority Christian Armenians. But the Azerbaijani blockade of railroads appeared to ease with trains arriving at Stepanakert, capital of Nagorno-Karabakh. Telephone communication was restored to Stepanakert for the first time in a week.

A cease-fire took tenuous hold Friday along the border between Armenia and Azerbaijan after a week of fighting between Azerbaijani militants and Soviet troops, who stormed Baku last Saturday. The Ministry of Interior said the week-long death toll had risen to 98.

Baku was still under a state of emergency. Soviet troops confiscated weapons in what appeared to be a mopping-up operation by the 24,000 regular army and Interior Ministry soldiers and sailors in the area, but tanks no longer guarded government buildings, Tass said.

The news agency also said the oil-processing city was experiencing gasoline shortages. Long lines formed at gasoline pumps. Residents also lined up outside food stores. The longest lines, it said, stretched at the kiosks for the first issues in a week of the chief newspaper of the region, Bakinski Rabochi, or the Baku Worker. A strike had shut the paper's plant.

Tass also said some enterprises were working, indicating the avowed open-ended general strike, now in its fourth day, was weakening.

NEW YORK (JAN. 26) UPI - Super Bowl Sunday is the second most popular party time in the United States, just after New Year's Eve, a survey by the House of Seagram said Friday.

The survey, which ranked nine celebrations among the events providing the best opportunity for big parties, did not include Christmas and Thanksgiving, regarded as family events.

About 62 percent of the U.S. population participate in New Year Eve's parties, 37 percent do their partying on Super Sunday, 30 percent on Halloween and 20 percent on St. Patrick's Day, the nationwide survey said.

The survey shows that women, which account for 40 percent of football fans are very much into Super Bowl parties and account for 34 percent of the Super Sunday partygoers.

Super Sunday means party time not only for young people, with 25 percent of the people planning to celebrate on Jan. 28 estimated to be in their 50s or older, the survey said.

Super Sunday's popularity does not reflect solely a growing interest in football, but rather an eagerness by Americans to get together and celebrate - no matter what the occasion, the survey said. It noted that 85 percent of the people polled said they just love going to parties.

Although the survey gave no average figure for what Americans spend on parties, it said the budget has doubled over the past five years, whether it was initially $20 or $200. Americans also spend one-third more time holding parties, with a current average of eight hours devoted to shopping cooking and cleaning.

Hosts insist on higher standards for their parties and buy quality foods and drinks, and are also devoting more attention to detail, the survey added.

For Super Sunday, a line of party products licensed by the National Football League included trays to make football-shaped icecubes, as well as cups, napkins, dishes and trash cans bearing the league's emblem.

Two other sports events are among the occasions for big parties: the World Series, attended by 17 percent of the population, and the Kentucky Derby, 7 percent, the survey said.

Partygoers also celebrate on Valentine's Day (14 percent), Mardi Gras (4 percent) and the Academy Awards night (3 percent).

The nationwide poll of 1,001 people with income of more than $25,000 was conducted by New York-based Research & Forecasts, Inc. for the House of Seagram, the marketing unit of Joseph E. Seagram & Sons Inc., the spirits manufacturer based in Montreal.

#90026u1761 01/26/1990 ~United Press International
JUNEAU, Alaska (JAN. 26) UPI - A Coast Guard vessel ran aground in the Wrangell Narrows of southeast Alaska, marking the third time in two months a ship has hit bottom there, the Coast Guard reported Friday.

The 180-foot cutter Planetree, which ran aground Thursday night and began taking on water, appeared out of danger Friday despite a 5-foot gash in its hull after other Coast Guard vessels rushed to assist.

At one point, 15 feet of water filled the ship's main hold, but six pumps managed to decrease the water level to 3 feet inside the ship, Robinson said.

None of the Planetree's 55 crewmen was injured and no fuel leaked, the Coast Guard said. The cause of the grounding was under investigation. The 47-year-old ship is homeported in Ketchikan, Alaska.

Three Coast Guard vessels were dispatched to help the Planetree, which was refloated and anchored while flooding was controlled, Robinson said.

Earlier this month, the Canadian tank ship Frank H. Brown ran aground in the Wrangell Narrows and spilled an estimated 57,600 gallons of gasoline in the waters. The 400-foot fuel tanker grounded because of a judgment error, the skipper told the Coast Guard.

The same ship ran aground in Wrangell Narrows two years ago when it hit an uncharted rock.

Last month another Coast Guard vessel, the Naushon, ran aground farther north in Wrangell Narrows.

#90026u1764 01/26/1990 ~United Press International
CAPE CANAVERAL, FL (JAN. 26) UPI - The space shuttle Columbia, carrying a

rescued science satellite in its payload bay, returned to the Kennedy Space Center Friday after a two-day piggy-back flight from California atop a NASA jumbo jet.

The 747 transport jet and its $2 billion cargo touched down on the spaceport's 3-mile shuttle runway about 3:30 p.m. EST, six days after Columbia landed at Edwards Air Force Base, Calif., to close out a record 11-day space mission.

Engineers planned to lower the shuttle to the tarmac late Friday and to tow it to a processing hangar for work to remove the Long Duration Exposure Facility - LDEF - satellite from the spaceplane's cargo bay.

If all goes well, the 11-ton satellite will be carefully pulled from the cargo bay Monday and mounted on a special transporter for a trip later in the week to a nearby facility where its 57 experiments will be examined by eager scientists.

Columbia blasted off Jan. 9 on the year's first shuttle mission and after a four-day orbital chase, the ship's three-man, two-woman crew completed a tricky rendezvous and caught up with LDEF for a long-awaited space rescue.

The 30-foot LDEF was launched in 1984 to expose a variety of high-tech materials to the radiation, temperature extremes and vacuum of the space environment in research to learn more about how to build longer-lived spacecraft.

NASA originally intended to rescue LDEF after just 10 months, but a series of shuttle launch delays, and, ultimately, the Challenger disaster, combined to delay the retrieval until this month - just in the nick of time.

Because of friction with the tenuous outer reaches of Earth's atmosphere, LDEF was slowly falling out of orbit. Without Columbia's daring rescue mission, the big satellite would have burned up in the atmosphere in early March.

Instead, astronaut Bonnie Dunbar, operating Columbia's 50-foot robot arm, plucked the satellite out of its failing orbit two weeks ago and pulled it into the shuttle's cargo bay for return to Earth.

Eager scientists were standing by Friday for work to remove the big satellite for the start of an exhaustive inspection.

After a detailed photo survey, the satellite's 57 experiments will be carefully removed and returned to the principle investigators for analysis.

#90026u1779 01/26/1990 ~United Press International
WASHINGTON (JAN. 26) UPI - The Energy Department said Friday it will spend $336 million over the next six years to improve U.S. energy efficiency and help industry develop renewable energy sources, ranging from ethanol fuel to solar power.

Deputy Energy Secretary Henson Moore, outlining more than half a dozen initiatives, said recent testimony at the department's National Energy Strategy hearings documented the potential of efficiency and renewable energy technologies to reduce pollution and cut energy costs.

Moore said the department estimates its initiatives could save the nation $32 billion in energy costs by the year 2000 while achieving annual reductions of 800 million tons in carbon dioxide emissions - a key "greenhouse" gas - and 2.3 million tons in sulfur dioxide, an acid rain pollutant. The department's initiatives include:

- A government-wide campaign to install more energy-efficient lighting in federal buildings. The department also said it would "examine options" for improving the efficiency of lighting in private sector commercial and industrial buildings.

- New incentives for utilities to pursue programs to reduce energy demand

by consumers. The department said it would work with the Federal Energy Regulatory Commission to "provide equal treatment of energy supply and demand-reduction options."

- A joint effort with industry to speed up the commercialization of new solar power technology. The department said new, more efficient solar power cells could be in use by utilities by the end of the decade as an additional energy source for peak demand periods.

- A public-private program to improve technology for producing ethanol, the motor vehicle fuel derived from grain. The department said it wanted to make ethanol a "fully competitive" fuel by the year 2000.

- Joint ventures with industry to demonstrate technologies that use garbage as a fuel for power production.

- Development and testing of new technology that utilizes concentrated solar energy to break down toxic chemicals, including dioxin and PCBs, into harmless by-products.

Peter Miller, an energy analyst with the Environmental Defense Fund, said the department's initiatives were a step in the right direction, but added "It's a real typical Bush (administration) proposal: There is a lot of talk, but not much cash."

Miller said the administration's plan did not include the most important efficiency measure - tougher fuel mileage standards for cars. However, he praised the department for moving to help industry commercialize new photovoltaic technology, saying the solar power market was poised for a major expansion.

#90026u1784 01/26/1990 ~United Press International

MOSCOW (JAN. 26) UPI - Estonia's parliament began its winter session Friday and legislators immediately proposed to end the guaranteed rule of the Communist Party in the Baltic republic.

In an initial vote, the deputies failed by two votes to muster the necessary two-thirds majority of the 283 votes cast to abolish monopoly power for the party. After the defeat the legislators sent the act back to committee for amendment and it will be voted on again later in the parliamentary session.

A failure in the electronic voting system added to the turmoil.

Estonia's sister republics of Latvia and Lithuania have already removed from their constitutions the articles that give the party an exclusive

right to rule. In so doing, they gave the go-ahead to multi-party systems.

A similar clause, Article 6, in the parent Soviet constitution mandates that ''the leading and guiding force of Soviet society and nucleus of its political system ... is the Communist Party of the Soviet Union.''

The prospect of a multi-party system in Lithuania and the growing power of the nationalist Sajudis movement there forced that republic's Communist Party to declare its independence from Moscow in December to avoid a trouncing in upcoming local elections.

Late last year, Mikhail Gorbachev narrowly beat back an attempt by the nation's parliament to drop Article 6. But the Soviet president has said he does not oppose modifying the article in a new constitution now being drawn up.

All Eastern European nations that have recently ousted communist governments have shed their versions of the Soviet Article 6, opening the floodgates for multi-party systems. Only Albania still grants the party sole right to rule.

BUDAPEST, HUNGARY (JAN. 26) UPI - Czechoslovak President Vaclav Havel ended a one-day official visit to Hungary Friday by signing a joint declaration with acting Hungarian President Matyas Szuros calling for improvement of mutual ties.

Havel came to Budapest following a visit to Poland Thursday where he proposed establishment of an economic alliance between Poland, Hungary and Czechoslovakia. He also visited the two Germanys earlier this month.

''The purpose of my visit to Warsaw, Budapest and Berlin was to find out how these countries can coordinate in their efforts to rejoin Europe,'' Havel said in a brief visit to the Hungarian Parliament.

The Czechoslovak president made a brief visit to the National Assembly and was visibly awed by the splendor of the baroque building, considered one of the finest in Europe.

He observed the debating deputies and, in a brief address, commented that one thing he noticed was clocks everywhere in the building, a contrast to his first visit as president to Prague Castle in Czechoslovakia.

''It meant to me that time had been standing still in Czechoslovakia,'' he said.

Havel said that Czechoslovakia views Hungary and Poland not only as neighbors, but also as nations worthy of increased attention because of their economic and political reforms.

Havel proposed a one-day meeting late in March in Bratislava with the Polish and Hungarian presidents as well as the representatives of the opposition in those countries, and also including ministers of Austria, Italy and Yugoslavia, to discuss closer cooperation.

''This meeting is to address the possibilities of a return to Europe, but also it will have to decide what kind of Europe we want to go back to,'' Havel said.

Szuros described it as ''an interesting initiative which will bring about a reorganization of the present system of ties.''

In a move to improve strained Czechoslovak-Hungarian relations over the issue of Hungarian ethnic minorities living in Czechoslovakia, Havel backed calls for Hungarians to have their own university in the republic of Slovakia.

''I acknowledge a collective right, but I abhor the principle of collective guilt,'' he said in reference to the post-war period, when ethnic Hungarians in Czechoslovakia did not have equal rights with Czechoslovaks.

#90026u1874 01/26/1990 ~United Press International
(JAN. 26) UPI - A spokesman for one of the New York hospitals that treated injured victims from last night's crash of Avianca Flight 52 says the rescue process was made more difficult because roads near its Long Island crash site were jammed. Richard Greenfield says the number of emergency vehicles, reporters and curious motorists turned what would normally have been a five-minute trip into a journey of more than one hour. At least 59 people died when the Boeing 707 crashed.

The Commerce Department this morning released preliminary fourth-quarter G-N-P figures showing the nation's economy grew a modest one-half of one percent, or five-point-two-BILLION dollars. It was the lowest quarterly rate in nearly four years. For all of 1989, officials say the real Gross National Product increased two-point-nine percent, or 118-point-two-BILLION dollars, compared with four-point-four percent or 170-point-seven-BILLION in 1988.

Another government report... this one on so-called ''big-ticket'' items built to last at least three years... shows orders rose two and one-half percent in December, to 133-point-five-BILLION dollars. The December increase was based on strong gains in new orders for transporation equipment... up eight-point-seven percent, to nearly 40-BILLION dollars. The Commerce Department also revised its November figures on durable goods orders to show a four-point-nine percent gain.

WASHINGTON (JAN. 26) UPI - The U.S. Export-Import Bank Friday said it was extending a new $10 million loan guarantee to Brazil although the Latin American nation has failed to service and repay $750 million of its $2 billion Eximbank loans.

An Eximbank official said bad loans to developing countries unable or unwilling to repay their debt resulted in a $5 billion loss for the bank by the end of fiscal year 1989, Sept. 30.

The loss mainly reflects a loan loss provision of $4.8 billion due to the "recognition of the substandard quality of the bank's $12 billion portfolio," the official said.

Brazil alone is in arrears of about $750 million which led the bank to stop issuing new loans to the Latin American nation as of last September, he said. Eximbank loans to Brazil total $2 billion, of which two-thirds were allocated to the public sector. "But we distinguish between the government and the private sector, and we will continue supporting the Brazilian private sector," the official said.

The source explained that up to $550 million of the $750 million in arrears represent loans that should have been rescheduled within the framework of two Paris Club agreements between Brazil and its creditors.

But Brazil, the world's largest debtor, never ratified the two agreements, reached in January 1987 and June 1988, the official said. Another $200 million to $250 million in arrears "were not rescheduled and should simply be paid," he added.

Late Thursday, the Eximbank said it will extend a $10 million medium-term guarantee to Bankers Trust Co. of New York to cover a Credit Guarantee Facility for Banco Frances e Brasileiro S.A. of Sao Paulo, Brazil.

The announcement was made after Brazilian President elect, Fernando Color de Mello, arrived in Washington for a thee-day official visit. Brazil's debt is $114 billion. The country is behind in its debt payments to both private and official creditors.

#90026u1926 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - A week after embattled Mayor Marion Barry turned over the reins of power to his city administrator, government leaders Friday said there has been virtually no change in the daily operation of the city.

''There's been no difference, no change,'' said Lucenia Dunn, a spokeswoman for City Administrator Carol Thompson. ''She is carrying on her own schedule as normal and has not really done anything she doesn't normally do because everything must pass through her office before going to the mayor's anyway.''

Barry placed temporary mayoral power in Thompson's hands last Friday, one day after he was arrested at a downtown Washington hotel and charged with one misdemeanor count of crack cocaine possession.

Thompson, under the city charter, does not have the legal power to sign or veto legislation or approve contracts with the federal government. Such documents are being sent to Barry in the Florida substance abuse center where he is residing for his signature.

''The ongoing management of government is usually in the hands of the city administrator,'' said City Council member Charlene Drew Jarvis, a candidate for mayor. ''This week was just another in the life of a city government.''

Council Chairman David Clarke, also a candidate for mayor, said the week was one of continuity because Thompson would run the day-to-day operations when Barry was out of town.

''She basically already had the authority the mayor gave her last Friday

'' said Clarke. ''It's all been there for years.''

Barry, 53, remained at the Hanley-Hazelden Center at St. Mary's Hospital in West Palm Beach, Fla., for substance abuse treatment. He entered the center Monday.

The council this week continued its legislative battle against drugs, with one committee stamping its approval on a bill to make it easier for landlords and citizens' associations to evict tenants who use rental units for illegal drugs.

''Everything went fine. Certainly the garbage truck came by and picked up my trash so all the workers seem to be doing what they're supposed to do '' said council member John Ray, another candidate for mayor.

''It is difficult to tell whether policy decisions or political decisions that were supposed to be made actually were,'' Ray added. ''It will be difficult to tell for at least another couple of weeks.''

Barry was arrested Jan. 18 in an FBI-police sting operation and charged with one count of possession of cocaine. An FBI affidavit filed in court claims Barry was videotaped buying and using crack cocaine.

If convicted, Barry could face a year in prison and a $100,000 fine. U.S. Attorney Jay Stephens has said the investigation is continuing.

Barry has not acknowledged using drugs, and has not revealed whether he will seek a fourth term as mayor in the nation's capital. His attorney said the three-term mayor was getting treatment for an alcohol problem.

''There's nothing good about what has happened, certainly not in an election year,'' said Clarke. ''But if it had to happen, the time of year was fortunate since Congress was out of town and the council has not yet received (next fiscal year's) budget.''

Under home rule, the city must get the approval of Congress for all legislation and the city's budget.

DETROIT (JAN. 26) UPI - General Motors Corp. plans to recall nearly 87,000 Chevrolet Berettas to replace defective door hinges, but will not act until it determines if the Chevrolet Corsica has the same problem, a corporate spokesman said Friday.

GM agreed with the National Highway Traffic Safety Administration last month to recall 1988 models of the Beretta coupe after a year-long probe by the government safety agency, prompted by hundreds of owner complaints that even included instances of the doors falling off.

GM indicated last Friday it might announce a recall of the Berettas this week, after United Press International reported the unpublicized Dec. 18 agreement between the carmaker and NHTSA. The agreement was outlined in the agency's monthly Defect Investigation Report issued last Friday.

However company spokesman Tom Pyden said GM is about to conclude its own investigation to see if the Beretta's sister car, the Corsica four-door sedan, also has defective door hinges.

Pyden estimated another 70,000 1988-model Corsicas could be involved in the recall. "If that is the case, then we would make one announcement covering both models," he said.

GM's Chevrolet division will instruct dealers to replace the upper and lower door hinge assemblies on all affected models, company spokesman J. David Hudgens said. The front-drive Beretta coupe and Corsica sedans were introduced in early 1987 as 1988 models.

#90026u1943 01/26/1990 ~United Press International

MIAMI (JAN. 26) UPI - A federal judge refused Friday to consider former

Panamanian strongman Manuel Antonio Noriega's request that he be declared a prisoner of war and transferred to a neutral country, where he would be either ''repatriated or released.''

U.S. District Judge William Hoeveler said he did not have the jurisdiction to deal with the prisoner of war issue. He also ruled that Noriega, who has been held on federal narcotics trafficking charges since surrendering to U.S. authorities in Panama on Jan. 3, would not be freed on bond.

Hoeveler refused to set bail after hearing only from federal prosecutors on the issue. Defense attorneys Frank Rubino and Steven Kollin refused to participate in the bail-setting proceedings, insisting that Noriega was a prisoner of war.

In a 26-page motion filed Friday, the defense argued that the United States does not have the jurisdiction to try Noriega and that he is a prisoner of war under the 1949 Geneva Convention. The defense demanded that he be transferred to a neutral country.

''Due to the fact that the United States has violated numerous articles of the convention as so enumerated here ... Gen. Manuel Antonio Noriega invokes the sections previously mentioned and demands that he immediately (sent) to a third country willing to accept him, from which he may be repatriated or released as per the 1949 Geneva Convention III,'' the motion said.

Filed along with the motion was a copy of a Jan. 25 letter sent by Rubino to President Bush and the secretaries of defense and state, invoking international law that would make Noriega a prisoner of war.

Whether Noriega - who appeared in court Friday wearing his Panamanian military uniform, with four general's stars on each shoulder - is entitled to prisoner of war status would have to be decided by either a panel of U.S. and Panamanian officials or a neutral panel of international authorities, Rubino said.

In refusing to grant bail, Hoeveler said, ''There is very little for me to decide. ... There has been no effort to rebut (prosecution arguments) by the defense.''

Assistant U.S. Attorney Myles Malman had argued that Noriega should not be released because he is a flight risk and a danger to the community.

The government also said it had frozen about $20 million of Noriega's assets and claimed that the money was only part of the former strongman's vast overseas wealth.

As an example of his wealth, Malman claimed that Noriega's daughhter,

Thays, deposited $1.3 million in a Panamanian bank during one day in September 1989.

''These are deposits made by a 17-year-old girl,'' Malman said. ''Unless the paper routes are extremely lucrative in Panama, I know of no other explanation (than drug trafficking).''

As other reasons to deny Noriega bail, Malman said Noriega had access to military weapons, had several loyal followers in Panama and had substantial ties to countries, like Cuba and Libya, from which the United States could not extricate him.

Rubino refused to respond to the government's allegations.

"Most respectfully, your honor, I will say his name is Manuel Antonio Noriega. His rank is four-star general, his serial number 0001," the defense lawyer said.

Rubino said the government's remarks violated Article 13 of the Geneva Convention, which prohibits public embarassment of prisoners of war.

''We have found their remarks to be demeaning, sometimes inflammatory and downright silly,'' said Rubino, who referred to Noriega throughout the hearing as ''prisoner of war Gen. Manuel Noriega.''

At his initial court appearance Jan. 4, Noriega refused to recognize the court's jurisdiction, saying he was a leader of a sovereign nation, a political prisoner and transferred illegally to the United States.

Noriega has been held in Miami on drug trafficking charges since his surrender to U.S. authorities in Panama Jan. 3.

His arrest by U.S. agents followed the ousted strongman's departure from the Central American country's Vatican Embassy, where he had fled on Christmas Eve after the Dec. 20 invasion by U.S. troops.

Noriega and 15 others were charged in a 12-count drug trafficking indictment returned Feb. 4, 1988, by a federal grand jury in Miami. If convicted, he would face a maximum penalty of 145 years in prison and a $1.1 million fine.

#90026u1963 01/26/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JAN. 26) UPI - Interior Ministry forces joined regular police patrols Friday amid rumors of a planned coup attempt involving the secret police, the recently dissolved Communist Party security force and hardline communist elements.

Interior Minister Richard Sacher, who had called the rumors ''totally unfounded'' in an interview published Friday morning, ordered the reinforcements by mid-afternoon.

Sacher appeared on nationwide television in the evening in an effort to reassure the public, and announced the Interior Ministry reinforcements would be identified by their wearing the state tricolor.

An Interior Ministry statement carried by the official news agency CTK said regular police had been reinforced ''in order to ensure the security and peace of citizens.''

A spokesman at the Defense Ministry said the army had not been put on alert.

The rumors spread following publication of a detailed account of an alleged coup plan in the independent newspaper Information Service.

The paper said that in late January or early February, ''There may be an attempt at a governmental putsch, which would be supported by a part of the STB (secret police), the former People's Militia (party police) and the apparatus of the Communist Party.

''Officers of the Czechoslovak People's Army (85 or 86 of whom are party members) are said to be able to prevent the army from taking any measures against the putsch for the first 12 or 24 hours, which would be enough to take power in all the cities of our republic,'' it said.

The newspaper, a respected former underground publication, said it had heard the same rumor from ''many levels of the security police, lawyers, and ex-Communist Party apparatchiks (bureaucrats).''

News of the rumors was also carried on the radio service of the opposition movement Civic Forum.

In an interview in the party daily Rude Pravo Friday, Sacher suggested the coup rumors could be linked to a power struggle within the secret police.

He said he had checked at four different levels and concluded, ''I think

this is a provocation. It's an attempt to disturb public opinion.''

The rumors were also denied by a spokesman for President Vaclav Havel, who was en route back to Prague following a two-day trip to Poland and Hungary.

Spokesman Stanislav Milota called the rumors an attempt at destabilization and disinformation by ''dark forces'' and urged the news media not to dramatize the situation.

The news media have carried reports of growing public concern in recent weeks as efforts to disband the secret police appear to have made little headway.

So far, only a handful of secret policemen have been arrested for their activities under the communist regime, and many citizens are convinced the organization still functions. Sacher, who has no party affiliation, has been criticized as weak and ineffectual in his post, and even afraid of it.

There is also concern whether members of the disbanded Peoples Militia have given up all their weapons.

The government issued a call Thursday that all citizens turn their weapons - including hunting rifles - over to the police until a new law on firearms is published.

Sacher told the press when he was appointed that he keeps a loaded pistol in his desk drawer.

Earlier this week, Sacher said secret police informers would not be prosecuted, and pledged to seal all files on informers.

At a meeting of 5,000 policemen Friday to form a new trade unin, they unanimously took a pledge to uphold the laws and regulations of Czechoslovakia.

#90026u1991 01/26/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JAN. 26) UPI - Jailed black nationalist Nelson Mandela objected Friday to a wave of publicity surrounding his talks with the South African government, saying public disclosure of details ''at this early stage'' was inappropriate.

In a brief statement - only his fourth officially sanctioned comment in the past 12 months - Mandela acknowledged that he authored a document published in an anti-apartheid weekly Thursday calling for ''an effective political settlement'' to the country's racial conflict.

But he said the document was drafted more than six months ago and denied he submitted it to either former President Pieter W. Botha during their unprecedented meeting last July or to his successor, Frederik de Klerk, in their talks last month.

Mandela, whose release from life imprisonment is expected shortly, said only that it was handed to a ''a team of government officials during the first half of 1989.''

Mandela, 71, concluded his statement with an objection to the intense public discussion of his talks with the government. A source close to Mandela said the document published Thursday clearly was not intended to be circulated publicly.

''As I have previously stated, at this early stage, statements to the press as a means of conducting possible future discussions is not the

appropriate course of action to promote peaceful development,'' Mandela said.

Justice Minister Kobie Coetsee, who has been talking regularly with Mandela for more than a year on his possible release, described the jailed activist earlier this week as a ''go-between'' for the government and the outlawed African National Congress in a possible prelude to full-scale power-sharing negotiations.

Mandela was sentenced to life imprisonment in 1964 on charges of plotting the violent overthrow of the white government through a campaign of sabotage by the ANC's guerrilla army, founded in 1961, a year after the liberation movement was outlawed.

In the past, Mandela has rejected offers of release conditional on his renunciation of violence as a political weapon, evidently forcing the government to accept his commitment to ''peaceful development'' as a sufficient demonstration of good faith.

De Klerk has called for talks on creating a new constitution that would eliminate minority white domination but guarantee minority rights, a proposal at odds with the ANC's long-standing demand for one-man, one-vote rule.

Still, the ANC has left open the possibility of talks with the government if de Klerk meets several preconditions, including the release of Mandela, the lifting of a 3-year-old state of emergency and the legalization of the ANC.

ANC officials in Lusaka also have rejected renouncing violence but have raised the possibility of a cease-fire if de Klerk creates a climate conducive to talks.

In a statement Friday that accompanied Mandela's, Coetsee acknowledged that Mandela had submitted on Dec. 12 a ''Document to Create a Climate of Understanding.'' He said this was the only document currently being circulated within the government.

''This document is confidential and enjoys the status of a useful background document,'' Coetsee said, apparently referring to a 10-point proposal Mandela has submitted to de Klerk laying out the framework for peace talks.

The 10-point proposal also has been submitted to the leadership of the ANC in exile in Lusaka but details have not been disclosed.

#90026u1999 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - The State Department and the Lebanese government of Elias Hrawi lost the first battle Friday as the factional dispute in Lebanon moved into the U.S. court system.

U.S. District Judge Harold Greene issued a temporary restraining order that bars the U.S. government or the Hrawi regime from evicting Abdallah Bouhabib from the Lebanese Embassy in Washington.

Bouhabib, who has been ambassador in the United States since 1983, is a supporter of the regime of Gen. Michel Aoun, the Lebanese army commander who occupies the presidential residence in Beirut and refuses to recognize the Hrawi election by the Lebanese parliament.

Bouhabib has changed the locks on the embassy's external doors and has effectively closed the embassy down by barring entry of any other diplomats.

Bouhabib was notifed in December that the U.S. government no longer recognizes his status as ambassador and will recognize the representative of the Hrawi governnment.

Greene, after hearing arguments, said he was granting a 10-day injunction that would permit Bouhabib to remain in the embassy, where he has locked out other Lebanese diplomats.

The State Department's lawyers argued that the U.S. government has both the right and the obligation to hand over the embassy property to the representative of the Lebanese government. The State Department accused Bouhabib of ''forcible entry'' by remaining in the embassy and keeping other diplomats out.

Greene said the State Department had not given Bouhabib sufficient notice to leave the premises.

The judge said he was not giving Bouhabib and the Aoun regime permanent possession of the embassy property with the ruling.

The State Department asked that it be allowed to station a security guard at the embassy to make sure that Bouhabib did not take away any Lebanese government archives or other property.

Bouhabib has told friends he will be leaving the embassy property soon, no matter how the court's final decision goes. The diplomat said if he is given permanent possession by the court, he will ask Aoun to replace him with another representative, and if he loses in the court, he will accept the order and quietly leave.

He is expected to remain in the United States and start an international consulting business.

WASHINGTON (JAN. 26) UPI - President Bush met Friday with Brazilian President-elect Fernando Collor de Mello and promised to work closely with him on plans to reform and revitalize Brazil's economy, a White House spokesman said.

Press secretary Marlin Fitzwater said the two leaders met for about an hour in the Oval Office and Cabinet Room and exchanged views on a wide range of bilateral and regional issues, including trade, investment, debt and the environment.

''The president expressed strong support for President-elect Collor's plans to reform and revitalize Brazil's economy and stated the United States would work closely with Brazil toward this goal,'' said Fitzwater.

He said that Bush told Collor he recogized Brazil's ''important role in hemispheric affairs and expressed the desire to maintain close contacts with him on regional matters in the future.''

In the discussion of environmental issues in Brazil, ''The president reviewed our own efforts to address environmental problems in the United States and expressed a desire to work with Brazil and other countries so that a proper balance can be worked out between development and environmental concerns with full respect for every nation's sovereignty and the need to base deliberations on the best scientific data available '' Fitzwater said.

COVE NECK, NY (JAN. 26) UPI - A passenger critically injured in the Avianca jet crash was trying to smuggle cocaine into the United States in four rubber packets hidden inside his rectum, authorities said Friday.

The unidentified passenger was brought to North Shore University Hospital in Manhasset with a leg fracture and ''terrible'' abdominal injuries after the Thursday night crash of Flight 052, which originated in Colombia, said Dan Rosett, a hospital spokesman.

Surgeons discovered and extracted four packets containing an unknown amount of the drug concealed in the man's rectum. The discovery was made, Rosett said, just before surgeons began operating on him.

''They looked like condoms containing a white substance, which we thought was cocaine,'' Rosett said.

The man was out of surgery Friday afternoon and doctors said they expected him to live.

The four packets were turned over to Nassau County police.

Drug Enforcement Administration spokesman Mary Cooper confirmed the discovery of the cocaine. She said initial reports claiming two other passengers who died in the crash were also smuggling cocaine were incorrect.

Cooper said that once the crash site has been secured, DEA agents and local authorities will search all luggage for drugs.

She said that despite Colombia's role as exporter of much of the world's cocaine, most smugglers who hide the drug in that particular manner come from other countries, particular Nigeria and Pakistan.

The smugglers usually try to conceal anywhere from eight ounces to one pound of cocaine in a condom, either by swallowing it and then excreting it or concealing it in various body orifices, Cooper said.

''There have been instances where we have arrested people and then waited at a hospital for them to excrete (the bags),'' she said.

Each condom carried by a smuggler could contain drugs worth as much as $50,000, Cooper said.

#90026u2021 01/26/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 26) UPI - Vice President Dimitru Mazilu resigned Friday, to protest what he called ''Stalinist practices and methods'' in the interim government of the National Salvation Front.

Mazilu handed in his resignation just hours after Romanian leader Ion Iliescu rejected calls for the resignation of his government and criticized attempts to undermine his authority.

''Having seen with great sorrow and deep regret that Stalinist practices and methods persist, that labels continue to be attached on the strength of security files and accusations made by pounding the table, that the press is still directed to destroy some people and promote some others, I resign the office I said I did not want on the very first day,'' Mazilu said in a nationally televised address.

Mazilu, an expert in international law who worked at the United Nations, wrote a report in 1988 on human rights violations and the difficult situation of youth in Romania, for which he was ordered to return to Bucharest, arrested and tortured.

Before December's popular uprising, the United Nations made numerous inquiries on his behalf to no avail, while Romanian authorities in the regime of dictator Nicolae Ceaucescu suggested that he had psychiatric problems.

In a nationally broadcast speech earlier, Iliescu issued his strongest warning yet against what he termed a ''tendency to separatism,'' a reference to resurgent nationalism among some of Romania's ethnic minorities.

The speech Thursday followed a barrage of attacks against the ruling National Salvation Front from fledgling opposition groups hoping to take its place at the head of the government following democratic elections scheduled for May 20.

Three leading opposition parties have been clamoring for members of the National Salvation Front to resign their transitional leadership posts since the Front's announcement Tuesday that it intends to participate in the elections.

Hundreds of people have been protesting on a daily basis outside the National Salvation Front's headquarters demanding the Front reverse its decision to stand in the elections.

The Front has responded by banning protests in all public places except parks.

However Friday night more than 500 people defied the ban demonstrating again at the Front's headquarters as soldiers backed by tanks looked on.

''During the revolution we followed orders and the people hated us. Never again will we turn against our people,'' said a policeman.

Iliescu earlier had defended the Front as the country's only political hope for the immediate future.

''For all its weaknesses and shortcomings, the National Salvation Front is the only structure, very frail still, that bears the brunt,'' Iliescu said in the speech, carried by Rompres, the official Romanian news agency Friday. ''The collapse of this structure means pushing the country to chaos.''

He urged opposition parties to ''forget about political passions and electoral ambitions,'' at least for the moment, in the interests of national stability.

Iliescu defended the Front's decision to put up candidates in the May 20 elections, saying no other group currently on the political horizon had the know-how and experience needed to run the government.

''The historical parties' call, as well as some similar opinions in press articles, for overthrowing or destabilizing the front spell great danger

for the country's fate,'' he said.

Another threat to the country's stability is a resurgence of nationalism, said Iliescu, citing increased tensions between ethnic Hungarians and the majority Romanian population in western Romania. He gave no specific examples.

''These last few days we have been alerted by many worrying phenomena in some counties in Transylvania regarding the tendency of separatism that causes tension and conflict between Romanian citizens and those of Magyar (Hungarian) nationality,'' he said.

''It is a shame such tensions are fueled, after the revolution had brought to the fore the common interest of the Romanians and the national minorities in overthrowing the dictatorship,'' he said.

Ceausescu, who was driven from power last month in a violent pro-democracy revolution, aggravated ethnic tension in the region through his policy of forced assimilation, in which entire villages were leveled to erase their ethnic character.

#90026u2027 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - Defense Secretary Dick Cheney will recommend a list of more than 100 military bases, units and facilities Monday for possible closure or reductions, defense and congressional officials said Friday.

''I have to caution you, though, that the situation is very fluid,'' a military official said. ''The secretary has not made all the decisions and the decisions he has made could change.''

Cheney will announce a ''hit list'' of bases and related cuts at a Pentagon news conference Monday along with details of the fiscal 1991 defense spending plan, a $295 billion blueprint that is 2 percent lower in ''real'' terms - that is, after allowing for inflation - than the current year.

The proposals target some of the country's largest military bases. If approved by Congress, the closures could eliminate 100,000 military and civilian jobs over the next five years, a senior defense official said.

The Pentagon declined official comment on the reports, details of which were first published by The Washington Post and The New York Times and confirmed by defense sources.

Cheney planned to make his final decisions on the list of U.S. bases this

weekend.

Officials said that many of the ''more than 100'' recommendations involve small ammunition depots that Cheney could close without congressional approval or involve a reduction of specific military units. But major military bases could not be closed without the approval of Congress, which is questionable.

Some members of Congress were briefed this week by Pentagon officials on the list. The release of the list Monday was expected to prompt strong protest from lawmakers who would see their districts or home states losing bases - and the jobs and income they represent.

''This evaluation for possible closure is Secretary Cheney's pre-emptive strike against Congress' tendency to slash the defense budget,'' said Rep. Duncan Hunter, R-Calif., a member of the House Armed Services Committee.

''Defense means jobs, as well as national security. Hopefully, my colleagues who are tempted to view the nation's defenses as an easy mark in the budget wars, will think twice before they take an ax to (the Defense Department),'' Hunter said.

Defense sources said Cheney is considering proposals to close Fort Ord, Calif., and Fort McClellan, Ala., and to make major troop reductions at Fort Knox, Ky., Fort Hood, Texas, and Fort Lewis, Wash.

In addition, sources said, the list includes the Philadelphia Navy Yard and three Navy facilities in the San Francisco Bay Area - the Alameda Naval Air Station, the Oakland Naval Supply Center and the Oakland Naval Hospital.

Congress last year approved closing or cutting back operations at 86 military bases in the United States.

Hunter said the other California bases that will be evaluated by the Pentagon for possible shut down or realignment include Naval Air Station, Moffett Field; Naval Aviation Depot, Alameda; Naval Station, Treasure Island; Naval Air Facility, El Centro; and Long Beach Naval Shipyard.

#90026u2062 01/26/1990 ~United Press International
(JAN. 26) UPI - New York officials say least 67 people were killed when a Colombian jet went down last night in heavy fog near Kennedy International Airport. Authorities say scores of people were injured. The plane's reservation list included 149 passengers and a crew of nine. Federal officials say there are conflicting reports on whether Avianca Flight 52 ran out of fuel, or whether it dumped the fuel to make an emergency landing.

An amateur radio operator says the pilot of the doomed Colombian jetliner

made a final plea for clearance to land just before the crippled Boeing 707 went down. Bronx resident Anthony Rosati quotes the pilot as saying ''we've just lost two engines.'' The jet crashed a short time later into a small hilltop in posh Cove Neck on Long Island, New York.

The government reports that a slowdown in personal consumption spending helped push the nation's economic growth to a sluggish one-half percent annual rate in the fourth quarter 1989. The Commerce Department estimates a five-point-two-BILLION-dollar rise in the Gross National Product last quarter... the lowest quarterly increase in nearly four years.

Federal health officials say the nation's worst flu epidemic in seven years claimed at least 11-hundred-43 lives during the last week alone. The national Centers for Disease Control in Atlanta says the flu accounted for seven-point-six percent of all 15-hundred-90 deaths reported across the country last week.

ANAHEIM, CA (JAN. 26) UPI - Religious leaders Friday released what they called the first joint statement on the Holocaust written by Catholics and Jews, a document that suggests a 1933 pact between the Vatican and Germany strengthened Hitler in his rise to power.

Nearly a year in the making, the five-page document - ''The Holocaust: At the Edge of Comprehension'' - was written by a committee of 23 local Catholic and Jewish religious leaders and educators to help teach Catholic students about the Holocaust and other aspects of the Jewish religious

experience.

''From a national point of view, this is unique, because this is the only place in the country where Catholic and Jewish scholars seriously grappled with the hardest issues of the Catholic-Jewish encounter,'' said Rabbi James Rudin of the American Jewish Committee, an influential national Jewish organization.

Southern California has the nation's largest Catholic archdiocese and the second largest Jewish community after New York.

The Holocaust statement was released along with a companion document that explores how each religion addresses the theological questions of forgiveness and reconciliation.

Both statements were issued at a news conference coinciding with the 1990 Religious Education Congress of some 18,000 religion teachers at the Anaheim Convention Center.

The two documents were produced by two standing committees that each year address various aspects of Catholic-Jewish relations. Their findings are included in a resource manual for Catholic educators.

Monsignor Royale Vadakin, a representative of Los Angeles Archbishop Roger Mahony and a member of the committee, said the documents released Friday have ''national ramifications'' and could eventually be used in most U.S. parochial schools and Roman Catholic seminaries.

Current plans are to use the statements at six Southern California Catholic high schools.

While the Vatican continually asserts its commitment to the Jewish people and encourages dialogue between Catholics and Jews, no Jewish-Catholic document specifically addressing the Holocaust in the context of the Jewish religious experience had been attempted before, Vadakin said.

One section of the Holocaust document, ''Complicity and Righteous Action '' raises provocative questions about whether the Vatican tacitly condoned the rise of the Third Reich with the signing a 1933 Concordat that protected the church's rights in the face of strident German nationalism.

According to the statement, the Nazis' motive in getting the Vatican to sign the agreement was to placate church officials and silence Catholic opposition. Hitler then disregarded the Concordat's protective clauses, allowing him to achieve his goal of a totalitarian one-party state without interference.

''In light of this, we are now free to ask whether the compromises made by

the Vatican with the Nazis did not, in the long run, do more harm than good,'' the statement says.

''It would be misleading to suggest that the Roman Catholic Church did everything in its power to come to the aid of the Jews,'' it adds.

''But it would also be an inaccurate rendering of history to assert that every Roman Catholic stood by idly and watched as the demonic strategies of the Nazis claimed the lives of 6 million Jews.''

(JAN. 26) UPI - European weather reports indicate that the severe storm that devastated the British Isles and the northern part of the continent is losing strength as it grinds its way toward the Baltic states. Authorities estimate that at least 88 people died in the tempest, which packed gale-force winds of more than 100 miles an hour.

The Azerbaijan capital of Baku is returning to a bit of normalcy with the resumption of television programming and the publication of newspapers. The resumed services and operation of some small businesses indicates a general strike arranged by the Azerbaijan Nationalist Front is losing steam as it enters Day Four.

Thousands of Indian troops and police have sealed the city of Srinagar, where Moslem militants are battling against Indian rule. There are varying figures of the death toll since well-armed militants began calling for freedom of the Kashmir state from Hindu-dominated India last week- from the government's total of 28 to the nationalist group's estimate of several hundred.

A survey conducted for the American Association of Retired Persons shows an overwhelming interest among people of all ages in the United States for the federal government to provide long-term care in a nursing home. More than two in three of those people polled say they would pay a 600-dollar annual fee to obtain such care.

#90026u2098 01/26/1990 ~United Press International

NEW YORK (JAN. 26) UPI - Better-than-expected news on fourth-quarter economic growth and durable goods orders gave the dollar marginal support in New York foreign exchange trading, but the effect soon wore off and the Japanese yen resumed its recent ascent against the U.S. currency.

The Commerce Department reports showing U.S. economic growth of 0.5 percent in the 1989 fourth quarter and durable goods orders up 2.5 percent

were better than pessimists had predicted - the market was looking for a GNP boost of 0.3 percent - so the dollar briefly benefited.

But chief international economist Jim Merrill of McCarthy, Crisanti & Maffei in New York said a close look at the GNP data showed final sales declined, and inventories were what kept the overall figure positive. "There's a lot to be said that that was a weak report," he said.

Players came around to the same conclusion. "The dollar was a little bit bid, and then sell orders brought it back down," said one trader.

In late New York trading the dollar was quoted at 1.6850 German marks, down from 1.680 marks Thursday. But it fell off sharply against Japan's currency, trading at 142.80 yen against 143.98.

Japanese yen strength was the leading market trend. Traders attributed the unit's vigor to rising interest rates on Japanese bonds and the Liberal Democratic Party's improving fortunes. How the ruling party fares in elections next month is of intense concern to financial markets.

Merrill said the yen weakness against the dollar was unjustified in light of Japan's stronger economy, so some correction had been due. The yen has been pushed down by LDP political scandals creating political uncertainty, and by relatively low Japanese interest rates.

The economist cited "increasing talk" in the market as to the possibility the Group of Seven major industrial democracies could take action to move the yen to a higher trading range against the dollar.

In New York trading the British pound rose to $1.6635 against $1.6580. Other dollar rates: 1.4890 Swiss francs, up from 1.4872; 5.7225 French francs, down from 5.7280; and 1,253.50 Italian lire, off from 1,254.25.

In Europe the dollar closed mixed, finishing higher in Frankfurt at 1.6910 German marks against 1.6905 and ahead in Zurich at 1.4965 Swiss francs against 1.4895. In Brussels it rose to 35.39 Belgian francs against 35.33.

The dollar closed lower in Paris at 5.7340 French francs against 5.7385, and also fell off in Milan to 1,255.30 lire against 1,256.40. In London the pound was lifted by a narrowed British trade deficit to close higher at $1.6590 against $1.6567 the day before.

Republic National Bank in New York closed cash gold at $420.25 an ounce, up from $416.25. The New York Commodity Exchange settled gold at $420.10 an ounce, up from $416. Gold in Zurich moved up to $418.50 an ounce from $416 the day before. London gold rose to $418.75 from $415.

Republic closed cash silver at $5.24 an ounce, up from $5.23. Comex spot

silver rose to $5.222 from $5.212. Silver was up in Zurich at $5.30 an ounce against $5.25. London silver moved upt o $5.24 from $5.23.

#90026u2157 01/26/1990 ~United Press International

WASHINGTON (JAN. 26) UPI - Rep. Gus Hawkins, D-Calif., chairman of the House Education and Labor Committee, announced Friday he would retire from

Congress at the end of this year.

Hawkins, 82, a 27-year veteran of Congress steeped in the traditions of the New Deal era and civil rights movement, has spent much of his political career crusading for improved education, equal opportunity and better jobs.

His socially oriented priorities reflect both his political background and the needs of his constituents in California's 29th Congressional District, which includes the predominantly black and impoverished Watts area of Los Angeles.

Though well placed to pursue his agenda as chairman of the Education and Labor Committee since 1984, his goals have been largely frustrated in recent years by budget constraints.

Instead, he has devoted much of his energy to fend off spending cuts and retrenchment in the social programs and laws that he has championed.

Hawkins' legislative priorities and his quiet, pragmatic style were both reflected in his statement announcing his retirement.

''While I believe I have accomplished much over the years, there is still a full agenda of issues that must be addressed,'' he said. ''Equity and excellence in education, basic skills training, proper health and nutrition, full employment, adequate housing, civil rights and drug abuse remain monumental challenges in my community and elsewhere.

''The leadership belongs not to the loudest, not to those who beat the drums or blow the trumpets, but to those who day in and day out, in all seasons, work for the practical realization of a better world,'' he added.

Before coming to Congress in 1963, Hawkins served 28 years in the California Assembly, beginning in 1935 at the dawn of the New Deal.

So light-skinned that he is frequently mistaken for white, Hawkins surprised many with a speech he gave on the House floor in support of the 1964 Civil Rights Act, in which he described the troubles he enountered with segregated public accommodations as a black man.

Perhaps his single most significant achievement was passage of Title 7 of the Civil Rights Act, which mandated fair employment practices and created the Equal Opportunity Commission.

However, he remains best known as co-sponsor of the 1978 Humphrey-Hawkins full employment bill, named for himself at the late Sen. Hubert Humphrey of Minnesota.

As originally introduced the bill set a goal of 4 percent unemployment by 1983, with the government serving as the employer of last resort to meet that target. What finally passed was a watered-down version of the bill that left out the requirement of government employment.

More recently, Hawkins shared credit with former Republican Sen. Robert Stafford of Vermont for passage in 1988 of an $8.3 billion bill that reauthorized federal elementary, secondary and adult education programs and created several small new ones.

Another major accomplishment credited to Hawkins was enactment in 1989 of the Civil Rights Restoration Act, which overturned the Supreme Court's 1984 Grove City decision. The bill expanded four landmark civil rights laws barring discrimination based on sex, race, religion or ethnicity to institutions receiving federeal money.

Hawkins plans to leave when his current term expires at the end of this year. He is one of 186 House members who have the option of converting leftover campaign funds to personal use if they leave Congress by the end of 1990. As of June 30, 1989, Watkins had $151,000 in unspent campaign funds left in his coffers.

#90026u2165 01/26/1990 ~United Press International

NEW YORK (JAN. 26) UPI - U.S. Treasury issues tumbled yet again Friday on the Commerce Department's estimate that the gross national product expanded by a half a percentage point in the fourth quarter - weak, but stronger than many had expected - pushing the long bond yield above 8.50 percent.

Other Commerce Department data showed durable goods orders up 2.5 percent in December - another soft figure, but better than anticipated. The statistics lessened recession fears and, accordingly, the likelihood of Federal Reserve credit easing which might boost bond prices.

The benchmark U.S. long bond, the 8 1/8 of 2019, closed at 95 23/32 to yield 8.52 percent, against 98 10/32 and 8.28 percent a week before, for a loss of almost 2 5/8 points or $26.25 for each $1,000 face value.

The week was ''devastating, a debacle,'' said Philip Braverman, senior vice president and chief economist with DKB Securities Corp., a subsidiary of the Dai-Ichi Kangyo Bank of Tokyo. The market is ''fearful of a worst-case scenario here,'' he said, but added it is ''misreading'' the evidence.

Higher yields could eventually be the salvation of the bond market, bringing enough buyers in to absorb the $30 billion Treasury refunding

auctions of Feb. 6-8 that some fear will create oversupply, he said.

Economic strength and inflation both have been overstated, he said. The present ''growth recession'' - Braverman noted only high inventories kept GNP expansion in positive figures - will whip inflation by and by. Once that happens, bonds will come into their own, he said.

That said, it was still an awful week.

Bonds, on a declining path since late last year, took a blow Tuesday when a Treasury auction of $5 billion in 40-year Resolution Funding Corp. bonds issued to finance the S&L bailout, flopped. Bonds of four-decades maturity had not been seen since the 1960s and the agency was a newcomer.

Lukewarm demand for the bonds resulted in low prices and yields of about 8.6 percent, later up to 8.66 percent. Some brokers sustained paper losses in the fiasco and the effect spilled over into Treasuries, driving long bond prices down by nearly 1 1/2 points in the next 24 hours.

The following day, Wednesday, some support for the bonds developed as dealers picked them up for stripping - separately selling their annual interest payment coupons and deeply discounted principle portions. At close of trading the benchmark long bond was down just 1/8 point.

The February refunding will likely total $30 billion broken down into equal portions of three-, 10- and 30-year maturities.

Ten-year Treasury notes closed at 96 3/32 to yield 8.47 percent against 8.24 percent last week. Five-year Treasury notes closed at 97 16/32 to yield 8.35 against 8.16 percent a week earlier.

Two-year Treasury notes closed at 98 1/32 to yield 8.26 percent compared with 8.17 percent at the end of last week.

Six-month Treasury bills ended at a discount rate of 7.63 to yield 8.04 percent against 8.0 percent a week before. Three-month T-bills finished at a discount rate of 7.69 to yield 7.94 percent against 7.99 percent.

Shearson Lehman Hutton Inc.'s index of long-term Treasury bonds fell 30.92 points or 2.3 percent in the week, closing at 1,292.42.

The Federal funds rate was at 8 3/16 percent, just over the current perceived Federal Reserve target rate of 8 1/4 percent. The Fed funds rate what banks charge each other for overnight loans, underlies most other rates.

#90026u2182 01/26/1990 ~United Press International

COVE NECK, NY (JAN. 26) UPI - Throngs of onlookers entered the site of the Avianca plane crash, crowding a tree-shrouded two-lane roadway leading to the jet and delaying possible life-saving efforts by at least an hour, rescue team leaders said Friday.

''It could have been quicker in the beginning only because of the congestion,'' said Chief Gary Peterford, of the Cove Neck firefighters' unit.

''When the first calls came in, we had a lot of people going up there to see it or even who wanted to lend a hand so it hampered some rescue equipment coming into the area,'' Peterford said.

Efforts to assist the injured were delayed ''an hour or more ... until we were able to clear out the area from people who weren't supposed to be here,'' he said.

There is only one narrow road that leads to the remote area where the plane crashed, he said.

Avianca Flight 052, a Boeing 707 flying from Bogota, Colombia, to New York with a stop in Medellin, Colombia, went down in heavy fog Thursday night about 17 miles northeast of the airport, killing at least 67 people and injuring at least 88, airline officials said.

The jet had been circling John F. Kennedy International Airport for more than an hour in the fog and a steady rain. It crashed about 9:30 p.m. while attempting to make a second landing after missing its first approach authorities said.

The jetliner clipped a private house in the exclusive community on Long Island's North Shore near the summer home of President Theodore Roosevelt.

Peterford said area police and firefighters rushed to the crash scene, and then called for rescue teams. Authorities had to then begin dealing with the crowd starting to form, he said.

Peterford said the path to the crash site ''was very difficult.'' But, ''once things got going, the rescue effort went very well,'' he said.

Rich Mullen, one of about 25 volunteer firefighters who blocked traffic for ambulances headed into and out of Cove Neck, said, ''The street was very crowded - that was dragging it down.''

But, Major Robert Vaughan, a Salvation Army minister and Nassau County's fire department chaplain, said efforts were ''well organized'' despite the crowds.

''I don't know of any professional service that could have done it better '' said Vaughan, 62, of Franklin Square, N.Y.

''The location where the crash was couldn't have been worse. It was on the side of the steep hill in the trees,'' he said.

''You always get a flock of onlookers at any kind of disaster, it's kind of a shame that people do get underfoot. There were times that the ambulance had to stop because there were so many onlookers, you couldn't get through.''

Vaughan said he arrived at the first triage - or on-the-scene medical treatment - area about 11 p.m. and left at 6 a.m.

''I tried to communicate with the survivors but there was a language barrier,'' he said. ''As I made the sign of the cross over the people, it was comforting.

''With such a high degree of death and injury, even the rescue workers are emotionally traumatized and you do what you can to support them.

''I saw a baby in arms and there were a couple of young children - one girl appeared to be roughly 13 and one child, 6. They were alive. The baby in arms was not. The fireman was crying like a child himself as he held this baby's body,'' Vaughan said.

Earlier, one fireman, holding his hands about 18 inches apart, yelled out, ''We got a baby about the age of my son ... dead.''

The firefighter was among the first rescuers to reach the tangled wreckage. A number of bodies were thrown free and were lying in a ravine surrounded by bushes behind the wrecked plane, they said.

Oyster Bay fireman Joe Congero said he found two babies, between 1 year and 18 months, in the ravine.

As victims were carried from the wreckage, the front lawn of the opulent mansion owned by tennis star John McEnroe's parents became a makeshift morgue and the location of the second triage center.

A row of bodies covered with sheets was lying on the lawn of the white mansion owned by John McEnroe Sr. and his wife Kay, the parents of the tennis star.

Helicopters landed and took off from their back yard, officials said.

Jay Parker, second assistant chief of the Cold Spring Harbor Fire

Department, said he and his colleagues freed a child buried in the wreckage by using pure strength.

''We lifted the seat right off the top of the child, it was just manpower '' he said.

#90026u2247 01/26/1990 ~United Press International
HARTFORD, CT. (JAN. 26) UPI - Two non-cancerous growths were removed from Gov. William A. O'Neill's colon during a routine examination earlier this week, the governor disclosed Friday.

The intestinal polyps were removed Monday and found to be benign, but O'Neill did not reveal the information until he was asked about his health during a Friday taping for a television interview program, his office said.

O'Neill, 59, has had polyps removed in the past, including one in January 1988 that was found to be cancerous. Doctors said they removed that polyp and O'Neill did not have cancer.

O'Neill, a Democrat, is planning to seek re-election in November. He has said that only health problems would prevent him from running for a third term.

The discovery of the latest polyps apparently has not changed O'Neill's mind about running, since his campaign is preparing a ''blitz'' of radio and television ads to officially kick off his re-election bid.

O'Neill's problems with polyps were first detected in November 1987 when he was hospitalized for nine days for treatment of diverticulitis, an infection and inflammation of small pockets protruding from the side of the colon.

O'Neill suffered a mild heart attack Nov. 20, 1981, and subsequently underwent open heart bypass surgery.

WASHINGTON (JAN. 26) UPI - Defense Secretary Dick Cheney will propose moving the nation's F-117 ''stealth'' fighter squadron from Nevada to New Mexico, lawmakers from the two states and their aides said Friday.

The transfer of the 52 warplanes, part of the base consolidations Cheney plans to propose in his ''transition'' defense budget Monday, will bring some 1,800 jobs to New Mexico, said Ari Fleischer, an aide to Sen. Pete Domenici, R-N.M.

Presumably, an equivalent number of jobs would be taken away from Nevada, but lawmakers from that state gave no estimate of the employment impact.

The F-117s currently are based at Tonopah Test Range, which is operated by Nellis Air Force Base near Las Vegas. Under Cheney's plan, they would be moved to Holoman Air Force Base in Ala Mogordo, N.M., Fleischer said.

Domenici was briefed on the proposasl Thursday in a meeting with Cheney and Air Force Secretary Don Rice, Fleischer said.

Sens. Harry Reid and Richard Bryan, both Nevada Democrats, issued a joint

statement Friday questioning whether ''moving the stealth fighters out of Tonopah is going to save any money.''

The proposed transfers are subject to congressional approval as part of Cheney's overall budget plan to close, consolidate or reduce operations at more than 100 U.S. military bases.

#90026u2372 01/26/1990 ~United Press International

COVE NECK, NY (JAN. 26) UPI - Investigators inspected the tangled wreckage Friday of a Colombian jetliner that crashed in dense fog on Long Island, and relatives began the gut-wrenching process of identifying the dead.

Investigators said they were working to determine the role of the plane's fuel level in the disaster and whether malfunctioning or misinterpreted gauges caused Avianca Flight 052 to crash Thursday night on its second approach to Kennedy Airport.

At least 67 of the 158 people believed aboard were killed, a coroner's official said. Rescue workers said there was no evidence the plane caught fire after crashing, contributing to questions about its fuel level.

A 13-member team from the National Transportation Safety Board assigned to inspect the wreckage Friday set up headquarters at the Royce Carlton Hotel in Melville, N.Y., and were to hold a news conference Friday evening to release initial findings into the crash.

The medical examiner's office asked families of those killed in the crash to come to the morgue to identify the bodies, said Diane Markunas, a spokeswoman for the coroner's office.

At least 67 people were killed in the crash, said Markunas. Another 88 people were being treated for injuries at hospitals, Nassau County police said.

''(The deceased) are still coming in from hospitals,'' said Jennifer Hassan, spokeswoman for the Red Cross of Greater New York, who was at the Nassau County Medical Center in East Meadow, where the county's Medical Examiner's office is located.

''The first of the families have made an identification and they're very upset right now,'' Hassan said. ''It's a very slow process.''

Avianca spokeswoman Cecelia Batista said the flight's reservation list included 149 passengers and a crew of nine on board the plane.

It was unclear why there was a gap between the number of people listed aboard the flight - 158 - and the number of casualties - 155. Authorities were probing the discrepancy.

The situation worsened Friday for one critically injured passenger who was discovered trying to smuggle cocaine into the United States in four rubber packets hidden inside his rectum, authorities said.

Drug Enforcement Administration spokesman Mary Cooper confirmed the discovery of the cocaine, and said original reports claiming two other passengers who died in the crash were also smuggling cocaine were incorrect.

Once the crash site has been secured, DEA agents in conjunction with local authorities will search all the luggage for drugs, Cooper said.

The plane, which had been circling John F. Kennedy International airport for more than hour in dense fog and a steady rain, crashed while attempting to make a second landing after missing its first approach, authorities said.

The pilot had been relying on cockpit instruments to fly the plane because of bad weather limiting visibility, but it was not known whether the navigational equipment played a role in the crash of the plane, said Diane Spitaliere, a spokeswoman for the Federal Aviation Administration.

The plane, which broke into pieces after crashing in woods, also lost power in at least one of its four engines, Spitaliere said.

FAA officials said the plane's flight recorder black boxes had been recovered and were sent to Washington for examination.

There were conflicting reports the Boeing 707 might have run out of fuel or had to dump fuel before it crashed, but investigators have refused to speculate on why the plane crashed.

One of the key bits of evidence concerning the fuel came from a ham radio operator who said he monitored what may have been Flight 052's last transmission, which said, ''Avianca 52, we've just lost engines. We're low on fuel, requesting priority clearance.''

Rescue workers said there was no evidence the plane caught fire after the crash, leading to additional speculation there was little fuel on board.

The aircraft, a Boeing 707 flying from Bogota, Colombia, to New York with a stop in Medellin, Colombia, went down just after 9:30 p.m. in the small, exclusive village of Cove Neck on the northern shore of Long Island about 17 miles northeast of the airport, authorities said.

Avianca released a partial list of passengers and crew on the flight but it did not specify whether the passengers were killed or their nationalities.

In Bogota, Avianca Airlines announced it planned a flight to bring to bring the bodies of the Colombian victims back home.

The plane broke into three pieces when it crashed in an area covered with trees and dense shrubbery about a mile from Long Island Sound, which separates Long Island and Connecticut.

There were no reports of injuries on the ground.

Rescue team leaders said throngs of onlookers entering the site of the Avianca plane crash crowded a tree-shrouded two-lane roadway leading to the jet, delayed possible life-saving efforts by at least an hour.

The New York Blood Center issued an appeal for blood for injured survivors and said blood centers in both New York City and Long Island would be open over the weekend.

#90026u2375 01/26/1990 ~United Press International

(JAN. 26) UPI - A government report showing a sluggish one-half of one percent rise in the nation's fourth-quarter economic growth was in line with White House expectations. Michael Boskin, chief of the president's Council of Economic Advisers, says weaker G-N-P growth in the last quarter of 1989 had been expected due to the California earthquake, the Boeing strike, Hurricane Hugo and the chill that swept the country. Boskin says he expects slower growth to continue into early 1990, before rebounding.

A spokeswoman for the Federal Aviation Administration says the F-A-A has NOT yet determined the cause of last night's crash of a Colombian jetliner. At least 67 of the more than 150 people aboard Avianca Flight 52 died when the Boeing 707 crashed on Long Island, 17 miles northeast of New York's Kennedy Airport. There's speculation that the plane was low on fuel as it prepared a second attempt to land in a dense fog and steady rain.

Pentagon officials say Defense Secretary Cheney will recommend the closings or partial closings of more than 100 military bases and facilities... a move that could put about 100-thousand military and civilian jobs at risk, But a military official describes the situation as ''very fluid.'' He says Cheney has NOT made all the decisions yet and those he has made could change. Cheney is expected to announce the base closing at a Monday news conference.

East German Prime Minister Hans Modrow is considering a call from opposition parties that he suspend his affiliation with the Communist Party until spring elections. This news comes as the opposition movement dwells on an offer by Modrow that they join the interim government to stabilize the country until the May general balloting. Sources indicate that the reform forces are likely to accept the premier's bid.

#90026u2395 01/26/1990 ~United Press International

(JAN. 26) UPI - Campbell Soup Co.'s decision to keep the food giant independent, despite minority shareholders' calls for a sale, gave no boost to the company's stock which closed unchanged Friday on the New York Stock Exchange.

Campbell's stock closed unchanged at $47.75, on the first day of trading after its directors voted in favor of keeping the company independent.

During the trading day, Campbell stock even fell to $47 per share after briefly rising sharply in recent weeks, on speculations the company was becoming a takeover target.

Analysts, however, said the drop is a temporary one, caused by speculators selling off as hopes of profiting from takeover bonanza faded.

''The thing is that you've got a lot of arbitrageurs in the stock,'' Stephen Carnes, an analyst with Pipper Jaffray & Hopwood in Minneapolis, said. ''And they're going to step back as they become convinced that (new Campbell chief executive officer) David Johnson is going to get the company back on an operational basis. If they see a takeover isn't going to happen, they're going to get out.''

Carnes credited Johson's new management stance for unifying the board at Campbell, and predicted that Johnson would use Campbell's high brand profile to boost the rest of its food line.

This will depress profits at first, Carnes said, but is the only path to increased earnings in the long-term for Campbell.

''It (the drop in profits) might go on a year, because they might have to put some money into the company to get their wheels back on the road. But they will come back,'' Carnes said.''

On Thursday, the company's board of directors, which is dominated by the heirs of John Dorrance Jr., voted against either selling the company or seeking a merger through a tax-free stock swap.

Dorrance's death in April touched off a squabble between two factions of

his family who together hold 57 percent of stock in the company.

One group, dissatisfied with the poor earnings of recent years, favored selling the company. The other group, led by Dorrance's three direct heirs fought to keep Campbell independent.

Marvin B. Roffman, vice president of research for Janney Montgomery Scott, a Philadelphia-based investment company said the no-sale decision might bring stability to the roller-coaster ride that began last April.

''For months, the company's stock had been affected by the various annnouncements made by different family members, then by company officials '' Roffman said.

Roffman said Campbell's new CEO faces a number of hurdles, most importantly making the power struggle of the past year history.

''I think Mr. Johnson's primary goal right now is to get the company back on the right track. That would mean dealing with Fresh Bake, a British company that they just paid too much for. It's important that he evaluate the operations at Campbell and decide which operations are going to go. And he has to pull the company together. The board went outside to find a replacement for (former chief executive officer) Gordon McGovern, and that generally caused some unhappiness.''

#90026u2397 01/26/1990 ~United Press International

MIAMI (JAN. 26) UPI - A federal judge refused Friday to consider former Panamanian strongman Manuel Antonio Noriega's request that he be declared a prisoner of war and transferred to a neutral country, where he would be either ''repatriated or released.''

U.S. District Judge William Hoeveler said he did not have the jurisdiction to deal with the prisoner of war issue. He also ruled that Noriega, who has been held on federal narcotics trafficking charges since surrendering to U.S. authorities in Panama on Jan. 3, would not be freed on bond.

Hoeveler refused to set bail after hearing only from federal prosecutors on the issue. Defense attorneys Frank Rubino and Steven Kollin refused to participate in the bail-setting proceedings, insisting that Noriega was a prisoner of war.

In a 26-page motion filed Friday, the defense argued that the United States does not have the jurisdiction to try Noriega and that he is a prisoner of war under the 1949 Geneva Convention. The defense demanded that he be transferred to a neutral country.

''Due to the fact that the United States has violated numerous articles of the convention as so enumerated here ... Gen. Manuel Antonio Noriega invokes the sections previously mentioned and demands that he be immediately (sent) to a third country willing to accept him, from which he may be repatriated or released as per the 1949 Geneva Convention III,'' the motion said.

Filed along with the motion was a copy of a Jan. 25 letter sent by Rubino to President Bush and the secretaries of defense and state, invoking international law that would make Noriega a prisoner of war.

Whether Noriega - who appeared in court Friday wearing his Panamanian military uniform, with four general's stars on each shoulder - is entitled to prisoner of war status would have to be decided by either a panel of U.S. and Panamanian officials or a neutral panel of international authorities, Rubino said.

In refusing to grant bail, Hoeveler said, ''There is very little for me to decide. ... There has been no effort to rebut (prosecution arguments) by the defense.''

Assistant U.S. Attorney Myles Malman had argued that Noriega should not be released because he is a flight risk and a danger to the community.

The government also said it had frozen about $20 million of Noriega's assets and claimed that the money was only part of the former strongman's vast overseas wealth.

As an example of his wealth, Malman claimed that Noriega's daughhter, Thays, deposited $1.3 million in a Panamanian bank during one day in September 1989.

''These are deposits made by a 17-year-old girl,'' Malman said. ''Unless the paper routes are extremely lucrative in Panama, I know of no other explanation (than drug trafficking).''

He said agents found more than $5.8 million at Noriega's home. He said investigators found that Noriega had deposited $17.3 million in a Bank of Credit and Commerce International office in Great Britain between August 1982 and February 1988.

About a week after he was indicted, Noriega transferred $14.8 million from BCCI in Great Britain to BCCI in Luxembourg. The following day he transferred another $4.3 million to BCCI Luxembourg, Malman said.

As other reasons to deny Noriega bail, Malman said Noriega had access to military weapons, had several loyal followers in Panama and had substantial ties to countries, like Cuba and Libya, from which the United

States could not extricate him.

Rubino refused to respond to the government's allegations.

''Most respectfully, your honor, I will say his name is Manuel Antonio Noriega. His rank is four-star general, his serial number 0001,'' the defense lawyer said.

Rubino said the government's remarks violated Article 13 of the Geneva Convention, which prohibits public embarassment of prisoners of war.

''We have found their remarks to be demeaning, sometimes inflammatory and downright silly,'' said Rubino, who referred to Noriega throughout the hearing as ''prisoner of war Gen. Manuel Noriega.''

At his initial court appearance Jan. 4, Noriega refused to recognize the court's jurisdiction, saying he was a leader of a sovereign nation, a political prisoner and transferred illegally to the United States.

Noriega has been held in Miami on drug trafficking charges since his surrender to U.S. authorities in Panama Jan. 3.

His arrest by U.S. agents followed the ousted strongman's departure from the Central American country's Vatican Embassy, where he had fled on Christmas Eve after the Dec. 20 invasion by U.S. troops.

Noriega and 15 others were charged in a 12-count drug trafficking indictment returned Feb. 4, 1988, by a federal grand jury in Miami. If convicted, he would face a maximum penalty of 145 years in prison and a $1.1 million fine.

The indictment, which deals with alleged crimes committed between 1982 and 1986, accuses Noriega of providing protection for cocaine shipments from Colombia to the United States in return for $4.6 million from the Medellin cartel, which is responsible for about 70 percent of the cocaine that reaches the United States.

The indictment also accuses Noriega of allowing smugglers to set up a processing laboratory and letting them deposit profits in Panama banks.

Of the other defendants, five are in the United States awaiting trial.

In a Tampa indictment also unsealed Feb. 4, 1988, Noriega and two others are charged with arranging to smuggle nearly 1 million pounds of marijuana into the United States from 1982 to 1984.

#90026u2435 01/26/1990 ~United Press International
ATHENS, GA. (JAN. 26) UPI - Georgia tailback Rodney Hampton announced Friday he will ask the National Football League to allow him to enter the 1990 draft a year early.

The 20-year-old junior, who rushed for 1,059 yards during the 1989 season, told reporters he will petition NFL Commissioner Paul Tagliabue for permission to be drafted early.

''I believe it is in my best interest and the best interest of my family to enter the draft at this time,'' Hampton said. ''I understand that by doing so I give up my remaining eligibility at the University of Georgia.''

Hampton, from Houston, said he will continue to seek his degree during the off-season.

''It is important to me to earn my degree from the University of Georgia '' the recreation major said.

Hampton averaged nearly 106 yards a game in 1989, despite being hampered by injuries most of the season. He rushed for 2,668 yards in his three seasons with the Bulldogs, averaging 5.7 yards a carry. He rushed for 12 touchdowns in 1989, finishing his college career with 22.

Hampton said he made the decision to enter the draft after he ''consulted with many people whom I trust.''

During his freshman year, Hampton broke Herschel Walker's Georgia record for single-game all-purpose yardage when he accumulated 290 yards against Mississippi. He finished the year with 890 yards as a backup to Lars Tate.

Hampton has battled knee difficulties, undergoing arthroscopic knee surgery in 1988 and suffering a knee sprain that bothered him during much of the 1989 season.

#90026u2479 01/26/1990 ~United Press International

NEW YORK (JAN. 26) UPI - The stock market weighed in with its steepest weekly loss since the week of the October mini-crash, manhandled by a global rise in interest rates.

The Dow Jones industrial average lost 1.81 Friday to close at 2559.23, for a drop of 118.67 points on the week, or about 4.4 percent. The drop was the biggest since the blue-chip indicator plunged 216.26 points in the week ended last Oct. 13.

Among the broader market averages, the New York Stock Exchange composite index lost 7.35 points to close the week at 180.21. Standard & Poor's 500-stock index slumped 13.35 to 325.80.

Declines pounded advances 1,632-313 among the 2,151 issues traded this week. Big Board volume totaled 906,434,420 shares, compared with 861,410,620 a week earlier and 981,997,360 a year ago.

The market opened the week with its biggest single decline since the mini-crash itself, plummeting 77.45 points, as investors were jolted by fears that with interest rates rising in Japan, investors there would see no reason to participate in the U.S. Treasury refunding next month since they will be able to buy the high-yielding bonds of their own country. The Japanese normally buy about 40 percent of the bonds sold in the auctions.

Without Japanese buying, demand would suffer greatly, sending yields on the bonds up sharply.

On Tuesday, the market's worst fears about interest rates were realized when investors turned a cold shoulder to the government's auction of 40-year bonds to finance the savings and loan bailout.

Demand for the $5 billion bond offering by the Resolution Funding Corp., a government agency created to finance the thrift bailout, was very weak,

making the rates on the bonds much higher than expected and providing yet another indication that interest rates seem to be headed one way right now - up.

Stocks sold off 60 points from the opening, before rebounding later in the day on a wave of bargain-hunting to close with more modest losses.

But Treasury bonds didn't rebound, declining right through the end of the week and taking stocks to their lowest levels since mid-July.

The long bond ended the week down 20/32 at 95 23/32 to yield 8.52 percent, its highest yield since late June and more than a half point higher than when the year began.

''The way rates are going, we could go down another 200 or 300 points in the next 8 to 10 days before the refunding,'' said Brad Weekes, senior vice president in charge of sales and trading at Donaldson, Lufkin and Jenrette Securities Corp.

''The Dow (industrial average) has been holding up very well compared to all the other averages,'' he said. ''It should be 200 points below where we are now.''

''The rate rise is it. Plain and simple. Until rates go lower we're not gonna get a rally,'' he said.

But why are rates suddenly so high in countries like West Germany and Japan? Those countries are trying to keep inflation in check, and are doing by raising their interest rates.

Inflation rates in those countries are not abnormally high, ''but they think they are, and if you think we're wary of inflation, it's nothing compared to West Germany and Japan, said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. ''There's an obsession in West Germany to keep inflation down. The concerns run much stronger there.''

As a frame of reference, Johnson noted that both countries had deflation - declining prices at the start of 1987, so any price rise is scary.

''Unfortunately, what usually does the trick is that the financial markets decline so sharply that it brings the policy makers back in line,'' he said. ''It's going to be tough.''

On the trading floor this week, Citicorp was the most active NYSE issue, off 2 1/2 to 23.

New Germany Fund followed, unchanged at 24. AT&T was third, off 3 at 39 1/8 after saying Friday it may not be able to match its 1989 earnings this

year.

Among the other blue chips, Philip Morris lost 2 1/4 to 37, General Electric fell 2 3/8 to 62 1/2, IBM tumbled 1 3/4 to 96 7/8, and Procter and Gamble tumbled 5 7/8 to 63 1/8 after a disappointing earnings report.

On the takeover front, UAL sank 15 5/8 to 150 after reporting a sharp earnings decline. Unions at United Airlines also said they had formed an alliance to bid for the company. Hitlon Hotels fell 13 1/4 to 64 1/2. The company, which has been in play for a long time, said it would consider a recapitalization plan. And Time Warner lost 9 1/4 to 105 5/8.

On the American Stock Exchange, the Amex Market Value index fell 15.21 to close Friday at 350.87. Declines thumped advances 679-178 among the 1,007 issues traded.

Amex volume totaled 84,143,370 shares, compared with 71,560,740 traded a week earlier and 62,917,300 traded in the same week a year ago.

Texas Air led the Amex actives, plunging 3 to 6 1/8. The company said Thursday it is prepared to pledge 40 percent ownership of Eastern Airlines to the airline's unsecured creditors as part of its revamped plan to bring Eastern out of Chapter 11 bankruptcy.

The National Association of Securities Dealers index tumbled 19.55 to end the week at 440.88.

#90026u2546 01/26/1990 ~United Press International

LOS ANGELES (JAN. 26) UPI - Shares of Teledyne Inc. soared nearly $12 Friday following the announcement of a 5-for-1 split of its common stock and shareholder approval of a previously announced plan to spin off its insurance and finance units.

Teledyne stock rose $11.875 to close at $345.875 per share on the New York Stock Exchange.

The company announced the split and the spin-off late Thursday after the market had closed. Teledyne shareholders of record Feb. 8 will receive four additional shares for each share held, with distribution of the additional stock expected about March 8.

The company has about 11.1 million shares outstanding.

Teledyne said the spin-off is expected to be effective March 31, pending regulatory approval, with shareholders receiving one share of stock in a new company called Unitrin for each share of Teledyne.

The company said it will recommend that future dividends of both companies be set at a yearly rate of $4 a share, matching the current Teledyne rate.

In 1989, the insurance and finance companies - United Insurance Co. of America, Trinity Universal Insurance Co., Financial Indemnity Co. and Fireside Trhift Co. - had $1.1 billion in revenues, while Teledyne had $3.8 billion in revenues.

#90026u2583 01/26/1990 ~United Press International

LOS ANGELES (JAN. 26) UPI - A teenage boy was sentenced Friday to at least seven years in California Youth Authority custody for molesting and strangling a 7-year-old girl whose body was found stuffed behind his water bed.

Curtis Dean Cooper, 15, of Newhall can be held at CYA incarceration facilities until age 25 under the maximum sentence imposed by Sylmar Juvenile Court Judge Morton Rochman.

Prosecutors said the teenager could be released before his 25th birthday but will have to serve at least seven years before becoming eligible for parole, a decision that will be left to juvenile authorities.

Prior to sentencing, the victim's mother, Linda Hodges, addressed the court and ''expressed her feelings that the maximum sentence is not enough'' to make up for the loss of her daughter, said Deputy District Attorney Michelle Rosenblatt.

Cooper pleaded guilty Nov. 2 to one count of first-degree murder stemming from last March's slaying of Sara Nan Hodges. Cooper also admitted molesting the child.

Rosenblatt said that after sexually assaulting the child - who was a neighbor living five doors away in a semi-rural area of Newhall north of Los Angeles - Cooper strangled her and stuffed the body behind a water bed in his bedroom.

A massive search by sheriff's deputies was launched when the girl was reported missing March 23 from her Santa Clarita Valley neighborhood.

The search ended March 26 when the girl's corpse was discovered behind the bed by the woman who owned the house where Cooper and his mother rented rooms.

Sheriff's investigators believe the little girl was killed by Cooper in his bedroom prior to her being reported missing. Investigators believe her

body had already been stuffed behind Cooper's water bed when they made a superficial search of the room the day she was reported missing.

The body was discovered by Olga Kaczmar, the owner of the house, who was searching the residence for the source of a sickening odor.

At the time of the discovery, Cooper was sitting on the bed crying and a fan was turned on in the room, apparently to blow the odor of the girl's body out an open window.

''He was crying and he said 'I didn't do it,''' said Terry Horner, an acquaintance of Kaczmar's who helped her search for the source of the odor.

Sheriff's Sgt. David Horton said Cooper had been living with his father in Florida until early last year. While in Florida, the youth reportedly spent time in a Florida juvenile hall and was treated for mental problems.

Horton said that, at the time he killed the girl, Cooper was a ''recent acquaintance'' of the victim and the two had gone horseback riding together.

Sara had been living in the neighborhood for about six weeks with her mother; her 16-year-old sister, Tisha, and her mother's boyfriend. The family shared the home with another family.

(JAN. 26) UPI - The Soviet capital of Moscow may have received some of the fall-out from the strife in Soviet Azerbaijan. The Soviet news agency Tass reports that 12 to 15 gunmen stormed the Azerbaijani mission in Moscow, taking prisoner the leader of the republic's Nationalist Popular Front, Etibar Mamedov. But a Foreign Ministry spokesman said later that Mamedov was arrested in Moscow on suspicion of preparing anti-state acts. It remains unclear if the gunmen who invaded the Azerbaijani mission acted on government authority.

Residents of Britain and northern Europe are surveying the damage caused by hurricane-force winds that swept the region yesterday, killing at least 91 people. Police say at least 44 people were killed in Britain, mostly in car accidents and by trees uprooted by 100-mile-an-hour winds. The storm also hit the Netherlands, where 20 people died.

While most of the country plods through one of the worst flu outbreaks in seven years, Indiana and New Jersey remain relatively untouched. The federal Centers for Disease Control says the two states report NO flu activity, despite a nation-wide influenza death toll of nearly 11-hundred-50 last week. Federal health officials expect this to be a

worse-than-average year for influenza.

Although he has stated an aversion of segregation of any kind, President Bush plans to attend two separate functions tomorrow, despite each organization's all-male membership policies. The White House says Bush will be catch lunch at the all-male Alibi Club, while dinner will be served at the all-male Alfalfa Club. A presidential spokesman dismissed as irrelevant criticism of Bush's itinerary.

(JAN. 26) UPI - The president's son, Neil Bush, may face action by federal thrift regulators. The Office of Thrift Supervision says it will ask for a ''cease and desist order'' against Neil Bush stemming from a probe of his involvement in the failed Silverado Banking, Savings and Loan Association. The announcement comes one day after the Bush broke off talks with the agency. The agency is looking into alleged conflicts of interest while Bush was on the board at Silverado.

Mounting criticism of Romania's interim government has caused it to curtail recently granted freedoms. Among the restrictions announced by the National Salvation Front are curbs as to where and when public gatherings can be held. The curtailed liberties come in the aftermath of the Front's unpopular decision to run candidates in elections scheduled for May, a decision opposed by reform parties.

A survey conducted last week finds Europeans are more likely than their American counterparts to worry about a reunified Germany. Poles head the list, with 69 percent of those questioned saying they would ''worry'' about a reunified Germany becoming- quote- ''the dominant power in Europe.'' Half of those polled in Britain and France felt likewise, while only 29 percent of Americans questioned said they would worry over a stronger Germany.

(JAN. 26) UPI - Pope John Paul spent the first full day of his five-country tour of Africa today visiting the Cape Verde Islands. The pontiff spoke to 30-thousand people gathered under pouring rain, telling the Atlantic islanders NOT to be- quote- ''imprisoned by the myth of economic progress.''

The streets of Beijing echoed with the sound of fireworks today as Chinese welcomed the year of the Horse. According to lore, the new lunar year promises to be one of unpredictable events. But China's leadership seems as if it would like to take the new year by the reins, appearing on

national T-V in a display of unified leadership.

A U-N investigator says Romania's interim government has given him the O-K to visit the country to assess human rights violations during the tenure of executed dictator Nicolae Ceausescu. Ceausescu refused to grant the official permission to enter the country last April.

Officials in Boston say a U-S-AIR jetliner made an emergency landing at Logan International Airport this morning after the pilot reported a problem with one of its engines. The plane, en route from Boston to Washington, touched down safely and there were NO injuries.

Although it's NOT yet visible to the naked eye, European and Chilean astronomers have spotted a comet they say is brighter than Halley's. Dubbed ''Austin 1989 C-1,'' the comet is expected to arrive at its closest point to Earth in April.

(JAN. 26) UPI - Another court appearance for Manuel Noriega... deadly storm moves into Sweden... and government reports on the economy. Next, from U-P-I...

Former Panamanian General Manuel Noriega appeared at a bond hearing in federal court in Miami today.

The ousted military leader has asked the judge presiding over his drug-trafficking case that he be declared a prisoner of war and transferred to a neutral country, where he would be either repatriated or released.

Defense attorneys for Noriega filed a 26-page motion with U-S District Judge William Hoeveler, saying the United States does NOT have the jurisdiction to try the deposed leader.

There has been NO ruling on the motion at this time.

The judge also must determine if Noriega would be a danger to the community or a flight risk if he's awarded bail. Defense lawyers Steven Kollin and Frank Rubino originally said they had NO plans to seek bail, but at the general's last court appearance, the government requested a bond hearing to ensure that Noriega's case was handled properly.

Before today's hearing, Kollin said Noriega is- quote- ''working actively on his case each and every day.'' Kollin says Noriega in a ''good frame of mind.''

#90026u3354 01/26/1990 ~United Press International
(JAN. 26) UPI - Soviet Defense Minister Dmitry Yazov says the intervention of government troops in Azerbaijan prevented the republic's takeover by the militant Popular Front.

In a published interview, Yazov says the Azerbaijan nationalist movement included- quote- ''about 40-thousand militants armed with sub-machine guns, rifles of all sorts, machine guns and shotguns.''

But their aspirations were stymied when 24-thousand Soviet military personnel entered the fray to return order to the region as well as to assert Moscow's dominance.

The Kremlin also flexed its political determination by brokering a tentative peace between the Moslem Azerbaijanis and their sectarian foes and neighbors, the Christian Armenians.

The cease-fire, although tenuous, seems to be taking hold as the two sides have begun exchanging prisoners and are taking steps to separate their armed units at the tension-filled Nakichevan frontier.

Also, Soviet authorities in Moscow report that an official of the Azerbaijan Front who had been reported as kidnapped earlier today was actually arrested for anti-state activities.

(JAN. 26) UPI - The death toll from the severe storm that pummeled the British Isles and northern Europe yesterday stands at at least 92, with damages from the tempest estimated in the hundreds of Millions of dollars.

While the fierce front played NO favorites as it smashed its way across whatever appeared in its easternly path, it wreaked the most damage in Britain.

At least 45 people died in Britain, mostly by falling trees and in motor accidents along slippery roads. And damage estimates from gale-force winds of more than 100 miles an hour on the island are at more than one-BILLION dollars.

Although Britain seemed to bear the brunt of the devastating storm, it was NOT alone in picking up debris in its aftermath.

Authorities in the Netherlands, West Germany, France and Belgium are cleaning up after the one of the continent's worst storms in the past

decade.

Meteorologists expect the front to lose its punch by the time it reaches the Soviet Baltic states.

Initial Commerce Department figures for economic growth in last year's final quarter reveal the most minimal quarterly increase since the third quarter in 1989.

Government numbers show a one-half of one percent rise, which in turn nudged the annual rate to nearly three percent.

In another government report, orders for durables- goods expected to last more than three years- rose two-point-five percent last month. The December figures caused the year's tally to equal a five-point-nine percent gain, the lowest increase in three years.

Economists say the two reports seem at odds, with a stronger-than-expected showing from the nation's manufacturers amid a general economic slowdown.

The chief economist at Chicago's Northern Trust Bank says- quote- ''Taken together, they seem to tell different stories.''

But Robert Dederick concludes that the story the reports tell is that the nation's economy as a whole is slowing down, a course that will NOT be reversed in the next quarter.

#90026u3388 01/26/1990 ~United Press International

(JAN. 26) UPI - Authorities say at least 67 people are dead and 88 others injured following last night's crash of a Colombian jetliner on Cove Neck, Long Island. Avianca Flight 52 was making a second landing approach at Kennedy International Airport in heavy fog and steady rain.

An F-A-A spokeswoman says the Boeing 707 was making an instrument landing because of the bad weather. She says it's NOT known if navigational equipment contributed to the crash.

The plane went down in a heavily wooded area of the exclusive Cove Neck village and broke into several pieces. There was NO major fire upon impact leading to speculation that the jet was low on fuel. It's NOT known if the pilot had run out of fuel or whether he dumped it before crashing.

Investigators are inspecting the wreckage of the plane and earlier recovered the flight recorder boxes. The so-called ''black boxes'' have been sent to Washington for examination.

Authorities say cocaine in rubber packets was found in the stomachs of two dead passengers. They add that at least one survivor swallowed the drug in an attempt to smuggle it into the country.

Atlantic City Mayor James Usry pleaded innocent today to charges that he received 65-hundred dollars in pay-offs in return for promising to help a business venture in the gambling resort.
